In addition, because the proposed system would gather information about individual employers, it could make possible consideration of employer-based, rather than industry based, random rates. For example, if a particular employer had an effective anti-drug program that resulted in very low detected drug usage over a reasonable period of time, it might be possible for that employer to test at a low random rate regardless of the situation of the entire industry of which it is a part.

The proposed §§ 40.81 and 40.83 would establish a standard DOT Management Information System (MIS) and require that employer reports be submitted to the appropriate Operating Administration. Each Operating Administration will amend its drug testing regulation to provide specific requirements for employer reporting. Elsewhere in today's Federal Register are Notices of Proposed Rulemaking for each of the Operating Administrations (FRA, FAA, USCG, RSPA, FHWA, FTA) with drug and/or alcohol testing rules.

Although each employer or employer's representative must maintain the data required in 40.41 as per the regulating administration rule, each OA may elect not to require all

employers to submit reports annually but instead select a representative sample for submission to the OA. Each OA rule establishes employee categories or positions covered by the OA rule. OA's have the option to require drug testing information be separated by employee category as established in their rules, or to establish other categories for reporting purposes, (i.e. licensed or unlicensed or in a single category).

Operating Administrations may allow data usually maintained by industry or commercial consortia to be submitted on behalf of individual employers. Operating Administrations that allow consortia or other service providers to maintain data, such as pre-employment test data, may allow submission of such data to the OA in aggregate figures if it cannot be attributed or assigned to a specific employer.

OA's must stipulate in their regulations that employers who fall under two or more DOT Agency regulations requiring drug testing, must submit data to each regulating OA for those employees covered by that OA rule. For example XYZ company has 100 employees subject to the RSPA rule, 50 employees covered by the FHWA rule and 25 employees covered by the FAA rule. XYZ must maintain data attributable by OA rule. Employees who perform functions covered by more than one OA should be identified by the employer as to which covered position they will be reported under. Drug testing data on dual covered employees should be reported to the appropriate OA. Generally, pre-employment, random, and return to duty tests should be reported to the OA which regulates the function used as the basis for employee category. Post-accident tests should be reported to the OA to whom that accident is reportable. Reasonable cause and periodic tests should be reported to the OA based on the employee function requiring the test.

Each OA may acquire any of the data elements through an alternative methodology. For instance, if an employer is already required to submit a post accident drug test report to the OA, the OA could consolidate those reports that would provide the necessary data and not request this data from the employer again.

The data elements will provide a factual base for decisionmaking concerning modifications to the DOT drug testing rules. Information about drug use prevalence, program implementation, and economic and logistical impact will provide a basis for policy review, development, and change. Issues such as scope of applicability, random test rates, cost benefit ratios, rehabilitation, and testing protocols can be more effectively addressed when industry-wide data is available. Program evaluation and determinations of the rules' effectiveness require feedback from the regulated industries. Over-regulation is as unwanted as under-regulation. The data made available under this NPRM will provide necessary indicators of the "outcomes" of the rules. The data elements were selected as the minimum necessary to provide information on the scope of the program, drug use and prevalence, program implementation, economic impact, employer policy and the deterrent effect of the rules over time. The drug rules were not intended to be static (*i.e.* unchangeable). A systematic program to collect, analyze, and interpret the drug testing data is necessary to provide a more effective and efficient approach to drug use deterrence and detection.

The Department seeks comment on a number of issues concerning the NPRM's basic approach to gathering needed data. With the exception of the FHWA NPRM, the proposals would seek to obtain information from all covered employers. (The FHWA NPRM would ask for information from a sample of employers, since FHWA does not have the resources to process data from the large number of covered employers in the motor carrier industry.) In particular, the Department seeks comment on the merits of seeking information only from a sample of covered employers, rather than from all employers. In answering this question, we ask commenters to keep in mind the Department's dual purpose in obtaining drug testing information: program evaluation and enforcement.

All the Operating Administrations require compliance with regulations by all regulated employers. All the Operating Administrations, except FHWA, normally require reporting, from all their regulated employers. This may not be necessary in this program. DOT request comments regarding less than 100% reporting in each industry. How would sampling work in each industry? Would a multi-tierd approach work, where small employers (less than 50 covered employees) would not be required to submit reports but larger employers (greater than 50 covered employees) would have to submit reports. What other methodologies or options would provide requisite data, be enforceable, provide adequate compliance data and be equitable.

The Department recognizes that any reporting requirement will impose burdens on employers. These burdens have been analyzed in the regulatory evaluation for the operating administration regulations that are part of this effort. The Department seeks comments on ways of achieving the objectives of this rulemaking with a smaller burden.

In a sampling approach, the Department would select a percentage of employers in each covered industry and require them to submit data to the Department. This approach would have the potential advantage of requiring reporting from fewer employers than under the Department's proposal, thereby reducing overall reporting costs. In such an approach, in the various regulated industries, what would appropriate sample percentages be? How much money and effort would be saved?

Sampling, if practicable in DOT's circumstances, might produce useful program evaluation information. However, we are concerned whether, under a sampling approach, the Department's objective of gathering data useful for enforcement purposes could be met. To be useful for enforcement with respect to a particular employer, data must pertain to that individual employer. If the Department collected data on only two percent or ten percent of employers in a given industry, how could the Department's enforcement objectives be met with respect to the employers who were not part of the sample? Would reporting be easier or harder on employers than a situation in which more Federal Inspectors had to visit employers' offices on a periodic basis to gather drug testing compliance information?

We have concerns about whether, in the Department's situation, sampling would be a practicable way of getting useful program evaluation information. Statistical samples can be useful in providing an estimate for an entire population. The primary reason for using a sample is efficiency in data collection. Sampling allows the generation of an estimate of a value for an entire population with the error of the estimate known based on data only from selected members of the population. The key to defining the known error is being able to specify the relationship of the sample to the entire population.

If one cannot identify or enumerate the population, it is not possible to specify the error in the estimate. In some industries subject to DOT drug testing, it is extremely difficult to identify or enumerate the population. That is, the operating administrations, in many cases, do not know or cannot readily retrieve the numbers of

regulated parties, their identities, and their addresses. There is an estimated five to twenty percent turnover in the regulated population each year, depending on the mode.

This situation poses a number of problems for the Department in attempting to operate under a sampling approach, and we request assistance from commenters in dealing with them. For example, how would the Department know the size of the population with sufficient precision to permit reliable statistical inferences? How would the Department inform participants in the sample that they were required to submit data at a particular time? Obviously, it is hard to mail questionnaires to employers whose addresses are not known but such an approach may be practicable after a one year "full census". For example, would it be feasible to have all employers report some information (*e.g.*, a core of items needed for enforcement) while a sample of employers reported additional information (*e.g.*, related solely to program evaluation?). Would such an approach be more rather than less confusing, could it avoid some of the drawbacks of sampling, and would it result in significant reductions in burdens to employers?

In spite of possible lower costs to respondents, a sampling approach could add significant administrative costs to the Department. (*e.g.*, to create research designs, identify respondents, mail out questionnaires or forms, and follow-up non-responses, etc.) The Department asks for comment and continues its own evaluation on how the transaction costs of alternative means of compiling the needed data can be minimized, consistent with program evaluation and enforcement needs.

Under either a sampling or more comprehensive approach, it might reduce costs if employers could report needed data electronically. The approach has proved useful, for example, in implementing the requirement that air carriers report certain tariff information to RSPA. The Department has developed an electronic Information Service called the Anti-Drug Information Center (ADIC). The Department seeks comments on whether adding an electronic filing capability to ADIC for MIS information would be useful. If so, what implementation problems do potential users see and how might they be resolved?

The GAO report specifically recommended that the Department obtain from employers the cost of implementing the program as an element of information to evaluate program success. The purpose of gathering such information would be not only to do analyses of the cost of implementing proposed regulations but also to periodically evaluate those regulations that are issued to determine whether they are achieving their intended purpose. Such an analysis would include the cost of implementing the rules, as well as an analysis of the benefits that are being achieved. With respect to the drug testing rules, many of the costs are easily identifiable. It should not be difficult, for example, to determine the charge that the company incurs to have a laboratory test a urine specimen. It may be difficult, however, to clearly identify some indirect costs, such as consequential costs of transportation delays caused by the collections. Moreover, to the extent we were to seek cost information from the companies implementing the drug testing programs, are existing accounting systems set up to capture such costs in a manner that would be specific to anti-drug compliance? If they were, could we be assured that the different accounting standards that might be used would permit comparison of data from different companies?

Similar questions are raised with respect to benefits. For example, we can determine that a specific number of individuals have tested positive and been removed from safety-sensitive positions. Although the removal of such individuals would clearly have safety benefits, will we be able to identify the direct consequences, such as a reduction in accidents? Will we be able to obtain data concerning the indirect benefits, such as better productivity and decreased absenteeism?

Perhaps the most thorough way to collect this data on cost and benefits would be to require the regulated industries to provide it to DOT. Based on such reports, the Department could evaluate the existing rules to determine whether they needed to be modified to improve upon their cost-benefit ratio. Alternatively, the cost data might be obtained through stratified or other means of sampling. The Department is seeking the best means of obtaining the following data:

Program costs for
- —Specimen collection
- —Laboratory testing
- —MRO services and
- —Education and training

The Department does not normally require cost reporting as a part of safety regulations. Cost reporting would be justified here, however, because it involves a new program involving a large number of vendors other than the regulated industry. That is, it is not traditional industry costs that are at issue. Further, the drug testing vendors have occupied what amounts to a new market for services with respect to which projections made by the agency's economic analysis (prepared in support of the rulemaking) may or may not be currently valid. That is, any cost reporting requirement may constitute a distinct exception to the rule that cost data should ordinarily be obtained in informal market surveys and through voluntary rulemaking submissions without resort to compulsory information collections. However, while there are some potential uses for cost data, there are also some serious potential problems. Asking for companies' costs for certain programs could result in the collection of what was, or what companies asserted was, proprietary information (either for themselves or their contractors). Doing so could create complications not only in the collection of the information, but also the Department's use of the information and the handling of requests from third parties for the release of the information. Moreover, reporting of cost information may be a more difficult, time-consuming, and expensive process for employers than the reporting of other drug testing information. For these reasons, the Department is not proposing to collect cost information at this time. The Department does seek comment on whether cost information should be collected and, if so, what specific information should be requested.

In addition, the Department seeks comment on a number of specific questions concerning the collection of cost information. We request comment on how expensive it would be for industry to provide this data. For example, is some or all of this data so readily available that it would be neither difficult nor expensive for the regulated industries to provide it to the Department in response to a reporting requirement? Would some cost or benefit data be so difficult for individual companies to obtain that it should not be required? Without this data would it be appropriate to request some data or would that data be misleading in the absence of all cost or benefit data? Are the four data elements on costs, listed above, that the Department wishes to collect sufficient? What other data should be collected?

The collection of actual cost data would have the aim of evaluating actual market conditions in a rapidly developing industry (*e.g.*, drug testing consortia, certified laboratories, collection services). (It must be assumed that prices and service packages will

stabilize after an initial period and that the Department will make reasonable prompt decisions with respect to adjustment of initial regulatory requirements in light of program experience. If cost data are collected, should the requirements contain an automatic expiration date? What would be a reasonable period (*e.g.*, 3 years, 4 years, etc.)?

The resolution of this issue also depends on the resolution of the sampling question. If we choose, for example, a two-tiered approach (*e.g.*, a core of enforcement data and the other tier for evaluation), we might also request the specific cost data as well as data relating to the indirect costs and benefits of the program.

Notwithstanding all the proceeding discussion justifying that program cost information is vital to DOT, DOT requests comments on the appropriateness and necessity of requesting cost data. Put another way, do employers desire to share with DOT specific program cost data to demonstrate the cost of compliance?

Each report under the proposed § 40.81 would cover a calendar year. An Operating Administration may require more frequent submission of reports. The closing date would be December 31 and the report would be due at the Operating Administration by February 15 of the following year. The transportation employer report would include each of the following data elements. The Department seeks comments on whether any of these elements should be modified or deleted, or whether any other elements should be added.

1. Number of covered employees by employee category. This data is necessary to assess the scope of the rule's application and provide a basis for determining if random testing meets the required 50% level.

2. Number of covered employees subject to testing under the anti-drug rules of more than one DOT Agency, identified by each agency. This data is necessary to review multi-modal implementation so that policy can be designed accordingly.

3. Number of specimens collected by type of test (*e.g.*, pre-employment, periodic, random, etc.) and employee category. This data is needed to check the compliance with the rules by category and to review collection, testing and the review process.

4. Number of positives verified by a Medical Review Officer (MRO) by type of test, by type of drug and employee category. This data, along with the number of tests performed, permits the calculation of positive rates necessary to determine the extent of drug use and the specific drugs detected in the various categories of employees. Further, analysis of this data over time will provide a measure of the effectiveness of the drug testing rules in deterring drug use.

5. Number of negatives verified by a MRO by type of test, and employer category. This data is needed to check compliance with the rules by category and to review the application of the components of the programs.

6. Number of persons denied a position as a covered employee following a verified drug test. This data provides an assessment of whether the testing program is being implemented as required, provides a measure of the impact of the drug testing rules on the industries, and yields information on the prevalence of drug use in the applicant pool.

7. Number of covered employees verified positive by a MRO, who were returned to duty in covered positions during the reporting period. This data provides information on employer policy implementation regarding reentry requirements and rehabilitation of identified drug users.

8. Number of employees with tests verified positive by a MRO for multiple drugs. This data provides information on the extent of polydrug use in the regulated industries.

9. Number of covered employees who refused to submit to a drug test required under this part, and the action taken in response to the refusal(s). This data provides information on employer policy implementation regarding refusals and subsequent employer actions.

10. Number of covered employees and supervisors who have received required training during the reporting period. This data provides information on training provided during the current reporting period and a cumulative count of covered employees and supervisory personnel on payroll as of December 31 who have received the required drug training.

DOT has developed a standard form for use by employers to provide the data required by this regulation. It is attached as an appendix to this proposed rule Operating Administration rules may require addenda and authorize modifications to this form to be submitted to that Administration Additionally, OA's may authorize electronic submission of the required report as prescribed in their rules. The Department seeks comment on whether these information elements, or the form on which the data would be gathered, are sufficiently clear and simple for use by employers, particularly small businesses. We are receptive to suggestions for making the form and information elements easier to use. For example, consistent with the Department's dual goals of information for program evaluation and enforcement, would it be helpful to separate the data gathering into two parts: One form with only enforcement-related elements that all employers would submit, and a second form with additional program evaluation information that would be submitted by a sample of employers. Aside from the issues surrounding the practicability of samples (see discussion above), would such an approach be helpful? Could it turn out to be more complex and difficult to deal with than the proposed approach?

Many small businesses that are required to participate in the DOT drug testing program do so through consortia. The Department seeks comment on the extent to which the use of consortia may mitigate any problems that smaller firms could have in dealing with the forms and information elements. The generic reporting form presented at appendix A can appear somewhat complex. For example, FAA has 8 categories of employees. Taken together with 6 types of testing (pre-employment, random, etc.) and five types of drugs, there would be a considerable number of data entries. For a small employer, this could appear unnecessary or burdensome. The modes (e.g. FAA) currently utilize fairly simple formats that are used by employers. Would commenters find the more complex instrument burdensome? If DOT decides to utilize it, should we allow small employers (particularly those who may not belong to a consortia) to continue to use existing formats? One of the specific areas on which the Department seeks comment is on the structure of the form in collecting several variables simultaneously versus on separate questions or matrices? The proposed structure is considerably shorter, than separate questions/matrices, but is it too complex? In general, the Department seeks to make the reporting of drug testing information as simple as possible while minimizing unnecessary burdens.

If the Department adopted a two-tiered approach (i.e. a core of data for enforcement and more detailed data for program evaluation, perhaps through sampling), the potential burdens of a more complex instrument would be reduced. Comments are invited on this issue.

The Department could also take a tiered approach as some of the OA's did in the case of the 1988 final rules

regarding the submission of plan requirements. All employers with 50 or more employees would report additional data needed for program evaluation purposes during the first year and a staged and/or short-form type of reporting (including perhaps a sampling of smaller firms) would apply after the first year for employers with 11–50 employees as well as those for 10 or fewer employees. Again, comments are particularly invited on how such an approach could serve the Department's program evaluation needs while providing data essential for enforcement purposes.

Section 40.83 Reporting Alcohol Testing Information to the Department of Transportation

This section, in conjunction with provisions of the five operating administration NPRMs, would require employers to maintain certain annual alcohol program data and report that data to the appropriate Operating Administration. The provision is parallel to the MIS provision for drug testing discussed above, and many of the same questions and requests for comments apply here as well. Each Operating Administration NPRM proposes specific requirements for employer reporting. The most thorough way to collect program data is to require the regulated industries to provide it to DOT. Based on such reports, the Department could evaluate the existing rules to determine whether they needed to be modified to improve upon their cost-benefit ratio. The Department has set forth in this proposal the information that it believes is necessary to enable it to effectively evaluate and to check compliance with the proposed rules.

Regulatory Analyses and Notices

Executive Order 12291

This proposed rule is not a major rule under Executive Order 12291. It is a significant rule under the Department's Regulatory Policies and Procedures. The Department has prepared a regulatory evaluation in connection with this proposed rule, which gives attention to the costs of testing under the proposed procedures and to costs for small employers, among other subjects. This evaluation is available for review in the docket for this rulemaking. The costs of compliance with this proposal have also been evaluated as part of the operating administrations' economic analyses prepared in connection with their proposed rules.

Federalism

This rule does not have any direct Federalism impacts on state or local governments. Although it would apply to certain state or local agencies (e.g., transit authorities) this application would be through operating administration rules and any federalism impacts will be discussed in their proposed rules. It should be pointed out that a substantial majority of affected parties are private businesses and individuals, rather than state or local governments. The operating administrations' general statutory safety authority and the Act provide preemptive effect over conflicting state and local law, but these effects are considered as part of the operating administration rules. For these reasons, it has been determined that this proposed rule does not have sufficient Federalism impacts to warrant a Federalism assessment under the principles and criteria contained in Executive Order 12612.

Regulatory Flexibility Act

The Act and operating administration statutory safety authority apply to all covered providers of transportation services, regardless of size. While small entities are affected by this proposed rule, it is through the medium of the operating administration rules (which themselves have some special provisions for small entities) and the impact is analyzed in their rulemaking documents. The necessity of uniform testing procedures for all employees makes it impractical to have special provisions for small entities in these procedures. Moreover, it is the alcohol testing requirements of the Act itself that will have economic effects on small entities, and the operating administrations' rules will provide the opportunity for small entities to participate in volume purchases of equipment and services through consortium or other arrangements. The Department certifies that these procedures (as distinct from the operating administration rules that require alcohol testing) will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

The Paperwork Reduction Act applies to this NPRM and the modal alcohol testing NPRMs because they initiate new information collection requirements (i.e., the management information system provisions of subpart D of this NPRM and corresponding provisions of the modal NPRMs). The NPRMs would also change some existing collections of information. It is difficult for the Department, at this time, to estimate the cost or precise paperwork burden of these proposals. DOT believes that employers would maintain most of the reportable information as part of their normal operation of the proposed alcohol testing program. The principal cost to employers would be that of compiling the information and transmitting it to the operating administrations. DOT and each operating administration solicits comments on the practical utility of the information, alternative methods that might achieve program objectives while being less burdensome, and the cost and burden of providing the information. Persons desiring to comment on this topic should submit their views to the docket for part 40 and/or one or more of the operating administrations' NPRMs.

The Department will request OMB approval of these information collection requirements, which would be enforceable until OMB clearance.The Department will publish a **Federal Register** notice when we receive Paperwork Reduction Act approval.

List of Subjects in 49 CFR Part 40

Alcohol abuse, Drug abuse, Reporting and recordkeeping requirements, Safety.

Issued this 2nd day of December 1992, at Washington, DC.

Andrew H. Card, Jr.,
Secretary of Transportation.

Thomas C. Richards,
Administrator, Federal Aviation Administration.

Thomas D. Larson,
Administrator, Federal Highway Administration.

Gilbert E. Carmichael,
Administrator, Federal Railroad Administration.

Brian W. Clymer,
Administrator, Federal Transit Administration.

Douglas B. Ham,
Deputy Administrator, Research and Special Programs Administration.

Adm. J. William Kime,
Commandant, United States Coast Guard.

For the reasons set forth in the preamble, the Department of Transportation proposes to amend title 49, Code of Federal Regulations, part 40, as follows:

PART 40—PROCEDURES FOR TRANSPORTATION WORKPLACE DRUG AND ALCOHOL TESTING PROGRAMS

1. The authority citation for part 40 is revised to read as follows:

Authority: 49 U.S.C. 102, 301, 322; 49 U.S.C. app. 1301nt., app. 1434nt., app. 2717, app. 1618a.

2. The title of part 40 is revised to read as set forth above.

3. Section 40.1 through 40.19 are designated subpart A, reading as follows:

Subpart A—General

40.1 Applicability.
40.3 Definitions.
40.5–40.19 [Reserved]

Subpart A—General

§ 40.1 Applicability.

This part applies, through regulations that reference it issued by agencies of the Department of Transportation, to transportation employers, including self-employed individuals, required to conduct drug and/or alcohol testing programs by DOT agency regulations and to such transportation employers' officers, employees, agents and contractors (including, but not limited to, consortia). Employers are responsible for the compliance of their officers, employees, agents and contractors with the requirements of this part.

§ 40.3 Definitions.

The following definitions apply to this part:

DHHS. The Department of Health and Human Services or any designee of the Secretary, Department of Health and Human Services.

DOT agency. An agency of the United States Department of Transportation administering regulations related to drug or alcohol testing, including the United States Coast Guard (for drug testing purposes only), the Federal Aviation Administration, the Federal Railroad Administration, the Federal Highway Administration, the Federal Transit Administration, the Research and Special Programs Administration, and the Office of the Secretary.

Employee. An individual designated in a DOT agency regulation as subject to drug testing or alcohol testing. As used in this part "employee" includes an applicant for employment. "Employee" and "individual" or "individual to be tested" have the same meaning for purposes of this part.

Employer. An entity employing one or more employees that is subject to DOT agency regulations requiring compliance with this part. As used in this part, "employer" includes an industry consortium or joint enterprise comprised of two or more employing entities. No single employing entity is relieved of its responsibility for compliance with this part by virtue of participation in such a consortium or joint enterprise.

Secretary. The Secretary of Transportation or the Secretary's designee.

§§ 40.5–40.19 [Reserved]

4. Sections 40.21 through 40.39 are proposed to be designated subpart B and § 40.41 is added as follows:

Subpart B—Drug Testing

40.21 The drugs.
40.23 Preparation for testing.
40.25 Specimen collection procedures.
40.27 Laboratory personnel.
40.29 Laboratory analysis procedures.
40.31 Quality assurance and quality control.
40.33 Reporting and review of results.
40.35 Protection of employee records.
40.37 Individual access to test and laboratory certification results.
40.39 Use of DHHS-certified laboratories.
40.41 Definitions.

Authority: 49 U.S.C. 102, 301, 322; 49 U.S.C. app. 1301nt., app. 1434nt., app. 2717, app. 1618a.

4a. In § 40.25, paragraph (f)(10) is proposed to be revised to read as follows:

§ 40.25 Specimen collection procedures.

* * * * * * *

(f) * * *

(10) The collection site person shall instruct the employee to provide at least 45 ml of urine under the split sample method of collection or 30 ml of urine under the single sample method of collection.

(i) (A) Employers with employees subject to drug testing only under the drug testing rules of the Research and Special Programs Administration and/or Coast Guard may use the "split sample" method of collection or may collect a single sample for those employees.

(B) Employers with employees subject to drug testing under the drug testing rules of the Federal Highway Administration, Federal Railroad Administration, Federal Transit Administration, or Federal Aviation Administration shall use the "split sample" method of collection for those employees.

(ii) Employers using the split sample method of collection shall follow the procedures in this paragraph:

(A) The donor shall urinate into a collection container, which the collection site person, in the presence of the donor, pours into two specimen bottles.

(B) The first 30 ml of urine shall be poured into a specimen bottle to be used for the primary specimen.

(C) The remainder of the urine shall be poured into another specimen bottle for the split specimen.

(D) In an unusual or emergency situation in which a collection container is not available or it is not practicable to pour the urine from the collection container into two specimen bottles, the donor can use a single specimen bottle and the collection site person shall pour 30 ml of urine from the specimen bottle into a second specimen bottle (to be used as the primary specimen) and retain the remainder in the collection bottle (to be used as the split specimen).

(E) Both bottles shall be shipped in a single shipping container, together with copies 1,2, and the split specimen copy of the chain of custody form, to the laboratory.

(F) If the test result of the primary specimen is positive, the employee may request that the MRO direct that the split specimen be tested in a different DHHS-certified laboratory for presence of the drug(s) for which a positive result was obtained in the test of the primary specimen. The MRO shall honor such a request if it is made within 72 hours of the employee having been notified of a verified positive test result.

(G) When the MRO informs the laboratory in writing that the employee has requested a test of the split sample, the laboratory shall forward, to a different DHHS-approved laboratory, the split specimen bottle, with seal intact, a copy of the MRO request, and the split specimen copy of the chain of custody form with appropriate chain of custody entries.

(H) The result of the test of the split sample is transmitted by the second laboratory to the MRO.

(I) Action required by DOT agency regulations as the result of a positive drug test (e.g., removal from performing a safety-sensitive function) is not stayed pending the result of the test of the split sample.

(J) If the result of the test of the split sample fails to reconfirm the presence of the drug(s) or drug metabolite(s) found in the primary specimen, the MRO shall cancel the test, and report the reasons for the cancellation to the DOT.

(iii) Employers using the single sample collection method shall follow the procedures in this paragraph:

(A) The collector may choose to direct the employee to urinate either directly into a specimen bottle or into a separate collection container.

(B) If a separate collection container is used, the collection site person shall, after determining specimen

temperature, pour the urine from the collection container into the specimen bottle in the presence of the employee.

(iv) In either collection methodology, upon receiving the specimen from the individual, the collection site person shall determine if it has at least 30 milliliters of urine for the primary or single specimen bottle and, where the split sample collection method is used, an additional, measurable amount of urine that can be poured into the split specimen bottle. If the individual is unable to provide such a quantity of urine, the collection site person shall instruct the individual to drink not more than 24 ounces of fluids and, after a period of up to two hours, again attempt to provide a complete sample using a fresh collection container. If the required amount is provided, the original insufficient specimen shall be discarded. If the employee is still unable to provide an adequate specimen, the insufficient specimen shall be discarded, testing discontinued, and the employer so notified. The MRO shall refer the individual for a medical evaluation to develop pertinent information concerning whether the individual's inability to provide a specimen is genuine or constitutes a refusal to test. (In preemployment testing, if the employer does not wish to hire the individual, the MRO is not required to make such a referral.) Upon completion of the examination, the MRO shall report his or her conclusions to the employer in writing.

* * * * *

5. In § 40.29, paragraph (b)(2) is proposed to be revised and (b)(3) is proposed to be added, as follows:

§ 40.29 Laboratory analysis procedures.

* * * * *

(b) * * *

(2) In situations where the employer uses the split sample collection method, the laboratory shall log in the split sample, with the split specimen bottle seal remaining intact. The laboratory shall store this sample securely (see paragraph (c) of this section). If the result of the test of the primary sample is negative, the laboratory may discard the split sample. If the result of the test of the primary sample is positive, the laboratory shall retain the split sample in long-term frozen storage for one year (see paragraph (h) of this section). Following the end of the one-year period, or if informed in writing by the MRO that the employee has not requested a test of the split sample, the laboratory may discard the split sample.

(3) When directed in writing by the MRO to forward the split sample to another DHHS-certified laboratory for analysis, the receiving laboratory shall analyze the split specimen by GMS to reconfirm the presence of the drug(s) or drug metabolite(s) found in the primary specimen. Such GMS confirmation shall be conducted without regard to the cutoff levels of § 40.29(f). The split sample shall be retained in long-term storage for one year by the laboratory conducting the analysis of the split sample (or longer if litigation concerning the test is pending).

* * * * *

5a. In § 40.33, paragraphs (e), (f) and (g) are proposed to be revised as follows:

§ 40.33 Reporting and review of results.

* * * * *

(e) In a situation in which the employer has used the single sample method of collection, the Medical Review Officer shall direct, in writing, a reanalysis of the original sample if requested to do so by the employee within 72 hours of the employee's having been informed of a verified positive test. The MRO may also direct, in writing, such a reanalysis if the MRO questions the accuracy or validity of any test result. Only the MRO may authorize such a reanalysis, and such a reanalysis may take place only at laboratories certified by DHSS. If the reanalysis fails to reconfirm the presence of the drug or drug metabolite, the MRO shall cancel the test and report the reasons for the cancellation to the DOT.

(f) In situations in which the employer uses the split sample method of collection. If the employee requests an analysis of the split sample within 72 hours of having been informed of a verified positive test (or a longer period, if provided in a DOT agency regulation), the MRO shall direct, in writing, the laboratory to provide the split sample to another DHHS-certified laboratory for analysis. If the analysis of the split sample fails to reconfirm the presence of the drug(s) or drug metabolite(s) found in the primary specimen, or if the split sample is unavailable, inadequate for testing or untestable, the MRO shall cancel the test and report the reasons for the cancellation to the DOT.

(g) When the employer uses the split sample method of collection, the employee is not authorized to request a reanalysis of the primary sample as provided in paragraph (e) of this section.

* * * * *

6. A new § 40.41 is proposed to be added, to read as follows:

§ 40.41 Definitions.

The following definitions apply to this subpart:

Aliquot. A portion of a specimen used for testing.

Blind sample or blind performance test specimen. A urine specimen submitted to a laboratory for quality control testing purposes, with a fictitious identifier, so that the laboratory cannot distinguish it from employee specimens, and which is spiked with known quantities of specific drugs or which is blank, containing no drugs.

Canceled test. A test which has been declared invalid by a Medical Review Officer. A canceled test is neither a positive nor a negative test. For purposes of this part, a sample that has been rejected for testing by a laboratory is treated the same as a canceled test.

Chain of custody. Procedures to account for the integrity of each urine specimen by tracking its handling and storage from point of specimen collection to final disposition of the specimen. These procedures shall require that an appropriate drug testing custody form (see § 40.23(a)) be used from time of collection to receipt by the laboratory and that upon receipt by the laboratory an appropriate laboratory chain of custody form(s) account(s) for the sample or sample aliquots within the laboratory.

Collection container. A container into which the employee urinates to provide the urine sample used for a drug test.

Collection site. A place designated by the employer where individuals present themselves for the purpose of providing a specimen of their urine to be analyzed for the presence of drugs.

Collection site person. A person who instructs and assists individuals at a collection site and who receives and makes an initial examination of the urine specimen provided by those individuals.

Confirmatory test. A second analytical procedure to identify the presence of a specific drug or metabolite that is independent of the initial test and that uses a different technique and chemical principle from that of the initial test in order to ensure reliability and accuracy. (Gas chromatography/mass spectrometry (GC/MS) is the only authorized confirmation method for cocaine, marijuana, opiates, amphetamines, and phencyclidine.)

Initial test (also known as screening test). An immunoassay screen to eliminate "negative" urine specimens from further analysis.

Medical Review Officer (MRO). A licensed physician responsible for receiving laboratory results generated by an employer's drug testing program who has knowledge of substance abuse disorders and has appropriate medical

training to interpret and evaluate an individual's confirmed positive test result together with his or her medical history and any other relevant biomedical information.

Shipping container. A container capable of being secured with a tamper proof seal that is used for transfer of one or more urine specimen bottle(s) and associated documentation from the collection site to the laboratory.

Specimen bottle. The bottle which, after being labeled and sealed according to the procedures in this part, is used to transmit a urine sample to the laboratory.

7. A new subpart C is proposed to be added to part 40, to read as follows:

Subpart C—Alcohol Testing

40.51 The breath alcohol technician.
40.53 Devices to be used in alcohol testing.
40.55 The alcohol testing site.
40.57 The alcohol testing form.
40.59 Preparation for testing.
40.61 Administration of the initial test.
40.63 Administration of the confirmatory test.
40.65 Inability to provide an adequate amount of breath.
40.67 Invalid tests.
40.69 Availability and disclosure of alcohol testing information about individual employees.
40.71 Maintenance and disclosure of records concerning EBTs and BATs.
40.73 Definitions.
40.77–40.79 [Reserved]

Authority: 49 U.S.C. 102, 301, 322; 49 U.S.C. app. 1301nt, app. 1434nt., app. 2717, app. 1618a.

§ 40.51 The breath alcohol technician.

(a) The breath alcohol technician (BAT) shall be trained to proficiency in the operation of the evidential breath testing device (EBT) he or she is using and in the alcohol testing procedures of this part.

(1) Proficiency shall be demonstrated by successful completion of a course of instruction, which at a minimum, provides training in the principles of EBT methodology, operation, and calibration checks; the fundamentals of breath analysis for alcohol content; and the procedures required in this part for obtaining a breath specimen, and interpreting and recording EBT results.

(2) Courses of instruction that meet standards of the National Highway Traffic Safety Administration (NHTSA) model course or a course approved by a state department of health or other relevant state agency may be used to demonstrate BAT proficiency.

(3) The course of instruction shall include documentation that the BAT has demonstrated competence in the operation of the specific EBT he/she will use.

(4) Any BAT who will perform an external calibration check of an EBT shall be trained to proficiency in conducting the check on the particular model of EBT, to include practical experience and demonstrated competence in preparing the breath alcohol simulator or alcohol standard, and in maintenance and calibration of the EBT.

(5) The BAT shall receive additional training, as needed to ensure proficiency, concerning new or additional devices or changes in technology that he or she will use.

(6) The employer shall maintain documentation of the training and proficiency test of each BAT it uses to test employees, as provided in § 40.71.

(b) The supervisor of an employee shall not act as a BAT for that employee, unless doing so is not prohibited by applicable DOT agency alcohol testing regulations and no other BAT is available in a timely manner to perform the test.

§ 40.53 Devices to be used in alcohol testing.

(a) Employers shall use only EBTs meeting the requirements of this section for alcohol testing subject to this part.

(b) EBTs shall have the capability of providing, independently or directly linked to a separate printer, a printed result in triplicate (or three consecutive identical copies) of each breath test and of the operations specified in paragraphs (c) and (d) of this section.

(c) EBTs shall be capable of assigning a unique and sequential number to each completed test, with the number capable of being read by the BAT and the employee before each test and being printed out on each copy of the result.

(d) EBTs shall be able to distinguish alcohol from acetone at the 0.02 alcohol concentration level.

(e) EBTs shall be capable of the following operations prior to and following each collection of breath:

(1) Testing an air blank.

(2) Performing an external calibration check.

(f) In order to be used in alcohol testing subject to this part, an EBT shall have a quality assurance plan (QAP) developed by the manufacturer.

(1) The plan shall designate the method or methods to be used to perform external calibration checks of the device.

(2) The plan shall specify the minimum intervals for performing external calibration checks of the device. Intervals shall be specified for different frequencies of use, environmental conditions (*e.g.*, temperature, altitude, humidity), and contexts of operation (*e.g.*, stationary or mobile use).

(3) The plan shall specify the tolerances on an external calibration check within which the EBT is regarded to be in proper calibration.

(4) The plan shall specify inspection, maintenance, and calibration requirements and intervals for the device.

(5) For a plan to be regarded as valid for purposes of this paragraph, the manufacturer shall have submitted the plan to the National Highway Traffic Safety Administration (NHTSA) for review by NHTSA and have received NHTSA approval of the plan.

(g) The employer shall comply with the NHTSA-approved quality assurance plan for each EBT it uses for alcohol testing subject to this part.

(1) The employer shall ensure that external calibration checks of each EBT are performed as provided in the manufacturer's plan.

(2) The employer shall take an EBT out of service if any external calibration check results in a reading outside the tolerances for the EBT set forth in manufacturer's plan. The EBT shall not again be used for alcohol testing under this part until it has been serviced and has had an external calibration check resulting in a reading within the tolerances for the EBT.

(3) The employer shall ensure that inspection, maintenance, and calibration of each EBT are performed by the manufacturer or a maintenance representative certified by the device's manufacturer or a state health agency or other appropriate state agency. The employer shall also ensure that each BAT or other individual who performs an external calibration check of an EBT used for alcohol testing subject to this part has demonstrated proficiency in conducting such a check of the model of EBT in question.

(4) The employer shall maintain records of the external calibration checks of EBTs as provided in § 40.71.

(h) When the employer is not using the EBT at an alcohol testing site, the employer shall store the EBT in a secure space.

§ 40.55 The alcohol testing site.

(a) Each employer shall use an alcohol testing site that affords visual and aural privacy to the individual being tested. All necessary equipment, personnel, and materials for breath testing shall be provided at each site.

(b) An employer may use a mobile collection facility (*e.g.*, a van equipped for alcohol testing) as an alcohol testing site.

(c) The alcohol testing site shall be secured, and no unauthorized persons shall be permitted access to the alcohol testing site, at any time when testing is occurring or when the EBT remains unsecured within the alcohol testing site.

(d) In unusual circumstances (*e.g.*, when it is essential to conduct a test outdoors at the scene of an accident), a test may be conducted at a place other than an alcohol testing site. In such a case, the employer or BAT shall provide visual and aural privacy to the employee to the greatest extent practicable.

(e) The BAT shall supervise only one employee's use of the EBT at a time. The BAT shall not leave the alcohol testing site while the preparations for testing and testing of a given employee (as set forth in §§ 40.59 through 40.63) are in progress.

§ 40.57 The alcohol testing form.

(a) Each employer shall use the collection form prescribed under this part or a form generated by the EBT that provides all the information contained on the form. Employers may not modify or revise these forms.

(b) The form shall provide triplicate copies: one for the employee being tested, one for the BAT, and one for the employer.

§ 40.59 Preparation for testing.

(a) When the employee enters the alcohol testing site, the BAT will require him or her to provide positive identification (*e.g.*, through use of a photo I.D. card or identification by an employer representative). On request by the employee, the BAT shall provide positive identification to the employee.

(b) The BAT shall explain the testing procedure to the employee.

(c) The employee and BAT shall complete and date the alcohol testing form. Both the BAT and the employee shall sign the form, signifying that the employee is present and is providing breath and noting the number of the test that is about to be taken.

(d) Refusal by an employee to complete and sign the alcohol testing form, to provide breath, to provide an adequate amount of breath, or otherwise to cooperate with the collection process in a way that prevents the completion of the test, shall be noted by the BAT in the remarks section of the form. The collection process shall be terminated and the BAT shall immediately notify the employer of the termination.

(e) If an initial or confirmation test cannot be completed, or if an event occurs that would invalidate the test, the BAT shall, if practicable, begin a new initial or confirmation test, as applicable, using a new alcohol testing form with a new sequential test number.

§ 40.61 Administration of the initial test.

(a) Before the initial test is administered for each employee, the BAT shall ensure that the EBT registers 0.00 on an air blank. If the EBT reading is greater than 0.00, the BAT shall conduct one more air blank. If the EBT does not register 0.00 on that attempt, testing shall not proceed using that instrument. However, testing of the employee may continue using another EBT.

(b) An individually-sealed mouthpiece shall be opened in view of the employee and BAT and attached to the EBT in accordance with the manufacturer's instructions.

(c) The BAT shall instruct the employee to blow forcefully into the mouthpiece for at least 6 seconds or until the EBT indicates that an adequate amount of breath has been obtained.

(d) After the initial test is administered for each employee, the BAT shall run an air blank, after allowing adequate time for the EBT to clear any residual alcohol remaining from the test. If the EBT reading is greater than 0.00, the BAT shall conduct one more air blank. The employee's test is valid only if this check results in a 0.00 reading.

(e) Any EBT taken out of service because of failure to perform air blanks accurately shall not be used for testing until a check of external calibration is conducted and the EBT found to be within tolerance limits.

(f) If the result of the initial test is an alcohol concentration of less than 0.02, no further testing is authorized. The BAT shall transmit the result to the employer in a confidential manner, and the employer shall receive and store the information so as to ensure that confidentiality is maintained as required by § 40.69.

(g) If the result of the initial test is an alcohol concentration of 0.02 or greater, a confirmatory test shall be performed as provided in § 40.63.

(h) If the EBT does not print the results directly onto the form, the BAT shall affix the test result printout to the alcohol test form in the designated space, using a method that will provide clear evidence of removal (*e.g.*, tamper-evident tape). The BAT shall sign and date the printed result, certifying that the proper procedures were followed. The employee shall sign the printed result, certifying that he or she took the test with the sequential test number recorded on the printed result that matches the number on the EBT. If the employee declines to sign the printed result, it shall not be considered a refusal to be tested. In this event, the BAT shall note the refusal to sign in the "Remarks" section of the form.

(i) In the event the result displayed on the EBT does not match the printed result, the BAT shall note the disparity in the remarks section. Both the employee and the BAT shall initial or sign the notation. In accordance with § 40.67, the test is invalid and the employer and employee shall be so advised.

§ 40.63 Administration of the confirmatory test.

(a) The BAT shall instruct the employee not to eat, drink, put any object or substance in his or her mouth, and, to the extent possible, not belch during a waiting period before the confirmatory test. This time period begins with the completion of the initial test, and shall not be less than 15 minutes nor more than 20 minutes long. The BAT shall explain to the employee the reason for this requirement (*i.e.*, to prevent any accumulation of mouth alcohol from leading to an artificially high reading) and the fact that it is for the employee's benefit. The BAT shall also explain that the test will be conducted at the end of the waiting period, even if the employee has disregarded the instruction. If the BAT becomes aware that the employee has not complied with this instruction, the BAT shall so note in the "Remarks" section of the form.

(b) The BAT shall provide to the employee, and instruct the employee to read during the waiting period, a notice that should the confirmatory test result be an alcohol concentration of 0.04 or greater, the employee should not drive a motor vehicle or perform any safety-sensitive function. The employee shall initial the testing form in the space provided to indicate that this notice has been provided. If the employee declines to initial the form for this purpose, the BAT shall note the provision of the notice and the employee's refusal to initial in the "Remarks" section of the form.

(c) The procedures of § 40.61 (a), (c), (d), (e) and (i) shall be followed. A new mouthpiece shall be used for the confirmation test.

(d) In the event that the initial and confirmatory test results are not identical, the lower of the two results is deemed to be the final result upon which any action under operating administration rules shall be based.

(e) If the EBT does not print the results directly onto the form, the BAT shall affix the test result printout to the

alcohol test form in the designated space, using a method that will provide clear evidence of removal (*e.g.*, tamper-evident tape). The BAT shall sign and date the printed result, certifying that the proper procedures were followed. The employee shall sign the printed result, certifying that he or she took the test with the sequential test number recorded on the printed result that matches the number on the EBT. If the employee declines to sign the printed result, it shall not be considered a refusal to be tested. In this event, the BAT shall note the refusal to sign in the "Remarks" section of the form.

(f) The BAT shall transmit all results to the employer in a confidential manner.

(1) Each employer shall designate an employer representative for the purpose of receiving and handling alcohol testing results in a confidential manner. All communications by BATs to the employer concerning the alcohol testing results of employees shall be to the designated employer representative.

(2) Such transmission may be in writing, in person or by telephone or electronic means, but the BAT shall ensure immediate transmission to the employer of results that require the employer to prevent the employee from performing a safety-sensitive function.

(3) If the initial transmission is not in writing (*e.g.*, by telephone), the employer shall establish a mechanism to verify the identity of the BAT providing the information.

(4) If the initial transmission is not in writing, the BAT shall follow the initial transmission by providing to the employer the employer's copy of the alcohol testing form. The employer shall store the information so as to ensure that confidentiality is maintained as required by § 40.69 of this part.

§ 40.65 Inability to provide an adequate amount of breath.

(a) This section sets forth procedures to be followed in any case in which an employee is unable, or alleges that he or she is unable, to provide an amount of breath sufficient to permit a valid breath test because of a medical condition.

(b) The BAT shall again instruct the employee to attempt to provide an adequate amount of breath. If the employee refuses to make the attempt, the BAT shall immediately inform the employer.

(c) If the employee attempts and fails to provide an adequate amount of breath, the BAT shall so note in the "Remarks" section of the alcohol testing form and immediately inform the employer.

(d) The employer shall direct the employee to obtain, as soon as practical after the attempted provision of breath, an evaluation from a licensed physician who is acceptable to the employer concerning the employee's medical ability to provide an adequate amount of breath. The employee shall make available to the physician all relevant medical history and records.

(e) If the physician determines, in his or her reasonable medical judgment, that a medical condition has, or with a high degree of probability, could have, precluded the employee from providing an adequate amount of breath, the employee's failure to provide an adequate amount of breath shall not be deemed a refusal to take a test. The physician shall provide to the employer a written statement of the basis for his or her conclusion.

(f) If the licensed physician, in his or her reasonable medical judgment, is unable to make the determination set forth in paragraph (e) of this section, the employee's failure to provide an adequate amount of breath shall be regarded as a refusal to take a test. The licensed physician shall provide a written statement of the basis for his or her conclusion to the employer.

§ 40.67 Invalid tests.

An alcohol test shall be invalid under the following circumstances:

(a) The next external calibration check of the EBT produces a result that differs by more than the tolerance stated in the manufacturer's QAP from the known value of the test standard. In this event, every test performed on the device since the last valid external calibration check shall be invalidated;

(b) A device other than an EBT as described in § 40.53 is used for the test;

(c) The BAT does not observe the minimum 15 minute waiting period prior to the confirmatory test, as provided in § 40.61 (a);

(d) The BAT does not perform an air blank of the EBT before and after an initial or confirmatory test, or an air blank does not result in a reading of 0.00 prior to or after the administration of the test, as provided in §§ 40.63 and 40.65;

(e) The BAT does not sign the form as required by §§ 40.61 and 40.63;

(f) The employee has failed to sign the form following the printing on or attachment to the form of the test result, and the BAT has failed to note this event on the remarks section of the form.

(g) The EBT fails to print the result;

(h) The sequential test number on the EBT is not the same as the sequential test number on the printed result; or

(i) The alcohol concentration displayed on the EBT is inconsistent with the alcohol concentration printed on the result.

§ 40.69 Availability and disclosure of alcohol testing information about individual employees.

(a) Except as provided in this section, employers shall release information or copies of records regarding an employee's alcohol test results to a third party only as directed by specific, written instruction of the employee authorizing the release of the information or records to an identified person.

(b) Employers shall maintain records in a secure manner, so that disclosure of information to unauthorized persons does not occur.

(c) Employers may disclose information related to an alcohol test of an individual to the individual, the decisionmaker in a lawsuit, grievance, or other proceeding initiated by or on behalf of the individual, or by a DOT agency against the individual, and arising from a positive alcohol test (including but not limited to a worker's compensation, unemployment compensation, equitable relief or monetary damages, or other proceeding relating to a benefit sought by the employee).

(d) On request of the National Transportation Safety Board (NTSB), employers shall disclose to the NTSB information about any post-accident test of an employee that was performed following the accident under NTSB investigation.

(e) Employers shall make available copies of all results of employer alcohol testing programs, and any other records pertaining to alcohol testing programs, when requested by DOT or any DOT agency with regulatory authority over the employer or any of its employees.

(f) A covered employee shall, upon written request, be entitled to be provided any records relating to his or her test. The employer shall promptly provide the records requested by the employee. Assignment of costs for such records shall be made in accordance with employer/employee agreements. Access to such records shall not be contingent on the employee obtaining or paying for records in addition to those specifically requested.

§ 40.71 Maintenance and disclosure of records concerning EBTs and BATs.

(a) Each employer shall maintain the following records for five years:

(1) Records of the inspection, maintenance, and calibration of each EBT used in employee testing;

(2) Documentation of the employer's compliance with the quality assurance plan of the manufacturer of each EBT it uses for alcohol testing under this part, including records of the results of external calibration checks;

(3) Records of the training and proficiency testing of each BAT used in employee testing.

(b) Records required to be maintained by this section shall be disclosed as follows:

(1) Employers shall make available copies of all such records, upon request, to DOT or any DOT agency with regulatory authority over the employer or employee.

(2) Employers shall make available, on the request of any covered employee who has been tested, any such record that relates to a test which the employee has taken. The employer shall promptly provide the records requested by the employee. Assignment of costs for such records shall be made in accordance with employer/employee agreements. Access to such records shall not be contingent on the employee obtaining or paying for records in addition to those specifically requested.

(3) Employers shall make available to the NTSB, on request, any such record that directly pertains to a post-accident test of an employee that was performed following an accident under NTSB investigation.

(4) Employers may disclose records covered by this section to the individual, the decisionmaker in a lawsuit, grievance, or other proceeding initiated by or on behalf of the individual, or by a DOT agency against the individual, and arising from a positive alcohol test (including but not limited to a worker's compensation, unemployment compensation, equitable relief or monetary damages, or other proceeding relating to a benefit sought by the employee).

§ 40.73 Definitions.

The following definitions apply to this subpart:

Air blank. A reading by an EBT of ambient air containing no alcohol.

Alcohol. Ethyl alcohol (ethanol). References to the use of alcohol include use of any beverage, mixture, or preparation containing ethyl alcohol (including any medication).

Alcohol concentration. The alcohol in a volume of breath expressed in terms of grams of alcohol per 210 liters of breath as indicated by an evidential breath test under this part. When the indicated alcohol concentration of a covered employee on an initial alcohol test is different from an indicated alcohol concentration on a confirmatory test, the employee shall be considered to have the lower indicated concentration.

Alcohol testing site. The location designated by the employer at which employees are required to provide breath.

Breath Alcohol Technician (BAT). An individual who instructs and assists individuals in the testing process and operates the evidential breath testing device.

Confirmatory test. An analysis of a second, separate amount of breath on an evidential breath testing device.

Evidential breath testing device (EBT). A breath testing device approved by the National Highway Traffic Safety Administration (NHTSA) for the evidential testing of breath and placed on NHTSA's "conforming products list of evidential breath measurement devices."

Initial test. The first analysis of an amount of breath on an evidential breath testing device.

Invalid test. A test which has been declared invalid. It is neither a positive nor a negative test.

§§ 40.73–40.79 [Reserved]

8 and 9. A new subpart D is proposed to be added to part 40 to read as follows:

Subpart D—Management Information System

Sec.

40.81 Reporting drug testing information to the Department of Transportation
40.83 Reporting alcohol testing information to the Department of Transportation

Subpart D—Management Information System

§ 40.81 Reporting drug testing information to the Department of Transportation.

(a) Employers shall maintain the drug testing program data identified in this section as specified in the appropriate DOT Agency drug testing rule. This data shall be submitted to each DOT Agency which regulates the employer as stipulated in the DOT Agency rule. DOT Agencies may require additional data necessary to evaluate the effectiveness of the drug testing rules. Any additional requirements are specified in the DOT Agency rules which regulate the employer. Data shall normally be compiled for the calendar year (starting January 1, 1993). If the rule is effective after January 1, 1993, reports for the first year should begin as of the rule's effective date. Annual reports shall be submitted no later than February 15 of the year following the year to which the data pertain.

(b) Each employer's report shall include each of the following data elements:

(1) Number of covered employees by employee category.

(2) Number of covered employees subject to testing under the anti-drug rules of more than one DOT Agency, identified by each agency.

(3) Number of specimens collected by type of test (i.e., pre-employment, periodic, random, etc.) and employee category.

(4) Number of positives verified by a Medical Review Officer (MRO) by type of test, type of drug and employee category.

(5) Number of negatives verified by a MRO by type of test, and employer category.

(6) Number of persons denied a position as a covered employee following a verified drug test.

(7) Number of covered employees verified positive by a MRO who were returned to duty in covered positions during the reporting period.

(8) Number of employees with tests verified positive by a MRO for multiple drugs.

(9) Number of covered employees who refused to submit to a drug test required under this rule, and the action taken in response to the refusal(s).

(10) Number of covered employees and supervisors who have received required training during the reporting period.

(c) The data shall be submitted on the form specified in Appendix B to this part or as amended by a DOT Agency rule. If the governing DOT Agency rule requires additional information or modifications authorized by this rule, appropriate modifications to the form will appear in the DOT Agency rule. Modification could include authorized additions and deletions.

§ 40.83 Reporting alcohol testing information to the Department of Transportation.

(a) Each employer shall submit to each DOT agency to whose alcohol testing rules it is subject an annual report covering the calendar year, summarizing the results of its alcohol misuse prevention program.

(b) Each employer that is subject to more than one DOT agency alcohol rule shall identify each employee covered by the regulations of more than one DOT agency. The identification will be by the total number and category of covered function. Prior to conducting any alcohol test on a covered employee subject to the rules of more than one DOT agency, the employer shall determine which DOT agency rule or rules authorizes or requires the test. The test result information shall be directed to the appropriate DOT agency or agencies.

(c) Each employer shall ensure the accuracy and timeliness of each report submitted by the employer or a consortium or other agent.

(d) Each employer shall submit the required annual report(s) no later than February 15 of each year. The report shall be submitted on the form specified by the DOT agency. Each report shall contain:

(1) Number of covered employees by employee category.

(2) Number of covered employees subject to testing under the alcohol misuse rule of another DOT agency, identified by each agency.

(3)(i) Number of initial tests by type of test and employee category.

(ii) Number of confirmatory tests, by type of test and employee category.

(4) Number of confirmatory alcohol tests indicating an alcohol concentration of .04 or greater, by type of test and employee category.

(5) Number of confirmatory alcohol tests indicating an alcohol concentration of .02 or greater but less than .04.

(6) Number of persons denied a position as a covered employee following a preemployment/pre-duty alcohol test indicating an alcohol concentration of .04 or greater.

(7) Number of covered employees with a confirmatory alcohol test indicating an alcohol concentration of .04 or greater who were returned to duty in covered positions (having complied with the recommendations of a substance abuse professional as described in DOT agency regulations).

(8) Number of covered employees who were administered alcohol and drug tests at the same time, with both a positive and drug test result and an alcohol test result indicating an alcohol concentration of .04 or greater.

(9) Number of covered employees who were found to have violated other provisions of DOT agency regulations, and the action taken in response to the violation.

(10) Number of covered employees who refused to submit to an alcohol test required under this part, and the actions taken in response to the refusal.

(11) Number of supervisors who have received training during the reporting period in determining the existence of reasonable suspicion of alcohol misuse.

10. A new appendix B is proposed to be added to part 40, to read as follows:

BILLING CODE 4910-62-M

APPENDIX B - DRUG AND ALCOHOL TESTING MIS DATA COLLECTION FORM

GENERAL INSTRUCTIONS

This reporting form includes three parts. Collectively, these parts address the data elements required in the U.S. Department of Transportation (DOT) drug and alcohol testing regulations. Each part of the form is preceded by instructions which outline and explain the information requested and indicate the probable sources for this information. The three parts of the form are:

Section	Instructions Pages	Reporting Form Pages
I. ORGANIZATIONAL INFORMATION	i-ii	1-2
II. DRUG TESTING INFORMATION	iii-vii	3-9
III. ALCOHOL TESTING INFORMATION	viii-xii	10-14

I. ORGANIZATIONAL INFORMATION

INSTRUCTIONS

This part of the reporting form includes two sections. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. TRANSPORTATION EMPLOYER INFORMATION	i	1
B. COVERED EMPLOYEES	ii	2

Page 1 **TRANSPORTATION EMPLOYER INFORMATION** (Section A) requires the company name for which the report is done and a current address. Below this, a signature and date are required certifying the correctness and completeness of the form.

Page 2

COVERED EMPLOYEES (Section B) requires a count for each employee category that must be tested under DOT regulations. Each operating administration will specify the categories to be used for reports submitted to it. The most likely source for this information is the employer's personnel department. These counts should be based on the company records for the reported year. The **TOTAL** is a count of **all** covered employees for **all** categories combined, i.e., the sum of the columns.

Additional information must be completed if your company employs personnel who perform duties covered by the drug and alcohol rules of more than one DOT operating administration. **NUMBER OF EMPLOYEES COVERED BY MORE THAN ONE DOT OPERATING ADMINISTRATION**, requires that you identify the number of employees in each employee category under the appropriate additional operating administration(s)

II. DRUG TESTING INFORMATION

INSTRUCTIONS

The following instructions are to be used as a guide for completing the drug testing information in the U.S. Department of Transportation (DOT) **Drug and Alcohol Testing Management Information System Data Collection Form**. These instructions outline and explain the information requested and indicate probable sources for this information. A sample testing results table with a narrative explanation is provided on pages iv-vi as an example to facilitate the process of completing the form correctly.

This part of the reporting form includes four sections. These sections address the data elements required in the regulations. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. JOB APPLICANT TESTING INFORMATION	iv	4
B. EMPLOYEE TESTING	vi	5-7
C. OTHER TESTING/PROGRAM INFORMATION	vi	8
D. TRAINING/EDUCATION	vii	9

Sections A and B are used to summarize the drug testing results for covered employees. There are six tables to be completed (one in Section A and five in Section B). The first table (Section A) is where you enter the data on pre-employment testing. The five tables in Section B are for entering drug testing data on periodic, random, post-accident, reasonable cause, and return to duty testing, respectively. Items necessary to complete these tables include:

1) the number of specimens collected in each employee category;
2) the number of specimens tested which were verified negative and verified positive for any drug(s); and
3) individual counts of those specimens which were verified positive for each of the five drugs.

Do not include results of quality control (QC) samples submitted to the testing laboratory in any of the tables.

A sample table with detailed instructions is provided for Section A, **JOB APPLICANT TESTING INFORMATION**. The format and explanations used for the sample table apply to all six of the tables in Sections A and B.

Information on actions taken with those persons testing positive is required at the end of both Sections A and B. Specific instructions for providing this latter information are given after the instructions for completing the tables in Sections A and B.

Page 4

JOB APPLICANT TESTING INFORMATION (Section A) requires information for pre-employment testing. All numbers entered into this table should be separated into the category of employment for which the applicant was applying. A sample table with example numbers is presented on page v.

Three types of information are necessary to complete the left side of this table. The first blank column with the heading "**NUMBER OF SPECIMENS COLLECTED,**" requires a count for all collected specimens by employee category, it should not include refusals to test. The second blank column with the heading "**NUMBER OF SPECIMENS VERIFIED NEGATIVE,**" requires a count for all completed tests by employee category that were verified negative by your Medical Review Officer (MRO).

The third blank column with the heading "**NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS,**" refers to the number of specimens provided by job applicants that were verified positive. "Verified positive" means the results were verified by your MRO.

The right hand portion of this table, with the heading "**NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG,**" requires counts of positive tests for each of the five drugs for which tests were done, i.e., marijuana (THC), cocaine, phencyclidine (PCP), opiates, and amphetamines. The number of specimens positive for each drug should be entered in the appropriate column for that drug type. Again, "verified positive" refers to test results verified by your MRO.

If an applicant tested positive for more than one drug; for example, both marijuana and cocaine, that person's positive results would be included once in each of the appropriate columns (marijuana and cocaine).

Each column in the table should be added and the answer entered in the row marked "**TOTAL**".

A sample table is provided on page v with example numbers.

Page 4

Below the table for pre-employment testing information is a box with the heading "**Number of persons denied a position as a covered employee following a verified positive drug test**". This is simply a count of those persons who were not placed in a covered position because they tested positive for one or more drugs.

SAMPLE APPLICANT TEST RESULTS TABLE

The following example is for Section A, **JOB APPLICANT TESTING INFORMATION**, which summarizes pre-employment testing results. The procedures detailed here also apply to the tables in Section B which require you to summarize testing results for employees. Each operating administration will specify the employee categories to be used in reports submitted to it. This example will use the categories "Operator" and "Maintenance" to illustrate the procedures for completing the form.

A Urine specimens were collected for 157 job applicants for operator positions during the reporting year. This information is entered in the first blank column of the table in the row marked "Operator".

B The Medical Review Officer (MRO) for your company reported that 153 of those 157 specimens from applicants for operator positions were negative (i.e., no drugs were detected). Enter this information in the second blank column of the table in the row marked "Operator".

C The MRO for your company reported that 4 of those 157 specimens from applicants for operator positions were positive (i.e., a drug or drugs were detected). Enter this information in the third blank column of the table in the row marked "Operator".

D With the 4 specimens that tested positive, the following drugs were detected:

Specimen	Drugs
#1	Marijuana
#2	Amphetamines
#3	Marijuana and Cocaine (Multi-drug specimen)
#4	Marijuana

Marijuana was detected in three (3) specimens, cocaine in one (1), and amphetamines in one (1). This information is entered in the columns on the right hand side of the table under each of these drugs. Since two different drugs were detected in specimen #3 (multi-drug), entries are made in both the marijuana and the cocaine columns for this specimen. Information on multi-drug specimens must also be entered in Section C, **OTHER TESTING/PROGRAM INFORMATION**, on page 8 of the reporting form.

PRE-EMPLOYMENT TESTING

EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
Operator	157	153	4	3	1	0	0	1
Maintenance	107	105	2	1	0	0	1	0
	0	0	0	0	0	0	0	0
TOTAL	264	258	6	4	1	0	1	1

A B C D E

Please note that the sample data collection form also has information for maintenance workers on line two. The same procedures outlined for operators should be followed for entering the data on maintenance workers. With applicants for maintenance positions, 107 specimens were collected resulting in 105 verified negatives and 2 verified positives -- 1 for marijuana and 1 for opiates. This information is entered in the row marked "Maintenance".

E

The last row, marked "TOTAL", requires you to add the numbers in each of the columns. With this example, 157 specimens from applicants for operator positions were collected and 107 for applicants for maintenance positions. The total for that column would be 264 (i.e., 157+107). The same procedure should be used for each column, i.e., add all the numbers in that column and place the answer in the last row.

Note that adding up the numbers for each type of drug in a row ("NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG") will not always match the number entered in the third column, "NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS". The total for the numbers on the right hand side of the table may differ from the number of specimens testing positive since some specimens may contain more than one drug.

Remember that the same procedures indicated above are to be used for completing all of the tables in Sections A and B.

Pages 5-7 **EMPLOYEE TESTING** (Section B), as indicated, requires information for company employees in **covered positions** only. A separate table must be completed for each category of test. These categories include: (1) periodic, (2) random, (3) post-accident, (4) reasonable cause, and (5) return to duty testing. These tables are to be filled out like the sample table above. Again, these numbers **do not** include refusals for testing.

Page 7 Following these tables that summarize **EMPLOYEE TESTING**, you must provide counts for employees who have tested positive and are currently in, or have completed rehabilitation, and have returned to work in a covered position. Report this information only for employees who tested positive during this reporting period. This information should be available from the personnel office and/or drug program manager.

Page 8 **OTHER TESTING/PROGRAM INFORMATION** (Section C) requires that you complete a table dealing with specimens positive for more than one drug and a table dealing with employees who refused to submit to a drug test.

Page 8 **SPECIMENS VERIFIED POSITIVE FOR MORE THAN ONE DRUG** requires information on specimens that contained more than one drug. Indicate the **EMPLOYEE CATEGORY** and the **NUMBER OF VERIFIED POSITIVES**, then check the appropriate columns indicating the combination of drugs reported as positive. For example, if marijuana and cocaine were detected in 3 operator specimens,

then you would write "Operator" as the employee category, "3" as the number of verified positives, and "3" in the columns for "Marijuana" and "Cocaine". If marijuana and opiates were detected in 2 operator specimens, then you would write "Operator" as the employee category, "2" as the number of verified positives, and "2" in the columns for "Marijuana" and "Opiates".

Page 8 **EMPLOYEES WHO REFUSED TO SUBMIT TO A DRUG TEST** requires information on the **NUMBER OF COVERED EMPLOYEES** who refused to submit to a drug test required under this regulation, and a description of the **ACTION TAKEN** in response to the refusal. An example of an action taken would be "removed from covered duties pending termination".

Page 9 **TRAINING/EDUCATION** (Section D) requires information on the number of covered employees and supervisory personnel who have received the required drug training during the current reporting period.

READ BEFORE COMPLETING THE REMAINDER OF THIS FORM:

1. All items refer to the **current** reporting period **only** (for example, January 1, 1993 - December 31, 1993).

2. This report is only for testing **REQUIRED BY THE U.S. DEPARTMENT OF TRANSPORTATION (DOT)**:

   - Results should be reported only for employees in **COVERED POSITIONS** as defined by DOT drug testing regulations.

   - The information requested should only include testing for marijuana (THC), cocaine, phencyclidine (PCP), opiates, and amphetamines using the standard procedures required by DOT regulation 49 CFR Part 40.

3. Information on refusals for testing should only be reported in Section C ("OTHER TESTING/PROGRAM INFORMATION"). Do not include refusals for testing in other sections of this report.

4. Do not include the results of any quality control (QC) samples submitted to the testing laboratory in any of the tables.

5. Complete all items; DO NOT LEAVE ANY ITEM BLANK. If the value for an item is zero (0), place a zero (0) on the form.

This part of the form requires information on VERIFIED POSITIVE and VERIFIED NEGATIVE drug tests. These are the results that are reported to you by your Medical Review Officer (MRO).

A. JOB APPLICANT TESTING INFORMATION

PRE-EMPLOYMENT TESTING									
EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
TOTAL								

Number of persons denied a position as a covered employee following a verified positive drug test:

B. EMPLOYEE TESTING

PERIODIC TESTING								
EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
TOTAL								

RANDOM TESTING								
EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
TOTAL								

B. EMPLOYEE TESTING (continued)

POST-ACCIDENT TESTING

EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
TOTAL								

REASONABLE CAUSE TESTING

EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
TOTAL								

B. EMPLOYEE TESTING (continued)

RETURN TO DUTY TESTING								
EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
TOTAL								

Number of employees, currently in or having completed rehabilitation or otherwise qualified to return to duty, who have returned to work in a covered position during this reporting period: [ ]

C. OTHER TESTING/PROGRAM INFORMATION

SPECIMENS VERIFIED POSITIVE FOR MORE THAN ONE DRUG						
EMPLOYEE CATEGORY	NUMBER OF VERIFIED POSITIVES	Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines

EMPLOYEES WHO REFUSED TO SUBMIT TO A DRUG TEST	
NUMBER OF COVERED EMPLOYEES	ACTION TAKEN

D. TRAINING/EDUCATION

Training During Current Reporting Period

Number of covered employees who have received initial training on the consequences, manifestations, and behavioral cues of drug use as required by DOT drug testing regulations: [ ]

Number of supervisory personnel who have received initial training on the specific contemporaneous physical, behavioral, and performance indicators of probable drug use as required by DOT drug testing regulations: [ ]

Number of covered employees who have received recurrent or refresher training on the consequences, manifestations, and behavioral cues of drug use: [ ]

Number of supervisory personnel who have received recurrent or refresher training on the specific contemporaneous physical, behavioral, and performance indicators of probable drug use: [ ]

III. ALCOHOL TESTING INFORMATION

INSTRUCTIONS

The following instructions are to be used as a guide for completing the alcohol testing information for the U.S. Department of Transportation (DOT) **Drug and Alcohol Testing Management Information System Data Collection Form**. These instructions outline and explain the information requested and indicate probable sources for this information. A sample testing results table with a narrative explanation is provided on pages ix-x as an example to facilitate the process of completing the form correctly.

This part of the reporting form includes four sections. These sections address the data elements required in the regulations. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. JOB APPLICANT TESTING INFORMATION	ix	10
B. EMPLOYEE TESTING	xi	11-13
C. OTHER TESTING/PROGRAM INFORMATION	xi	13-14
D. TRAINING/EDUCATION	xii	14

Sections A and B are used to summarize the alcohol testing results for covered employees. There are six tables to be completed (one in Section A and five in Section B). The first table (Section A) is where you enter the data on pre-employment/pre-duty testing. The five tables in Section B are for entering alcohol testing data for random, post-accident, reasonable suspicion, return to duty, and follow-up testing, respectively. Items necessary to complete these tables include:

1) the number of initial alcohol tests performed for each employee category;
2) the number of confirmatory alcohol tests performed for each employee category;
3) the number of confirmatory test results which were equal to or greater than 0.04; and
4) the number of confirmatory test results which were equal to or greater than 0.02, but less than 0.04.

A sample table with detailed instructions is provided for Section A, **JOB APPLICANT TESTING INFORMATION**. The format and explanations used for the sample table apply to all six of the tables in Sections A and B.

Information on actions taken with those persons whose alcohol test results were 0.04 or greater is required at the end of both Sections A and B. Specific instructions for providing this latter information are given after the instructions for completing the tables in Sections A and B.

Page 10

JOB APPLICANT TESTING INFORMATION (Section A) requires information for pre-employment/pre-duty testing. All numbers entered into this table should be separated into the category of employment for which the applicant was applying. A sample table with example numbers is presented on page x.

Four types of information are necessary to complete the left side of this table. The first blank column with the heading "**NUMBER OF INITIAL TESTS**" requires a count of all initial alcohol tests performed for each employee category. It should not include refusals to test. The second blank column with the heading "**NUMBER OF CONFIRMATORY TESTS**" requires a count of all confirmatory alcohol tests performed for each employee category.

The third blank column with the heading "**NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04**" requires a count for each employee category.

The fourth blank column with the heading "**NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02, BUT LESS THAN 0.04**" requires a count for each employee category.

Each column in the table should be added and the answer entered in the row marked "**TOTAL**".

A sample table is provided on page x with example numbers.

Page 10

Below the table for pre-employment testing information is a box with the heading "**Number of persons denied a position as a covered employee following a pre-employment/pre-duty alcohol test indicating an alcohol concentration of 0.04 or greater**". Enter the appropriate number in the box provided.

SAMPLE APPLICANT TEST RESULTS TABLE

The following example is for Section A, **JOB APPLICANT TESTING INFORMATION**, which summarizes pre-employment/pre-duty testing results. The procedures detailed here also apply to the tables in Section B which require you to summarize testing results for employees. Each operating administration will specify the employee categories to be used in reports submitted to it. This example will use the categories "Operator" and "Maintenance" to illustrate the procedures for completing the form.

A

Initial tests were performed on 157 job applicants for operator positions during the reporting year. This information is entered in the first blank column of the table in the row marked "Operator".

B

Confirmatory tests were necessary for 6 of the 157 applicants for operator positions. Enter this information in the second blank column of the table in the row marked "Operator". The confirmatory test results for these 6 applicants were the following:

Applicant	Confirmation Result
#1	0.06
#2	0.01
#3	0.11
#4	0.04
#5	0.03
#6	0.02

C The confirmatory test results for 3 of the applicants for operator positions were equal to or greater than 0.04. Enter this information in the third blank column of the table in the row marked "Operator".

D The confirmatory test results for 2 of the applicants for operator positions were equal to or greater than 0.02, but less than 0.04. Enter this information in the fourth blank column of the table in the row marked "Operator".

E The last row, marked "TOTAL", requires you to add the numbers in each of the columns. With this example, 157 applicants for operator positions and 107 applicants for maintenance positions were subjected to initial tests. The total for that column would be 264 (i.e., 157 + 107). The same procedure should be used for each column (i.e., add all the numbers in that column and place the answer in the last row).

PRE-EMPLOYMENT/PRE-DUTY TESTING

EMPLOYEE CATEGORY	NUMBER OF INITIAL TESTS	NUMBER OF CONFIRMATORY TESTS	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0 04	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0 02, BUT LESS THAN 0 04
Operator	157	6	3	2
Maintenance	107	3	1	0
	0	0	0	0
TOTAL	264	9	4	2

A B C D E

Please note that our sample data collection form also has information for maintenance workers on line two. The same procedures outlined for operators should be followed for entering the data on maintenance workers. With applicants for maintenance positions, 107 initial tests were conducted resulting in 3 confirmatory tests. The confirmatory test result for 1 of the maintenance worker applicants was equal to or greater than 0.04; no results were equal to or greater than 0.02, but less than 0.04. This information is entered in the row marked "Maintenance".

x

Note that adding up the numbers for confirmation results in columns three and four will not always match the number entered in the second column, "NUMBER OF CONFIRMATORY TESTS". These numbers may differ since some confirmatory test results may be less than 0.02.

Remember that the same procedures indicated above are to be used for completing all of the tables in Sections A and B.

Pages 11-13 **EMPLOYEE TESTING** (Section B), as indicated, requires information for company employees in **covered positions** only. A separate table must be completed for each category of test. These categories include: (1) random, (2) post-accident, (3) reasonable suspicion, (4) return to duty, and (5) follow-up testing. These tables are to be filled out like the sample table above. Again, these numbers do **not** include refusals for testing.

Page 12 Following the table that summarizes return to duty testing, you must provide a count of the **"Number of employees with a confirmatory alcohol test indicating an alcohol concentration of 0.04 or greater who were returned to duty in a covered position (having complied with the recommendations of a substance abuse professional as described in DOT regulations)"**. Report this information only for employees who were tested during this reporting period. This information should be available from the personnel office and/or alcohol program manager.

Pages 13-14 **OTHER TESTING/PROGRAM INFORMATION** (Section C) requires that you provide information on employees who tested positive for drugs and alcohol (at the same time), information on violations of other alcohol provisions (not necessarily resulting in positive alcohol tests), and information on employees who refused to submit to an alcohol test.

Page 13 **Number of employees administered drug and alcohol tests at the same time resulting in a verified positive drug test and an alcohol test indicating an alcohol concentration of 0.04 or greater**, requires that a count of all such employees be entered in the indicated box.

Page 13 **VIOLATIONS OF OTHER ALCOHOL PROVISIONS/PROHIBITIONS OF THIS REGULATION**, requires information on the **NUMBER OF COVERED EMPLOYEES** committing such a violation, a description of the **VIOLATION** committed (e.g., pre-duty alcohol use, on duty alcohol use, on duty alcohol possession), and a description of the **ACTION TAKEN** in response to the violation.

Page 14 **EMPLOYEES WHO REFUSED TO SUBMIT TO AN ALCOHOL TEST** requires information on the **NUMBER OF COVERED EMPLOYEES** who refused to submit to an alcohol test as required under this regulation, and a description of the **ACTION TAKEN** in response to the refusal.

Page 14 **TRAINING/EDUCATION** (Section D) requires information on the number of supervisory personnel who have received the required alcohol training during the current reporting period.

READ BEFORE COMPLETING THE REMAINDER OF THIS FORM:

1. All items refer to the **current** reporting period **only** (for example, January 1, 1993 - December 31, 1993).

2. This report is only for testing **REQUIRED BY THE U.S. DEPARTMENT OF TRANSPORTATION (DOT)**:

   - Results should be reported only for employees in **COVERED POSITIONS** as defined by DOT alcohol testing regulations.
   - The information requested should only include testing for alcohol using the standard procedures required by DOT regulation 49 CFR Part 40.

3. Information on refusals for testing should only be reported in Section C ("OTHER TESTING/PROGRAM INFORMATION"). Do not include refusals for testing in other sections of this part of the report.

4. Complete all items; DO NOT LEAVE ANY ITEM BLANK. If the value for an item is zero (0), place a zero (0) on the form.

A. JOB APPLICANT TESTING INFORMATION

PRE-EMPLOYMENT/PRE-DUTY TESTING				
EMPLOYEE CATEGORY	NUMBER OF INITIAL TESTS	NUMBER OF CONFIRMATORY TESTS	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02, BUT LESS THAN 0.04

14 CFR Part 61, et al.
Drug and Alcohol Testing Programs; Proposed Rules

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 61, 63, 65, 121 and 135

[Docket No. 27065; Notice No. 92-17]

RIN: 2120-AE43

Alcohol Misuse Prevention Program for Personnel Engaged in Specified Aviation Activities

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes regulations to establish an alcohol testing program for air carrier employees who perform safety-sensitive duties, which would implement the FAA-related provisions of the Omnibus Transportation Employee Testing Act of 1991, which was enacted on October 28, 1991. As proposed in this NPRM, employees who perform safety-sensitive duties directly or by contract for aviation employers that hold a certificate issued under certain regulatory provisions, operators as defined in the regulations, or air traffic control facilities not operated by the FAA or the U.S. military would have to be subject to an FAA-approved alcohol misuse prevention program (AMPP). The proposed rule would require alcohol testing of these employees, proscribe certain alcohol-related conduct, and establish specified consequences for engaging in alcohol misuse. Employers would also be required to provide written materials to covered employees explaining the program and to submit reports to the FAA on the results of the program. This proposed rule is intended to ensure that public safety is maintained by preventing alcohol misuse by safety-sensitive aviation employees.

DATES: Comments must be received on or before April 14, 1993. There will be public hearings on this proposal, details about which will be published in the Federal Register.

ADDRESSES: Comments on this notice should be mailed, in triplicate, to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-10), Docket No. 27065, 800 Independence Avenue SW., Washington, DC 20591. Comments that are delivered to this address must be marked "Docket No. 27065." Comments may be examined in room 915G between 8:30 a.m. and 5 p.m. on weekdays, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Ms. Julie B. Murdoch, Office of Aviation Medicine, Drug Abatement Division (AAM-800), Federal Aviation Administration, 400 7th Street SW., Washington, DC 20590; telephone (202) 366-6710.

SUPPLEMENTARY INFORMATION:

Availability of NPRM

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attn: Public Inquiry Center (APA-230), 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 267-3484. Requests must include the notice number of this NPRM.

Persons interested in being placed on a mailing list for future rulemaking actions should request a copy of Advisory Circular 11-2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedures.

Current Laws and Regulations

A variety of laws and regulations currently restrict the consumption of alcohol by some aviation employees. Federal criminal law prohibits any person from operating or directing the operation of a common carrier while under the influence of alcohol. 18 U.S.C. 342. A blood alcohol level of .10 percent is considered presumptive evidence that the person is under the influence. 18 U.S.C. 343(1).

The FAA's regulations concerning alcohol misuse would be supplemented but not changed by the rule proposed here. Currently, under the FAA's rules, no person may act or attempt to act as a crewmember of a civil aircraft within 8 hours after consuming any alcoholic beverage, while under the influence of alcohol, or while having .04 percent by weight or more of alcohol in the blood. (14 CFR 91.17(a).) In limited circumstances, the FAA's regulations require crewmembers to submit to alcohol tests requested by State or local law enforcement officers and, upon request, to furnish the results of such tests to the Administrator. (14 CFR 91.17(c).) Refusal to take a properly authorized law enforcement alcohol test or to furnish the results can result in the denial, revocation, or suspension of an airman certificate issued under part 61 or 63. (14 CFR 61.16 and 63.12a.)

Holders of or applicants for medical certificates issued under 14 CFR part 67 are subject to additional regulations regarding alcohol use. First, a diagnosis of alcoholism is a disqualifying factor for a medical certificate. A diagnosed alcoholic must be evaluated by the Federal Air Surgeon and meet certain recovery criteria prior to receiving a medical certificate. However, to facilitate recovery and to prevent the unnecessary loss of skilled employees, a program established by the FAA, the airline industry, and the pilots' unions has enabled hundreds of alcoholic pilots to safely return to duty. The program combines confrontation, therapy, and stringently monitored aftercare.

Part 67 also provides that any individual who applies for a medical certificate must permit access by the Administrator to information in the National Driver Register concerning drug- and alcohol-related driving offenses. (14 CFR 67.3.) If an individual has had two or more such offenses within 3 years after the effective date of the rule, the FAA may suspend or revoke a part 61 airman certificate held by the individual or deny the individual's application for such certificate. (14 CFR 61.15.)

Discussion of Amendments

OST Common Preamble

OST, seeking to determine the extent of any alcohol problem in the transportation industries, issued an advance notice of proposed rulemaking (ANPRM) on November 2, 1989. The ANPRM asked for comment on a variety of issues related to preventing alcohol misuse by transportation workers, and several hundred comments were received. A thorough discussion of these comments and of the general issues related to alcohol use in the transportation industries is found in the common preamble published elsewhere in today's Federal Register. The OST preamble also addresses the multi-modal aspects of the Omnibus Transportation Employee Testing Act of 1991 (the Act) (Pub. L. 102-143, title V), which provides the statutory mandate for the rule proposed in this notice and for the related notices of other operating administrations. This common preamble is incorporated into this notice by reference. Any aspects of the proposed rule that are not discussed below are addressed in the common preamble.

Proposed Alcohol Misuse Prevention Program (AMPP)

The rule proposed in this NPRM would use three primary tools for reducing the threat of alcohol misuse in aviation. First, by amending parts 65, 121, and 135, the rule would prohibit certain alcohol-related conduct by employees performing safety-sensitive duties. Second, under the provisions of new appendix J to part 121, such

employees would be subject to pre-employment/pre-duty, random, post-accident, reasonable suspicion, return to duty, and follow-up alcohol testing. This testing would be federally-mandated but would be administered by the affected employers. Third, in accordance with requirements in appendix J, employees subject to the rule would be provided with materials designed to educate them about the provisions of the rule and the consequences of engaging in alcohol misuse.

Other Requirements Imposed by Employers; Requirement for Notice

The scope of the FAA's proposed rule is limited to prohibiting alcohol misuse and to providing for testing when there is a direct implication for aviation safety. Should an aviation employer determine that, as a matter of company policy, a different program should be implemented, the employer would be able to establish such a program. Any such program, however, would have to be clearly separate from the program that would be required under this rule, with appropriate notice given prior to tests under this rule. These provisions should preclude the commingling of employer-directed and FAA-mandated programs—a problem that has been of significant concern to the FAA in the context of anti-drug programs.

Employers Who Would Be Required To Establish Programs

During the development and implementation of the FAA's industry anti-drug program, the FAA carefully considered the appropriate scope of the rule. After the implementation of the rule, the FAA amended the scope to eliminate most of the operations that do not require a part 121 or part 135 certificate. The amendment was based on the FAA's determination that the minimal benefit to public safety that might accrue from inclusion of these operators did not warrant the cost and intrusiveness of drug testing (56 FR 43974; September 5, 1991).

This NPRM proposes to include essentially the same classes of employers as are covered by the anti-drug rule: 14 CFR part 121 certificate holders, 14 CFR part 135 certificate holders, sightseeing operators who meet the criteria of 14 CFR 135.1(c), and air traffic control (ATC) facilities not operated by the FAA or the U.S. military would have to establish alcohol misuse prevention programs. Companies with employees who perform safety-sensitive functions by contract for these employers would be permitted to establish and manage programs under this appendix. However, while a contractor company that manages its own program would perform all of the functions required of an "employer" in proposed appendix J, the certificate holders, operators, and ATC facilities would remain responsible for ensuring that all covered employees who perform services for them are subject to an approved program.

One change from the coverage in the anti-drug rule should be noted: ATC facilities operated under contract with the FAA were not included in the FAA's anti-drug rule. It was originally presumed that employees of such facilities were sufficiently subject to the supervision and control of the FAA that inclusion in the FAA's program (for its own employees) would be feasible. Subsequently, however, it was determined that the scope of the FAA's authority did not extend to such inclusion. Therefore, employees of contract ATC facilities should be subject to the FAA's rules for the aviation industry, and would be included under the scope of the proposed alcohol misuse rule.

Employees Who Would Be Subject to the Rule

This proposed rule would cover employees performing certain specified safety-sensitive functions. The FAA proposes to retain essentially the same coverage as the anti-drug rule, that is persons performing any of the following duties: Flight crewmember, flight attendant, flight instruction, aircraft dispatch, aircraft maintenance, ground security coordinator, aviation screening, and air traffic control. The anti-drug rule included flight test duties in its list of covered functions. As a practical matter, these duties are subsumed in the category of flight crewmember duties; therefore, the flight test category would not be included in this rule. Additionally, the category of ground security coordinator duties has been specified separately to reflect the coverage intended by the term "aviation security" in the anti-drug rule.

The FAA has been carefully evaluating the scope of covered functions since implementation of the anti-drug rule in 1989 and finds that the scope remains appropriate and should be adopted for this rule. At this point the FAA is uncertain whether the increased benefit to safety that could accrue by including other functions warrants the imposition of an alcohol testing requirement on individuals performing those functions. However, the FAA is soliciting comment on this issue, with specific focus on the following questions:

1. Are there additional functions with sufficient safety implications to warrant regulating alcohol-related conduct and imposition of a testing requirement?
2. Do air carriers have any data on the size of the additional population that would be affected and the incidence of alcohol misuse by this population?
3. What additional costs would be incurred by inclusion of other functions and what would be the offsetting benefits (*i.e.*, in terms of accident prevention, productivity, etc.)?

The FAA is also considering whether the class of maintenance personnel covered by this rule should be limited to those persons who are in charge of maintenance operations, who perform required inspections, and who have the authority to return an aircraft to service after maintenance has been performed. The FAA seeks comment on the following questions:

1. Should the maintenance population covered by the alcohol misuse rule be limited to supervisors, inspectors, and persons authorized to return aircraft to service?
2. Is the inspection and supervisory system for maintenance sufficiently comprehensive to remove or reduce the safety impact of the actual maintenance work?
3. Would restriction of the covered population have an adverse effect on safety?
4. What cost savings would accrue from limiting the population?

Prohibited Alcohol-Related Conduct

The NPRM would prohibit specific alcohol-related conduct by covered employees. Further, an employer would be prohibited from using a covered employee if the employer had actual knowledge that the employee had engaged in such conduct. Each of the prohibitions has been carefully tailored to minimize the restriction on the otherwise lawful use of alcohol by covered employees by limiting the time of the prohibition to at or near the time of the performance of covered functions. The FAA does not, however, propose to list the specific actions within a safety-sensitive function that would trigger coverage under this rule. This would be determined by the employer based on the requirements of the FAA's regulations and the employer's experience and knowledge of the employees' duties. These determinations would have to be included in the company policy required under the new appendix J and would be subject to FAA review.

The specific prohibitions are:

Alcohol Concentration: The NPRM proposes to establish that a covered

employee would be in violation of the rule with an alcohol concentration of .04 or greater. A concentration of .04 is consistent with the FAA's current regulations regarding alcohol use by crewmembers, and is based on research conducted by the FAA and other DOT agencies into the impairing effects of different amounts of alcohol. Unlike the FAA's present regulatory provisions, however, the proposed rule would also prohibit employers from using an employee to perform a safety-sensitive function if the employee's test result was .02 or greater, but less than .04, until either the employee's next duty period if at least 8 hours has elapsed or the employee is tested again within the 8 hours and has a test result below .02.

Performance of covered functions while under the influence of alcohol: As noted above, the FAA's current regulations prohibit any person from acting or attempting to act as a crewmember while under the influence of alcohol. The FAA's experience in enforcing this provision indicates that it is a useful tool in preventing alcohol misuse. Therefore, the FAA proposes to adopt a similar prohibition in this rule. While the FAA does not propose to specifically define "under the influence," preferring rather to leave open case-by-case analysis, the FAA notes that the proposed rule does provide that "under the influence" would have to be shown by behavior or appearance characteristic of alcohol misuse, or by an adverse effect on the employee's ability to perform his or her assigned functions. Further, if an employer determined that sufficient evidence existed to believe the employee to be under the influence of alcohol, the employer would be required to administer a reasonable suspicion test.

The FAA recognizes that an "under the influence" provision would impose a subjective standard on covered employees and that that standard may in the rare case provide supervisors or employers with a means to harass or unfairly stigmatize employees. It is the intent of the FAA, therefore, that use of this provision to impose sanctions under this rule would be limited to the unusual situation in which an employer could not administer a reasonable suspicion test. The indicators of alcohol misuse are commonly recognized and a reasonable suspicion test supported by such indicators, with a result indicating an alcohol concentration of .04 or greater, would provide the employer with objective, rather than subjective, evidence of alcohol misuse on which to take action.

The FAA has considered whether to permit an employer to take action under this rule against a covered employee for violating the under the influence provision even if an alcohol test result indicated an alcohol concentration below .04. The FAA in no way proposes to limit the employer's authority to remove the employee from the performance of safety-sensitive duties if the employer believed, notwithstanding an alcohol test result, that the employee was impaired (and, in fact, the employer would be required to remove the employee, at least temporarily, if the employee's alcohol concentration was .02 or greater but less than .04). However, to prevent any possibility of harassment and in light of the fact that the FAA has proposed a comprehensive alcohol testing program, the FAA has determined that employers should not be permitted to take other action under this rule for alleged impairment that is not supported by the test result when a test is administered. Any such action would have to be under the employer's independent authority.

On-Duty Use

It is the FAA's intent that this provision would apply to any covered employee who, while not actually performing a safety-sensitive function, could be called at any time to perform. Such an employee (for example, a supervisor) would have to refrain from using alcohol or would be in violation of this provision.

Pre-Duty Use

This notice proposes a two-tiered prohibition with respect to pre-duty use of alcohol. As noted above, the FAA already prohibits any person from acting or attempting to act as a crewmember within 8 hours after the consumption of any alcoholic beverage. This prohibition applies to all persons, including those in general aviation. It was based on a determination by the FAA that a specified period of abstinence would decrease the likelihood that an individual would be impaired by alcohol while acting as a crewmember. (Many air carriers voluntarily impose a longer abstinence period for their crewmembers.) The FAA is aware that individuals who drink to excess may still be impaired even after abstaining for 8 hours; however, the 8-hour rule establishes an adequate behavioral limitation for the majority of persons who are not heavy drinkers. The FAA has determined that the 8-hour limit remains appropriate for crewmembers, and proposes to include a similar prohibition under this rule. This provision would, to some extent, duplicate the restrictions in 14 CFR 91.17(a), but would be limited in application to the covered employees of the specified employers under the rule. Additionally, the rule would prohibit the employers from using covered employees who have impermissibly used alcohol—a restriction that does not currently exist in the FAA's regulations.

The FAA proposes a 4-hour pre-duty use limitation on the remaining classes of covered employees. Imposition of an 8-hour rule on all covered employees could have a safety benefit; however, the FAA is concerned that the nature of the safety-sensitive functions other than crewmember duties are sufficiently different that an 8-hour limitation on pre-duty use of alcohol for those classes could constitute an unwarranted intrusion by the Federal government into the off-duty life of aviation industry employees.

The FAA is asking for comment on whether covered employees performing safety-sensitive functions other than crewmember duties should be subject to a pre-duty alcohol use limitation. If so, how long should the period be; if not, why not?

Use Following An Accident

Under the proposed rule, a covered employee with actual knowledge of an accident involving an aircraft for which he or she performed a safety-sensitive function at or near the time of the accident would be required to refrain from using alcohol for 8 hours unless the employee had been given a post-accident test or the employer had determined that the employee's performance could not have contributed to the accident. The restriction on use, as proposed, would primarily affect those employees whose performance of duties may have contributed to the accident and whose consumption of alcohol prior to the time of the accident would be relevant information that should not be masked by post-accident consumption. While the prohibition would be imposed on covered employees, employers would be encouraged to attempt to control the actions of the affected employees as circumstances permit.

Refusal to Submit to a Required Alcohol Test

A refusal to submit to random, post-accident, reasonable suspicion, or follow-up testing would be, in addition to a rule violation (as discussed in the common preamble), a potential basis for the denial, suspension, or revocation of a certificate issued under 14 CFR part 61, 63, or 65. The inclusion of such provisions is necessary both to deter

noncompliance with the rule and to emphasize the important role that testing plays in increasing aviation safety. The FAA does not propose to attach any consequences other than preclusion from performing a safety-sensitive function to an individual's choice not to submit to pre-employment/pre-duty or return to duty testing.

Required Alcohol Testing

As previously mentioned, under the proposed rule aviation employees who perform safety-sensitive functions for certain employers would be subject to several types of alcohol testing: pre-employment/pre-duty, post-accident, random, reasonable suspicion, and return to duty and follow-up (after engaging in prohibited conduct or refusing to submit to required testing). Additionally, a covered employee who had an alcohol concentration of .02 or greater but less than .04 on any test would have to undergo another test if the employer wanted to permit the employee to perform a safety-sensitive function within 8 hours of the first test. All testing would have to be conducted using the DOT-wide procedures for alcohol testing contained in proposed amendments to 49 CFR part 40 issued by OST this day. The procedures would be incorporated by reference into the FAA's rule.

Pre-Employment/Pre-Duty Testing

The procedures and rationale for pre-employment/pre-duty alcohol testing are addressed in the OST common preamble.

The FAA is requesting specific comment on whether the proposed procedure for using the results of prior pre-employment/pre-duty alcohol tests is useful. It is particularly interested in knowing whether employers would be likely to use this option, whether they would hesitate to use another employer's result, and whether the need to obtain prior test results and the other required evidence would make the option too burdensome to provide a real benefit to employers.

Post-Accident Testing

The FAA's current anti-drug rule requires post-accident testing for drug use, and the proposed alcohol misuse rule includes an analogous provision for alcohol testing. The triggering event for such testing would be the same as in the anti-drug rule. Similarly, the employees subject to testing would be the same—covered employees whose performance of safety-sensitive functions either contributed to an accident or cannot be completely discounted as a contributing factor. Additionally, the purpose of this testing would be the same as under the anti-drug rule: to determine if an employee should be removed from the performance of safety-sensitive functions.

Since alcohol passes through the human system quickly, testing would have to occur within a short time following the accident. An employer who was unable to conduct a timely post-accident test would have to submit an explanatory report to the FAA.

Random Testing

As required by the Act, the proposed rule includes random alcohol testing for covered employees. The FAA has tailored the testing to ensure that testing reasonably serves the FAA's interest in aviation safety. Selection procedures like those in current FAA-approved anti-drug plans would have to be used to ensure randomness of testing.

The anti-drug rule included a "moonlighting" provision for employees working for multiple employers because random drug testing can take place at any time the employee is at work, is intended to detect any drug use, and can detect drug use that may have occurred substantially prior to the test. Because random alcohol testing would be tied to the performance of safety-sensitive functions (and the misuse of alcohol at or near the time of performance), employees who work for more than one employer would have to be in the random testing pool of each employer.

Reasonable Suspicion Testing

The anti-drug rule contains a provision for "reasonable cause" testing of employees who may have used illegal drugs. This proposed rule, like the Act, refers to reasonable suspicion testing; however, the same type of testing is meant by both terms. The FAA recognizes that logistical requirements associated with obtaining an alcohol test may cause some delay in administration of the test and that employers will not maintain or have immediate access to testing equipment at every location where reasonable suspicion testing may have to be conducted. While reasonable suspicion testing should be conducted as close in time as possible to the time of the observations, factors such as being at a remote location or air carrier outstation or having to delay testing while waiting to use equipment shared with another employer would be considered in determining if the timing of a test comported with requirements of the rule. Further, the FAA realizes that a delay in excess of 2 hours from the time of the observations on which the decision to test was made would cause the alcohol concentration determined by the test to decline and possibly drop below .04 or .02.

In some situations, where an unavoidable delay would vitiate the usefulness of a test, it could be appropriate for the employer to take action based on the employee being under the influence of alcohol rather than attempt to obtain an essentially irrelevant test result. The FAA would review each such situation to determine whether the facts supported the employer's determination that it was unable, without substantial difficulty or cost, to conduct a timely reasonable suspicion test.

In the anti-drug rule, the FAA required part 121 and large part 135 certificate holders to have two supervisors, at least one of whom was trained in the detection of drug use, substantiate and concur in the decision to conduct a reasonable cause drug test. All other covered employers could conduct a test if one trained supervisor substantiated the decision to test. Under this proposed rule, a reasonable suspicion alcohol test could be conducted by any employer based on the observations of one supervisor who has been trained in the detection of the symptoms of alcohol misuse.

Return to Duty and Follow-Up Testing

The specific requirements for these types of tests are discussed in the OST common preamble.

Retesting After Result of .02 or Greater But Less Than .04

Retesting under this provision was previously discussed in the context of the proposed alcohol concentration prohibitions. The FAA is seeking comment on whether the proposed "retest or return" procedure gives employers enough flexibility (or too much) in handling covered employees with low-level alcohol concentrations.

Recordkeeping and Reporting; Confidentiality

This rule would require employers to maintain detailed records related to their alcohol misuse prevention programs, including records of alcohol tests performed under this rule. The records would have to be maintained in a secure location and could be released only as required under the rule or with the express written consent of the employee.

The FAA is aware that some employers have hesitated to release information related to drug test results to subsequent employers. Under the anti-drug rule, such releases are based on the general permissive authority

given to employers to release information upon the written consent of the employee. This rule would require the release of employee-specific information to a subsequent employer if the original employer receives a written request from the employee. Providing a regulatory mandate for such release and removal of employer discretion should relieve employers' concerns about possible litigation.

The rule would also provide express authority to the FAA to conduct on-site inspections of employer's alcohol programs, including the alcohol testing process. The FAA's experience with compliance monitoring under the anti-drug rule has indicated that the individuals managing employers' programs are frequently persons with human resources or administration backgrounds. These people often have had no experience with other FAA inspections (*e.g.*, flight standards) and are often unaware of the FAA's authority to conduct such inspections. While the Administrator or his designee has such authority even absent a regulatory provision, the FAA determined that inclusion of such a provision in this rule would be appropriate to ensure industry awareness of the FAA's authority to monitor compliance.

Finally, the reporting of statistical information by employers (and other planholders) is an essential tool for monitoring compliance with the rule. Although the anti-drug rule requires both semi-annual and annual reporting, the FAA's experience with these reports indicates that annual reporting is sufficient to ensure that the FAA can adequately monitor the rule. This NPRM therefore proposes only annual reporting.

Consequences of Engaging in Misuse of Alcohol or Refusing To Submit to Testing

The Omnibus Transportation Employee Testing Act of 1991 (the Act) amended the Federal Aviation Act of 1958 (the FAAct) and the statutes that apply to the Federal Railroad Administration, the Federal Highway Administration, and the Federal Transit Administration. While these amendments have much common language, especially in the area of testing, they are not identical. Of greatest significance, the amendments to the FAAct contain a section entitled "Prohibition on Service," which does not appear in the amendments to the other modes' statutes.

The "Prohibition on Service" section is found at new FAAct section 614(b). Under subsection 614(b)(1), an individual may not remain on duty in a safety-sensitive function if he or she has violated the prohibitions on the use of alcohol. This legislative provision on continued duty is reflected in each of the subsections of the FAA's proposed rule addressing prohibited conduct (see, *e.g.*, proposed 14 CFR 65.46a). Each proposed section states either directly or by implication that the employee may not report for duty or remain on duty requiring the performance of safety-sensitive functions while engaging in conduct prohibited by the rule. These sections further provide that no employer who has actual knowledge that an employee is in violation of the rule may permit the employee to perform or continue to perform safety-sensitive functions. Additionally, proposed appendix J, section V, paragraph A would expressly prohibit an employee who has engaged in conduct prohibited by the rule from performing safety-sensitive functions. This section, consistent with the proposed rules of the other DOT OAs, would also require removal from duty for refusal to submit to a required alcohol test.

Section 614(b)(2) of the FAAct, "Effect of Rehabilitation," states that no covered employee may perform a safety-sensitive function after engaging in prohibited conduct unless he or she has completed a rehabilitation program under the provisions of section 614(c) of the FAAct. Section 614(c)(1) requires the Administrator to prescribe regulations that provide, at a minimum, for the identification of employees in need of assistance in resolving problems with misuse of alcohol. Further, the section gives the Administrator the authority to determine the circumstances under which such employees would be required to participate in any required rehabilitation. The provisions recognize that rehabilitation may not be appropriate or warranted in all cases of prohibited conduct.

The legislative requirement of section 614(b)(2) is implemented in proposed appendix J, section V, paragraph E, "Required evaluation." This proposed section would require that the employee be evaluated in accordance with proposed section VI of the appendix prior to performing covered functions. The evaluation process is discussed further below.

The proposed rule contains a provision, analogous to the one in the anti-drug rule, under which employers would be required to notify the Federal Air Surgeon of any instance in which a holder of a part 67 medical certificate violated the provisions of the rule or refused to submit to a required alcohol test (with the exception of pre-employment/pre-duty tests). The employer would also have to forward to the FAA copies of the evaluations conducted by the SAP. The Federal Air Surgeon would use this information to determine whether further action should be taken with respect to the medical certificate. No such employee could return to the performance of safety-sensitive functions without the Federal Air Surgeon's recommendation.

Section 614(b)(3) of the FAAct, "Performance of prior duties prohibited," provides sanctions for employees who engage in prohibited use of alcohol after the date of the Omnibus Transportation Employee Testing Act. This subsection is found only in the amendments to the FAAct and has no parallel in the amendments to the other modes' statutes. It provides that, under certain circumstances discussed below, an individual shall not be permitted to perform the duties related to air transportation that he or she performed prior to the date he or she engaged in the impermissible use of alcohol. The legislation does not require that the individual's employment be terminated, nor that he or she be reassigned to perform non-safety-sensitive functions. However, it is an absolute bar to the performance of the same duties the employee performed before the violation.

This bar applies under four circumstances. The first occurs if the individual misuses alcohol "while on duty." The remaining prohibitions all relate to rehabilitation: the absolute bar to returning to duty applies if an employee misuses alcohol after the date of enactment, and

1. Had previously misused alcohol and undergone a program of rehabilitation under the regulations promulgated pursuant to the Act;
2. Refused to undertake any required rehabilitation; or
3. Failed to complete any required rehabilitation.

The proposed rule would implement the prohibitions in two ways. First, proposed appendix J, section V, paragraph B, "Permanent disqualification for service" would prohibit an employee who has engaged in prohibited conduct from performing safety sensitive functions if the employee violated the on-duty use prohibition or if the employee twice violated the provisions of the rule after its effective date. As drafted, this bar would apply to the performance of any safety-sensitive function. Although this bar would be more extensive than that required by the Act, the FAA believes

that the alternative of a narrow bar would lead to anomalous results; for example, a person might be barred from performing screening duties but could serve as a pilot. Additionally, the bar on two-time violators would apply both to persons who had gone through rehabilitation and to those who, after evaluation by a SAP, were determined not to need treatment. Otherwise, an employee who was found to need treatment and had an instance of recidivism would be sanctioned, but an employee who did not need assistance but simply chose to engage in misuse of alcohol would not be sanctioned.

Second, the bar following a refusal or failure of rehabilitation would be implicitly implemented by the requirement that prior to returning to duty performing safety-sensitive functions each employee must be evaluated by an SAP to determine whether the employee properly met the requirements for rehabilitation established during the initial evaluation. An employee who did not meet the requirements, whether by failure or refusal, would be precluded from returning to the performance of safety-sensitive functions. The FAA has chosen, however, not to propose a definite time period during which the employee must comply. The rule would thus allow for the denial phase that most people go through when first confronted with evidence of an alcohol problem.

Alcohol Misuse Information and Training

Unlike the FAA's current anti-drug program, this NPRM does not propose to require training for covered employees, other than for supervisors who would make reasonable suspicion testing determinations. Whereas the dangers posed by various drugs and the indicators of use of the different drugs are not widely recognized, the hazards and indicators of alcohol misuse are a matter of common knowledge. Therefore, basic alcohol awareness training appears to be unnecessary. With respect to supervisors who would direct reasonable suspicion tests, however, the FAA believes that the rule should include a training requirement. This training would be sufficiently detailed to ensure that reasonable suspicion testing is directed only on specific bases meeting the requirements of this rule.

The FAA is specifically seeking comment on whether the rule should include alcohol awareness training for all employees.

Employee Referral, Evaluation, and Treatment

In drafting the proposed rule, representatives from other OAs and the FAA gave considerable thought to the issue of rehabilitation of employees who engage in alcohol misuse. During the rulemaking on the anti-drug rule, the FAA received comments from industry, labor organizations, and others stressing the sometimes conflicting needs of employer flexibility and employee health. In the end, the FAA was largely silent on the issue of rehabilitation. Although, as discussed above, the Act does address the need for rehabilitation, it has left to the discretion of the Administrator the method for approaching that need.

The FAA has chosen not to prescribe regulations with respect to specific types of rehabilitation. Rather, it is proposing a process under which each covered employee who engages in alcohol misuse or who refuses to submit to testing would be advised of all resources available to the employee. Further, each such employee would be evaluated by a SAP who would determine whether and what assistance the employee needed in resolving problems associated with alcohol misuse. Whether the employer would provide any required treatment or would hold a position open for the employee upon completion of the treatment would be a matter for employer/employee negotiation.

Employer Alcohol Misuse Prevention Program Plans

The FAA proposes to include a requirement that employers submit alcohol misuse prevention program (AMPP) plans to the FAA for approval prior to implementation of a program under the rule. The plan approval process was used during the implementation of the anti-drug rule and proved invaluable in assisting the industry in establishing programs and educating the industry about the requirements of the rule. Additionally, the plan submission requirement provided the FAA with the ability to readily determine which companies were failing or refusing to comply with the rule. The FAA also uses the plans in its ongoing compliance and enforcement efforts.

Under the proposed alcohol misuse rule, the FAA would require that the plans be submitted by certified mail, return receipt requested. With the exception of consortia core plans, the plans would be deemed approved by the FAA 60 days after the date on the receipt unless the FAA notified the plan submitter otherwise.

The elements that would be required in the plans include the AMPP manager; the type of evidential breath testing (EBT) device to be used for testing; the person or company that will be collecting breath specimens; and the person or company that will be providing EBT maintenance and breath alcohol technician training. The plan would also identify the SAP and include certification that the plan submitter agreed to comply with the provisions of the alcohol misuse prevention regulations.

As mentioned above, the FAA proposes to permit companies whose employees perform covered services by contract to an employer to establish independent alcohol misuse prevention programs. Contractor companies would be able to submit plans directly to the FAA for approval and to implement approved plans for their own employees. Each plan submitter, whether a contractor company or an employer, would be responsible for maintaining a program in accordance with the approved plan and the final rule. A contractor company, for example, would be required to maintain the confidentiality of records pertaining to its employees and could disclose such records only in accordance with the rule. The FAA's experience with the anti-drug program indicates that permitting contractor companies to manage their own programs is generally the most efficient method through which to ensure coverage of contractor employees. As with the anti-drug program, the FAA would exercise control over the contractor companies that establish programs by retaining the ability to revoke the plan approval of any contractor company that fails to properly implement its approved AMPP plan. Because employers would be able to use only contractor employees who were subject to an FAA-approved program, potential revocation of such approval would provide a strong incentive to contractor companies to properly implement their programs.

The FAA also proposes to permit employers and contractor companies to join consortia for purposes of complying with the rule. The proposed consortia system, which is based on the system developed under the anti-drug rule, would require an entity (or a group of employers/contractors) to develop a core program and submit a plan to the FAA for approval. The core program would have to contain all of the operational elements of the plan. Once the FAA approved the core program, the consortium would be able to seek

clients ("riders"). Both the client and the consortium would submit a rider plan to the FAA, which would essentially just identify the employer/contractor company program manager and include a certification by both the consortium and the client that each understands its responsibilities under the proposed rule.

Although the preparation of plans by the industry and review of the plans by the FAA could be somewhat burdensome, the FAA has found in its anti-drug program that the utility of these plans more than offsets any burden.

Phased Implementation

The NPRM includes a proposed schedule for phased implementation of the AMPP for the aviation industry. For each class of employers, the rule would require plan submission by a certain date and implementation of the approved plan 6 months later. Employers would have 8 months after their specified plan submission date to ensure that contractor employees are subject to an approved program. Part 121 and large part 135 certificate holders (more than 50 covered employees) and air traffic control facilities would be required to comply with the rule first, with implementation proposed to occur 12 months after the effective date of the rule. Part 135 certificate holders with 11 to 50 covered employees would be in the second phase of implementation (18 months after the effective date), with small part 135 certificate holders and § 135.1(c) operators in the last phase (24 months after the effective date of the final rule).

The FAA used phased implementation in establishing the anti-drug program, and found it to be the most efficient method through which to ensure that the industry had adequate time to comply with the rule and that the FAA had sufficient resources to review the required plans. Although implementation of this rule would be phased over two years, the actual process of implementation should be facilitated by the experience the FAA and the industry with implementation of the anti-drug rule. Virtually all of the employers who would be subject to this rule are also subject to the anti-drug rule and have experience in establishing and maintaining testing and training programs. While the operational aspects of this rule would be somewhat different from those of the anti-drug rule, the time to comply as currently contemplated in the NPRM should be more than sufficient.

The FAA invites comment on the proposed implementation schedule, especially with respect to any specific difficulties the industry foresees could impede implementation of the rule.

Employees Located Outside the U.S.

As proposed, this rule would apply to direct employees of U.S. air carriers who perform safety-sensitive functions outside the U.S. after January 2, 1995. The rule would not permit testing of such employees, however, if the FAA receives written documentation from an employer demonstrating that such testing would be inconsistent with the laws and regulations of the country in which the testing would occur. Employers would have to submit copies, in English, of applicable laws and regulations. It is within the purview of this agency to regulate the conduct of direct employees of holders of FAA-issued operating certificates, regardless of the location of the employees. However, the FAA is mindful of the fact that employee testing is impermissible in many countries, and does not wish to pose an impossible burden on its regulated employers. The delayed effective date of the rule should permit adequate time for employers to determine whether alcohol testing comports with the laws and regulations of the countries in which its employees are located.

Paperwork Reduction Act Approval

Proposed appendix J to part 121 would require each employer to submit to the FAA: An alcohol misuse prevention program plan for approval by the FAA; notification to the FAA of alcohol misuse by holders of airman medical certificates issued under 14 CFR part 67; notification to the FAA of refusals to submit to alcohol testing by holders of airman certificates issued under 14 CFR parts 61, 63, and 65; and annual statistical reports summarizing data on the employer's alcohol misuse prevention program. To provide the notifications and reports to the FAA, employers will be required to maintain records related to each covered employee, including test results.

In accordance with the Paperwork Reduction Act of 1980 (Pub. L. 96–511), the recordkeeping and reporting requirements proposed in this notice will be submitted to the Office of Management and Budget (OMB) for approval. Comments on these requirements should be submitted to the Office of Information and Regulatory Affairs (OMB), New Executive Office Building, room 3001, Washington, DC 20503; attention: FAA Desk Officer. A copy should be submitted to the FAA docket. Commenters should especially provide their views on the accuracy of the FAA's estimate of the burdens associated with these requirements, the practical utility of the information to be obtained, and less burdensome reporting alternatives to those proposed in this notice. The following is a synopsis of the assessment of the paperwork burden associated with this notice:

Title: Alcohol Misuse Prevention Program for Personnel Engaged in Specified Aviation Activities.
Need For Information: The information is needed to respond to regulations promulgated in accordance with the Omnibus Transportation Employee Testing Act of 1991, enacted on October 28, 1991.
Proposed Use of Information: The information submitted is intended to be the basis for monitoring industry implementation of and compliance with the FAA Alcohol Misuse Prevention Program. The information will also be used to evaluate the effectiveness of the program.
Frequency:
Alcohol Misuse Prevention Program Plan: One time submission for FAA approval (followed by any necessary amendments to the approved plan if any changes or revisions occur).
Notification of Refusals/Alcohol Misuse: As required.
Statistical Report: Annual.
Burden Estimate: 23,862.
Respondents: Specified aviation employers.
Average Burden, Hours/Respondent/Year: 4.

Economic Summary

This section summarizes a full regulatory evaluation prepared by the FAA and contained in the docket that provides detailed estimates of the economic consequences of this regulatory action. In addition to a summary of the regulatory evaluation, this section also contains a regulatory flexibility determination required by the Regulatory Flexibility Act of 1980 (Pub.L. 96–354) and an international trade impact assessment.

Costs

The FAA calculated costs for three random testing scenarios: 10 percent, 25 percent, and 50 percent. The total costs of testing for all occupational categories for these scenarios have a net present value, over ten years, of $29.9 million, $41.6 million, and $60.8 million, respectively. In addition to testing costs, there are also costs associated with short-notice replacement of employees

who misuse alcohol and evaluating these employees. Adding the testing and follow-up costs, the total ten year discounted costs for the 10 percent random testing scenario, the 25 percent random testing scenario, and the 50 percent random testing scenario total $34.1 million, $46.6 million, and $66.6 million, respectively.

Benefits

The FAA believes that major benefits would accrue from these proposals. The first is the prevention of potential injuries and fatalities and property losses resulting from accidents attributed to alcohol misuse. The second is the potential reduction in absenteeism, lost worker productivity, and medical costs, and improved general safety in the work place resulting from the deterrence of alcohol misuse.

The FAA has estimated that the cost of human fatalities in the event of an accident could be as high as $160.5 million. The estimated cost of a National Transportation Safety Board (NTSB) accident investigation is $1.2 million. Therefore, if this proposed rule prevents one accident attributed to alcohol-impaired performance by a person who performs sensitive safety-related functions in commercial aviation during the 10-year period from 1993 to 2002, discounted benefits of $107.4 million could be realized.

The FAA estimates that productivity gains of $44.7 million, $50.7 million, and $59.6 million, discounted over ten years, would accrue to the aviation industry from the reduction of alcohol misuse, for the 10 percent, 25 percent, and 50 percent random testing scenarios, respectively.

Consequently, the total quantifiable discounted benefits that are expected to result from promulgation of the proposed rule amount to $152.1 million, $158.1 million, and $167.0 million, discounted, over ten years, for the 10 percent, 25 percent, and 50 percent random testing scenarios, respectively.

Cost/Benefit Analysis

Given the costs and benefits discussed above, as summarized in the following table, the FAA finds that all three random testing scenarios are cost beneficial (all costs discounted over ten years):

	10% random	25% random	50% random
Costs	$34.1 mil	$46.6 mil	$66.6 mil.
Benefits	152.2 mil	158.1 mil	167.0 mil.
Benefit/Cost Ratio	4.47	3.40	2.51
Net Benefits	118.1 mil	111.5 mil	100.4 mil.

Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 (RFA) was enacted by Congress to ensure that small entities are not unnecessarily burdened by government regulations. The RFA requires agencies to review rules that may have a "significant economic impact on a substantial number of small entities."

Under FAA Order 2100.14A, the criterion for a "substantial number" is a number that is not less than 11 and that is more than one third of the small entities subject to the rule. For operators of aircraft for hire, a small operator is one that owns, but not necessarily operates, nine or fewer aircraft. The FAA's criteria for "significant impact" are $4,330 or more per year for an unscheduled operator, $111,250 or more per year for a scheduled operator whose entire fleet is made up of airplanes with over 60 seats, and $62,170 or more per year for other scheduled carriers.

This proposed rule would primarily affect holders of certificates issued under parts 121 and 135. The FAA calculated estimated compliance costs for small part 121 and 135 operators owning 9 aircraft. Although the average small operator owns 4 aircraft, this analysis assumes 9 aircraft as a worst case scenario. For a part 121 small operator, the annual costs are expected to be $8,649, for part 135 Scheduled, $3,164, and for part 135 Unscheduled, $1,649. Accordingly, the annual costs expected to be imposed on such small operators would not exceed the thresholds for significant impact outlined above. Therefore, the FAA finds that this proposed rule would not have a significant economic impact on a substantial number of small entities.

International Trade Impact Analysis

The FAA finds that this proposed rule would affect all part 121 and part 135 air carriers. All safety-sensitive part 121 and part 135 employees would be covered. The FAA finds that this proposed rule would not have an adverse impact on trade opportunities for either U.S. firms doing business overseas or foreign firms doing business in the United States. While there would be increased costs to carriers as a consequence of this proposed rule, these costs would be offset by the benefits summarized above and an increase in public confidence.

Federalism Implications

The rule proposed herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, the FAA has determined that this proposal does not have sufficient federalism implications to warrant preparation of a Federalism Assessment.

Significance

This proposed rule, if adopted, is not likely to result in an annual effect on the economy of $100 million or more, although it may result in an increase in costs for consumers, industry, or Federal, State, or local agencies. Although the proposed rule is not "major" as defined in Executive Order 12291, the FAA has determined that this proposal involves issues of substantial interest to the public. Therefore, the FAA has determined that the NPRM is significant under the Regulatory Policies and Procedures of the Department of Transportation (44 FR 11034; February 2, 1979).

A draft Regulatory Impact Analysis of the proposed rule has been placed in the regulatory docket. A copy may be obtained by contacting the person identified under "FOR FURTHER INFORMATION CONTACT."

Cross-Reference Table

As noted above, a number of DOT agencies in addition to the FAA are publishing notices of proposed rulemaking in today's Federal Register, all of which are introduced by a common preamble prepared by OST. The following cross-reference table identifies the relevant provision of the FAA's NPRM by the subject heading used in the DOT preamble and the location of each provision in the FAA's proposed rule.

Subject heading	FAA NPRM
	(References are to (new) appendix J to 14 CFR part 121, unless noted).
General:	
Purpose	Section I, paragraph A.
Applicability	Sec I, para C (definition of employer); also: 14 CFR 65.46a(a). 14 CFR 121.458(a). 14 CFR 135.253(a).
Alcohol Testing Procedures	Sec I, para B.
Definitions	Sec I, para C.
Preemption	Sec I, para D.
Other Requirements Imposed by Employers.	Sec I, para E.
Requirement for Notice	Sec I, para F.
Starting Dates for Alcohol Testing Programs.	Sec VII, para A(Schedule for submission of plans and implementation).
Prohibited Conduct:	
Alcohol Concentration	14 CFR 65.46a(b). 14 CFR 121.458(b). 14 CFR 135.253(b).
Behavior or Appearance	14 CFR 65.46a(c). 14 CFR 121.458(c). 14 CFR 135.253(c). (Under the influence of Alcohol).
On-duty Use	14 CFR 65.46a(d). 14 CFR 121.458(d). 14 CFR 135.253(d).
Pre-duty Use	14 CFR 65.46a(e). 14 CFR 121.458(e). 14 CFR 135.253(e).
Use Following an Accident	14 CFR 65.46a(f). 14 CFR 121.458(f). 14 CFR 135.253(f).
Refusal to Submit to a Required Alcohol Test.	14 CFR 65.46a(g). 14 CFR 121.458(g). 14 CFR 135.253(g).
Tests Required:	
Pre-employment/pre-duty	Sec III, Para A.
Post-accident	Sec III, Para B.
Random	Sec III, para C.
Reasonable Suspicion	Sec III, para D.
Return to Duty	Sec III, para E.
Follow-up	Sec III, para F.
Retesting • • • .02 or Greater • • •	Section III, para G.
Handling of Test Results, Record Retention, and Confidentiality:	
Retention of Records	Sec IV, para A.
Reporting of Results	Sec IV, para B.
Access to Facilities and Records.	Sec IV, para C.
Consequences for Employees Engaging in Alcohol-Related Conduct:	
Removal from Safety-Sensitive Function.	Sec V, para A.
Required Evaluation and Testing.	Sec V, para E.
Other Alcohol-Related Conduct	Sec V, para F.
Alcohol Misuse Information, Training, and Referral:	
Employer Obligation to Promulgate a Policy.	Sec VI, para A.
Training for Supervisors	Sec VI, para B.
Referral, Evaluation, and Treatment.	Sec VI, Para C.
Major Additional Provisions in FAA NPRM:	
Refusal to Submit to a Drug or Alcohol Test (certificate action).	14 CFR 61.14. 14 CFR 63.12b. 14 CFR 65.23.
Testing for Alcohol	14 CFR 65.46(b). 14 CFR 121.459. 14 CFR 135.255.
Covered Employees	Sec II.
Permanent Disqualification for Service.	Sec V, para B.
Notice to the Federal Air Surgeon.	Sec V, para C.
Notice of Refusals	Sec V, para D.
Employer's Alcohol Misuse Prevention Program Plan.	Sec VII.
Employees Outside the U.S	Sec VIII.

List of Subjects

14 CFR Part 61

Air safety, Air transportation, Aircraft, Aircraft pilots, Airmen, Alcohol, Alcoholism, Aviation safety, Safety, Transportation.

14 CFR Part 63

Air safety, Air transportation, Aircraft, Airmen, Alcohol, Alcoholism, Aviation safety, Safety, Transportation.

14 CFR Part 65

Air safety, Air traffic, Air transportation, Aircraft, Airmen, Alcohol, Alcoholism, Aviation safety, Safety, Transportation.

14 CFR Part 121

Air carriers, Air transportation, Aircraft, Aircraft pilots, Airmen, Airplanes, Alcohol, Alcoholism, Aviation safety, Pilots, Safety, Transportation.

14 CFR Part 135

Air carriers, Air taxi, Air transportation, Aircraft, Airmen, Airplanes, Alcohol, Alcoholism, Aviation safety, Pilots, Safety, Transportation.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR parts 61, 63, 65, 121, and 135 as follows:

PART 61—CERTIFICATION: PILOTS AND FLIGHT INSTRUCTORS

1. The authority citation for part 61 is revised to read as follows:

Authority: 49 U.S.C. 1354(a), 1355, 1421, 1422, and 1427 (revised, Pub. L. 102–143, October 28, 1991); 49 U.S.C. 106(g) (revised, Pub. L. 97–449, January 12, 1983).

2. Section 61.14 is revised to read as follows:

§ 61.14 Refusal to submit to a drug or alcohol test.

(a) This section applies to an employee who performs a function listed in appendix I or appendix J to part 121 of this chapter directly or by contract for a part 121 certificate holder, a part 135 certificate holder, or an operator as defined in § 135.1(c) of this chapter.

(b) Refusal by the holder of a certificate issued under this part to take a drug test required under the provisions of appendix I to part 121 or an alcohol test required under the provisions of appendix J to part 121 is grounds for—

(1) Denial of an application for any certificate or rating issued under this part for a period of up to 1 year after the date of such refusal; and

(2) Suspension or revocation of any certificate or rating issued under this part.

PART 63—CERTIFICATION: FLIGHT CREWMEMBERS OTHER THAN PILOTS

3. The authority citation for part 63 is revised to read as follows:

Authority: 49 U.S.C. 1354(a), 1355, 1421, 1422, 1427, 1429, and 1430 (revised, Pub. L. 102–143, October 28, 1991); 49 U.S.C. 106(g) (revised, Pub. L. 97–449, January 12, 1983).

4. Section 63.12b is revised to read as follows:

§ 63.12b Refusal to submit to a drug or alcohol test.

(a) This section applies to an employee who performs a function listed in appendix I or appendix J to part 121 of this chapter directly or by contract for a part 121 certificate holder, a part 135 certificate holder, or an operator as defined in § 135.1(c) of this chapter.

(b) Refusal by the holder of a certificate issued under this part to take a drug test required under the provisions of appendix I to part 121 or an alcohol test required under the provisions of appendix J to part 121 is grounds for—

(1) Denial of an application for any certificate or rating issued under this

part for a period of up to 1 year after the date of such refusal; and

(2) Suspension or revocation of any certificate or rating issued under this part.

PART 65—CERTIFICATION: AIRMEN OTHER THAN FLIGHT CREWMEMBERS

5. The authority citation for part 65 is revised to read as follows:

Authority: 49 U.S.C. 1354(a), 1355, 1421, 1422, and 1427 (revised, Pub. L. 102–143, October 28, 1991); 49 U.S.C. 106(g) (revised, Pub. L. 97–449, January 12, 1983).

6. Section 65.23 is revised to read as follows:

§ 65.23 Refusal to submit to a drug or alcohol test.

(a) *General.* This section applies to an employee who performs a function listed in appendix I or appendix J to part 121 of this chapter directly or by contract for a part 121 certificate holder, a part 135 certificate holder, an operator as defined in § 135.1(c) of this chapter, or an air traffic control facility not operated by the FAA or the U.S. military.

(b) Refusal by the holder of a certificate issued under this part to take a drug test required under the provisions of appendix I to part 121 or an alcohol test required under the provisions of appendix J to part 121 is grounds for—

(1) Denial of an application for any certificate or rating issued under this part for a period of up to 1 year after the date of such refusal; and

(2) Suspension or revocation of any certificate or rating issued under this part.

7. Section 65.46a is added to read as follows:

§ 65.46a Misuse of alcohol.

(a) This section applies to employees who perform air traffic control duties directly or by contract for an employer that is an air traffic control facility not operated by the FAA or the U.S. military (*covered employees*).

(b) Alcohol concentration. No covered employee shall report for duty or remain on duty requiring the performance of safety-sensitive functions while having an alcohol concentration of .04 or greater. No employer having actual knowledge that an employee has an alcohol concentration of .04 or greater shall permit the employee to perform or continue to perform safety-sensitive functions.

(c) Under the influence of alcohol. Notwithstanding the absence of a reasonable suspicion alcohol test under appendix J to part 121 of this chapter, no covered employee shall report for duty or remain on duty requiring the performance of safety-sensitive functions while the employee is under the influence of or impaired by alcohol, as shown by behavior or appearance characteristic of alcohol misuse or by an adverse effect on the employee's ability to perform his or her assigned functions. No employer having actual knowledge that the employee is in violation of this provision shall permit a covered employee to perform or continue to perform safety-sensitive functions.

(d) On-duty use. No covered employee shall use alcohol while performing safety-sensitive functions. No employer having actual knowledge that a covered employee is using alcohol while performing safety-sensitive functions shall permit the employee to perform or continue to perform safety-sensitive functions.

(e) Pre-duty use. No covered employee shall perform air traffic control duties within 4 hours after using alcohol. No employer having actual knowledge that such an employee has used alcohol within 4 hours shall permit the employee to perform or continue to perform air traffic control duties.

(f) Use following an accident. No covered employee who has actual knowledge of an accident involving an aircraft for which he or she performed a safety-sensitive function at or near the time of the accident shall use alcohol for 8 hours following the accident, unless he or she has been given a post-accident test under appendix J to part 121 of this chapter, or the employer has determined that the employee's performance could not have contributed to the accident.

(g) Refusal to submit to a required alcohol test. No covered employee shall refuse to submit to a post-accident, random, reasonable suspicion, or follow-up alcohol test required under appendix J to part 121 of this chapter. No employer shall permit an employee who refuses to submit to such a test to perform or continue to perform safety-sensitive functions.

8. Section 65.46b is added to read as follows:

§ 65.46b Testing for alcohol.

(a) Each air traffic control facility not operated by the FAA or the U.S. military (hereinafter *employer*) must establish an alcohol misuse prevention program in accordance with the provisions of appendix J to part 121 of this chapter.

(b) No employer shall use any person who meets the definition of *covered employee* in appendix J to part 121 to perform a safety-sensitive function listed in that appendix unless such person is subject to testing for alcohol misuse in accordance with the provisions of appendix J.

PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC, FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT

9. The authority citation for part 121 is revised to read as follows:

Authority: 49 U.S.C. 1354(a), 1355, 1356, 1357, 1401, 1421–1430, 1485, and 1502 (revised, Pub. L. 102–143, October 28, 1991); 49 U.S.C. 106(g) (revised, Pub. L. 97–449, January 12, 1983).

10. Section 121.458 is added to read as follows:

§ 121.458 Misuse of alcohol.

(a) *General.* This section applies to employees who perform a function listed in appendix J to this part for a certificate holder (*covered employees*). For the purpose of this section, a person who meets the definition of covered employee in appendix J is considered to be performing the function for the certificate holder.

(b) *Alcohol concentration.* No covered employee shall report for duty or remain on duty requiring the performance of safety-sensitive functions while having an alcohol concentration of .04 or greater. No certificate holder having actual knowledge that an employee has an alcohol concentration of .04 or greater shall permit the employee to perform or continue to perform safety-sensitive functions.

(c) *Under the influence of alcohol.* Notwithstanding the absence of a reasonable suspicion alcohol test under appendix J to this part, no covered employee shall report for duty or remain on duty requiring the performance of safety-sensitive functions while the employee is under the influence of or impaired by alcohol, as shown by behavior or appearance characteristic of alcohol misuse or by an adverse effect on the employee's ability to perform his or her assigned functions. No certificate holder having actual knowledge that the employee is in violation of this provision shall permit a covered employee to perform or continue to perform safety-sensitive functions.

(d) *On-duty use.* No covered employee shall use alcohol while performing safety-sensitive functions. No certificate holder having actual knowledge that a covered employee is using alcohol while performing safety-sensitive functions shall permit the employee to perform or continue to perform safety-sensitive functions.

(e) *Pre-duty use.* (1) No employee shall perform flight crewmember or flight attendant duties within 8 hours after using alcohol. No certificate holder having actual knowledge that such an employee has used alcohol within 8 hours shall permit the employee to perform or continue to perform the specified duties.

(2) No employee shall perform safety-sensitive duties other than those specified in paragraph (e)(1) of this section within 4 hours after using alcohol. No certificate holder having actual knowledge that such an employee has used alcohol within 4 hours shall permit the employee to perform or continue to perform safety-sensitive functions.

(f) *Use following an accident.* No covered employee who has actual knowledge of an accident involving an aircraft for which he or she performed a safety-sensitive function at or near the time of the accident shall use alcohol for 8 hours following the accident, unless he or she has been given a post-accident test under appendix J of this part, or the employer has determined that the employee's performance could not have contributed to the accident.

(g) *Refusal to submit to a required alcohol test.* No covered employee shall refuse to submit to a post-accident, random, reasonable suspicion, or follow-up alcohol test required under appendix J to this part. No certificate holder shall permit an employee who refuses to submit to such a test to perform or continue to perform safety-sensitive functions.

11. Section 121.459 is added to read as follows:

§ 121.459 Testing for alcohol.

(a) Each certificate holder must establish an alcohol misuse prevention program in accordance with the provisions of appendix J to this part.

(b) No certificate holder shall use any person who meets the definition of *covered employee* in appendix J to this part to perform a safety-sensitive function listed in that appendix unless such person is subject to testing for alcohol misuse in accordance with the provisions of appendix J.

12. Appendix J to part 121 is added to read as follows:

Appendix J to Part 121—Alcohol Misuse Prevention Program

This appendix contains the standards and components that must be included in an alcohol misuse prevention program required by this chapter.

I. General.

A. *Purpose.* The purpose of this appendix is to establish programs designed to help prevent accidents and injuries resulting from the misuse of alcohol by employees who perform safety-sensitive functions in aviation.

B. *Alcohol testing procedures.* Each employer shall ensure that all alcohol testing conducted pursuant to this appendix complies with the procedures set forth in 49 CFR part 40. The provisions of 49 CFR part 40 that address alcohol testing are incorporated by reference into and are made applicable to employers by this appendix.

C. *Definitions.* As used in this appendix—

Accident means an occurrence associated with the operation of an aircraft which takes place between the time any person boards the aircraft with the intention of flight and the time all such persons have disembarked, and in which any person suffers death or serious injury or in which the aircraft receives substantial damage.

Administrator means the Administrator of the Federal Aviation Administration or his or her designated representative.

Alcohol means ethyl alcohol (ethanol).

Alcohol concentration (or content) means the alcohol in a volume of breath expressed in terms of grams of alcohol per 210 liters of breath as indicated by an evidential breath test performed under this appendix. When the indicated alcohol concentration of a covered employee on an initial alcohol test is different from an indicated alcohol concentration on a confirmatory test, and the consequences of the two results would differ under the provisions of this appendix, the lower result shall be considered the final result on which action under this appendix shall be based.

Alcohol use means the use of alcohol include consumption of any beverage, mixture, or preparation, including any medication, containing alcohol.

Confirmatory test means a second analytical procedure, separate from the screening test, to determine the concentration of alcohol in a covered employee's system. The confirmatory test may or may not use a different chemical principle from that of the screening test, but shall employ a scientifically recognized method of testing capable of providing quantitative data regarding alcohol concentration. For specific requirements concerning evidential breath testing devices see 49 CFR part 40.

Consortium means an entity, including a group or association of employers or contractors, that provides alcohol testing as required by this appendix and that acts on behalf of such employers or contractors, provided that it has an alcohol misuse prevention plan approved by the FAA in accordance with this appendix.

Contractor company means a company that has employees who perform safety-sensitive functions by contract for an employer.

Covered employee means a person who performs, either directly or by contract, a safety-sensitive function listed in section II of this appendix for an employer (as defined below). For purposes of pre-employment/pre-duty testing only, the term "covered employee" includes a person applying to perform a safety-sensitive function.

DOT agency means an agency (or "operating administration") of the United States Department of Transportation administering regulations requiring alcohol testing (14 CFR parts 65, 121, and 135; 49 CFR parts 199, 219, and 382) in accordance with 49 CFR part 40.

Employer means a part 121 certificate holder; a part 135 certificate holder; an air traffic control facility not operated by the FAA or the U.S. military; and an operator as defined in 14 CFR 135.1(c).

Initial alcohol test (or screening test) means an analytical procedure to determine whether a covered employee may have a prohibited concentration of alcohol in his or her system.

Performing (a safety-sensitive function): an employee is considered to be performing a safety-sensitive function during any period in which he or she is actually performing, ready to perform, or immediately available to perform such functions.

Refuse to submit (to an alcohol test) means that a covered employee fails to provide adequate breath for testing without a valid medical explanation after he or she has received notice of the requirement to be tested in accordance with this appendix, or engages in conduct that clearly obstructs the collection process.

Safety-sensitive function means a function listed in section II of this appendix.

Substance abuse professional means a licensed physician (Medical Doctor or Doctor of Osteopathy), or a licensed or certified psychologist, social worker, or employee assistance professional with knowledge of and clinical experience in the diagnosis and treatment of alcohol-related disorders.

D. *Preemption of State and local laws.* 1. Except as provided in subparagraph 2 of this paragraph, these regulations preempt any State or local law, rule, regulation, or order to the extent that:

(a) Compliance with both the State or local requirement and this appendix is not possible; or

(b) Compliance with the State or local requirement is an obstacle to the accomplishment and execution of any requirement in this appendix.

2. The alcohol misuse requirements of this title shall not be construed to preempt provisions of State criminal law that impose sanctions for reckless conduct leading to actual loss of life, injury, or damage to property, whether the provisions apply specifically to transportation employees or employers or to the general public.

E. *Other requirements imposed by employers.* Except as expressly provided in these alcohol misuse requirements, nothing in these requirements shall be construed to affect the authority of employers, or the rights of employees, with respect to the use or possession of alcohol, including any authority and rights with respect to alcohol testing and rehabilitation.

F. *Requirement for notice.* Before performing an alcohol test under this appendix, each employer shall notify a covered employee that the alcohol test is required by this appendix. No employer shall falsely represent that a test is administered under this appendix.

II. Covered Employees

Each employee who performs a function listed in this section directly or by contract

for an employer as defined in this appendix must be subject to alcohol testing under an FAA-approved alcohol misuse prevention program implemented in accordance with this appendix. The covered safety-sensitive functions are:

1. Flight crewmember duties.
2. Flight attendant duties.
3. Flight instruction duties.
4. Aircraft dispatcher duties.
5. Aircraft maintenance duties.
6. Ground security coordinator duties.
7. Aviation screening duties.
8. Air traffic control duties.

III. Tests Required

A. *Pre-employment/pre-duty.* 1. Prior to the first time a covered employee performs safety-sensitive functions for an employer, the employee shall undergo testing for alcohol. No employer shall allow a covered employee to perform safety-sensitive functions unless the employee has been administered an alcohol test with a result indicating an alcohol concentration less than .04. If a pre-employment/pre-duty test result under this paragraph indicates an alcohol concentration of .02 or greater but less than .04, the provisions of paragraph F of section V of this appendix apply.

2. An employer is not required to administer an alcohol test as required by this paragraph if:

(a) the employee has undergone an alcohol test required by this appendix or the alcohol misuse rule of another DOT agency within the previous 6 months, with a result indicating an alcohol concentration lower than .04; and

(b) the employer ensures that no prior employer of the covered employee of whom the employer has knowledge has records of a violation of §§ 65.46a, 121.458, or 135.253 of this chapter or the alcohol misuse rule of another DOT agency within the previous 6 months.

B. *Post-accident.* 1. As soon as practicable following an accident, an employer shall test each surviving covered employee for alcohol if that employee's performance of a safety-sensitive function either contributed to the accident or cannot be completely discounted as a contributing factor to the accident. The decision not to administer a test under this section shall be based on the employer's determination, using the best available information at the time of the determination, that the employee's performance could not have contributed to the accident.

2. If a test required by this section is not administered within 2 hours following the accident, the employer shall submit a report to the FAA, Office of Aviation Medicine, Drug Abatement Division (AAM–800), 400 7th Street SW., Washington, DC 20590, stating the reasons the test was not promptly administered. If a test required by this section is not administered within 8 hours following the accident, the employer shall cease attempts to administer an alcohol test and shall submit the same report.

3. A covered employee who is subject to post-accident testing who leaves the scene of an accident without a valid reason prior to submission to such test may be deemed by the employer to have refused to submit to testing. Nothing in this section shall be construed to require the delay of necessary medical attention for injured people following an accident or to prohibit a covered employee from leaving the scene of an accident for the period necessary to obtain assistance in responding to the accident or to obtain necessary emergency medical care.

C. *Random testing.* 1. Each employer shall, at various times, randomly select covered employees for unannounced alcohol testing. The selection of employees shall be made by use of a scientifically valid method, such as a random-number table or a computer-based random number generator that is matched with employees' Social Security numbers, payroll identification numbers, or other comparable identifying numbers. Each covered employee shall have an equal chance of being tested under the selection process used.

2. During each 12 month period following the start of random alcohol testing by the employer, the employer shall meet the following conditions:

(a) The dates for administering unannounced testing of randomly-selected covered employees shall be spread reasonably throughout the 12-month period; and

(b) The number of employees randomly selected for testing during the 12-month period shall equal an annual rate of not less than [10–50] percent of the total number of employees subject to alcohol testing under this appendix or the alcohol misuse rule of another DOT agency. If the employer conducts random testing through a consortium, the annual rate may be calculated for each individual employer or for the total number of covered employees subject to random testing by the consortium.

3. A covered employee shall only be tested while the employee is performing safety-sensitive functions; just before the employee is to perform safety-sensitive functions; or just after the employee has ceased performing such functions.

4. Each employer shall require that each covered employee who is notified of selection for random testing proceeds to the testing site immediately. However, if the employee is performing a safety-sensitive function at the time of the notification, the employer shall instead ensure that the employee ceases to perform the safety-sensitive function and proceeds to the testing site as soon as possible.

D. *Reasonable suspicion testing.* 1. Each employer shall require any covered employee to submit to an alcohol test when the employer has reasonable suspicion to believe that the employee has violated the alcohol misuse prohibitions in §§ 65.46a, 121.458, or 135.253 of this chapter.

2. The employer's determination that reasonable suspicion exists to require the covered employee to undergo an alcohol test shall be based on specific, contemporaneous, articulable observations concerning the appearance, behavior, speech or body odors of the employee. The required observations shall be made by a supervisor who is trained in detecting the symptoms of alcohol misuse. The supervisor who makes the determination that reasonable suspicion exists shall not conduct the breath alcohol test on that employee.

3. Alcohol testing is authorized by this section only if the observations required by paragraph 2 are made during or just preceding the period of the work day that the covered employee is required to be in compliance with this rule. A covered employee may be required to undergo reasonable suspicion testing for alcohol while the employee is performing safety-sensitive functions; just before the employee is to perform safety-sensitive functions; or just after the employee has ceased performing such functions.

E. *Return to duty testing.* Each employer shall ensure that before a covered employee returns to duty requiring the performance of a safety-sensitive function after engaging in conduct prohibited in §§ 65.46a, 121.458, or 135.253 of this chapter, the employee shall undergo a return to duty alcohol test with a result indicating an alcohol concentration of less than .02.

F. *Follow-up testing.* Following a determination under section VI, paragraph C.2 of this appendix that a covered employee is in need of assistance in resolving problems associated with alcohol misuse, each employer shall ensure that the employee is subject to unannounced follow-up alcohol testing as directed by a substance abuse professional in accordance with the provisions of section VI, paragraph C.3(b)(2) of this appendix.

G. *Retesting of covered employees with an alcohol concentration of .02 or greater but less than .04.* Each employer shall retest a covered employee to ensure compliance with the provisions of section V, paragraph F of this appendix, if the employer chooses to permit the employee to perform a safety-sensitive function within 8 hours following the administration of an alcohol test indicating an alcohol concentration of .02 or greater but less than .04.

IV. Handling of Test Results, Record Retention, and Confidentiality

A. *Retention of records.* 1. *General Requirement.* Each employer shall maintain records of its alcohol misuse prevention program as provided in this section. The records shall be maintained in a secure location with controlled access.

2. *Period of Retention.* Each employer shall maintain the records in accordance with the following schedule:

(a) *Five years.* Records of employee alcohol test results with results indicating an alcohol concentration of .02 or greater, documentation of refusals to take required alcohol tests, calibration documentation, and employee evaluations and referrals, shall be maintained for a minimum of 5 years.

(b) *Two years.* Records related to the collection process (except calibration of evidential breath testing devices) and training shall be maintained for a minimum of 2 years.

(c) *One year.* Records of negative test results (as defined in 49 CFR part 40) shall be maintained for a minimum of 1 year.

3. *Types of Records.* The following specific records shall be maintained.

(a) Records related to the collection process:

(1) Collection logbooks, if used.
(2) Documents relating to the random selection process.
(3) Calibration documentation for evidential breath testing devices.
(4) Verification of breath alcohol technician training.
(5) Documents generated in connection with decisions to administer reasonable suspicion alcohol tests.
(6) Documents generated in connection with decisions on post-accident tests.
(7) Documents verifying existence of a medical explanation of the inability of a covered employee to provide adequate breath for testing.
(b) Records related to test results:
(1) The employer's copy of the alcohol test form, including the results of the test;
(2) Documents related to the refusal of any covered employee to submit to an alcohol test required by this appendix.
(3) Documents presented by a covered employee to dispute the result of an alcohol test administered under this appendix.
(c) Documents related to other violations of § 65.46a, § 121.248, or § 135.253 of this chapter.
(d) Records related to evaluations:
(1) Records pertaining to a determination by a substance abuse professional concerning a covered employee's need for assistance.
(2) Records concerning a covered employee's compliance with the recommendations of the substance abuse professional.
(3) Records of notifications to the Federal Air Surgeon of violations of the alcohol misuse prohibitions in this chapter by covered employees who hold medical certificates issued under part 67 of this chapter.
(e) Records related to education and training:
(1) Materials on alcohol misuse awareness, including a copy of the employer's policy on alcohol misuse.
(2) Documentation of compliance with the requirements of section VI, paragraph A of this appendix.
(3) Documentation of training provided to supervisors for the purpose of qualifying the supervisors to make a determination concerning the need for alcohol testing based on reasonable suspicion.
(4) Certification that any training conducted under this appendix complies with the requirements for such training.

B. *Reporting of results in a management information system.* 1. Each employer shall submit to the FAA an annual report covering the calendar year, summarizing the results of its alcohol misuse prevention program.

2. Each employer that is subject to more than one DOT agency alcohol rule shall identify each employee covered by the regulations of more than one DOT agency. The identification will be by the total number and category of covered function. Prior to conducting any alcohol test on a covered employee subject to the rules of more than one DOT agency, the employer shall determine which DOT agency rule or rules authorizes or requires the test. The test result information shall be directed to the appropriate DOT agency or agencies.

3. Each employer shall ensure the accuracy and timeliness of each report submitted by the employer or by a consortium.

4. Each employer shall submit the required annual report no later than February 15 of each year. The report shall be submitted on the form specified by the FAA. Each report shall contain:
(a) Number of covered employees by employee category.
(b) Number of covered employees in each category subject to alcohol testing under the alcohol misuse rule of another DOT agency, identified by each agency.
(c)(1) Number of initial tests by type of test and employee category.
(2) Number of confirmatory tests, by type of test and employee category.
(d) Number of confirmatory alcohol tests indicating an alcohol concentration of .04 or greater, by type of test and employee category.
(e) Number of confirmatory alcohol tests indicating an alcohol concentration of .02 or greater but less than .04.
(f) Number of persons denied a position as a covered employee following a pre-employment/pre-duty alcohol test indicating an alcohol concentration of .04 or greater.
(g) Number of covered employees with a confirmatory alcohol test indicating an alcohol concentration of .04 or greater who were returned to duty in covered positions (having complied with the recommendations of a substance abuse professional as described in section V, paragraph E, and section VI, paragraph C of this appendix).
(h) Number of covered employees who were administered alcohol and drug tests at the same time, with both a positive drug test result and an alcohol test result indicating an alcohol concentration of .04 or greater.
(i) Number of covered employees who were found to have violated other alcohol misuse provisions of §§ 65.46a, 121.458, or 135.253 of this chapter, and the action taken in response to the violation.
(j) Number of covered employees who refused to submit to an alcohol test required under this appendix, and the action taken in response to each refusal.
(k) Number of supervisors who have received training during the reporting period in determining the existence of reasonable suspicion of alcohol misuse.
(l) Direct costs of the program during the reporting period:
(1) Breath collection
(2) Breath analysis (equipment/service)
(3) Substance abuse professional evaluation (if appropriate)
(4) Education and training.

C. *Access to facilities and records.* 1. Except as required by law or expressly authorized or required in this appendix, no employer shall release covered employee information that is contained in records required to be maintained under this appendix.

2. A covered employee is entitled, upon written request, to obtain copies of any records pertaining to the employee's use of alcohol, including any records pertaining to his or her alcohol tests. The employer shall promptly provide the records requested by the employee. Access to an employee's records shall not be contingent upon payment for records other than those specifically requested.

3. Each employer shall permit access to all facilities utilized in complying with the requirements of this appendix to the Secretary of Transportation or any DOT agency with regulatory authority over the employer or any of its covered employees.

4. Each employer shall make available copies of all results of alcohol testing conducted under this appendix and any other information pertaining to the employer's alcohol misuse prevention program, when requested by the Secretary of Transportation or any DOT agency with regulatory authority over the employer or covered employee.

5. When requested by the National Transportation Safety Board as part of an accident investigation, each employer shall disclose information related to the employer's administration of a post-accident alcohol test administered following the accident under investigation.

6. Records shall be made available to a subsequent employer upon receipt of written request from the covered employee. Disclosure by the subsequent employer is permitted only as expressly authorized by the terms of the employee's request.

7. An employer may disclose information required to be maintained under this appendix pertaining to a covered employee to the employee or to the decisionmaker in a lawsuit, grievance, or other proceeding initiated by or on behalf of the individual and arising from the results of an alcohol test administered under this appendix or from the employer's determination that the employee engaged in conduct prohibited under § 65.46a, § 121.458, or § 135.253 of this chapter (including, but not limited to, a worker's compensation, unemployment compensation, or other proceeding relating to a benefit sought by the employee).

8. An employer shall release information regarding a covered employee's records as directed by the specific, written consent of the employee authorizing release of the information to an identified person. Release of such information by the person receiving the information is permitted only in accordance with the terms of the employee's consent.

V. Consequences for Employees Engaging in Alcohol-Related Conduct

A. *Removal from safety-sensitive function.* 1. Except as provided in section VI of this appendix, no covered employee shall perform safety-sensitive functions if the employee has engaged in conduct prohibited by § 65.46a, § 121.458, or § 135.253 of this chapter or an alcohol misuse rule of another DOT agency.

2. No employer shall permit any covered employee to perform safety-sensitive functions if the employer has determined that the employee has violated this paragraph.

B. *Permanent disqualification for service.* An employee is permanently precluded from performing safety-sensitive duties for an employer if the employee has used alcohol in violation of § 65.46a(d), § 121.458(d), or

§ 135.253(d) or if the employee engages in other alcohol misuse in violation of § 65.46a, § 121.458, or § 135.253 of this chapter and had previously engaged in conduct that violated the provisions of § 65.46a, § 121.458, or § 135.253 of this chapter after [*the effective date of the final rule*].

C. *Notice to the Federal Air Surgeon.* 1. An employer who determines that a covered employee who holds a medical certificate issued under part 67 of this chapter has violated the provisions of § 65.46a, § 121.458, or § 135.253 of this chapter shall notify the Federal Air Surgeon within 2 working days.

2. Each such employer shall forward to the Federal Air Surgeon a copy of the report of any evaluation performed under the provisions of section VI of this appendix within 2 working days of the employer's receipt of the report.

3. All documents shall be sent to the Federal Air Surgeon, Office of Aviation Medicine, Drug Abatement Division (AAM–800), 400 7th Street SW., Washington, DC 20590.

4. No covered employee who holds a part 67 medical certificate shall perform safety-sensitive duties for an employer following a violation until and unless the Federal Air Surgeon has recommended that the employee be permitted to perform such duties.

D. *Notice of refusals.* 1. Except as provided in subparagraph 2 of this paragraph, each employer shall notify the FAA of any covered employee who holds a certificate issued under part 61, part 63, or part 65 who has refused to submit to an alcohol test required under this appendix. Notifications should be sent to: Federal Aviation Administration, Aviation Standards National Field Office, Airmen Certification Branch, AVN–460, P.O. Box 25082, Oklahoma City, OK 73125.

2. An employer is not required to notify the FAA of refusals to submit to pre-employment/pre-duty alcohol tests or refusals to submit to return to duty tests.

E. *Required evaluation and testing.* No covered employee who has engaged in conduct prohibited by § 65.46a, § 121.458, or § 135.253 of this chapter shall perform safety-sensitive functions unless the employee has met the requirements of section VI, paragraph C of this appendix. No employer shall permit a covered employee to perform safety-sensitive functions unless the employee has met the requirements of section VI, paragraph C of this appendix. Nothing in this paragraph shall be construed to prohibit the continued performance of safety-sensitive functions necessary to respond to an emergency.

F. *Other alcohol-related conduct.* 1. No covered employee tested under the provisions of section III of this appendix who is found to have an alcohol concentration of .02 or greater but less than .04 shall perform or continue to perform safety-sensitive functions for an employer, nor shall an employer permit the employee to perform or continue to perform safety-sensitive functions, until:

(a) The employee's alcohol concentration measures less than .02; or

(b) The start of the employee's next regularly scheduled duty period, but not less than 8 hours following administration of the test.

2. Except as provided in subparagraph 1 of this paragraph, no employer shall take any action under this rule against an employee based solely on test results showing an alcohol concentration less than .04. This does not prohibit an employer with authority independent of this rule from taking any action otherwise consistent with this law.

3. Nothing in this paragraph shall be construed to prohibit the continued performance of safety-sensitive functions necessary to respond to an emergency.

VI. Alcohol Misuse Information, Training, and Referral

A. *Employer obligation to promulgate a policy on the misuse of alcohol.* 1. *General requirements.* Each employer shall provide educational materials that explain these alcohol misuse requirements and the employer's policies and procedures with respect to meeting those requirements. Each employer shall provide written notice to every covered employee and to representatives of employee organizations of the availability of this information.

2. *Required content.* The materials to be made available to employees shall include detailed discussion of at least the following:

(a) The identity of the person designated by the employer to answer employee questions about the materials.

(b) The categories of employees who are subject to the provisions of these alcohol misuse requirements.

(c) Sufficient information about the safety-sensitive functions performed by those employees to make clear what period of the work day the covered employee is required to be in compliance with these alcohol misuse requirements.

(d) Specific information concerning employee conduct that is prohibited by this chapter.

(e) The circumstances under which a covered employee will be tested for alcohol under this appendix.

(f) The procedures that will be used to test for the presence of alcohol, protect the employee and the integrity of the breath testing process, safeguard the validity of the test results, and ensure that those results are attributed to the correct employee.

(g) The requirement that a covered employee submit to alcohol tests administered in accordance with this appendix.

(h) An explanation of what constitutes a refusal to submit to an alcohol test and the attendant consequences.

(i) The consequences for covered employees found to have violated the prohibitions in this chapter, including the requirement that the employee be removed immediately from performing safety-sensitive functions, and the procedures under section VI of this appendix.

(j) The consequences for covered employees found to have an alcohol concentration of .02 or greater but less than .04.

(k) Optional provisions. The materials supplied to covered employees may also include information on additional employer policies with respect to the use or possession of alcohol, including any consequences for an employee found to have a specified alcohol level, that are based on the employer's authority independent of this appendix. Any such additional policies or consequences must be clearly and obviously described as being based on independent authority.

B. *Training for supervisors.* Each employer shall ensure that persons designated to determine whether reasonable suspicion exists to require a covered employee to undergo alcohol testing under section II of this appendix receive at least 60 minutes of training on the physical, behavioral, speech, and performance indicators of probable alcohol misuse.

C. *Referral, evaluation, and treatment.* 1. Each covered employee who has engaged in conduct prohibited by § 65.46a, § 121.458, or § 135.253 of this chapter shall be advised by the employer of the resources available to the employee in evaluating and resolving problems associated with the misuse of alcohol, including the names, addresses, and telephone numbers of substance abuse professionals and counseling and treatment programs.

2. Each covered employee who engages in conduct prohibited under § 65.46a, § 121.458, or § 135.253 of this chapter shall be evaluated by a substance abuse professional who must determine what assistance, if any, the employee needs in resolving problems associated with alcohol misuse.

3. (a) Before a covered employee returns to duty requiring the performance of a safety-sensitive function after engaging in conduct prohibited by § 65.46a, § 121.458, or § 135.253 of this chapter, the employee shall undergo an alcohol test with a result indicating an alcohol concentration of less than .02.

(b) In addition, each covered employee identified as needing assistance in resolving problems associated with alcohol misuse—

(i) Shall be evaluated by a substance abuse professional to determine whether the employee has properly followed any rehabilitation program prescribed under subparagraph 2 of this paragraph, and,

(ii) Shall be subject to unannounced follow-up tests administered by the employer following the employee's return to duty. The number and frequency of such follow-up testing shall be determined by a substance abuse professional, but shall consist of at least six tests in the first 12 months following the employee's return to duty. Follow-up testing shall not exceed 60 months from the date of the employee's return to duty. The substance abuse professional may terminate the requirement for follow-up testing at any time after the first six tests have been administered, if the substance abuse professional determines that such testing is no longer necessary.

4. Evaluation and rehabilitation may be provided by the employer, by a substance abuse professional under contract with the employer, or by a substance abuse professional not affiliated with the employer. The choice of substance abuse professional and assignment of costs shall be made in accordance with employer/employee agreements and employer policies.

5. The requirements of this paragraph with respect to referral, evaluation, and

rehabilitation do not apply to applicants who refuse to submit to or have a pre-employment/pre-duty test with a result indicating an alcohol concentration of .04 or greater.

VII. Employer's Alcohol Misuse Prevention Program Plan

A. *Schedule for submission of plans and implementation.* 1. Each employer shall submit an alcohol misuse prevention program (AMPP) plan to the FAA on a form and in a manner prescribed by the Administrator. Plans should be submitted to the FAA, Office of Aviation Medicine, Drug Abatement Division (AAM-800), 400 7th Street SW., Washington, DC 20590, by certified U.S. mail, return receipt requested, in accordance with the schedule below.

(a) Each employer who holds a part 121 certificate, each employer who holds a part 135 certificate and directly employs more than 50 covered employees, and each air traffic control facility affected by this rule shall submit an AMPP plan to the FAA by [6 months after the effective date of the final rule]. Each employer must implement an approved AMPP by [12 months after the effective date of the final rule]. Contractor employees to these employers must be subject to an FAA-approved AMPP by [14 months after the effective date of the final rule].

(b) Each employer who holds a part 135 certificate and directly employs from 11 to 50 covered employees shall submit an AMPP plan to the FAA by [12 months after the effective date of the final rule]. Each employer must implement an approved AMPP by [18 months after the effective date of the final rule]. Contractor employees to these employers must be subject to an FAA-approved AMPP by [20 months after the effective date of the final rule].

(c) Each employer who holds a part 135 certificate and directly employs ten or fewer covered employees, and each operator as defined in 14 CFR 135.1(c) shall submit an AMPP plan to the FAA by [18 months after the effective date of the final rule]. Each employer must implement an approved AMPP by [24 months after the effective date of the final rule]. Contractor employees to these employers must be subject to an FAA-approved AMPP by [26 months after the effective date of the final rule].

2. A company providing covered employees by contract to employers may submit an AMPP plan directly to the FAA for approval on a form and in a manner prescribed by the Administrator. Each contractor company shall implement its approved AMPP in accordance with its terms and the provisions of this appendix.

(a) The FAA may revoke its approval in the case of any contractor company that fails to properly implement its AMPP.

(b) No employer shall use a contractor company's employee who is not subject to the employer's AMPP unless the employer has first determined that the employee is subject to another FAA-approved AMPP.

3. A consortium may submit a core AMPP plan directly to the FAA for approval on a form and in a manner prescribed by the Administrator. Each consortium shall implement its approved plan in accordance with its terms and the provisions of this appendix.

(a) The FAA may revoke its approval in the case of any consortium that fails to properly implement its AMPP.

(b) Each employer that participates in an FAA-approved consortium remains individually responsible for ensuring compliance with the provisions of these alcohol misuse requirements and must maintain all records required under section IV of this appendix.

(c) Each consortium shall notify the FAA of any membership termination within 10 days of such termination.

4. Any person who applies for a certificate under the provisions of part 121 or 135 of this chapter after [the effective date of the final rule] shall submit an alcohol misuse prevention program (AMPP) plan to the FAA for approval and must obtain such approval prior to beginning operations pursuant to the certificate. The AMPP shall be implemented concurrently with beginning such operations or by the date specified in paragraph A.1 of this section, whichever is later. Contractor employees to a new certificate holder must be subject to an FAA-approved AMPP within 60 days of the implementation of the employer's AMPP.

5. Any person who intends to begin sightseeing operations as an operator under 14 CFR 135.1(c) after [the effective date of the final rule] shall, not later than 60 days prior to the proposed initiation of such operations, submit an alcohol misuse prevention program (AMPP) plan to the FAA for approval. No operator may begin conducting sightseeing flights prior to receipt of the FAA's approval of the AMPP plan; the AMPP shall be implemented concurrently with the inception of operations or by the date specified in paragraph A.1 of this section, whichever is later. Contractor employees to a new operator must be subject to an FAA-approved AMPP within 60 days of the implementation of the employer's AMPP.

7. Each employer or contractor company that submits an AMPP plan to the FAA shall consider its plan to be approved unless notified to the contrary by the FAA within 60 days of the date the plan was received at the FAA as reflected on the certified mail receipt.

8. Each consortium that submits a core AMPP plan to the FAA for approval must receive the express written approval of the plan from the FAA prior to submitting rider plans or performing services under the plan.

9. Each employer, and each contractor company that submits a plan directly to the FAA, shall notify the FAA of any proposed change in status (*e.g.*, join a consortium or another carrier's program, change consortium, etc.) and must receive FAA approval prior to the effective date of such change. The employer or contractor company must ensure that it is continuously covered by an FAA-approved alcohol misuse prevention program.

B. *Required content of AMPP plans.* 1. Each AMPP plan, including a consortium core plan to the extent the consortium will be providing services required under this appendix, shall provide the following information:

(a) The name, address, and telephone number of the plan submitter's AMPP manager;

(b) The evidential breath testing (EBT) device that will be used to conduct alcohol testing under this appendix;

(c) The person(s) or company that will be collecting breath specimens;

(d) The person(s) or company that will be providing EBT training and maintenance;

(e) The name, address, and telephone number of the substance abuse professional who will conduct evaluations under this appendix; and

(f) The name, address, and telephone number of the rehabilitation provider if chosen by the employer.

2. Consortium rider plans shall provide the following information:

(a) The identity of the consortium;

(b) The name, address, and telephone number of the consortium member's AMPP manager; and

(c) Any information otherwise required under paragraph 1., above, that will not be covered by the consortium.

3. Each plan and rider submitter shall provide certification of understanding of and agreement to comply with the provisions of the FAA's alcohol misuse prevention regulations.

4. Any amendments to the information required in paragraphs 1 and 2 above shall be submitted to the FAA for review and approval prior to implementation of the changes. The FAA reserves the right to require employers, consortia, and/or contractor companies to amend previously-approved plans as deemed necessary by the FAA for compliance with this appendix.

VIII. Employees Located Outside the U.S.

A. Each covered employee located outside the territory of the United States who is directly employed by an employer will become subject to the provisions of these alcohol misuse requirements on January 2, 1995; provided, however, that no such employee shall be tested for alcohol misuse while located outside the territory of the United States if the Federal Aviation Administration receives written documentation from an employer that such testing is inconsistent with the laws and regulations of the country in which the employee is located. Employers shall submit copies, in English, of any applicable laws and regulations to the FAA, Office of Aviation Medicine, Drug Abatement Division (AAM-800), 400 7th Street SW., Washington, DC 20590.

B. The provisions of this appendix shall not apply to any person located outside the territory of the United States who performs a safety-sensitive function by contract for an employer.

PART 135—AIR TAXI OPERATORS AND COMMERCIAL OPERATORS

13. The authority citation for part 135 is revised to read as follows:

Authority: 49 U.S.C. 1354(a), 1355(a), 1421–1431, and 1502 (revised, Pub. L. 102–143, October 28, 1991); 49 U.S.C. 106(g) (revised, Pub. L. 97–449, January 12, 1983).

14. In § 135.1 paragraphs (c) and (d) are revised to read as follows:

§ 135.1 Applicability.

* * * * *

(c) For the purpose of §§ 135.249, 135.251, 135.253, 135.255, and 135.353, *operator* means any person or entity conducting non-stop sightseeing flights for compensation or hire in an airplane or rotorcraft that begin and end at the same airport and are conducted within a 25 statute mile radius of that airport.

(d) Notwithstanding the provisions of this part and appendices I and J to part 121 of this chapter, an operator who does not hold a part 121 or part 135 certificate is permitted to use a person who is otherwise authorized to perform aircraft maintenance or preventive maintenance duties and who is not subject to FAA-approved anti-drug and alcohol misuse prevention programs to perform—

(1) Aircraft maintenance or preventive maintenance on the operator's aircraft if the operator would otherwise be required to transport the aircraft more than 50 nautical miles further than the repair point closest to operator's principal place of operation to obtain these services; or

(2) Emergency repairs on the operator's aircraft if the aircraft cannot be safely operated to a location where an employee subject to FAA-approved programs can perform the repairs.

15. Section 135.253 is added to read as follows:

§ 135.253 Misuse of alcohol

(a) This section applies to employees who perform a function listed in appendix J to part 121 of this chapter for a certificate holder or operator (*covered employees*). For the purpose of this section, a person who meets the definition of covered employee in appendix J is considered to be performing the function for the certificate holder or operator.

(b) *Alcohol concentration.* No covered employee shall report for duty or remain on duty requiring the performance of safety-sensitive functions while having an alcohol concentration of .04 or greater. No certificate holder or operator having actual knowledge that an employee has an alcohol concentration of .04 or greater shall permit the employee to perform or continue to perform safety-sensitive functions.

(c) *Under the influence of alcohol.* Notwithstanding the absence of a reasonable suspicion alcohol test under appendix J to part 121 of this chapter, no covered employee shall report for duty or remain on duty requiring the performance of safety-sensitive functions while the employee is under the influence of or impaired by alcohol, as shown by behavior or appearance characteristic of alcohol misuse or by an adverse effect on the employee's ability to perform his or her assigned functions. No certificate holder or operator having actual knowledge that the employee is in violation of this provision shall permit a covered employee to perform or continue to perform safety-sensitive functions.

(d) *On-duty use.* No covered employee shall use alcohol while performing safety-sensitive functions. No certificate holder or operator having actual knowledge that a covered employee is using alcohol while performing safety-sensitive functions shall permit the employee to perform or continue to perform safety-sensitive functions.

(e) *Pre-duty use.* (1) No employee shall perform flight crewmember or flight attendant duties within 8 hours after using alcohol. No certificate holder or operator having actual knowledge that such an employee has used alcohol within 8 hours shall permit the employee to perform or continue to perform the specified duties.

(2) No employee shall perform safety-sensitive duties other than those specified in paragraph (e)(1) of this section within 4 hours after using alcohol. No certificate holder or operator having actual knowledge that such an employee has used alcohol within 4 hours shall permit the employee to perform or continue to perform safety-sensitive functions.

(f) *Use following an accident.* No covered employee who has actual knowledge of an accident involving an aircraft for which he or she performed a safety-sensitive function at or near the time of the accident shall use alcohol for 8 hours following the accident, unless he or she has been given a post-accident test under appendix J of part 121 of this chapter, or the employer has determined that the employee's performance could not have contributed to the accident.

(g) *Refusal to submit to a required alcohol test.* No covered employee shall refuse to submit to a post-accident, random, reasonable suspicion, or follow-up alcohol test required under appendix J to part 121 of this chapter.

16. Section 135.255 is added to read as follows:

§ 135.255 Testing for alcohol.

(a) Each certificate holder and operator must establish an alcohol misuse prevention program in accordance with the provisions of appendix J to part 121 of this chapter.

(b) No certificate holder or operator shall use any person who meets the definition of "covered employee" in appendix J to part 121 to perform a safety-sensitive function listed in that appendix unless such person is subject to testing for alcohol misuse in accordance with the provisions of appendix J.

Issued in Washington, DC, on December 2, 1992.

Andrew H. Card, Jr.,

Secretary of Transportation.

Thomas C. Richards,

Administrator.

RIN 2120-AE79

Anti-Drug Program and Alcohol Misuse Prevention Program for Employees of Foreign Air Carriers Engaged in Specified Aviation Activities

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Advance notice of proposed rulemaking (ANPRM).

SUMMARY: The Omnibus Transportation Employee Testing Act of 1991 directs the FAA Administrator to prescribe regulations that require foreign air carriers to establish drug and alcohol testing programs for employees performing safety-sensitive aviation functions. The regulations must be consistent with the international obligations of the United States and take into consideration any applicable laws and regulations of foreign countries. This notice invites comments on a variety of issues related to the application of drug and alcohol testing requirements to safety-sensitive employees of foreign air carriers operating within the territory of the United States.

DATES: Comments must be received on or before February 16, 1993.

ADDRESSES: Comments on this notice should be mailed, in triplicate, to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-10), Docket No. 27066, 800 Independence Avenue, SW., Washington, DC 20591. Comments that are delivered to this address must be marked "Docket No. 27066." Comments may be examined in Room 915G between 8:30 a.m. and 5 p.m. on weekdays, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Ms. Julie B. Murdoch, Office of Aviation

Medicine, Drug Abatement Division (AAM–800), Federal Aviation Administration, 400 7th Street, SW., Washington, DC 20590; telephone (202) 366–6710.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of a proposed rule by submitting such written data, views, suggestions, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in triplicate to the address above. All communications received on or before the closing date for comments will be considered by the Administrator before rulemaking action is taken. Persons wishing the FAA to acknowledge receipt of their comments must submit with those comments a self-addressed stamped postcard on which the following statement is made: "Comments to Docket No. 27066." The postcard will be dated and time stamped and returned to the commenter. All comments submitted will be available for review in the Rules Docket, both before and after the comment closing date. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will also be filed in the docket.

Availability of ANPRM

Any person may obtain a copy of this ANPRM by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attn: Public Inquiry Center (APA–230), 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267–3484. Requests must include the notice number of this ANPRM.

Persons interested in being placed on a mailing list for future rulemaking actions should request a copy of Advisory Circular 11–2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedures.

Current Laws and Regulations

The FAA has general statutory authority to regulate safety in civil aviation under the Federal Aviation Act of 1958 (the FAAct), as amended. As provided in section 1108 of the FAAct, the United States of America has complete and exclusive national sovereignty in the airspace of the United States (49 App. U.S.C. 1508(a)). However, as a signatory to the Convention on International Civil Aviation (December 7, 1944, 61 Stat. 1180, T.I.A.S. No 1591; hereinafter the Chicago Convention), the United States must exercise that sovereignty with respect to foreign civil aircraft in a manner consistent with the Chicago Convention.

The Chicago Convention stipulates that a member State has complete and exclusive sovereignty as to regulating the operation and navigation of foreign-registered aircraft within its territory. *Id.* arts. 1–2, 12. Regulation of aviation activity that takes place wholly or substantially within the territory of the United States, so long as the regulation is reasonable and takes into consideration applicable foreign laws that may affect the foreign air carriers or their employees, is therefore clearly within the scope of the FAA's authority. The FAA has, for example, prescribed regulations requiring foreign air carrier pilots to be familiar with applicable air traffic and other rules, and directing foreign air carriers to establish procedures to verify such knowledge. (14 CFR 129.19.)

The Chicago Convention does not explicitly permit the extraterritorial application of one State's laws to non-citizens outside the territory of that State; however, States may promulgate regulations regarding entrance into or departure from their territorial boundaries by aircraft. The United States has used this authority, together with the supporting provisions of the Chicago Convention and its Annexes, to regulate foreign air carriers operating into the United States in a number of areas, including airplane security. (14 CFR 129.25.)

In addition to establishing the general rights, privileges, and obligations of the member States engaging in international aviation, the Chicago Convention established the International Civil Aviation Organization (ICAO). An adjunct of the United Nations, the ICAO includes all of the signatories to the Chicago Convention (over 170 countries) and operates through a standing Council comprised of 33 elected States and a General Assembly that meets every three years. ICAO has responsibility for establishing international Standards and Recommended Practices to promote aviation safety. Every member State must adhere to the established Standards, unless the State files a difference with ICAO. States are encouraged, but not required, to comply with Recommended Practices.

As a signatory to the Chicago Convention, the U.S. is bound by its Annex 2 (Rules of the Air), which provides in paragraph 2.5 that

> No person shall pilot an aircraft, or act as a flight crew member of an aircraft, while under the influence of intoxicating liquor or any narcotic or drug, by reason of which that person's capacity so to act is impaired.

Consistent with this standard, the FAA's regulations prohibit any person from acting or attempting to act as a crewmember within 8 hours after consuming any alcoholic beverage, while under the influence of alcohol, while using any drug that affects the person's faculties in a manner contrary to safety, or while having .04 percent by weight or more alcohol in the blood. (14 CFR 91.17(a).) This regulation covers all operations within the territory of the United States, including foreign air carrier operations.

Under Federal criminal law, no person may operate or direct the operation of a common carrier (which includes foreign air carriers operating within the territory of the United States) while under the influence of a controlled substance or alcohol. (18 U.S.C. 342.) An individual with a blood alcohol content of .10 percent or more is presumed to be under the influence of alcohol (18 U.S.C. 343(1)), as is an individual with a quantity of drug in his or her system that would be sufficient to impair the perception, mental processes, or motor functions of the average individual (18 U.S.C. 343(2)).

Many states have similar criminal laws that prohibit any person from operating an aircraft while under the influence of alcohol and/or drugs. Under limited circumstances, the FAA's regulations require persons who are being investigated for violation of these State or local laws to submit to alcohol tests when requested by authorized State or local law enforcement officers, and, upon request, to furnish the test results to the Administrator. (14 CFR 91.17(c).)

On November 21, 1988, the FAA published regulations that require certain employers to establish anti-drug programs for their employees who perform specified safety-sensitive functions (*e.g.*, pilots, flight attendants, and mechanics). In addition to requiring employers to educate employees about the detrimental effects of drug abuse, the FAA's anti-drug rule requires pre-employment, random, post-accident, reasonable cause, and return to duty drug testing. Individuals required to hold airman medical certificates under 14 CFR part 67 are also subject to periodic drug testing. The anti-drug rule is limited in its application, however, to the employees (whether direct or contract) of U.S. employers. Similarly, the proposed alcohol misuse prevention program (which lists the employees who would be subject to alcohol testing), published elsewhere in today's Federal

Register, currently only proposes application to U.S. employers and not to foreign air carriers.

Omnibus Transportation Employee Testing Act

The Omnibus Transportation Employee Testing Act of 1991 (the Act (Pub. L. 102–143, title V)) was enacted on October 28, 1991. Among other things, the Act adds a new section 614 to the FAAct, which requires the FAA Administrator to prescribe regulations under which air carriers and foreign air carriers must establish alcohol and drug testing programs for safety-sensitive employees. The Act specifically provides that the regulations must establish a program which requires air carriers *and* foreign air carriers to conduct drug and alcohol testing of safety-sensitive employees. (Section 3 of the Act, amending title VI of the FAAct (49 App. U.S.C. 1434(a)(1)).) The Act also provides that the requirements applicable to foreign air carriers must be consistent with the international obligations of the United States, and must take into consideration any applicable laws and regulations of foreign countries. (Section 3 of the Act, amending title VI of the FAAct (49 App. U.S.C. 1434(e)(3)).)

As discussed above, the FAA has jurisdiction over the navigation and operations of foreign air carriers within the territory of the United States. The FAA would not propose, for example, to apply its drug and alcohol rules to the performance of safety-sensitive functions by foreign air carrier employees outside the territory of the United States. However, in determining whether and how to impose drug and alcohol testing requirements on such carriers, the FAA must, under the Act, take into consideration not only international obligations of the U.S. such as the Chicago Convention, but also any applicable foreign laws and regulations.

We also recognize the concerns of foreign countries, and are aware of the practical considerations that may arise as we implement the provisions of the Act with respect to foreign air carriers. For these reasons, the FAA is issuing this ANPRM, rather than a notice of proposed rulemaking, to seek the public's views on a variety of issues and responses to questions that may arise in addressing drug and alcohol testing by foreign air carriers. The Act similarly amended the statutes applicable to the Federal Railroad Administration (FRA) and the Federal Highway Administration (FHWA). These amendments, and the possible implications for the rail and commercial motor vehicle industries, are addressed in ANPRMs specific to each industry published elsewhere in today's **Federal Register**. It is the intent of the Department to foster consistency to the extent possible in prescribing regulations implementing these similar statutory provisions.

In a provision specific to the FAA, the Act directed the Secretaries of State and Transportation to call on the member countries of the ICAO to strengthen and enforce existing standards to prohibit the use, in violation of law or Federal regulation, of alcohol or a controlled substance by crew members in international civil aviation. *Id.* On September 30, 1992, a resolution offered by the United States and co-sponsored by a number of other countries was introduced at the 29th General Assembly of ICAO in furtherance of this legislative directive (ICAO Document A29–WP/67; EX/17; 3/9/92). The resolution was approved by the Assembly and states that the Assembly:

1. *Declares* its strong support for making and maintaining civil aviation workplaces free of substance abuse and encourages cooperative efforts throughout the international civil aviation community to educate employees on the dangers of substance abuse, and to take steps, when deemed necessary, to detect and deter such use, and through such efforts, to ensure that substance abuse never becomes prevalent or tolerated within civil aviation;

2. *Urges* the Council to accord a high degree of priority * * * to expediting the development and publication of guidance material containing measures which may be implemented by Contracting States * * *;

3. *Requests* the Council to continue its effort to monitor:

(a) the existence and growth of the threat to the safety of international civil aviation posed by substance abuse; and

(b) efforts by Contracting States to implement preventive measures; and

4. *Requests* the Council to present a report on the implementation of this Resolution to the next ordinary session of the Assembly.

The willingness of the member States of ICAO to adopt this resolution indicates the degree to which substance abuse is recognized as a threat to international civil aviation safety. Although the methods chosen to address substance abuse problems will inevitably vary by State, the United States has at present identified substance abuse testing as a useful tool for detecting and deterring use of illegal drugs and misuse of alcohol.

General Problems and Issues

The following general problems and issues have been identified in assessing the implications of the Act's testing provisions. In responding to the questions and requests for comment below, we ask that commenters distinguish responses relating to alcohol testing from those relating to drug testing, where the same response is not appropriate for both.

1. International Agreements and Foreign Laws

We have set forth above the FAA's interpretation of the international law pertaining to the imposition of substance abuse testing requirements on foreign air carriers under U.S. regulations. We are aware, however, that commenters may have different perspectives. We seek further information on any bilateral or multilateral obligations of the U.S., or principles of customary international law, that may affect our implementation of the Act. If there are any international agreements under development that would affect drug and alcohol testing of foreign air carriers, we also seek information on them. In commenting on international obligations of the U.S., we request that commenters focus on any provisions that affect the ability of the United States to require testing of employees conducting operations in the U.S., with the testing to take place in the United States.

In addition to international obligations, we seek comment on any laws or regulations of foreign countries that we should take into account in implementing the Act. We would like to obtain information on any laws or rules, with English-language translations, of specific foreign countries whose foreign air carriers conduct operations within the territory of the U.S. that we should consider.

2. Pre-employment and Follow-Up Testing

Often, employees of foreign air carriers are recruited and hired in the foreign country involved. For example, a Canadian employer may hire Canadian nationals in Canada, some of whom will subsequently conduct operations in the United States. The employer may not know, at the time of hire, which of its employees will perform safety-sensitive functions within the territory of the United States.

In such a situation, should the employer be required to conduct any pre-employment testing? If so, how, when, and where would the foreign air carrier conduct pre-employment testing of the employees who were to perform safety-sensitive functions in the United States? Should all pre-employment testing be conducted in the U.S., or should any proposed rules permit the employer to conduct tests in its own country?

If an employee tests positive on any type of alcohol or drug test, the FAA's existing and proposed rules generally require a return to duty test and follow-up tests, over a period of time. For an employee based outside of the territory of the United States who comes into the U.S. occasionally, questions similar to those mentioned above for pre-employment testing may arise. If the foreign air carrier does not conduct the tests in its own country, should we require the foreign air carrier to arrange for the required tests to take place in the United States?

3. Random Testing

Under the FAA's current anti-drug rule, to meet random testing rate requirements, employers have to conduct a certain number of tests per year (*e.g.*, under a 50 percent random testing rate, a number of tests each year equivalent to half the number of the employees in the random pool). Should all of a foreign air carrier's covered employees who perform safety-sensitive functions within the territory of the U.S. at any time have to be part of a random testing pool? Could a true random testing program be developed that would provide for testing only within the territory of the United States? How would foreign air carriers arrange for the unannounced, random testing of their employees only in U.S. territory?

Are there circumstances in which foreign air carriers should not be subject to a random testing requirement at all?

4. Requirement for All Types of Tests

The Act specifically requires four types of substance abuse testing by covered employers: Pre-employment, random, reasonable suspicion, and post-accident. Periodic testing associated with an airman medical examination is discretionary on the part of the Administrator. Should the FAA refrain from requiring foreign air carriers to conduct certain kinds of tests? The FAA anticipates little problem with requiring a post-accident or reasonable suspicion test in the U.S., following an accident or basis for reasonable suspicion that occurred in this country. At the 29th General Assembly of ICAO, the only organization to oppose the U.S.-sponsored substance abuse resolution—the International Federation of Air Line Pilots' Associations—recognized the usefulness of both types of tests.

However, as discussed above, there may be problems with requiring foreign air carriers to conduct other forms of testing (*e.g.*, random). Should the FAA exclude foreign air carriers from some or all types of alcohol or drug testing? Why or why not? Should the legal authority of the foreign air carrier to conduct a certain kind of testing in its own country be considered in deciding whether to exclude foreign air carriers from a certain country from a requirement to conduct testing within the United States? If some exclusions are desirable, how could such exclusions be reconciled with the testing requirements of the Act? Should the FAA consider requiring different types of tests depending on where the foreign air carrier employees were based (*e.g.*, impose all types of tests on U.S.-based employees, but only reasonable suspicion and post-accident on employees based outside the U.S. when they are performing safety-sensitive functions within the territory of the U.S.)?

5. Other Compliance Activities

The FAA's current anti-drug rule and proposed alcohol misuse rule have a variety of other program requirements in addition to testing. These requirements pertain to employee assistance and training programs, substance abuse professionals, record retention, data reporting, plan submission, and others. Some of these activities or functions could be accomplished most conveniently in the foreign air carrier's country. Should some or all of the foreign air carrier's program activities be required or permitted to take place outside the territory of the United States?

How would the FAA monitor and enforce compliance with anti-drug or alcohol program activities that take place outside the United States? What problems are possible in gaining access by FAA personnel to information about the foreign air carriers' implementation of program and testing requirements?

6. Testing Procedures

Under the FAA's anti-drug rule, all testing must be conducted in accordance with the procedures established by the Office of the Secretary of Transportation (OST) in 49 CFR part 40. The proposed alcohol misuse rule would include a similar requirement to conduct alcohol testing in accordance with the procedures proposed by OST. Ensuring compliance with these procedures could raise a number of problems if any testing or collection is performed outside the territory of the United States. Should there be a method of accepting evidence of compliance with a foreign country's testing procedures in lieu of some or all of the 49 CFR part 40 procedures, if testing is permitted to be conducted outside of U.S. territory?

All urine specimens collected under the FAA's anti-drug rule must be analyzed at a laboratory certified by the National Institute on Drug Abuse (NIDA), all of which are in the United States. Unless this requirement is changed, specimens collected outside the U.S. for drug testing under the FAA's rule would have to be sent to these laboratories for analysis. This poses some obvious practical problems (*e.g.*, timeliness of transmission of specimens and associated paperwork, possible difficulties with U.S. Customs). Are there other such problems? We seek comment on how the practical problems could be solved. If specimen collection for drug testing or alcohol testing is permitted to be conducted outside the U.S., how could the possible language or training problems be overcome (*e.g.*, translations of DOT requirements or forms)?

In FAA-mandated drug testing, there is a requirement for medical review officers to verify positive tests and perform other functions. Should MROs (who, under current rules, must be physicians licensed in the U.S.) have to perform these functions, or should physicians licensed in the foreign countries involved be able to serve as MROs? Could the requirements for MROs pose particular problems in countries with scarce medical resources? The same questions can be asked for substance abuse professionals who would evaluate people who test positive for drugs or who misuse alcohol. If personnel licensed in the U.S. were required for this function, would this create difficult logistical problems for the program?

As proposed, alcohol testing would have to be conducted using evidential breath testing devices (EBTs) on the National Highway Transportation Safety Administration's Conforming Products List. Would there be problems in obtaining or using such EBTs in other countries, if testing is permitted to be conducted outside the territory of the United States?

The FAA seeks comment on any other problems related to the testing procedures that may occur in the context of testing by foreign air carriers. We are aware, for example, that there may be cultural impediments in some countries to the provision of urine for testing. Other countries may regulate forensic testing in a way that could affect the ability of foreign air carriers to comply with the provisions of 49 CFR part 40.

7. Required Consequences

Under the FAA's anti-drug rule the consequence of refusing to submit to a

drug test or failing a drug test is removal from a safety-sensitive position, until the employee follows the rule's procedures for returning to the performance of safety-sensitive duties. The alcohol misuse NPRM proposes similar consequences. However, the application of the anti-drug and alcohol misuse rules to foreign air carriers would be intended only to affect operations within the United States. Therefore, the FAA would not propose to prohibit the performance of safety-sensitive functions outside the territory of the U.S. by a foreign air carrier employee who, for example, failed a drug test. Such an employee would, however, be prohibited from conducting any safety-sensitive functions in the U.S. until the employee met the FAA's return to duty requirements. How would foreign air carriers ensure that an employee who failed or refused a drug or alcohol test or engaged in other alcohol misuse did not engage in operations in the U.S., until return to duty requirements had been met? How would the FAA monitor compliance with this requirement?

8. Costs

We are specifically seeking information from foreign air carriers on the number of employees who would be affected by a requirement to test persons performing safety-sensitive functions within the territory of the U.S. for foreign air carriers. Do commenters anticipate that foreign air carriers' positive test rates for the employees who would be subject to any proposed rules (which can affect costs significantly) would be higher, lower, or about the same as the positive test rates of comparable U.S. employers? What would be the costs of the anti-drug and alcohol misuse program activities that could occur outside the U.S. that the FAA should consider in estimating the costs of the rule? Are there any costs that would be unique to such program activities? Are there any positive or negative trade or competitive effects of testing (or not testing) employees of foreign air carriers, for either U.S. or foreign companies?

Regulatory Process Matters

Economic Impact

The FAA is unable to determine at this point what the likely costs of implementing the Act with respect to foreign air carriers might be, nor the annual effect on the economy. Following a review of the comments submitted to this ANPRM, the FAA will determine what regulatory requirements will be proposed. At that time the FAA will review the potential costs and benefits, as required by Executive Order 12291. As discussed above, we are seeking relevant cost data to facilitate the FAA's determinations.

Significance

This anticipated rulemaking is not "major" as defined in Executive Order 12291. It does involve issues of substantial interest to the public, however, and the FAA has therefore determined that the ANPRM is significant under the Regulatory Policies and Procedures of the Department of Transportation (44 FR 11034; February 2, 1979).

Other Regulatory Matters

At this preliminary stage, it is not yet possible to determine whether there will be a significant economic impact on a number of small entities, what the paperwork burden might be, or whether there will be any federalism implications. Each of these regulatory matters will be addressed fully at the time of publication of any notice of proposed rulemaking on this subject.

List of Subjects

14 CFR Part 121

Air carriers, Air transportation, Aircraft, Aircraft pilots, Airmen, Airplanes, Alcohol, Alcoholism, Aviation safety, Drug abuse, Drugs, Narcotics, Pilots, Safety, Transportation.

14 CFR Part 129

Air carriers, Air transportation, Aircraft, Aircraft pilots, Airmen, Airplanes, Alcohol, Alcoholism, Aviation safety, Drug abuse, Drugs, Foreign air carriers, Narcotics, Pilots, Safety, Transportation.

Authority: 49 U.S.C. 1346, 1354(a), 1355, 1356, 1357, 1401, 1421–1430, 1485, 1502, 1511, and 1522 (revised, Pub. L. 102–143, October 28, 1991); 49 U.S.C. 106(g) (revised, Pub. L. 97–449, January 12, 1983).

Issued in Washington, DC, on December 2, 1992.

[Docket No. 25148; Notice No. 92–19]

RIN 2120–AC33

Anti-Drug Program for Personnel Engaged in Specified Aviation Activities

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: On November 21, 1988, the Federal Aviation Administration (FAA) published a final rule requiring specified aviation employers to implement anti-drug programs for personnel performing sensitive safety- and security-related functions. That final rule includes recordkeeping and reporting requirements. In response to a Department of Transportation (DOT) Notice of Proposed Rulemaking (NPRM), published elsewhere in today's **Federal Register**, that would establish a standard Management Information System for the Department's drug testing programs, this NPRM proposes modifications to the FAA's record-keeping and reporting requirements. The amendments proposed here would conform the FAA's requirements to those in the DOT NPRM and provide the FAA with needed additional data for use in monitoring the anti-drug program.

DATES: Send or deliver comments by April 14, 1993.

ADDRESSES: Send or deliver comments on this notice, in triplicate, to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC–10), room 915G, Docket No. 25148, 800 Independence Avenue, SW., Washington, DC 20591. Persons wishing the FAA to acknowledge receipt of their comments should submit with those comments a pre-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 25148." The postcard will be dated and time stamped and returned to the person submitting the comment. Comments may be examined in the Rules Docket between 8:30 a.m. and 5 p.m. on weekdays, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Carol Daugherty, Office of Aviation Medicine, Drug Abatement Division (AAM–800), Federal Aviation Administration, 400 Seventh Street, SW., Washington, DC 20590; telephone (202) 366–6710.

SUPPLEMENTARY INFORMATION:

General

Interested persons are invited to participate in the development of the proposed rule by submitting such written information, views, or arguments as they may desire. Comments relating to the environmental, energy, federalism, or economic impact that might result from adopting the proposals in this notice are invited. Substantive comments should be accompanied by cost estimates. Comments should identify the regulatory docket or notice number and should be submitted in triplicate to the Rules Docket address specified above. All comments received on or before the closing date for comments specified will be considered by the Administrator before taking action on this proposed rulemaking. Comments filed late will be considered to the extent practicable. The proposals contained in this notice may be changed in light of comments received. All comments received will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attn: Public Inquiry Center (APA–230), 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267–3484. Requests must include the notice number identified in this NPRM. Persons interested in being placed on a mailing list for future rulemaking actions should request a copy of Advisory Circular 11–2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedures.

Background

Definitions

The following definitions apply to terms used throughout this notice of proposed rulemaking (NPRM):

FAA's current rule (or *the FAA final rule*) is the FAA's anti-drug rule, as amended, now in effect. This rule, entitled "Anti-Drug Program for Personnel Engaged in Specified Aviation Activities," was published in 53 FR 47024 (November 21, 1988), and amended 14 CFR parts 61, 63, 65, 121 and 135.

Employee category means a category of employees who must be subject to drug testing under the final rule (14 CFR part 121, appendix I, section III). The employee categories in the final rule (and this NPRM) are employees who perform the following functions: Flight crewmembers; flight attendants; flight or ground instructors; flight testing personnel; aircraft dispatchers; maintenance or preventive maintenance personnel; security or screening personnel; and air traffic control personnel.

Test category or *type of test* are synonymous and refer to the types of drug testing required by the FAA final rule: pre-employment, periodic, random, post-accident, reasonable cause, and return-to-duty. For further information regarding the types of tests, refer to 14 CFR part 121, appendix I, section V.

The Department Of Transportation NPRM

This NPRM responds to a Department of Transportation (DOT) NPRM which proposes that employers in all segments of the transportation industry maintain and submit standardized drug program information as specified in the rules of the appropriate DOT operating administration (OA). Information compiled by the FAA would be incorporated into a comprehensive, DOT-wide anti-drug program Management Information System (MIS). The proposed changes to the FAA's current reporting requirements would support the DOT's goal of establishing a systematic, standardized program to collect, analyze, and interpret anti-drug program information. The data provided through the MIS is intended to be the basis for monitoring implementation of and compliance with the anti-drug rule, and for evaluating the effectiveness of the OAs' anti-drug programs as well as the overall effectiveness of the DOT's program.

Today's **Federal Register** also contains related NPRMs issued pursuant to DOT's NPRM by each of the other DOT operating administrations that have drug testing rules [Federal Railroad Administration (FRA), United States Coast Guard (USCG), Research and Special Programs Administration (RSPA), Federal Highway Administration (FHWA)], as well as the DOT NPRM.

The FAA NPRM (Anti-Drug Management Information System)

The FAA final rule requires aviation employers to submit drug testing reports as specified in section X of appendix I to 14 CFR part 121. In accordance with the DOT's NPRM, the FAA proposes to modify the reporting requirements for aviation employers in this NPRM. These employers receive information from forensic laboratories, medical review officers, and specimen collection agents/facilities and therefore can provide the necessary cumulative data for the DOT's MIS program.

Issues Relating to Record Keeping and Reporting Procedures

In the following sections, the FAA has compared the record keeping and reporting procedures of the final rule, the DOT NPRM, and the FAA's proposals in this NPRM.

1. *Reporting by a Representative Sample of Employers.* The FAA final rule requires *all* affected aviation employers to submit semiannual and annual reports. Under the DOT NPRM, although each employer or employer's representative must maintain the data required by each OA's rule, the OAs could select a representative sample of employers who must submit reports to the OA. The FAA does not propose to adopt a representative sample reporting technique at this time. Confirmation of actual drug testing levels and other program elements through official reports from the aviation employer is an important aspect of compliance monitoring. Therefore, the FAA proposes to continue to require submission of reports from all affected aviation employers, unless an employer is otherwise expressly authorized by the FAA not to submit a report.

2. *Reporting by Employee Category.* The FAA final rule requires aviation employers to conduct drug testing and report to the FAA the results regarding specific employee categories or positions tested. The DOT NPRM proposes to permit each OA to require that drug testing information be reported either by employee categories or by other categories established for reporting purposes. The FAA NPRM proposes to continue to require reporting by employee categories, as established in the final rule. The possible addition or deletion of covered employee positions or categories would be deferred.

3. *Reporting by Consortia.* The FAA final rule requires all covered employers, even those that belong to a consortium, to submit required reports directly to the FAA. Under the DOT NPRM, the FAA could permit consortia to submit reports for their member companies directly to the FAA. The FAA proposes to adopt this procedure; however, even if a consortium prepares and submits a report for an employer, the employer would remain responsible for the accuracy and timeliness of the submission.

4. *Employers Affected by More than One OA.* An aviation employer subject to the FAA anti-drug rule whose employees are also subject to the anti-drug rule of another OA must submit data to each regulating OA for those employees covered by that OA rule. This could occur in a number of ways, for example:

a. The employer may have one group of employees who *only* perform functions covered by the FAA and other employees who only perform functions covered by another OA; or

b. The employer may have individual employees who perform functions covered by two or more OAs.

In the first situation, the groups of employees are independent and distinct. The employer is subject to the requirements of separate OAs, but the individual employee is subject to the requirements of only one OA. Under the current rule, the employer must implement an FAA-approved anti-drug program for the employees performing FAA covered functions. A separate anti-drug program covers those employees who are subject to the requirements of another OA rule. With respect to reporting to the FAA, employers may not include information about employees who do not perform a covered aviation function. The reporting of information pertaining to employees covered by the FAA's rule would not be affected by the reporting requirements of this NPRM. Reports pertaining to aviation employees are directed to the FAA; reports pertaining to employees affected by another OA are directed to that OA.

In the second situation, the individual employee is subject to the requirements of different OAs during the performance of duty. The current rule requires that employees who perform functions covered by the FAA rule be subject to an FAA-approved anti-drug program, regardless of whether the affected employees might be subject to the requirements of another OA's rule. This NPRM proposes to make the following change: for employees who perform functions covered by more than one OA, employers would identify the covered position under which the employee would be categorized, and to which OA the results would be reported. The identification would be accomplished on the new FAA annual reporting form.

Employers would continue to report information pertaining to drug tests conducted under the auspices of the FAA anti-drug rule only to the FAA. The employer would have to determine whether the test is conducted pursuant to FAA requirements or the requirements of another OA. Based on that determination, the report would be directed to the appropriate OA.

For employees subject to the requirements of more than one OA, employers would notify employees that a single drug test (for example, a pre-employment test) may be administered to satisfy the requirements of more than one OA.

5. *Alternative Reporting Methods.* The FAA final rule requires that all drug tests conducted under the FAA anti-drug program be included in the semiannual and annual reports. The DOT NPRM proposes to allow an OA to elect to acquire any of the MIS information elements through alternative methodology (for example, through separately-required post-accident reports). The FAA does not propose to acquire information through alternative means at this time. Although the FAA reporting system is still being developed, it has proven to be both practical and efficient. The FAA seeks to avoid the significant possibility that error may be introduced through the use of alternative reporting methods.

6. *Annual Reporting.* The FAA final rule requires aviation employers to submit semiannual and annual reports. The DOT NPRM proposes that program information be submitted on an annual basis, or more frequently if required by the OA's rules. The FAA proposes to eliminate the semiannual reporting requirement and require aviation employers to submit an annual report only. The report would cover the calendar year January 1 through December 31 and would be submitted by February 15 following the reporting period.

7. *Transmission of Reports Electronically.* The DOT NPRM requests comments on the usefulness of transmitting reporting data electronically through the Anti-Drug Information Center (ADIC). The FAA is interested in employers' comments on the use of the ADIC for this purpose.

Proposed Recordkeeping and Reporting Requirements

The DOT NPRM requires each operating administration to submit consolidated industry data, which must include the data elements specified in the NPRM. Therefore, the FAA proposes to require that employers provide the following data to the FAA:

1. Number of covered employees by employee category. This information is necessary to assess the scope of the rule's application and provide a basis for determining the level of random testing being conducted.

2. Employees covered by more than one OA. The employer would identify, and report upon the employees who were affected by the provisions of the FAA's and at least one other OA's anti-drug rule due to the multiple functions performed by the employee. Through employer disclosure of this information, the FAA and DOT would be able to ascertain the size of the dual covered population.

3. Number of specimens collected by type of test and employee category. This information would provide the scope of drug testing in the categories specified by the anti-drug rule and is necessary for reviewing the collection, testing, and review process.

4. Number of positive drug test results verified by a Medical Review Officer (MRO) by type of test, type of drug, and employee category. This information, along with the number of tests performed, would permit the calculation of positive rates necessary to determine the extent of drug use and the specific drugs detected in the various categories of employees. Further, analysis of this information over time would provide a measure of the effectiveness of the anti-drug rule in deterring drug abuse.

5. Number of negative tests verified by a MRO by type of test, and employee category. This data is needed to check compliance with the rules by category and to review the application of the components of the programs.

6. Number of persons denied a position as a covered employee based on verified positive tests. This information would provide an assessment of whether the testing program is being implemented as required, provide a measure of the impact of the FAA anti-drug rule on the aviation industry, and yield information on the prevalence of drug abuse in the applicant pool.

7. Number of employees with tests verified positive by a MRO, who were returned to duty in covered positions (currently in or having completed rehabilitation or otherwise qualified for duty during the reporting period). This information would show employer policies regarding rehabilitation of identified drug abusers.

8. Number of employees with tests verified positive by a MRO for more than one drug. This information would show the extent of multiple drug abuse in the aviation industry.

9. Number of covered employees who refused to submit to a drug test and the action taken in response to the refusal(s). This information would help determine appropriate certificate action on individuals who refuse to submit to testing.

10. Number of covered employees and supervisors who have received required training during the reporting period. This information would provide a cumulative count of covered employees and supervisory personnel who have received the required drug abuse education and training as of December 31st of each year.

The FAA has developed a standard form for use by employers to provide to the FAA the information required by this proposed regulation. The FAA standard form and a detailed set of instructions for correctly completing the form are attached to this NPRM. Although the proposed standard DOT format would make each OA form similar, there could be differences from one OA to the next. Therefore, aviation employers would use only the FAA standard form. As of the publication of the FAA final rule resulting from this NPRM with the attached FAA standard form, no other form would be accepted by the FAA unless expressly authorized by the FAA.

Regulatory Analyses and Notices

Executive Order 12291 and DOT Regulatory Policies and Procedures

This proposal is not "major" under Executive Order 12291. It is significant under the Department of Transportation's Regulatory Policy and Procedures.

Economic Evaluation

Executive Order 12291, dated February 17, 1981, directs Federal agencies to promulgate new regulations or modify existing regulations only if the potential benefits to society for the regulatory change outweigh the potential costs to society. In accordance with the requirements of Executive Order 12291, the FAA reviewed the costs and benefits of the final anti-drug rule issued on November 14, 1988. At that time, the FAA prepared a comprehensive Regulatory Evaluation of the final anti-drug rule. The FAA also summarized and analyzed the comments submitted by interested persons on the economic issues in the final rulemaking document published in the **Federal Register** on November 21, 1988.

The original analysis of the anti-drug rule considered the costs and benefits for all affected employers and concluded that the overall rule, which included much of the information required under this proposed change, had a positive cost-benefit ratio.

This proposed rulemaking would conform the FAA's anti-drug program reporting requirements to standardized reporting requirements proposed for each of the other OA's by the DOT NPRM. The purpose is to provide DOT and the FAA with critical program information in order to make necessary procedure and program evaluations. These evaluations could lead to policy changes to make the rule more effective, which would in turn enhance public safety. The information would provide valuable detail to evaluate the cost/benefit effect of the anti-drug program.

This proposed action could result in a modest increase in the recordkeeping cost of the final rule because the aviation employer would be required to compile and submit information in greater detail than required previously. However the elimination of a reporting requirement (semiannual report) would result in a decreased cost to the employer. In addition, once the aviation employer becomes familiar with the reporting format, preparation of successive reports would become less time-consuming. Finally, the DOT has developed a format, and the FAA has developed a specific form, with instructions that can be used to reduce the costs of compliance. Therefore, the FAA has tentatively concluded any potential effect on costs would be minimal. However, comments addressing potential increased costs are invited from the industry. A revision of the comprehensive Regulatory Evaluation and the preparation of a separate economic evaluation for this amendment is not warranted.

Paperwork Reduction Act Approval

The recordkeeping and reporting requirements of the final anti-drug rule, issued on November 14, 1988, were previously submitted to the Office of Management and Budget (OMB) for approval in accordance with the Paperwork Reduction Act of 1980, and assigned OMB control number 2120–0535.

The paperwork clearance package, 2120–0535, will be amended to reflect the burden associated with this NPRM, and submitted to OMB for approval. Following is a synopsis of the paperwork/recordkeeping burden associated with this NPRM:

DOT No.:
OMB No.: 2120–0535.
Title: Anti-Drug Program for Personnel Engaged in Specified Aviation Activities.
Need For Information: The information is needed to respond to a DOT NPRM which proposes that employers in all segments of the transportation industry maintain and submit standardized anti-drug program information.
Proposed Use of Information: The information submitted is intended to be the basis for monitoring aviation industry implementation of and compliance with the anti-drug rule, and for evaluating the effectiveness of the FAA anti-drug program.
Frequency: Annually.
Burden Estimate: 32,742 hours.
Respondents: Specified aviation employers.
Average Burden Hours Per Respondent: 2.5 hours.

Trade Impact Statement

This proposed rulemaking would affect only domestic aviation operations performed under the provisions of the Federal Aviation Regulations (FAR); therefore, it would have no impact on trade opportunities for United States firms doing business overseas or foreign firms doing business in the United States.

Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 (RFA) was enacted by Congress to ensure that small business entities are not unnecessarily or disproportionately burdened by Government regulations. The FAA certifies that this proposal would not have a significant economic impact, positive or negative, on a substantial number of small entities.

Federalism Implications

The proposed rulemaking action would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, the FAA has determined that this notice does not have sufficient federalism implications to warrant preparation of a Federalism Assessment.

Conclusion

In this action the FAA proposes to amend the requirements imposed upon aviation employers for the maintenance and submission of specific anti-drug program information. It is undertaken in response to a DOT NPRM that would establish a standard Management Information System (MIS) for the Department's drug-testing programs. This MIS will provide the basis for monitoring anti-drug rule implementation and compliance, and for evaluating the effectiveness of the FAA's and DOT's anti-drug programs. Pursuant to the terms of the Regulatory Flexibility Act of 1980, the FAA certifies that the provisions contained in this proposal would not have a

significant economic impact, positive or negative, on a substantial number of small entities. In addition, the proposal would not result in an annual effect on the economy of $100 million or more and would not result in a significant increase in consumer prices; thus, the proposal is not a major one pursuant to the criteria of Executive Order 12291. However, because the proposal involves issues of substantial interest to the public, the FAA has determined that the proposal is significant under the Regulatory Policies and Procedures of the Department of Transportation (44 FR 11034; February 2, 1979).

List of Subjects

14 CFR Part 121

Air carriers, Air transportation, Aircraft, Aircraft pilots, Airmen, Airplanes, Aviation safety, Drug abuse, Drugs, Narcotics, Pilots, Safety, Transportation.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend title 14, Code of Federal Regulations, part 121, appendix I, as follows:

PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC, FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT

1. The authority citation for part 121 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1355, 1356, 1357, 1401, 1421–1430, 1472, 1485, and 1502; 49 U.S.C. 106(g) (revised, Pub. L. 97–449, January 12, 1983).

2. Section X of appendix I to part 121 is revised to read as follows:

Appendix I to Part 121—Drug Testing Program

* * * * *

X. Reporting of anti-drug program results.

A. Each employer shall maintain records of the anti-drug program information identified in this section.

B. Each employer or consortium shall submit annual reports of anti-drug program results on the FAA standard form to the FAA by February 15 for the prior calendar year January 1 through December 31.

C. An FAA-approved consortium may submit reports on behalf of individual aviation employers for purposes of compliance with this reporting requirement. However, the aviation employer shall remain responsible for ensuring the accuracy and timeliness of each report submitted on its behalf by a consortium.

D. Each report shall be submitted on the form specified by the FAA. No other DOT Operating Administration form, or the DOT form, is acceptable for submission to the FAA.

E. Each report shall be signed by the employer's or consortium's anti-drug program manager or designated representative.

F. Each report shall include each of the following informational elements:

1. Number of covered employees by employee category.

2. Number of covered employees affected by the anti-drug rule of another OA identified and reported by number and employee category.

3. Number of specimens collected by type of test and employee category.

4. Number of positive test results verified by a Medical Review Officer (MRO) by type of test, type of drug, and employee category.

5. Number of negative tests verified by a MRO by type of test and employee category.

6. Number of persons denied a position as a covered employee based on a verified positive drug test verified by a MRO.

7. Number of employees with a test verified positive by a MRO who were returned to duty in covered positions (currently in or having completed rehabilitation or otherwise qualified to return to duty during the reporting period).

8. Number of employees with tests verified positive for multiple drugs by a MRO.

9. Number of covered employees who refused to submit to a drug test and the action taken in response to the refusal(s).

10. Number of covered employees and supervisory personnel who have received required initial training. Number of supervisors who have received required recurrent or refresher training.

3. Appendix K to part 121 is added to read as follows:

Note: This appendix will not appear in the Code of Federal Regulations.

Appendix K to Part 121—Drug and Alcohol Testing Management Information System Data Collection Form

BILLING CODE 4910-13-M

GENERAL INSTRUCTIONS

This reporting form includes three parts. Collectively, these parts address the data elements required in the Federal Aviation Administration (FAA) and the U.S. Department of Transportation (DOT) drug and alcohol testing regulations. Each part of the form is preceded by instructions which outline and explain the information requested and indicate the probable sources for this information. The three parts of the form are:

Section	Instructions Pages	Reporting Form Pages
I. ORGANIZATIONAL INFORMATION	i-ii	1-2
II. DRUG TESTING INFORMATION	iii-vii	3-11
III. ALCOHOL TESTING INFORMATION	viii-xii	12-19

I. ORGANIZATIONAL INFORMATION

INSTRUCTIONS

This part of the reporting form includes two sections. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. EMPLOYER INFORMATION	i	1
B. COVERED EMPLOYEES	ii	2

Page 1

EMPLOYER INFORMATION (Section A) requires the company name for which the report is done and a current address. Below the company names, list any other names the company uses ("Doing Business As") and the company's FAA Anti-drug Plan Identification Number. Indicate which FAA Certificate(s) are held by the company. Below this, a signature and date are required certifying the correctness and completeness of this form, and a current telephone number (including the area code). Finally, list the name, address, and telephone number for any other aviation companies covered under the report, attaching additional sheets, if necessary.

COVERED EMPLOYEES (Section B) requires a count for each employee category that must be tested under FAA/DOT regulations. For the FAA, the covered employees are "Flight Crew Members" which includes pilots, flight engineers, and navigators; "Flight Attendants", "Flight or Ground Instructors"; "Aircraft Dispatchers"; "Flight Testing Personnel"; "Maintenance or Preventive Maintenance Personnel"; "Security or Screener Personnel"; and "Air Traffic Control Personnel." The most likely source for this information is the employer's personnel department. These counts should be based on the company records for the reported year. The **TOTAL** is a count of **all** covered employees for **all** categories combined, i.e., the sum of the columns.

Additional information must be completed if your company employs personnel who perform duties covered by the drug and alcohol rules of more than one DOT operating administration. **NUMBER OF EMPLOYEES COVERED BY MORE THAN ONE DOT OPERATING ADMINISTRATION**, requires that you identify the number of employees in each employee category under the appropriate additional operating administration(s).

II. DRUG TESTING INFORMATION

INSTRUCTIONS

The following instructions are to be used as a guide for completing the drug testing information in the FAA and DOT **Drug and Alcohol Testing Management Information System Data Collection Form**. These instructions outline and explain the information requested and indicate probable sources for this information. A sample testing results table with a narrative explanation is provided on pages v-vi as an example to facilitate the process of completing the form correctly.

This part of the reporting form includes four sections. These sections address the data elements required in the regulations. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. JOB APPLICANT TESTING INFORMATION	iv	4
B. EMPLOYEE TESTING	vi	5-9
C. OTHER TESTING/PROGRAM INFORMATION	vii	10
D. TRAINING/EDUCATION	vii	11

Sections A and B are used to summarize the drug testing results for covered employees. There are six tables to be completed (one in Section A and five in Section B). The first table (Section A) is where you enter the data on pre-employment testing. The five tables in Section B are for entering drug testing data on periodic, random, post-accident, reasonable cause, and return to duty testing, respectively. Items necessary to complete these tables include:

1) the number of specimens collected in each employee category;
2) the number of specimens tested which were verified negative and verified positive for any drug(s); and
3) individual counts of those specimens which were verified positive for each of the five drugs.

Do not include results of quality control (QC) samples submitted to the testing laboratory in any of the tables.

A sample table with detailed instructions is provided for Section A, **JOB APPLICANT TESTING INFORMATION**. The format and explanations used for the sample table apply to all six of the tables in Sections A and B.

Information on actions taken with those persons testing positive is required at the end of both Sections A and B. Specific instructions for providing this latter information are given after the instructions for completing the tables in Sections A and B

Page 4

JOB APPLICANT TESTING INFORMATION (Section A) requires information for pre-employment testing. All numbers entered into this table should be separated into the category of employment for which the applicant was applying. A sample table with example numbers is presented on page vi.

Three types of information are necessary to complete the left side of this table. The first blank column with the heading "**NUMBER OF SPECIMENS COLLECTED,**" requires a count for all collected specimens by employee category. It should not include refusals to test. The second blank column with the heading "**NUMBER OF SPECIMENS VERIFIED NEGATIVE,**" requires a count for all completed tests by employee category that were verified negative by your Medical Review Officer (MRO).

The third blank column with the heading "**NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS,**" refers to the number of specimens provided by job applicants that were verified positive. "Verified positive" means the results were verified by your MRO.

The right hand portion of this table, with the heading "**NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG,**" requires counts of positive tests for each of the five drugs for which tests were done, i.e., marijuana (THC), cocaine, phencyclidine (PCP), opiates, and amphetamines. The number of specimens positive for each drug should be entered in the appropriate column for that drug type. Again, "verified positive" refers to test results verified by your MRO.

If an applicant tested positive for more than one drug; for example, both marijuana and cocaine, that person's positive results would be included once in each of the appropriate columns (marijuana and cocaine).

Each column in the table should be added and the answer entered in the row marked "**TOTAL**".

A sample table is provided on page vi with example numbers.

Page 4

Below the table for pre-employment testing information is a box with the heading "**Number of persons denied a position as a covered employee following a verified positive drug test**". This is simply a count of those persons who were not placed in a covered position because they tested positive for one or more drugs.

SAMPLE APPLICANT TEST RESULTS TABLE

The following example is for Section A, **JOB APPLICANT TESTING INFORMATION**, which summarizes pre-employment testing results. The procedures detailed here also apply to the tables in Section B which require you to summarize testing results for employees. This example will use the first two FAA categories "Flight Crew Members" and "Flight Attendants" to illustrate the procedures for completing the form.

A — Urine specimens were collected for 157 job applicants for flight crew positions during the reporting year. This information is entered in the first blank column of the table in the row marked "Flight Crew Members".

B — The Medical Review Officer (MRO) for your company reported that 153 of those 157 specimens from applicants for flight crew positions were negative (i.e., no drugs were detected). Enter this information in the second blank column of the table in the row marked "Flight Crew Members".

C — The MRO for your company reported that 4 of those 157 specimens from applicants for flight crew positions were positive (i.e., a drug or drugs were detected). Enter this information in the third blank column of the table in the row marked "Flight Crew Members".

D — With the 4 specimens that tested positive, the following drugs were detected:

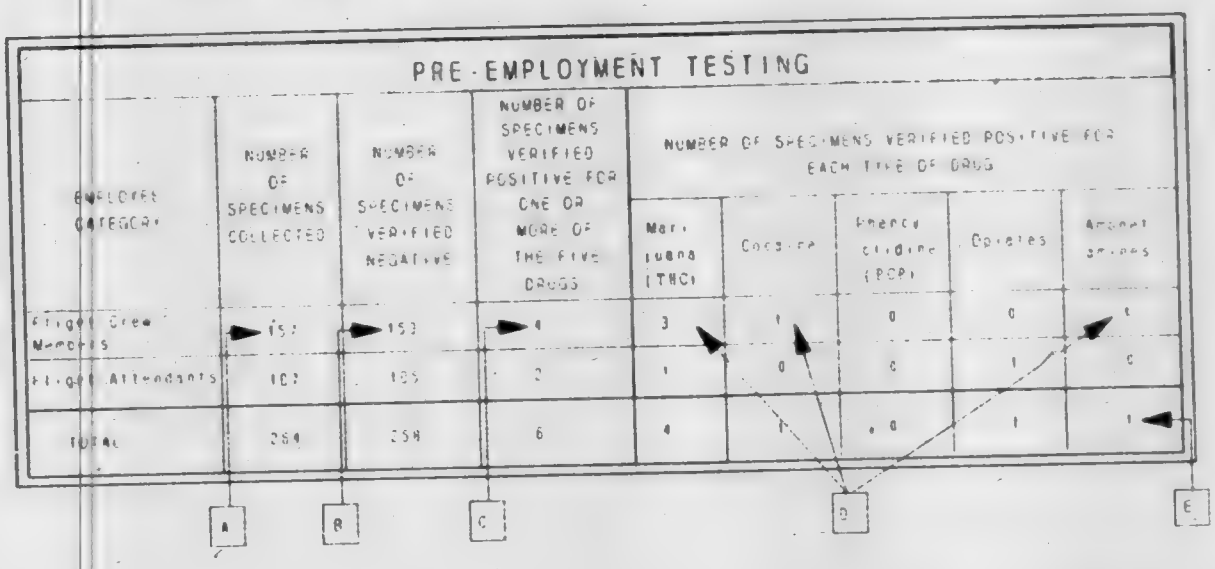
Specimen	Drugs
#1	Marijuana
#2	Amphetamines
#3	Marijuana and Cocaine (Multi-drug specimen)
#4	Marijuana

Marijuana was detected in three (3) specimens, cocaine in one (1), and amphetamines in one (1). This information is entered in the columns on the right hand side of the table under each of these drugs. Since two different drugs were detected in specimen #3 (multi-drug), entries are made in both the marijuana and the cocaine columns for this specimen. Information on multi-drug specimens must also be entered in Section C, **OTHER TESTING/PROGRAM INFORMATION**, on page 10 of the reporting form.

Please note that the sample data collection form below also has information for flight attendant positions on line two of our data collection form. The same procedures outlined for flight crew positions should be followed for entering the data on flight attendant positions. With applicants for flight attendant positions, 107 specimens were collected resulting in 105 verified negatives and 2 verified positives -- 1 for marijuana and 1 for opiates. This information is entered in the row marked "Flight Attendants".

E — The last row, marked "TOTAL", requires you to add the numbers in each of the columns. With this example, 157 specimens from applicants for flight crew positions were collected and 107 for applicants for flight attendant positions. The total for that column would be 264 (i.e., 157+107). The same procedure should

be used for each column, i.e., add all the numbers in that column and place the answer in the last row.



Note that adding up the numbers for each type of drug in a row ("NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG") will not always match the number entered in the third column, "NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS". The total for the numbers on the right hand side of the table may differ from the number of specimens testing positive since some specimens may contain more than one drug.

Remember that the same procedures indicated above are to be used for completing all of the tables in Sections A and B.

Pages 5-9 **EMPLOYEE TESTING** (Section B), as indicated, requires information for company employees in **covered positions** only. A separate table must be completed for each category of test. These categories include: (1) periodic, (2) random, (3) post-accident, (4) reasonable cause, and (5) return to duty testing. These tables are to be filled out like the sample table above. Again, these numbers **do not** include refusals for testing.

Page 9 Following these tables that summarize **EMPLOYEE TESTING**, you must provide counts for employees who have tested positive and are currently in, or have completed rehabilitation, and have returned to work in a covered position. Report this information only for employees who tested positive during this reporting period. This information should be available from the personnel office and/or drug program manager.

Page 10 **OTHER TESTING/PROGRAM INFORMATION** (Section C) requires that you complete a table dealing with specimens positive for more than one drug and a table dealing with employees who refused to submit to a drug test.

Page 10 **SPECIMENS VERIFIED POSITIVE FOR MORE THAN ONE DRUG** requires information on specimens that contained more than one drug. Indicate the **EMPLOYEE CATEGORY** and the **NUMBER OF VERIFIED POSITIVES**, then check the appropriate columns indicating the combination of drugs reported as positive. For example, if marijuana and cocaine were detected in 3 flight crew members specimens, then you would write "Flight Crew Members" as the employee category, "3" as the number of verified positives, and "3" in the columns for "Marijuana" and "Cocaine". If marijuana and opiates were detected in 2 flight crew members specimens, then you would write "Flight Crew Members" as the employee category, "2" as the number of verified positives, and "2" in the columns for "Marijuana" and "Opiates".

Page 10 **EMPLOYEES WHO REFUSED TO SUBMIT TO A DRUG TEST** requires information on the **NUMBER OF COVERED EMPLOYEES** who refused to submit to a drug test required under this regulation, and a description of the **ACTION TAKEN** in response to the refusal. An example of an action taken would be "removed from covered duties pending termination".

Page 11 **TRAINING/EDUCATION** (Section D) requires information on the number of covered employees and supervisory personnel who have received the required drug training during the current reporting period.

READ BEFORE COMPLETING THE REMAINDER OF THIS FORM:

1. All items refer to the current reporting period only (for example, January 1, 1993 - December 31, 1993).

2. This report is only for testing REQUIRED BY THE FEDERAL AVIATION ADMINISTRATION (FAA) AND THE U.S. DEPARTMENT OF TRANSPORTATION (DOT):

   - Results should be reported only for employees in COVERED POSITIONS as defined by FAA/DOT drug testing regulations.
   - The information requested should only include testing for marijuana (THC), cocaine, phencyclidine (PCP), opiates, and amphetamines using the standard procedures required by DOT regulation 49 CFR Part 40.

3. Information on refusals for testing should only be reported in Section C ("OTHER TESTING/PROGRAM INFORMATION"). Do not include refusals for testing in other sections of this report.

4. Do not include the results of any quality control (QC) samples submitted to the testing laboratory in any of the tables.

5. Complete all items; DO NOT LEAVE ANY ITEM BLANK. If the value for an item is zero (0), place a zero (0) on the form.

This part of the form requires information on VERIFIED POSITIVE and VERIFIED NEGATIVE drug tests. These are the results that are reported to you by your Medical Review Officer (MRO).

D. TRAINING/EDUCATION

Training During Current Reporting Period

Number of covered employees who have received initial training on the consequences, manifestations, and behavioral cues of drug use as required by FAA drug testing regulations: [ ]

Number of supervisory personnel who have received initial training on the specific contemporaneous physical, behavioral, and performance indicators of probable drug use as required by FAA drug testing regulations: [ ]

Number of supervisory personnel who have received recurrent or refresher training on the specific contemporaneous physical, behavioral, and performance indicators of probable drug use: [ ]

III. ALCOHOL TESTING INFORMATION

INSTRUCTIONS

The following instructions are to be used as a guide for completing the alcohol testing information for the Federal Aviation Administration (FAA) and the U.S. Department of Transportation (DOT) **Drug and Alcohol Testing Management Information System Data Collection Form**. These instructions outline and explain the information requested and indicate probable sources for this information. A sample testing results table with a narrative explanation is provided on pages ix-xi as an example to facilitate the process of completing the form correctly.

This part of the reporting form includes four sections. These sections address the data elements required in the regulations. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. JOB APPLICANT TESTING INFORMATION	ix	13
B. EMPLOYEE TESTING	xi	14-18
C. OTHER TESTING/PROGRAM INFORMATION	xi	19
D. TRAINING/EDUCATION	xii	19

Sections A and B are used to summarize the alcohol testing results for covered employees. There are six tables to be completed (one in Section A and five in Section B). The first table (Section A) is where you enter the data on pre-employment/pre-duty testing. The five tables in Section B are for entering alcohol testing data for random, post-accident, reasonable suspicion, return to duty, and follow-up testing, respectively. Items necessary to complete these tables include:

1) the number of initial alcohol tests performed for each employee category;
2) the number of confirmatory alcohol tests performed for each employee category;
3) the number of confirmatory test results which were equal to or greater than 0.04; and
4) the number of confirmatory test results which were equal to or greater than 0.02, but less than 0.04.

A sample table with detailed instructions is provided for Section A, **JOB APPLICANT TESTING INFORMATION**. The format and explanations used for the sample table apply to all six of the tables in Sections A and B.

Information on actions taken with those persons whose alcohol test results were 0.04 or greater is required at the end of both Sections A and B. Specific instructions for providing this latter information are given after the instructions for completing the tables in Sections A and B.

Page 13

JOB APPLICANT TESTING INFORMATION (Section A) requires information for pre-employment/pre-duty testing. All numbers entered into this table should be separated into the category of employment for which the applicant was applying. A sample table with example numbers is presented on page x.

Four types of information are necessary to complete the left side of this table. The first blank column with the heading "**NUMBER OF INITIAL TESTS**" requires a count of all initial alcohol tests performed for each employee category. It should not include refusals to test. The second blank column with the heading "**NUMBER OF CONFIRMATORY TESTS**" requires a count of all confirmatory alcohol tests performed for each employee category.

The third blank column with the heading "**NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04**" requires a count for each employee category.

The fourth blank column with the heading "**NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02, BUT LESS THAN 0.04**" requires a count for each employee category.

Each column in the table should be added and the answer entered in the row marked "**TOTAL**".

A sample table is provided on page x with example numbers.

Page 13

Below the table for pre-employment testing information is a box with the heading "**Number of persons denied a position as a covered employee following a pre-employment/pre-duty alcohol test indicating an alcohol concentration of 0.04 or greater**". Enter the appropriate number in the box provided.

SAMPLE APPLICANT TEST RESULTS TABLE

The following example is for Section A, **JOB APPLICANT TESTING INFORMATION**, which summarizes pre-employment/pre-duty testing results. The procedures detailed here also apply to the tables in Section B which require you to summarize testing results for employees. This example will use the categories "Flight Crew Members" and "Flight Attendants" to illustrate the procedures for completing the form.

A

Initial tests were performed on 157 job applicants for flight crew positions during the reporting year. This information is entered in the first blank column of the table in the row marked "Flight Crew Members".

B

Confirmatory tests were necessary for 6 of the 157 applicants for flight crew positions. Enter this information in the second blank column of the table in the

row marked "Flight Crew Members". The confirmatory test results for these 6 applicants were the following:

Applicant	Confirmation Result
#1	0.06
#2	0.01
#3	0.11
#4	0.04
#5	0.03
#6	0.02

C The confirmatory test results for 3 of the applicants for flight crew positions were equal to or greater than 0.04. Enter this information in the third blank column of the table in the row marked "Flight Crew Members".

D The confirmatory test results for 2 of the applicants for flight crew positions were equal to or greater than 0.02, but less than 0.04. Enter this information in the fourth blank column of the table in the row marked "Flight Crew Members".

E The last row, marked "TOTAL", requires you to add the numbers in each of the columns. With this example, 157 applicants for flight crew positions and 107 applicants for flight attendant positions were subjected to initial tests. The total for that column would be 264 (i.e., 157 + 107). The same procedure should be used for each column (i.e., add all the numbers in that column and place the answer in the last row).

PRE-EMPLOYMENT/PRE-DUTY TESTING

EMPLOYEE CATEGORY	NUMBER OF INITIAL TESTS	NUMBER OF CONFIRMATORY TESTS	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02, BUT LESS THAN 0.04
Flight Crew Members	157	6	3	2
Flight Attendants	107	3	1	0
TOTAL	264	9	4	2

A B C D E

Please note that the sample data collection form also has information for flight attendants workers on line two. The same procedures outlined for flight crew members should be followed

x

for entering the data on flight attendant workers. With applicants for flight attendant positions, 107 initial tests were conducted resulting in 3 confirmatory tests. The confirmatory test result for 1 of the flight attendant applicants was equal to or greater than 0.04; no results were equal to or greater than 0.02, but less than 0.04. This information is entered in the row marked "Flight Attendants".

Note that adding up the numbers for confirmation results in columns three and four will not always match the number entered in the second column, "NUMBER OF CONFIRMATORY TESTS". These numbers may differ since some confirmatory test results may be less than 0.02.

Remember that the same procedures indicated above are to be used for completing all of the tables in Sections A and B.

Pages 14-18 **EMPLOYEE TESTING** (Section B), as indicated, requires information for company employees in **covered positions** only. A separate table must be completed for each category of test. These categories include: (1) random, (2) post-accident, (3) reasonable suspicion, (4) return to duty, and (5) follow-up testing. These tables are to be filled out like the sample table above. Again, these numbers **do not** include refusals for testing.

Page 18 Following these tables that summarize **EMPLOYEE TESTING**, you must provide a count of the **"Number of employees with a confirmatory alcohol test indicating an alcohol concentration of 0.04 or greater who were returned to duty in a covered position (having complied with the recommendations of a substance abuse professional as described in FAA/DOT regulations)"**. Report this information only for employees who were tested during this reporting period. This information should be available from the personnel office and/or alcohol program manager.

Page 19 **OTHER TESTING/PROGRAM INFORMATION** (Section C) requires that you provide information on employees who tested positive for drugs and alcohol (at the same time), information on violations of other alcohol provisions (not necessarily resulting in positive alcohol tests), and information on employees who refused to submit to an alcohol test.

Page 19 **Number of employees administered drug and alcohol tests at the same time resulting in a verified positive drug test and an alcohol test indicating an alcohol concentration of 0.04 or greater**, requires that a count of all such employees be entered in the indicated box.

Page 19 **VIOLATIONS OF OTHER ALCOHOL PROVISIONS/PROHIBITIONS OF THIS REGULATION**, requires information on the **NUMBER OF COVERED EMPLOYEES** committing such a violation, a description of the **VIOLATION** committed (e.g., pre-duty alcohol use, on duty alcohol use, on duty alcohol possession), and a description of the **ACTION TAKEN** in response to the violation.

Page 19 **EMPLOYEES WHO REFUSED TO SUBMIT TO AN ALCOHOL TEST** requires information on the **NUMBER OF COVERED EMPLOYEES** who refused to submit to an alcohol test as required under this regulation, and a description of the **ACTION TAKEN** in response to the refusal.

Page 19 **TRAINING/EDUCATION** (Section D) requires information on the number of supervisory personnel who have received the required alcohol training during the current reporting period.

VOL 57 SS 241 DE 15 992 UMI

READ BEFORE COMPLETING THE REMAINDER OF THIS FORM:

1. All items refer to the **current** reporting period **only** (for example, January 1, 1993 - December 31, 1993).

2. This report is only for testing **REQUIRED BY THE FEDERAL AVIATION ADMINISTRATION (FAA) AND THE U.S. DEPARTMENT OF TRANSPORTATION (DOT)**:

   - Results should be reported only for employees in **COVERED POSITIONS** as defined by FAA/DOT alcohol testing regulations.
   - The information requested should only include testing for alcohol using the standard procedures required by DOT regulation 49 CFR Part 40.

3. Information on refusals for testing should only be reported in Section C ("OTHER TESTING/PROGRAM INFORMATION"). Do not include refusals for testing in other sections of this part of the report.

4. Complete all items; DO NOT LEAVE ANY ITEM BLANK. If the value for an item is zero (0), place a zero (0) on the form.

Department of Transportation

Federal Highway Administration

49 CFR Part 350, et al.
Drug and Alcohol Testing Programs; Proposed Rules

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

49 CFR Parts 350, 382, 383, 392, and 395

[FHWA Docket No. MC-92-19]

RIN 2125-AC85

Federal Motor Carrier Safety Regulations; Commercial Motor Carrier Safety Assistance Program; Controlled Substances and Alcohol Use and Testing; Commercial Driver's License Standards; Driving of Motor Vehicles; Hours of Service of Drivers

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FHWA is requesting comments on a proposed rule which would prohibit alcohol use and possession and mandate alcohol testing of drivers who operate commercial motor vehicles. This action is being taken in response to the Omnibus Transportation Employee Testing Act of 1991 and complements existing regulatory prohibitions on alcohol and controlled substances use. This proposal is consistent with a companion NPRM published by the FHWA on controlled substances testing and an NPRM on alcohol testing procedures published by the Office of the Secretary, U. S. Department of Transportation (OST). These two NPRMs are published elsewhere in today's **Federal Register**.

The overall goal of alcohol testing is to ensure that drivers who use alcohol are not permitted to operate a commercial motor vehicle, thereby reducing accidents, injuries and fatalities on highways nationwide.

In this proposal, the FHWA is proposing two different options for testing drivers randomly for alcohol misuse as required by the Omnibus Transportation Employee Testing Act of 1991. The first option would require motor carriers to perform all aspects of an alcohol testing program. The second option would require States accepting Motor Carrier Safety Assistance Program (MCSAP) grants from the FHWA to perform random alcohol testing of commercial motor vehicle drivers, while motor carriers would be required to perform all other aspects of the alcohol testing program. The FHWA will determine from the comments received to the docket whether the second option is feasible for alcohol testing of drivers of commercial motor vehicles.

DATES: Comments must be received on or before April 14, 1993.

ADDRESSES: All signed, written comments should refer to the docket number that appears at the top of this document and must be submitted to HCC-10, room 4232, Office of the Chief Counsel, 400 Seventh Street, SW., Washington, DC 20590. All comments received will be available for examination at the above address from 8:30 a.m. to 3:30 p.m., e.t., Monday through Friday, except Federal legal holidays.

FOR FURTHER INFORMATION CONTACT: Mr. David Miller, Office of Motor Carrier Standards, (202) 366-2981, or Mr. David Sett, Office of the Chief Counsel, (202) 366-0834, Federal Highway Administration, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except Federal legal holidays.

The public is urged to obtain information through the Department of Transportation's Anti-Drug Information Center (ADIC) system. The public may access the system by dialing (800) 225-3784 using a touch tone telephone. Access to a computer system may also be made using a personal computer connected via modem on (800) 225-3804. A user fee will be charged for certain services provided by the system.

SUPPLEMENTARY INFORMATION:

I. Statutory Authority

The Omnibus Transportation Employee Testing Act of 1991 (the Act) was signed by President Bush on October 28, 1991, as part of the 1992 Department of Transportation and Related Agencies Appropriations Act. Public Law 102-143, Title V, 105 Stat. 917, 952 (1991). The Act requires the Secretary of Transportation to promulgate regulations for alcohol and controlled substances testing for persons in safety-sensitive positions in four modes of transportation: Motor carrier, airline, railroads and mass transit. The general requirements of the Act are addressed in the OST's NPRM amending 49 CFR part 40 and in a common preamble, also prepared by OST, applicable to all of the U.S. Department of Transportation (USDOT) modal agency rules on alcohol testing programs. These documents appear elsewhere in today's issue of the Federal Register. All of the requirements of the Act are fully incorporated herein.

Section 5 of the Act addresses the requirements for motor carriers. This section amends the Commercial Motor Vehicle Safety Act of 1986 (CMVSA). Public Law 99-570, 100 Stat. 3207-170 (codified at 49 U.S.C. app. 2701-2718) The CMVSA establishes the requirements for the commercial driver's license (CDL). The FHWA has implemented the CDL provisions of the CMVSA through the publication of several final rules. A discussion of the CDL requirements, including who is required to obtain a CDL, is included under Section V, Commercial driver's license program, later in this preamble.

The Act requires the Secretary to issue regulations by October 28, 1992, requiring motor carriers to conduct pre-employment, reasonable suspicion, random and post-accident testing of drivers for the use of alcohol or a controlled substance which use constitutes a violation of law or Federal regulation. Congress recognized that the Federal Highway Administration has already issued regulations for controlled substances testing which reference the scientific and technical guidelines established by the Department of Health and Human Services. (49 CFR part 391, subpart H). The FHWA believes it is the intent of Congress that the regulations required to be developed under the Act be an adjunct to FHWA's current controlled substances regulations. In addition, the FHWA believes that the sanctions addressed in the Act, for violations of law or Federal regulation for use of a controlled substance or alcohol for which a driver is not considered to be under the influence, should be the same or similar to the sanctions or penalties of Public Law 99-570, 100 Stat. 3207-170 Sec. 12008 of the CMVSA.

II. Regulatory History

The FHWA published in the **Federal Register** a final rule on November 21, 1988, setting forth regulations to require motor carriers who operate commercial motor vehicles in interstate commerce to have an anti-drug program, including the testing of commercial motor vehicle drivers for the use of controlled substances. 53 FR 47134. That rule required motor carriers to conduct five types of controlled substances tests: Pre-employment/use, periodic, reasonable cause, post-accident and random. Generally, interstate drivers of commercial motor vehicles with a gross vehicle weight rating (GVWR) more than 26,000 pounds, vehicles transporting hazardous materials which are required to be placarded, or vehicles designed to transport more than 15 passengers, including the driver, are covered by this final rule.

On the same date, November 21, 1988, the Office of the Secretary, U.S. Department of Transportation (OST) published an interim final rule, "Procedures for Transportation

Workplace Drug Testing Programs." 53 FR 47002. On November 2, 1989, OST published an advance notice of proposed rulemaking (ANPRM) on alcohol testing. 54 FR 46328. On December 1, 1989, OST published a final rule amending certain portions of the interim final rule. 54 FR 49854. This final rule is being referred to in this document as the "OST rule."

Subsequent to the publication of the November 21, 1988, FHWA final rule, the FHWA published several notices relating to the controlled substances testing requirements, including an interim final rule. 54 FR 39546; 54 FR 46616; 54 FR 53294; 55 FR 3546.

III. Substance Abuse in Transportation

Refer to the Office of the Secretary's common preamble to all the USDOT modal agencies' alcohol NPRMs, published elsewhere in today's **Federal Register** for a complete discussion of this topic. The OST preamble is referred to as the common preamble in this document since it applies to all DOT agency alcohol testing programs including FHWA's, except as noted herein.

IV. Legal Issues

Many of the legal issues implicated by the FHWA's proposed testing program have been considered in the Legal Authority/Issues section of the OST general preamble. Therefore, only those issues unique to or highlighted by FHWA's rule and regulatory environment will be discussed in this section.

In *International Brotherhood of Teamsters* v. *U.S. Department of Transportation*, 932 F.2d 1292 (9th Cir. 1991) ("IBT"), the FHWA's current controlled substances testing program was adjudged to comport with the Fourth Amendment. The court held that the search mandated by the FHWA, including random, nonsuspicion testing, was reasonable. Warrant and probable cause requirements were held impractical in the particular context of motor carrier-based testing of drivers of commercial motor vehicles. The testing program "promotes special governmental needs, beyond the normal need for law enforcement," (quoting *Bluestein* v. *Skinner*, 908 F.2d 451, 455 (9th Cir. 1990)), such as ensuring safety and deterring drug use in the workplace. *IBT* at 1299. For the same reasons, the proposed rule includes no provisions for warrants and probable cause is not a prerequisite to testing.

Also consistent with the framework of the current program is the limited release of the results under the proposed rule. *Id.* While various forms of testing will be administered without suspicion of alcohol misuse under the proposed rule, in the absence of a probable cause determination made by a Federal, State, or local official the results of such tests will not be used to prosecute a driver criminally, regardless of the level of alcohol ultimately determined to be present in the driver's system. The only consequences for having a prohibited concentration of alcohol which are provided in the proposed rule are driving prohibitions (including CDL revocations or suspensions) and referral to a substance abuse professional. It is only where probable cause is determined under authority granted by State law that a driver may be subject to criminal prosecution for driving under the influence based on an illegal breath alcohol concentration level. *See Michigan* v. *Sitz*, 496 U.S. 444 (1990).

In considering the intrusion on a driver's reasonable expectation of privacy caused by controlled substances testing, the *IBT* court found that commercial motor vehicle operations occur in the context of a highly regulated industry. "The incremental decrease in privacy caused by the search relative to the existing privacy expectations of the drivers" was insubstantial. *IBT* at 1300, citing *Skinner* v. *Railway Labor Executives' Association*, 489 U.S. 602, 624–5 (1989) and *National Treasury Employees Union* v. *Von Raab*, 489 U.S. 656, 671–2 (1989). In addition to the restrictions on movement imposed on all employees as a condition of employment, the FHWA acknowledges that drivers are already required to document biennial physical examinations, including urinalysis, and to record their on-duty time on records of duty status. Both documents are reviewable by employers and government officials.

In practice, what FHWA is proposing under Option 2 is a slight incremental increase in the roadside inspection burden already imposed on drivers. Along with their medical certificate, proof of hours of service, logs, shipping papers, proof of insurance in certain cases, and commercial driver's licenses, drivers will be required to provide adequate breath for testing. As part of ongoing and longstanding roadside inspections, this brief, additional procedure will not limit a driver's freedom of movement to the extent that the search's intrusiveness is increased. The roadside location also does not increase the intrusiveness of the test procedure itself or the surprise occasioned by unannounced random tests.

Not all random tests under Option 2 will be conducted, however, along the roadside. In order to ensure scientific randomness, alcohol tests will be conducted at a wide variety of work-related locations. Places such as carrier terminals are likely locations for tests. Under such circumstances the time commitment required of drivers will be less than that involving current controlled substances testing, in which drivers usually must travel to collection sites remote from the terminal.

To be balanced against this "minimal" level of intrusiveness in an environment of "substantially reduced privacy expectations" is the compelling interest of the government in alcohol testing. *IBT* at 1303. The purpose of the alcohol testing program is to detect and deter on-duty alcohol misuse and impairment by commercial motor vehicle drivers, who perform highly safety-sensitive tasks. This "concern for safety and deterrence * * * at least parallels, if not exceeds, the government interests found compelling in [the] earlier [airline, pipeline, and Customs Service employees] cases." *Id.* at 1304. The great number of commercial motor vehicles on the roads, all much larger than most other vehicles and thus capable of inflicting enormous damage, "multiplies the danger to motorists and raises the FHWA's concern for transportation safety to the level of a compelling government interest." *Id.* The balance of interests clearly weighs in favor of the FHWA's program.

While the reasonableness of a testing program does not turn on the existence of less intrusive alternative means, the court in *IBT* nevertheless found that it was not clear that such means as requiring reasonable suspicion for all controlled substances testing would accomplish the deterrent purpose of the program. Given the widespread alcohol problem in society, and the rapid rate at which alcohol is eliminated from the body, random alcohol testing, particularly at the roadside, represents the most effective means of deterring on-duty alcohol use.

Random testing for alcohol, much like that for controlled substances, responds to the operational realities of the motor carrier industry. *Id.* at 1304–5. Drivers work alone and unsupervised for long periods. The opportunity for motor carriers to detect alcohol use by their drivers may be limited to brief encounters at terminals. Therefore, great harm could be inflicted by alcohol impaired drivers before any signs of alcohol misuse are detected.

"Given the unique deterrent effect of random testing and the inefficiency of relying on individualized suspicion in this particular employment context, the FHWA reasonably found the alternative,

less intrusive drug tests to be insufficient to meet its goals." *Id.* at 1305. In similar fashion, the FHWA has determined that alcohol testing, including random and roadside components, is the most efficient method for achieving its statutory mandate of improved highway safety.

V. Commercial Driver's License Program

The Commercial Driver's License (CDL) program is a broad-based initiative to upgrade commercial motor vehicle (CMV) safety by establishing minimum Federal standards for State testing and licensing of CMV drivers, and by disqualifying drivers who develop poor records while operating CMVs. The CDL program applies to virtually all drivers of CMVs meeting or exceeding a 26,001 pound gross vehicle weight rating threshold, hauling placardable amounts of hazardous materials, or carrying 16 or more persons. The only persons excluded or waived from CDL responsibilities are those engaged in purely personal/recreational transportation, uniformed active-duty military personnel, and certain farmers, farm related service industries and firefighters and operators of other emergency vehicles. Unlike other Federal motor carrier safety programs, the CDL applies without distinction to inter- or intrastate commerce, and without regard to the purpose, frequency, duration or amount of the transportation. Thus, for example, drivers of government vehicles, school bus operators, and volunteer drivers of CMVs of all kinds must obtain CDLs and are subject to the corresponding disqualifications.

As of April 1, 1992, except as noted above, every CMV operator must have obtained a State-issued CDL by undergoing extensive knowledge and/or skills testing, providing specified certifications and information, and undergoing driving record checks both at the State level and through the Commercial Driver's License Information System (CDLIS—the national computerized clearinghouse for CMV driver records) and the National Driver Record (addressing problem drivers of all types). The required tests are tailored to the type of vehicle operated; all vehicles are classified by size and handling characteristics, and certain specialized vehicles or hazardous materials loads require specialized testing. Upon issuing a CDL to a driver, a State must identify itself to the CDLIS as the driver's single State of record, thus preventing that driver from obtaining a CDL from another State

CMV operators who are convicted of certain very serious driving offenses involving CMVs—driving under the influence of alcohol or drugs, leaving the scene of an accident, or felonies—will lose their CDLs and all commercial driving privileges for periods of from one year to life, depending on the nature of the offense. Two or more serious traffic violations committed in CMVs—excessive speeding, reckless driving, following too closely, erratic lane changes, or any offenses pertaining to a fatal accident—will lead to disqualifications of CMV driving privileges from 60 to 120 days. The CDLIS, accessed through a nationwide computer information network for State motor vehicle departments, will assure that disqualifying offenses committed anywhere will lead to disqualification by a CDL holder's State of licensure. Thus, the CDL program as currently structured positively enhances the qualifications of the CMV operator workforce nationwide, and provides enforceable consequences against CMV operators exhibiting bad driving behavior in every State.

As currently codified, the CDL regulations do not require CMV drivers to undergo testing for alcohol use beyond the testing traditionally performed by States in traffic law enforcement. However, the existing regulations constitute a marked improvement over prior treatment of alcohol offenses by these drivers in that—

1. The CDLIS prevents drivers from obtaining multiple licenses, which formerly allowed drivers to spread alcohol and other convictions over multiple States of record;

2. The CDLIS and its supporting information network allow alcohol convictions to be forwarded speedily to the driver's State of record for licensing action;

3. The threshold at or above which a CMV driver is deemed to be driving under the influence, hence subject to severe penalties, is now 0.04 breath alcohol concentration, rather than the 0.10 prevalent in most States prior to CDL;

4. The disqualification periods for alcohol-related offenses—one year for the first offense, three years for the first offense involving hazardous materials, lifetime (commutable upon rehabilitation to 10 years) for the second offense, and lifetime (noncommutable) for the third offense—in themselves constitute a powerful deterrent against alcohol use by CMV drivers;

5. The requirement that States place drivers who are found to have any measured or detected presence of alcohol out-of-service for 24 hours provides a further consequence to CMV operators' use of intoxicating beverages, as required in § 392.5; and

6. The implied consent provision of § 383.72 requires each driver of a CMV who holds a CDL to have given his/her prior consent to be tested for the use of alcohol by any State or jurisdiction in the enforcement of §§ 383.51(b)(2)(i) and 395.5(a)(2). The FHWA is proposing to amend this provision in this rulemaking to include alcohol testing administered by State and local officials under MCSAP.

As of April 1, 1992, all States should be enforcing the 0.04 BAC requirement as part of the CDL implementation and most States have passed enabling legislation. Thus, the CDL program provides a strong foundation for the additional alcohol testing requirements proposed herein.

VI. Motor Carrier Safety Assistance Program (MCSAP)

The Motor Carrier Safety Assistance Program is a Federal/State matching grant-in-aid program which was initially created by Section 402 of the Surface Transportation Assistance Act (STAA) of 1982 (Pub.L. 97–424, 96 Stat. 2097). Since the initial authorization, the program has received tremendous public, State and Federal support resulting in further congressional reauthorizations. The most recent was a six year reauthorization through FY 1997 in the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) (Pub.L. 102–240, 105 Stat. 1914).

The intent of MCSAP is to achieve a national uniform motor carrier safety program. In an effort to achieve this goal, the FHWA provides grants only to States which enforce Federal or compatible State motor carrier safety and hazardous materials regulations.

Title IV of the ISTEA is the Motor Carrier Act of 1991, and specifically in section 4002, this new legislation adds several dimensions to the MCSAP funding eligibility criteria for States' participation in MCSAP. Pursuant to this section, participating States may use MCSAP funds for specific enforcement activities such as alcohol and controlled substance detection and enforcement, provided such "activities are carried out in conjunction with an appropriate type of inspection of the commercial motor vehicle for enforcement of Federal or State commercial motor vehicle safety regulations."

Currently, there are 48 States and four United States territories participating in MCSAP. As a result, over 1.5 million

roadside inspections are conducted annually on commercial motor vehicles and/or drivers by approximately 2,800 State enforcement officials in accordance with the Federal Motor Carrier Safety Regulations (FMCSRs) or compatible State safety regulations. During these inspections, over 497,000 vehicles and over 126,000 drivers have been placed out-of-service for violations of Federal or State safety regulations.

In order to receive MCSAP funding for inspection activities and enforcement, States are required to submit a "State Enforcement Plan" to the FHWA outlining the enforcement activities contemplated during that year in accordance with the procedures set forth in 49 CFR part 350. Part 350 has been revised to include requirements of the ISTEA.

In this NPRM, the FHWA is proposing, as one option, that motor carriers can achieve compliance with the random alcohol testing provisions of this part through a MCSAP-funded approach. The FHWA believes that this approach merits consideration since it would provide a much stronger deterrent than now exists against driving a commercial motor vehicle in commerce with a measured level or detected presence of alcohol. This deterrent would draw its strength from a driver's increased exposure through MCSAP-funded roadside inspections and, if this proposal is adopted, the corresponding likelihood of having a random breath alcohol test during those inspections. The MCSAP-based proposal assumes that the greater a driver's exposure to being tested, the more he or she will be discouraged from using or possessing alcohol while or prior to driving a CMV. Under this proposal for random alcohol testing, a CMV driver would have to be prepared to demonstrate fitness, through an alcohol test which shows no alcohol concentration of 0.04 or greater, to perform the driving task at random times and locations. The FHWA is proposing the State/MCSAP-based Program proposal because it believes that in enacting the Omnibus Transportation Employee Testing Act of 1991 and the Commercial Motor Vehicle Safety Act of 1986, the Congress intended that the FHWA and the States work together to remove unsafe CMV operators from the road, especially when those operators drink and drive.

The FHWA is given the discretion in the Act to establish appropriate penalties for drivers of CMVs who are determined to have unlawfully used, but who were not under the influence of, alcohol (i.e., 0.04 BAC or greater) or a controlled substance. This proposed rule sets such penalties commensurate with those for serious traffic violations under CDL provisions. The penalties for drivers of CMVs who are convicted of driving under the influence of alcohol or a controlled substance are unchanged from current CDL provisions—disqualification from one year to life. The FHWA believes the proposed consequences will complement existing State drunk driving laws and programs.

The FHWA believes that this option would be implemented as a small incremental increase to the current general roadside inspection responsibilities. The FHWA believes that an alcohol test with an initial alcohol concentration of less than 0.02 will last approximately 5 minutes and may be done separately or in conjunction with a roadside inspection. Tests with an initial result of 0.02 or greater must be performed a second time after an elapsed period of 15 minutes. Complete roadside inspections last from 20 to 60 minutes currently. The FHWA believes that an initial test would be done at the beginning of an inspection and if a confirmation test is required, the confirmation test would be performed later in the inspection process. The 15 minute time period required by 49 CFR part 40 would be filled by the MCSAP officer performing other inspection duties such as inspecting the motor vehicle.

The option proposed herein may slightly reduce the number of vehicle safety inspections per day, however, the FHWA believes that added benefits will occur by deterring alcohol use while driving a commercial motor vehicle which will reduce the number of accidents. Will the alcohol testing rate have a significant negative impact on how many vehicle inspections may be done per day? Will this impact produce a smaller overall societal benefit, such as increased accidents, more injuries, fatalities, etc.?

The FHWA believes that a random testing program that is highly visible to drivers will deter substance misuse. Will testing at a 10, 25, or 50 percent testing rate provide the best deterrence for the overall FHWA program? Which testing rates will cost the program too much for current funding? Should the FHWA consider imposing a user fee, as suggested in the common preamble published elsewhere in today's **Federal Register**, to pay for any increased costs to the MCSAP program? The FHWA seeks comments and answers to these questions from all interested parties.

VII. Proposal

A new part 382 to title 49, Code of Federal Regulations, Controlled Substances and Alcohol Use and Testing, is proposed which would be added to the FMCSR and would contain the new requirements of the Omnibus Transportation Employee Testing Act of 1991. Most notably, as this Act amends the Commercial Motor Vehicle Safety Act of 1986, the Act expands the category of persons required to be tested for controlled substances and imposes alcohol testing requirements on the same category. This NPRM is proposing the alcohol-related sections of the new part to be set forth in subparts A through F. A companion NPRM on controlled substances testing, also published in today's **Federal Register**, includes subparts G through L of part 382, which incorporates the current controlled substances testing requirements of 49 CFR part 391, subpart H into this new part 382.

The FHWA's experience in administering the three-year-old controlled substances testing requirements, and its consideration of comments (OST Docket No. 46574, Notice No. 89–22) received in response to the November 2, 1989, ANPRM (54 FR 46326) and other comments are reflected in this proposal. Based on further comments received on this NPRM and the companion NPRM on controlled substances, the FHWA will consider integration of the two proposals in one final rule.

SECTION-BY-SECTION ANALYSIS

PART 350—COMMERCIAL MOTOR CARRIER SAFETY ASSISTANCE PROGRAM

Section 350.9 Conditions for Basic Grant Approval

The FHWA proposes to require States to include part 382 under the conditions for basic implementation grant approval. Consistent with the State MCSAP-based proposal, random alcohol testing by MCSAP officers would be a condition of the grant for fiscal year 1995. If a State chooses not to conduct alcohol testing of CMV drivers, that State would be denied all MCSAP funds.

The FHWA is not proposing that a State implement random alcohol testing upon the effective date of the final rule. Rather, the FHWA is proposing to allow States an amount of time similar to that generally provided during the development stage of the original MCSAP implementation process in order to obtain new authorizations, laws, rules, regulations, training, acquisition of equipment and supplies and other administratively required items that must be obtained prior to

implementation. The FHWA is proposing to allow States up until October 1, 1996 to begin random alcohol testing.

Section 350.13 State Enforcement Plan (SEP) for a Basic Grant

Paragraph (b)(8) would require the State to place in the SEP that random alcohol testing of CMV drivers would be a part of an appropriate type of driver inspection by the beginning of the fiscal year starting at least two years from the publication of this proposal as final.

PART 382—CONTROLLED SUBSTANCES AND ALCOHOL USE TESTING

The FHWA is issuing these proposed alcohol testing rules in cooperation with the other DOT agencies required by the Omnibus Transportation Employee Testing Act. The rules proposed herein are similar to alcohol testing regulations published by the FAA, FRA, FTA, and RSPA elsewhere in today's **Federal Register**. The Office of the Secretary of Transportation is publishing today a common preamble on general requirements and a common rule on testing procedures also. The following Section-by-Section Analysis only covers sections and areas that are unique to the FHWA rule or which differ from the common rule and common preamble.

Subpart A—Alcohol Use and Testing

Section 382.103 Applicability

Currently, the FHWA's controlled substances testing requirements are part of the driver qualification standards. The requirements apply to motor carriers and drivers of the motor carriers who are involved in interstate commerce and are subject to the FMCSRs. Private and for-hire motor carriers of property and for-hire motor carriers of passengers are subject to the FMCSRs. However, the FMCSRs include several general exemptions for certain types of transportation, such as fire trucks and rescue vehicles involved in an emergency, governmental operations and school bus operations. Therefore, drivers involved in the exempted transportation operations are not currently required to comply with the FHWA's controlled substances testing requirements. In addition, anyone who is not required to meet the physical qualification requirements, such as farm custom operations, apiarian industries and certain farm vehicle drivers, are also exempt from the controlled substances testing requirements. Finally, while the FMCSRs generally apply to commercial motor vehicles exceeding 10,000 pounds GVWR, the drug testing provisions of part 391 apply only to drivers of commercial motor vehicles exceeding 26,000 pounds GVWR.

The Act amends the CMVSA, and therefore, the definitions of "commercial motor vehicle" and "commerce" in the CMVSA apply. This means that the testing requirements of the Act extend to interstate and intrastate operations in commercial motor vehicles exceeding 26,000 pounds GVWR and that the FMCSR exemptions stated above and listed in 49 CFR 390.3(f) do not apply.

The FHWA is therefore proposing that the drivers who are required to obtain a CDL are the same drivers who would be subject to the alcohol testing requirements of this rule. Because they are the subject of a companion rule, the FHWA is also proposing that motor carriers and drivers for those motor carriers subject to the alcohol and controlled substances testing requirements of the Federal Transit Administration (FTA), formerly the Urban Mass Transportation Administration, be excluded from the requirements of this rule. Drivers subject to the FTA rule who hold CDLs will continue, however, to be subject to the CDL disqualifications provided in part 383.

By the same token, the FHWA is proposing that any entity operating under a waiver of all CDL requirements, approved or authorized by the FHWA, would not be subject to the alcohol testing requirements of the Act. The measure of applicability is: if a person is required to obtain a CDL, that driver and the motor carrier using the driver must comply with these proposed alcohol testing requirements.

This means there would be certain entities who are not required to comply with the FMCSRs, but who would now be subject to the requirements of this rule. For example, governmental and school bus drivers as well as drivers of private motor carriers of passengers would be required to submit to tests. Governmental operations include all levels of government, Federal, State and local. Private motor carriers of passengers would include, but not be limited to, civic and church organizations.

Table I shows which groups have waivers or restricted CDLs and which groups will be required to be tested under this rule.

TABLE I.—COMMERCIAL DRIVER'S LICENSE (CDL) WAIVERS

Type	CDL requirement	Tests required
Full Waiver of all CDL requirements for vehicles owned/operated by Dept. of Defense		
Non-Civilian Military Personnel: —Active Duty Military Personnel —Active Duty Reserves and Nat'l Guard —National Guard Military Technicians	No CDL required	No controlled substances or alcohol testing required under 49 CFR Pt. 382.
State Option Waiver—States may waive all CDL requirements, if waiver conditions are met		
Farm Vehicle Operators	If State waives the individual If State DOES NOT waive the individual	No testing is required. Controlled Substances and Alcohol testing is required
Firefighters and Other Operators of Emergency Equipment.	If State waives the individual If State DOES NOT waive the individual	No testing is required. Controlled Substances and Alcohol testing is required.

TABLE I.—COMMERCIAL DRIVER'S LICENSE (CDL) WAIVERS—Continued

Type	CDL requirement	Tests required
Limited Waiver/Restricted CDL—States may waive CDL knowledge and skills testing and issue restricted CDLs		
Farm-Related Service Industries —Farm retail outlets & suppliers —Agri-chemical businesses —Livestock feeders —Custom Harvesters	The operators of these vehicles ARE required to obtain a Restricted CDL.	See Note.
Isolated Sections of Alaska	The operators of these vehicles ARE required to obtain a Restricted CDL.	See Note.

Note: Controlled substances and alcohol testing is required of these operators. Additionally, these operators shall have a pre-employment/pre-duty test for controlled substances and alcohol each time the State requires the license to be revalidated for these operators.

The FHWA is proposing the same applicability with the CDL to comply with the intent of Congress and estimates that this proposal will affect approximately five million drivers.

Paragraph (c) of this section excepts those drivers from alcohol testing requirements who are based at or depart from home terminals in foreign nations. Implementation of alcohol testing of foreign-domiciled commercial motor vehicle operators, mandated by the Act, will be considered in an advanced notice of proposed rulemaking published elsewhere in today's **Federal Register**. Comments on this issue should be submitted to that docket.

Section 382.107 Definitions

The definitions unique to this part are included in this section. The terms common to title 49, chapter III, subchapter B are already included in 49 CFR 390.5, Definitions, and are applicable to this part, unless otherwise defined. The terms *commerce* and *commercial motor vehicle* are taken from 49 CFR part 383, the requirements for a CDL. These definitions expand the applicability to intrastate operations as well as the other operations currently exempted from the FMCSRs.

The term *accident* is proposed and is identical to that being proposed by the FHWA in another rulemaking on accident-reporting requirements. See July 30, 1992, of the **Federal Register**, 57 FR 33712.

The term *alcohol* is defined as ethyl alcohol. The FHWA is proposing in this NPRM to make a conforming change to 49 CFR 392.5 by replacing the term, *intoxicating beverage*, with *alcoholic beverage* and to define alcoholic beverage in 49 CFR 390.5.

The term *commerce* and *commercial motor vehicle* are identical to those included in 49 CFR part 383.

The term *on-duty* is proposed to be defined here and a conforming amendment to 49 CFR 395.2, Definitions, is also being proposed to ensure that motor carriers maintain control over the alcohol testing procedures in those cases where the motor carrier directs the driver to provide adequate breath for testing under the requirements of this rule. The FHWA strongly encourages comments on this proposal.

The FHWA is also proposing a definition of the term "consortium" to indicate that persons other than the motor carrier may perform the actual testing and other functions, provided, however, that these functions are at the direction and/or approval (when they are done prior to the motor carrier's knowledge as may be in the case of a driver-based consortium) of the motor carrier. The FHWA will continue to hold the motor carrier responsible for compliance with these proposed requirements.

Subpart B—Prohibitions

As stated in the November 2, 1989, ANPRM on alcohol issues published by OST, the FHWA has had very stringent alcohol use prohibitions in the FMCSRs. These alcohol prohibitions, which apply to both CMV drivers and motor carriers, are included in this subpart.

Additionally, the FHWA's current controlled substances testing regulations allow a driver to have an affirmative defense for the use of controlled substances, if the driver has taken the substances at the direction of a medical practitioner. The FHWA would like comments on the possibility of allowing a similar exception in the alcohol testing rules. The FHWA believes that many medications may contain alcohol and that a driver's alcohol test will show an alcohol concentration prohibited by these proposed rules. Should FHWA seriously consider allowing medications to be taken that would contain alcohol?

A possible exception might read as follows:

Medication exception.

(a) A driver may possess and use a medication approved by the Department of Health and Human Services, Food and Drug Administration which contains ethyl alcohol while on-duty driving, notwithstanding §§ 382.201, 382.204, and 382.205 of this subpart, provided:

(1) The medication does not affect driving performance,

(2) The medication is taken consistent with its directions for use, including dosage, frequency, and any limitation on driving motor vehicles or operating heavy machinery, and

(3) The driver's breath alcohol concentration is not 0.04 or greater.

(b) A driver's possession of medication as described in this section, absent other documentable observations as required by § 382.311(b), shall not constitute reasonable suspicion of alcohol misuse.

What non-alcohol alternative medications are there that may be used over-the-counter or prescribed by health care professionals that would be substitutes for medications with an alcohol base? What is the cost of these alternative medications compared to the alcohol based medications? Are there any other issues related to alcohol medications that FHWA should address?

Section 382.209 Use Following an Accident

The FHWA is changing this section from the common rule. The FHWA is removing the phrases addressing motor carriers having to discount the driver's performance as a contributing factor to the accident. The requirements for an FHWA post-accident test require a test after each fatality accident and after the driver receives a citation for a moving traffic violation. The FHWA believes that the act of receiving a citation for a moving traffic violation would indicate that the driver's actions may have contributed to the accident and thus the motor carrier does not need to decide whether the driver's actions may have contributed to the accident.

Subpart C—Tests Required

The FHWA is proposing not to require periodic testing. The Act gives the Secretary such discretion only for this type of testing. Based upon the FHWA's experience with controlled substances testing, the FHWA has decided that periodic testing is not needed. The current controlled substances testing regulations allow motor carriers to eliminate periodic testing upon implementation of a random testing program with testing at the 50% rate. The FHWA acknowledges that many carriers are taking advantage of this authority and are eliminating periodic testing for controlled substances within the two-year cycle. Moreover, the FHWA believes that other forms of testing will adequately detect and deter alcohol use justifying this action. Also, the FHWA is proposing to eliminate periodic testing for the use of controlled substances in a separate rulemaking action in today's **Federal Register**.

Section 382.303 Post-Accident Testing

The FHWA is strongly committed to ensure that drivers who are involved in an accident are tested for the use of alcohol. The FHWA is proposing to use the same criteria for an accident as is currently required in 49 CFR part 391, subpart H with one revision. A motor vehicle which is required to be towed away replaces the amount of property damage criterion.

Post-accident testing may have to be performed not only when an accident occurs while the driver is actually driving a commercial motor vehicle, but also, in an accident involving a fatality, when the driver is performing a safety-sensitive function. For instance, a driver parks a truck improperly, on the travelled portion of the highway. Another motorist collides with the truck and the motorist is killed. The driver of the truck will be required, by this rule, to be tested for alcohol. Post-Accident Testing must also be performed when the driver receives a citation arising from the accident.

The FHWA is differing from the other DOT agencies rules being proposed with regard to the documentation associated with a post accident test. Other agencies are requiring that when an employer does not require an employee to submit, or when an employee is not timely in his/her submission of, adequate breath for testing that a report be prepared and sent to the DOT agency. The FHWA will require such a report to be prepared and kept in the motor carrier's files for review upon a FHWA investigation, but it will not require that the report be sent to the FHWA. The FHWA prefers to have the motor carrier maintain these records along with the other records they must keep for each accident, as required by the FMCSRs. The FHWA investigators would review these reports along with the other documentation during safety compliance reviews.

Although stated in general terms in subpart F of this proposal, the FHWA believes that a statement that motor carriers be required to provide drivers with the necessary post-accident procedures and instructions prior to operating a CMV, on a continuous basis, be made within the body of this section. Additionally, motor carriers would be required to maintain the information relating to the alcohol test or the need for a test, if one was not performed. This information would include the valid reasons when a test was not performed under the recordkeeping requirements in § 382.403 of this proposed rule.

Paragraph (f) allows tests done by Federal, State or local officials having independent authority to require alcohol tests, to meet the requirements of this section *if* the results of the test are obtained by the motor carrier and the testing was performed in conformance with the applicable Federal, State or local requirements for alcohol testing. This means that if a National Park Service Police officer, State Highway Patrol officer, municipal police officer, or similar official has independent authority to require an alcohol test after an accident, this test may be deemed as a completed test by the motor carrier if the official used an approved or applicable testing methodology for his/her jurisdiction and the motor carrier obtains the results of the test. This will allow motor carriers to accept tests done by law enforcement officials, such as, but not limited to, blood tests, saliva tests, or breath tests when these tests are standard for the jurisdiction and are applicable in the jurisdiction of the law enforcement official.

Section 382.305 Random Testing

The FHWA is proposing two options for random testing: A motor carrier-based testing program and a State/MCSAP-based testing program. Under either program the testing rate would be between 10 to 50 percent of the number of drivers (either the number of drivers used by the motor carrier or the number of drivers holding a CDL in a State), to be determined in the final rule stage of this rulemaking.

Motor Carrier-based Program

Under the motor carrier-based program, the motor carrier would select drivers for testing at various times during the year and would ensure that the selection was based on scientifically-valid methods. The driver selected would be notified only when he/she would be able to provide a breath specimen immediately upon notification. That is, the driver once notified, would proceed directly to providing a specimen without performing any other duties. This option is similar to the current random testing requirements for controlled substances.

The FHWA has had many inquiries from owner-operators and the public on how owner-operators comply with the random testing requirements. It has been the Department of Transportation's view that owner-operators are not allowed to have a random testing program on their own. Owner-operators must meet the conditions of random testing, which include that the random selection process be unannounced. The FHWA believes that the requirement of unannounced testing requires that an owner-operator must join a consortium, group or have a neutral, unbiased third party select a date for testing and the third party keeps the date confidential from the driver until that date arrives. Owner-operators, under this proposal, will be expected to perform the same type of random selection process.

State/MCSAP-Based Program

Under the MCSAP proposal, participating MCSAP States will be required to submit their planned random alcohol testing activities as a part of their "State Enforcement Plan" required under 49 CFR part 350. The FHWA is proposing that a State's random alcohol testing plan component must include the following program requirements:

1. The number of random tests performed in the State equal 10 to 50 percent of the number of Commercial Driver's License (CDL) holders in the State as of April 1 each year or as of a date certain mutually agreed upon by the State and the FHWA.
2. Random alcohol testing will be performed in conjunction with other driver and/or vehicle inspections performed under the authority of 49 CFR part 350 at various locations, including, but not limited to, weigh stations, roadside, terminal and other motor carrier fixed locations, and portable locations.
3. Random alcohol testing must be administered in conformance with the requirements of this part and 49 CFR part 40.
4. Random alcohol testing conducted by Federal, State or local officials required under this part and part 350

shall be administered without regard to any reasonable suspicion or probable cause standard found in State or local law. The consequences of such non-reasonable suspicion or non-probable cause random alcohol testing shall be limited to those set forth in this part.

5. Random alcohol testing conducted by Federal, State or local officials where reasonable suspicion or probable cause is independently established without regard to administering random alcohol testing in accordance with this part or part 350 shall be administered in accordance with State and local law and not in accordance with this part. The consequences of such reasonable suspicion or probable cause random alcohol testing shall be determined pursuant to State or local law and if applicable, in accordance with 49 CFR 383.51.

6. A driver's refusal to be tested under this part when requested to do so by a Federal, State or local official pursuant to part 350 or under independent State or local authority for such testing shall be deemed a positive test at the 0.04 BAC level under this part for purposes of CDL disqualification.

7. Pursuant to this part and part 350, the State or local officials participating under this program shall input into SAFETYNET all required random alcohol testing data.

8. Based upon an alcohol breath testing result of 0.02 or greater, the MCSAP officer must provide written notification to the appropriate State of licensure within 5 working days.

To implement this option, the FHWA is considering that States must adopt laws and/or regulations that will establish that BAC levels of 0.02 or greater but less than 0.04 found by MCSAP officials in the course of their inspections are deemed to be serious traffic violations which would disqualify CMV drivers. This proposed action would be required of States to avoid a loss of Federal-aid highway funds, and will be addressed in further detail in the FHWA's forthcoming rulemaking of State compliance with the CDL program. States are currently required to disqualify drivers with BAC levels of 0.04 or greater. Nothing in this proposal prohibits State and local officials from applying reasonable suspicion or probable cause based alcohol breath testing or invoking criminal sanctions for violations of State drunk driving laws.

If the State/MCSAP-based testing program is selected for the final rule, the FHWA will propose in a separate rulemaking action that State licensing authorities amend their CDL definition of the term "serious traffic violation," to include any conviction, when driving a commercial motor vehicle, of a measured alcohol concentration below 0.04 BAC. When this is included in the State's law, the driver licensed in that State would know that a measured alcohol concentration of below 0.04 BAC would result in a disqualification from driving a CMV of 60 or 120 days upon the second or third conviction within a three year period, respectively. If the measured BAC is 0.04 or above the disqualification upon conviction would be from one year to life. The disqualification for BACs of 0.04 or more is already in the CDL law and was published in final rules at 53 FR 39044 and 54 FR 40782, which are codified at § 383.51.

All disqualifications assigned as State responsibilities in this proposal would, of course, remain prerogatives of the FHWA as well. The FHWA and the States are working to develop coordinated processes to assure prompt and effective disqualification procedures.

The FHWA is proposing that the random alcohol testing required by this section and administered by the MCSAP officers is procedurally a mere incremental addition to the current North American Standard Driver Vehicle Inspection, which currently includes inspections of log books, medical examiner certificates and motor vehicle inspections. The FHWA believes that MCSAP officers will not have to obtain any additional State authority to perform alcohol testing as proposed herein. One of the conditions for the implementation and approval processes for MCSAP is that State laws provide for the right of entry and inspection by State personnel sufficient to enforce the FMCSRs or compatible State rules and to perform the activities in the State Enforcement Plan.

The implementation of this proposal would require a MCSAP officer to request that a driver submit adequate breath for testing into an evidential breath testing device in accordance with this part and part 40. If the driver refuses to submit the sample, the MCSAP officer would note the refusal of the request to submit adequate breath for testing on the inspection form and enter the refusal to test into the SAFETYNET system and notify the State of licensure.

MCSAP officers would only be acting as a collector and analyzer of breath to determine if a driver has an alcohol concentration of 0.02 or greater in his/her system. MCSAP officers would place drivers out-of-service at the roadside, as they presently do, when a violation is found, but would not be required under this proposal to arrest drivers or do reasonable suspicion testing of drivers. The States' authority, rights and procedures for testing drivers under reasonable suspicion of alcohol use would remain unchanged by this proposal.

If this option is adopted, the FHWA will also add other recordkeeping requirements, other than those listed in subpart D of this proposal, that motor carriers would be required to maintain.

The FHWA strongly encourages public comments on this option. Is this option workable and enforceable? Are there any changes that should be made to this proposal to make it more workable? Should FHWA base the number of random tests done annually by MCSAP officials on some other standard than the number of commercial driver's licenses issued by the State, such as the number of driver/vehicle inspections performed, or the number of miles travelled by CMVs in that State per year, etc? Will Option 2 overburden the MCSAP driver/vehicle inspection program? The FHWA would like to have critical comments on this option and why the option will or will not work?

Retesting of Covered Employees With an Alcohol Level of 0.02 or Greater But Less Than 0.04

This section in the common rule is not included in this proposal because it conflicts with requirements of the CMVSA. Section 382.505 provides that a person found to have a BAC level of 0.02 or greater but less than 0.04 is prohibited from operating a CMV for a minimum of 24 hours. *See* sec. 12008(d) of the CMVSA.

Section 382.315 Exceptions for Testing Performed by Consortiums

This section, added to the FHWA proposal, provides that preemployment/pre-duty testing and random testing need not be performed directly by the motor carrier provided that the motor carrier directs or approves such testing program prior to using a driver participating in the program. The FHWA recognizes the high driver turnover rate in the motor carrier industry and believes that the provisions of this proposed section will minimize additional unnecessary tests while ensuring that drivers who use alcohol while operating a CMV or on duty are identified and prohibited from performing safety-sensitive tasks.

The proposed conditions in which a motor carrier would be allowed to use a driver without testing the driver for pre-employment/pre-duty are similar to the conditions included in 49 CFR

391.103. The information that a motor carrier is to obtain from a consortium is similar to that contained in 49 CFR 391.103.

Subpart D—Handling of Test Results, Record Retention and Confidentiality

As stated above, if the MCSAP random testing option is adopted, the FHWA will add other recordkeeping requirements, other than those listed herein, that motor carriers would be required to maintain. These would include, but are not limited to:

1. The motor carrier's or driver's copy of the Driver Vehicle Examination Report presented to the driver following a MCSAP driver inspection, and
2. State Out-of-Service Orders issued for violations of subpart B.

Section 382.403 Reporting of Results in a Management Information System

Elsewhere in today's **Federal Register** is a "MIS" NPRM regarding 49 CFR part 40 and 49 CFR part 391, subpart H. The preamble to the 49 CFR part 40 NPRM contains many comments, discussions and questions that should be considered in reviewing this NPRM's § 382.403. Your comments on this NPRM should indicate that you are responding to questions or comments found in the generic NPRM under 49 CFR part 40, this specific NPRM (FHWA Docket No. MC–92–19, the drug testing NPRM (FHWA Docket No. MC–92–23), or the NPRM for changing 49 CFR part 391, subpart H (FHWA Docket No. MC–93–2).

Subpart E—Consequences For Drivers Engaging In Alcohol-Related Conduct

Section 382.505 Other Alcohol-Related Conduct

The FHWA recognizes the acute possibilities for an accident if a person has been using alcohol. Therefore, the current prohibition to keep a driver who has an alcohol concentration of 0.02 or greater from operating a commercial motor vehicle for 24 hours is being proposed in this rule, instead of the requirement of eight hours off duty as used by other DOT agencies and discussed in the common preamble.

Section 382.507 Additional Consequences For Alcohol Concentration Violations

The FHWA is proposing two options for this section. These options parallel the random testing options in that different consequences would apply depending on whether the violation was discovered by a motor carrier or a Federal, State or local official and the level of alcohol concentration. Section 5(f) of the Act directs the Secretary to determine appropriate sanctions for drivers who are determined to have used alcohol through testing developed under this Act or used alcohol in violation of law or Federal regulation, but are not under the influence of alcohol as provided in the CMVSA. Regulations issued pursuant to the CMVSA impose disqualifications and penalties for driving under the influence of alcohol, see § 383.51, and other alcohol misuse. *See* § 392.5.

Option 1

The common rule's paragraph (a) for this section would remain unchanged for this option. For alcohol concentrations of 0.04 or greater, the consequence would entail that the driver not perform safety-sensitive functions, until his/her alcohol concentration is below 0.02 and will be prohibited from driving for a minimum period of 24 hours, as required by the CMVSA. The FHWA is proposing, however, that motor carrier-based testing which indicates alcohol concentrations of 0.04 or greater should result in consequences commensurate with serious traffic violations, as defined in § 383.5. The FHWA considers the alcohol concentration violations to be similar to those identified in part 383 and believes that additional consequences are needed for repeat violators. The FHWA proposes to prohibit drivers who are found to have 0.04 or greater alcohol concentrations on a second, third and subsequent violation of the alcohol concentration rule from driving for 60 or 120 days. The prohibition includes operating a CMV as defined in this part or as defined in 49 CFR part 390. That is, a person violating the prohibitions on having an alcohol concentration of 0.04 or greater proposed in this NPRM would be prohibited from operating a CMV with a gross vehicle weight rating (GVWR) of more than 10,000 pounds in interstate commerce or a CMV with a GVWR of more than 26,000 pounds in both intrastate and interstate commerce. In addition, that person would be prohibited from operating a CMV which is designed to transport 16 or more passengers, including the driver, or transporting material found to be hazardous for the purposes of the Hazardous Materials Transportation Act and which require the motor vehicle to be placarded under the Hazardous Materials Regulations (49 CFR part 172, subpart F) in either intrastate or interstate commerce.

Specifically, the FHWA is proposing increasingly more stringent consequences based on the number of violations over a three year period. The first violation of the prohibitions in § 382.201 would result in the driver being prohibited from driving for a minimum period of 24 hours, and referred by the motor carrier to a substance abuse professional for evaluation of his/her misuse of alcohol, as required in §§ 382.505(a) and 382.605.

A driver who violates the prohibitions twice within a three year period would be prohibited from driving any commercial motor vehicle for a minimum period of 60 days and must be referred to a substance abuse professional by the driver's motor carrier.

A driver who violates the prohibitions three or more times within a three year period would be prohibited from driving any commercial motor vehicle for a minimum period of 120 days and must be referred to a substance abuse professional by the driver's motor carrier.

Option 2

Under the second option, the FHWA is proposing that the consequences identified in option one for alcohol concentrations of 0.04 or greater be applied to all alcohol concentrations. Drivers who are found by a Federal, State or local official to have alcohol concentrations of 0.02 or greater but less than 0.04 would be subject to prohibited driving periods and CDL disqualifications of 60 to 120 days on second, third and subsequent violations. These consequences are intended to rid the highways of drivers who continually violate alcohol misuse prohibitions and thereby pose a threat to the public.

As stated above, under Option 1, when a violation of § 382.201 involving an alcohol concentration of 0.04 or greater is identified by a motor carrier, the motor carrier would be prohibited from using the driver for the periods provided in the rule. The motor carrier would be required to document the violation, and both the motor carrier and the driver would be required to comply strictly with the consequences noted in this section, subject to the additional consequences in paragraphs (d) through (g) for failure to comply. There would be no licensing sanctions.

By contrast, under Option 2 additional consequences, including licensing sanctions, attach for all violations of § 382.201 which are identified by a Federal, State or local official, as opposed to the driver's motor carrier. The FHWA is specifying that a violation of § 382.201, that is, a breath alcohol concentration violation discovered through the means of an

evidential breath testing device operated by a Federal, State or local official, would result in the driver being placed out-of-service for 24 hours through the issuance of an out-of-service order. Furthermore, the driver must report the order to his/her motor carrier within 24 hours. The Federal, State or local official would in turn notify the appropriate State commercial driver licensing authority for the appropriate licensing action. For alcohol concentrations of 0.02 or greater but less than 0.04, the driver's license will be suspended or revoked for 60 or 120 days upon a second and subsequent offenses. The current CDL disqualifications of one year for a first offense and lifetime for subsequent offenses upon conviction of operating a commercial motor vehicle with an alcohol concentration of 0.04 or greater remain applicable.

Proposed paragraph (d) prohibits a driver who refuses to be tested from driving any commercial motor vehicle for no less than one year. The FHWA believes that a strong disincentive to refuse to comply with this proposed rule is needed. This proposal is similar to the requirement of 49 CFR 383.51(b)(3)(i) which requires a driver who refuses to undergo testing required by a State or local jurisdiction under a probable cause determination to be disqualified for one year upon a conviction for such refusal.

Proposed § 382.507(e) would require that motor carriers who knowingly use drivers who have violated these rules, will be subject to 49 U.S.C. 521(b) penalty provisions. These provisions provide for civil forfeiture penalties of up to $10,000 for violations of motor carrier safety regulations.

Proposed § 382.507(f) prohibits a person found to have violated the alcohol use prohibition and testing rules of another DOT agency from operating a CMV until the driver complies with the requirements of that DOT agency.

As explained above, subpart F of this proposed rule includes other actions which must be taken prior to a driver operating a commercial motor vehicle after having violated the prohibitions in §§ 382.201 through 382.211. These actions include an evaluation by the substance abuse professional and a finding that the driver has properly followed any instructions given. A driver needing assistance must also be tested for alcohol use and the results must indicate an alcohol concentration of less than 0.02.

Proposed § 382.507(g) prohibits drivers from driving a commercial motor vehicle following a fatal accident in which their alcohol tests show an alcohol concentration of 0.02 or greater. This prohibition is similar to the current drug rule in part 391, in which a driver is disqualified for one year following a positive drug test result after he or she is involved in a fatal accident. See 49 CFR 391.117(b).

Tables II & III indicate the FHWA proposed consequences for drivers who violate the alcohol concentration prohibition. Table IV indicates the post accident testing requirements and additional penalties that would be imposed for prohibited actions after accidents.

TABLE II.—DRIVER ALCOHOL PROHIBITIONS AND CONSEQUENCES, OPTION 1 DISCOVERED BY A MOTOR CARRIER

[Prohibited Activities—Have a Prohibited Alcohol Concentration]

	Consequences			
First offense	Second offense within a three year period	Third offense within a three year period	Refusal to be tested	Violation of an out-of-service order
Alcohol Concentrations of 0.02 and Greater But Less Than 0.04				
Professional referral and 24 hours off duty.	Professional referral and 24 hours off duty.	Professional referral and 24 hours off duty.	One year minimum driving suspension.	First offense: 90 day driving suspension and $1000 penalty. Subsequent offenses: One year minimum up to five year maximum driving suspension and $1000 penalty.
Alcohol Concentrations of 0.04 or Greater				
24 hours out of service, professional referral.	24 hours out of service, professional referral, 60 day driving prohibition.	24 hours out of service, professional referral, 120 day driving prohibition.	Same as above.	Same as above.

TABLE III.—DRIVER ALCOHOL PROHIBITIONS AND CONSEQUENCES, OPTION 2 DISCOVERED BY A FEDERAL, STATE OR LOCAL OFFICIAL

[Prohibited activities—Have a Prohibited Alcohol Concentration]

	Consequences			
First offense	Second offense within a three year period	Third offense within a three year period	Refusal to be tested	Violation of an out-of-service order
Alcohol Concentrations of 0.02 and Greater But Less Than 0.04				
Professional referral and 24 hours off duty.	Professional referral and 60 day driving suspension.	Professional referral and 120 day driving suspension.	One year minimum driving suspension.	First offense: 90 day driving suspension and $1000 penalty Subsequent offenses: One year minimum up to five year maximum driving suspension and $1000 penalty.

TABLE III.—DRIVER ALCOHOL PROHIBITIONS AND CONSEQUENCES, OPTION 2 DISCOVERED BY A FEDERAL, STATE OR LOCAL OFFICIAL—Continued

[Prohibited activities—Have a Prohibited Alcohol Concentration]

Consequences				
First offense	Second offense within a three year period	Third offense within a three year period	Refusal to be tested	Violation of an out-of-service order
Alcohol Concentrations of 0.04 or Greater				
24 hours out of service, professional referral, one year disqualification.[1].	24 hours out of service, professional referral within three days, lifetime disqualification.	Not Applicable	Same as above	Same as above.

[1] Suspensions begin at completion of any State licensing review process. Drivers found with a BAC level of 0.04 or greater shall be subject to one year disqualification for a first offense and a lifetime disqualification for a subsequent offense under current CDL rules.

TABLE IV.—POST ACCIDENT ALCOHOL TESTING AND PENALTIES

[Qualifying Accident—Any Accident, as Defined in Part 382, Involving the Death of a Human Being, or any Accident in Which the Driver Receives a Citation for a Moving Traffic Violation (as Defined by State or Local Law)]

Testing Requirements		
Alcohol test	Penalties	Within two hours of accident
	No Fatalities	*Fatal Accident*
Refusal to submit to testing	One year suspension.	One year suspension.
Leave accident scene prior to testing	One year suspension	One year suspension.
Option 1—Alcohol concentration of 0.04 or greater	(1) Professional Referral, (2) 24 hours off duty, (3) Driver must submit adequate breath for testing which has less than a 0.02 result, and (4) Possibly 60 to 120 days driving suspension for second and subsequent times within 3 years.	(1) Professional Referral, (2) One year driving prohibition, and (3) Driver must submit adequate breath for testing which has less than a 0.02 result.
Option 2—Alcohol concentration of 0.02 or greater	(1) Professional Referral, (2) 24 hours off duty, (3) Driver must submit adequate breath for testing which has less than a 0.02 result, and (4) Possibly 60 to 120 days driving suspension for second and subsequent times within 3 years.	(1) Professional Referral, (2) One year driving prohibition, and (3) Driver must submit adequate breath for testing which has less than a 0.02 result.

The FHWA strongly encourages the public to comment on these proposed consequences. The agency encourages critical comments including why the proposed consequences will or will not be sufficient to deter alcohol misuse among CMV drivers.

Section 382.509 Disqualifications

As stated above, the penalty provisions of the CDL regulations are not affected in any way by this proposed rule. The authority of State and local officials to implement the disqualifications included in 49 CFR part 383 are not affected by this proposed rule. Drivers found, upon MCSAP inspection, to have BAC levels of 0.04 or greater will be subject (in addition to the 24-hour period out-of-service and the mandatory referral to a substance abuse professional) to disqualifications of from one year to life under § 383.51(b).

Part 383—Commercial Driver's License Standards; Requirements and Penalties

Section 383.5 Definitions

The FHWA is proposing to add to the existing definition of *Serious traffic violations* in § 383.5 a conviction while operating a CMV with a BAC of either 0.04 (Option 1) or 0.02 (Option 2). See discussion of these options under the discussion of §§ 382.505 and 382.507.

Part 392—Driving of Motor Vehicles

Section 392.5 Alcohol Prohibition

The FHWA proposes to change the name of this section from Intoxicating beverage to Alcohol prohibition to conform this section to the proposed part 382. In addition, the FHWA proposes to revise paragraphs (a)(1) and (a)(2) and paragraph (b)(2) to replace the words intoxicating beverage with the words use alcohol. Also, the FHWA would conform the section to the FHWA's proposed part 382. Paragraph (a)(3) would be revised by deleting the words intoxicating beverage and replacing it with the words alcoholic beverage.

Part 395—Hours of Service of Drivers

Section 395.2 Definitions

The FHWA proposes to revise the definition of on-duty time by adding paragraph (10) which would include all time spent in providing breath and urine samples for testing in accordance with part 382 when directed by a motor carrier to submit to a random, reasonable suspicion, post-accident or follow-up test. The definition would also include all time spent in which a driver is providing breath, urine and blood samples for testing when a Federal, State or local official requests them to provide such samples for testing, regardless of whether the request and the test is in accordance with part 382. Preemployment and return-to-duty testing will not be included in this proposal because daily records of duty status are not required to be completed by drivers who have not yet been hired and those who have been removed from driving functions.

The FHWA has had many inquiries from the public and the motor carrier industry regarding whether the time spent providing urine specimens under part 391, subpart H should be considered as on-duty time or off-duty time. The FHWA believes that a motor carrier's responsibility under part 391, subpart H is to ensure that a controlled substances urine specimen is submitted by a driver and that the test is performed correctly, regardless of who pays for the collection and analysis of the specimen. Similarly, the FHWA believes that a driver's submission of adequate breath for testing for alcohol use is the motor carrier's responsibility, when the test is required by the Omnibus Act.

The FHWA's prior interpretations that time spent by a driver taking a physical examination in accordance with § 391.41 or time spent taking driver's license examinations that were not directed by a motor carrier could be logged as off-duty time on a record of duty status is not comparable to submitting to a controlled substances or alcohol test. When a motor carrier requests a driver, who is currently employed by the motor carrier, to submit adequate breath for testing or a urine specimen, the time associated with that test should be recorded as on-duty time on an applicable record of duty status, regardless of whether the driver is paid for this time.

The FHWA believes that submission of adequate breaths or testing by drivers for a motor carrier's use is similar to other motor carrier requests or expectations for driver services that may or may not be reimbursed or paid by the motor carrier.

VIII. Regulatory Analyses and Notices

Regulatory Impact Analysis

This proposed rule will require motor carriers to test drivers for the use of controlled substances and alcohol use. This rule will affect trucking companies, passenger carriers, State and local governments and anyone who operates a commercial motor vehicle on the public highways.

Executive Order 12291 (Federal Regulation) and DOT Regulatory Policies and Procedures

The FHWA has determined that this document is a major rule under Executive Order 12291 and a significant regulation under the regulatory policies and procedures of the DOT. A draft regulatory impact analysis has been prepared and a copy has been placed in the docket. A summary is included here.

Economic Impact Analysis

The Act requires among other things, testing of safety-sensitive employees in the highway industry for use of alcohol in violation of the law or Federal regulations. The Act specifically mandates privacy in collection techniques, testing safeguards, confirmation of positive results, confidentiality of test results and scientific random selection of employees for testing. The Act further mandates pre-employment, random, post-accident, and reasonable suspicion testing.

Within the framework of these legislative mandates the FHWA is proposing an alcohol testing program that minimizes the economic impact to the industry by utilizing established procedures, equipment, techniques, and safeguards that are already available to, and in use by law enforcement agencies and employers. The proposed rule will not require the development of new technologies, or the need to create an extensive cadre of testing personnel. In the majority of cases, an employer's alcohol testing program will be an incremental expansion of existing drug testing programs, utilizing the same facilities, personnel, and records systems that currently exist.

The following summarizes the preliminary industry cost and benefit evaluation for the final rule on alcohol testing. The rule is intended to prohibit absolutely alcohol concentrations of 0.04 or greater in a driver's breath when operating a commercial motor vehicle. The rule will require pre-employment/pre-duty, random, post-accident, reasonable suspicion, and return-to-duty alcohol testing for approximately 5,000,000 drivers of commercial motor vehicles.

The economic cost to the motor carrier industry will be substantial and include, in addition to the cost of the test, the cost of administering a testing program, the cost of replacement drivers, the occasional court cost, and for owner-operators the potential loss of livelihood.

Notwithstanding these economic costs, the FHWA believes that substantial benefits exceeding the costs will accrue as a result of this proposal. There will be benefits due to the prevention of fatalities, personal injuries, property damage, and lost productivity resulting from accidents attributed to neglect or error on the part of commercial motor vehicle drivers whose judgment or motor skills were impaired by the use of alcohol.

The assumptions and cost factors used in preparing the economic impact estimate have been developed by the FHWA. This regulatory impact analysis is in the docket for this rulemaking and is subject to review. Cost data were furnished by motor carriers, motor carrier industry associations, and trade publications.

The benefit cost analysis is a direct arithmetic comparison between the identified and quantified cost of an alcohol testing program and the economic value of the benefits expected to be derived therefrom. The preliminary cost-benefit analysis is for a ten year period beginning with 1993; assumes three different random testing rates of 10, 25, and 50 percent, a deterrence rate of 50 percent the first year and 70 percent thereafter.

The estimated total cost consists of: setting up and administrating a testing program, the cost of pre-employment, random, post accident, reasonable suspicion, and follow-up testing. Costs were estimated using two alternative methods of testing; the cost of a testing program for all types of testing operated exclusively by the motor carriers and/or their testing contractors, and the cost of a program with all random testing operated by State motor carrier enforcement personnel and the remaining testing by the motor carrier or their testing contractors.

The estimated value of the benefits is the cost associated with projected reduction in commercial motor vehicle accidents by the assumed 3.7 percent of drivers that will have an alcohol concentration of 0.04 or greater and includes fatalities, injuries, property damage, traffic delays, and emergency services that will not occur by removing or deterring these drivers from the highways.

Summary of Benefits and Costs

Costs and benefits are total for the 10 year analysis period in assumed 1993 dollars.

Name of testing program	Random testing rate (percent)	Ten year benefits (billions)	Ten year costs (billions)	Benefit cost ratio
Motor Carrier	10	$3.92	$.731	5.36
Do	25	3.92	1.02	3.84
Do	50	3.92	1.502	2.61
Motor Carrier and Enforcement Personnel	10	3.92	.74	5.3
Do	25	3.92	.78	5.0
Do	50	3.92	.84	4.7

In other words for every $1.00 spent on this testing program there would be returned in benefits $2.61 to $5.36.

Regulatory Flexibility Act

In compliance with the Regulatory Flexibility Act (Pub. L. 96–354), the FHWA has evaluated the effects of this rulemaking on small entities. This final rule would require motor carriers to test drivers for the use of alcohol. It will have a significant adverse economic impact on small entities. Because the Omnibus Act mandates alcohol testing irrespective of the size of the entities, the FHWA is unable to lessen the economic impact on them.

For these reasons, the FHWA hereby certifies that this action will have a significant economic impact on a substantial number of small entities.

Executive Order 12612 (Federalism Assessment)

This proposal adds part 382 of the FMCSRs pertaining to testing for controlled substances and alcohol by drivers of commercial motor vehicles operating in commerce on public roads and highways. These proposed requirements directly affect motor carriers and the drivers for these motor carriers. This document preempts State or local laws and regulations that are inconsistent with this proposed rule, as required by the Omnibus Transportation Employee Testing Act of 1991. Therefore, the agency does not have to prepare a Federalism Assessment for this proposal.

Executive Order 12372 (Intergovernmental Review)

Catalog of Federal Domestic Assistance Program Number 20.217, Motor Carrier Safety. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.

Paperwork Reduction Act

The information collection requirements in part 382, subpart D and § 395.2 of this rule have been submitted to the Office of Management and Budget for approval under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

National Environmental Policy Act

The agency has analyzed this action for the purpose of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) and has determined that this action would not have any effect on the quality of the environment.

Regulation Identification Number

A regulation identification number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

List of Subjects in 49 CFR Parts 350, 382, 383, 392, and 395

Controlled Substances, Highways and roads, Highway safety, Motor carriers, Motor vehicle safety.

Issued on: December 2, 1992.

Andrew H. Card Jr.,
Secretary of Transportation.
Thomas D. Larson,
Administrator.

In consideration of the foregoing, the FHWA proposes to amend title 49, CFR subtitle B, chapter III, parts 350, 383, 392 and 395, and add part 382 as set forth below:

PART 350—COMMERCIAL MOTOR CARRIER SAFETY ASSISTANCE PROGRAM

1. The authority citation for part 350 continues to read as follows:

Authority: 49 U.S.C. app. 2301–2304, 2505–2507; 49 U.S.C. 3102; Sec.15(d), Pub. L. 101–500, 104 Stat. 1213, 1219; Secs. 4002 and 4009, Pub. L. 102–240, 105 Stat. 2140; 49 CFR 1.48.

2. In § 350.9, paragraph (q), is added to read as follows:

§ 350.9 Conditions for basic grant approval.

* * * * *

(q) The State shall adopt and enforce the requirements of 49 CFR part 382 with respect to random alcohol testing of commercial motor vehicle operators by October 1, 1996.

3. In § 350.13, paragraph (b)(8) is added to read as follows:

§ 350.13 State enforcement plan (SEP) for a basic grant.

* * * * *

(b) * * *

(8) Describe the efforts taken by the State to adopt and enforce the requirements of 49 CFR part 382 with respect to random alcohol testing of commercial motor vehicle drivers; and

* * * * *

4. Chapter III is amended by adding part 382 as follows:

PART 382—CONTROLLED SUBSTANCES AND ALCOHOL USE AND TESTING

Subpart A—Alcohol; General

Sec.
382.101 Purpose.
382.103 Applicability.
382.105 Alcohol testing procedures.
382.107 Definitions.
382.109 Preemption of State and local laws.
382.111 Other requirements imposed by motor carriers.
382.113 Requirement for notice.
382.115 Starting date for alcohol testing programs.

Subpart B—Prohibitions

382.201 Alcohol concentration.
382.203 Behavior or appearance.
382.204 Alcohol possession.
382.205 On-duty use.
382.207 Pre-duty use.
382.209 Use following an accident.
382.211 Refusal to submit to a required alcohol test.

Subpart C—Tests Required

382.301 Pre-employment/pre-duty testing.
382.303 Post-accident testing.
382.305 Random testing.
382.307 Reasonable suspicion testing.
382.309 Return-to-duty testing.
382.311 Follow-up testing.
382.313 [Reserved]
382.315 Exceptions for testing performed by consortiums.

Subpart D—Handling of Test Results, Record Retention, and Confidentiality

382.401 Retention of records.
382.403 Reporting of results in a management information system.
382.405 Access to facilities and records.

Subpart E—Consequences for Drivers Engaging in Alcohol-Related Conduct

382.501 Removal from safety-sensitive function.
382.503 Required evaluation and testing.
382.505 Other alcohol-related conduct.
382.507 Additional consequences for alcohol concentration violations.
382.509 Disqualifications.

Subpart F—Alcohol Misuse Information, Training, and Referral

382.601 Motor carrier obligation to promulgate a policy on the misuse of alcohol.
382.603 Training for supervisors.
382.605 Referral, evaluation, and treatment.

Authority: 49 U.S.C. app. 2505; 49 U.S.C. app. 2701 *et seq.*; 49 U.S.C. 3102; 49 CFR 1.48.

Subpart A—General

§ 382.101 Purpose.

The purpose of this part is to establish programs designed to help prevent accidents and injuries resulting from the misuse of alcohol by drivers of commercial motor vehicles.

§ 382.103 Applicability.

(a) This part applies to all motor carriers and drivers as defined in this part who are required under part 383 of this chapter to obtain a commercial driver's license, except for motor carriers and their drivers who are required to conform to the alcohol testing requirements of the Federal Transit Administration of the Department of Transportation found in part 654 of this title or have obtained a full waiver or State option waiver from the Part 383 requirements.

(b) A motor carrier who employs himself/herself as a driver must comply with both the rules in this part that apply to motor carriers and the rules in this part that apply to drivers, except the motor carrier who employs himself/herself as a driver shall not implement an alcohol testing program that only includes himself/herself as a participant.

(c) The requirements of this part do not apply to any employee whose place of reporting or point of departure *(home terminal)* for motor carrier transportation services is located outside the territory of the United States.

§ 382.105 Alcohol testing procedures.

Each motor carrier shall ensure that all alcohol testing conducted under this part complies with the procedures set forth in part 40 of this title. The provisions of part 40 of this title that address alcohol testing are applicable to motor carriers by this part.

§ 382.107 Definitions.

As used in this part—

Accident means an occurrence involving a commercial motor vehicle engaged in the operations of a motor carrier who is subject to this part resulting in:

(1) The death of a human being; or

(2) Bodily injury to a person who, as a result of the injury, immediately receives medical treatment away from the scene of the accident; or

(3) One or more motor vehicles incurring disabling damage as a result of the accident and transported away from the scene by a tow truck or other motor vehicle.

Alcohol means ethyl alcohol (ethanol).

Alcohol concentration (or content) means the alcohol in a volume of breath expressed in terms of grams of alcohol per 210 liters of breath as indicated by an evidential breath test under this part. When the indicated alcohol concentration of a driver on an initial alcohol test is different from an indicated alcohol concentration on a confirmatory test, the driver shall be considered to have the lower indicated concentration.

Alcohol use means the consumption of any beverage, mixture, or preparation, including any medication, containing alcohol.

Commerce means (1) any trade, traffic or transportation within the jurisdiction of the United States between a place in a State and a place outside of such State, including a place outside of the United States and (2) trade, traffic, and transportation in the United States which affects any trade, traffic, and transportation described in paragraph (1) of this definition.

Commercial motor vehicle means a motor vehicle or combination of motor vehicles used in commerce to transport passengers or property if the motor vehicle—

(1) Has a gross combination weight rating or gross combination weight of 26,001 or more pounds inclusive of a towed unit with a gross vehicle weight rating or gross vehicle weight of more than 10,000 pounds; or

(2) Has a gross vehicle weight rating or gross vehicle weight of 26,001 or more pounds; or

(3) Is designed to transport 16 or more passengers, including the driver; or

(4) Is of any size and is used in the transportation of materials found to be hazardous for the purposes of the Hazardous Materials Transportation Act and which require the motor vehicle to be placarded under the Hazardous Materials Regulations (49 CFR part 172, subpart F).

Confirmatory test means a second analytical procedure, separate from the screening test, to determine the concentration of alcohol in a driver's system. The confirmatory test may or may not use a different chemical principle from that of the screening test, but shall employ a scientifically recognized method of testing capable of providing quantitative data regarding alcohol concentration. For specific requirements concerning evidential breath testing devices see part 40 of this title.

Consortium means an entity, including a group or association of employers, motor carriers, or contractors that provides alcohol testing as required by this part or other DOT alcohol testing rules and that acts on behalf of the employers.

Covered employee means a driver. For the purposes of preemployment/pre-duty testing only, the term covered employee includes a person applying to perform a safety-sensitive function.

Disqualification means either:

(1) The suspension, revocation, cancellation, or any other withdrawal by a State of a driver's privileges to drive a commercial motor vehicle; or

(2) A determination by the FHWA, under the rules of practice for motor carrier safety contained in Part 386 of this title, that a driver is no longer qualified to operate a commercial motor vehicle under Part 391; or

(3) The loss of qualification which automatically follows conviction of an offense listed in §§ 383.51 or 391.15 of this chapter; or

(4) The loss of qualification which automatically follows a violation of the alcohol prohibitions as specified in this subchapter.

DOT Agency means an agency (or "operating administration") of the United States Department of Transportation administering regulations requiring alcohol testing (14 CFR parts 65, 121, and 135; 49 CFR parts 199, 219, 382 and 654) in accordance with part 40 of this title.

Driver means any person who operates a commercial motor vehicle. This includes, but is not limited to, full time, regularly employed drivers; casual, intermittent or occasional drivers; leased drivers and independent, owner-operator contractors who are either directly employed by or under lease to a motor carrier or who operate a commercial motor vehicle at the direction of or with the consent of a motor carrier. For the purposes of preemployment/pre-duty testing only, the term driver includes a person applying to a motor carrier to drive a commercial motor vehicle.

Employer means a motor carrier and any other person designated in a DOT agency alcohol rule as an employer.

Initial alcohol test (or screening test) means an analytical procedure to determine whether a driver may have a prohibited concentration of alcohol in his or her system.

Motor carrier means any person (including the United States, a State, the District of Columbia or a political subdivision of a State) who owns or leases a commercial motor vehicle or assigns persons to operate such a vehicle. The term *motor carrier* includes a motor carrier's agents, officers and representatives as well as employees responsible for hiring, supervising, training, assigning, or dispatching of drivers and employees concerned with the installation, inspection, and maintenance of commercial motor vehicle equipment and/or accessories.

On-duty means all on duty time as defined in § 395.2 *On-duty time* of this chapter and includes all time submitting to the breath testing process for alcohol

testing and performing any other functions contained in this part and in part 40 of this title with respect to alcohol testing.

Performing (a safety-sensitive function) means a driver is considered to be performing a safety-sensitive function during any period in which he or she is actually performing, ready to perform, or immediately available to perform any of those on-duty functions set forth in § 395.2 *On-Duty time*, paragraphs (1) through (7) of this chapter.

Refuse to submit (to an alcohol test) means that a driver fails to provide adequate breath for testing without a valid medical explanation after he or she has received notice of the requirement to be tested in accordance with this part, or engages in conduct that clearly obstructs the collection process. The notice of the requirement to be tested may be made by the motor carrier or a Federal, State, or local official.

Safety-sensitive function means any of those on-duty functions set forth in § 395.2 *On-Duty time*, paragraphs (1) through (7) of this chapter.

Substance abuse professional means a licensed physician (Medical Doctor or Doctor of Osteopathy), or a licensed or certified psychologist, social worker, or employee assistance professional with knowledge of and clinical experience in the diagnosis and treatment of alcohol-related disorders.

§ 382.109 Preemption of State and local laws.

(a) Except as provided in paragraph (b) of this section, this part preempts any State or local law, rule, regulation, or order to the extent that:

(1) Compliance with both the State or local requirement and this part is not possible; or

(2) Compliance with the State or local requirement is an obstacle to the accomplishment and execution of any requirement in this part.

(b) This part shall not be construed to preempt provisions of State criminal law that impose sanctions for reckless conduct leading to actual loss of life, injury, or damage to property, whether the provisions apply specifically to transportation employees (including drivers) or employers (including motor carriers) or to the general public.

§ 382.111 Other requirements imposed by motor carriers.

Except as expressly provided in this part, nothing in this part shall be construed to affect the authority of motor carriers, or the rights of drivers, with respect to the use or possession of alcohol, including authority and rights with respect to alcohol testing and rehabilitation.

§ 382.113 Requirement for notice.

Before performing an alcohol test under this part, each motor carrier or Federal, State, or local official shall notify a driver that the alcohol test is required by this part. No motor carrier or Federal, State or local official shall falsely represent that a test is administered under this part.

§ 382.115 Starting date for alcohol testing programs.

(a) *Large motor carriers.* Each motor carrier with fifty or more drivers on [The Effective Date of the Final Rule] shall implement the requirements of this part on [Date One Year After the Effective Date of the Final Rule].

(b) Small motor carriers. Each motor carrier with fewer than fifty drivers on [The Effective Date of the Final Rule] shall implement the requirements of this part on [Date Two Years After the Effective Date of the Final Rule].

(c) All motor carriers shall have an alcohol misuse program that conforms to this part by [Date Two Years After the Effective Date of the Final Rule] or by the date a motor carrier begins motor carrier operations, whichever is later.

Subpart B—Prohibitions

§ 382.201 Alcohol concentration.

No driver shall report for duty or remain on duty requiring the performance of safety-sensitive functions while having an alcohol concentration of 0.04 or greater. No motor carrier having actual knowledge that a driver has an alcohol concentration of 0.04 or greater shall permit the driver to perform or continue to perform safety-sensitive functions.

§ 382.203 Behavior or appearance.

Notwithstanding the absence of a reasonable suspicion test under § 382.307, no driver shall report for duty or remain on duty requiring the performance of safety-sensitive functions while the driver's behavior or appearance is characteristic of alcohol misuse or the driver's ability to perform his or her assigned functions is adversely affected by alcohol use. No motor carrier having actual knowledge that the driver is in violation of this section shall permit a driver to perform or continue to perform safety-sensitive functions.

§ 382.204 Alcohol possession.

No driver shall be on duty or operate a commercial motor vehicle while the driver possesses alcohol unless the alcohol is manifested and transported as part of a shipment. No motor carrier having actual knowledge that a driver possesses unmanifested alcohol may permit the driver to drive or continue to drive a commercial motor vehicle.

§ 382.205 On-duty use.

No driver shall use alcohol while performing safety-sensitive functions. No motor carrier having actual knowledge that a driver is using alcohol while performing safety-sensitive functions shall permit the driver to perform or continue to perform safety-sensitive functions.

§ 382.207 Pre-duty use.

No driver shall perform safety-sensitive functions within four hours after using alcohol. No motor carrier having actual knowledge that such a driver has used alcohol within four hours shall permit a driver to perform or continue to perform safety-sensitive functions.

§ 382.209 Use following an accident.

No driver who has an accident while performing safety-sensitive functions shall use alcohol for eight hours following the accident, unless the driver has been given a post-accident test under § 382.303 of this part.

§ 382.211 Refusal to submit to a required alcohol test.

No driver shall refuse to submit to a post-accident alcohol test required under § 382.303, a random alcohol test required under § 382.305, a reasonable suspicion alcohol test required under § 382.307, or a follow-up alcohol test required under § 382.311. No motor carrier shall permit a driver who refuses to submit to such a test to perform or continue to perform safety-sensitive functions.

Subpart C—Tests Required

§ 382.301 Pre-employment/pre-duty testing.

(a) Prior to the first time a driver performs safety-sensitive functions for a motor carrier, the driver shall undergo testing for alcohol. No motor carrier shall allow a driver to perform safety-sensitive functions, unless the driver has been administered an alcohol test with a result indicating an alcohol concentration less than 0.04. If a pre-employment/pre-duty test result under this section indicates an alcohol content of 0.02 or greater but less than 0.04, the provisions of § 382.505 shall apply.

(b) A motor carrier is not required to administer an alcohol test required by paragraph (a) of this section, if:

(1) The driver has undergone an alcohol test required by this section or the alcohol misuse rule of another DOT agency under part 40 of this title within the previous six months, with a result indicating an alcohol concentration less than 0.04; and

(2) The motor carrier ensures, by obtaining the information required by § 382.315(b), that no prior motor carrier of the driver of whom the motor carrier has knowledge has records of a violation of this part or the alcohol misuse rule of another DOT agency within the previous six months.

§ 382.303 Post-accident testing.

(a) As soon as practicable following an accident involving a commercial motor vehicle, each motor carrier shall test for alcohol each surviving driver:

(1) Who was performing safety-sensitive functions with respect to the vehicle, if the accident involved the loss of human life; or

(2) Who receives a citation under State or local law for a moving traffic violation arising from the accident.

(b) If a test required by this section is not administered within two hours following the accident, the motor carrier shall prepare a written report to be kept in the motor carrier's files stating the reasons the test was not promptly administered. If a test required by this section is not administered within eight hours following the accident, the motor carrier shall cease attempts to administer an alcohol test and shall prepare the report.

(c) A driver who is subject to post-accident testing who leaves the scene of an accident without a valid reason prior to submission to such test may be deemed by the motor carrier to have refused to submit to testing. Nothing in this section shall be construed to require the delay of necessary medical attention for injured people following an accident or to prohibit a driver from leaving the scene of an accident for the period necessary to obtain assistance in responding to the accident or to obtain necessary emergency medical care.

(d) A motor carrier shall provide drivers with necessary post-accident information, procedures and instructions, prior to the driver operating a commercial motor vehicle, so that drivers will be able to comply with the requirements of this section.

(e) The results of any tests for the use of alcohol performed by Federal, State, or local officials having independent authority to require a driver to submit to a test, shall be considered to meet the requirements of this section provided such tests conform to applicable Federal, State or local requirements, and that the results of the tests are obtained by the motor carrier.

§ 382.305 Random testing.

Option 1

(a) Each motor carrier shall, at various times, randomly select drivers for unannounced alcohol testing. The selection of drivers shall be made by use of a scientifically valid method, such as a random-number table or a computer-based random number generator that is matched with drivers' Social Security numbers, payroll identification numbers, or other comparable identifying numbers. Each driver shall have an equal chance of being tested under the selection process used.

(b) During each 12-month period following the start of random alcohol testing by the motor carrier, the motor carrier shall meet the following conditions:

(1) The dates for administering unannounced testing of randomly-selected drivers shall be spread reasonably throughout the 12-month period; and

(2) The number of drivers randomly selected for testing during the 12-month period shall equal an annual rate of not less than (10–50) percent of the total number of drivers subject to alcohol testing under this part or the alcohol misuse rule of another DOT agency. If the motor carrier conducts random testing through a consortium, the annual rate may be calculated for each individual motor carrier or for the total number of drivers and DOT covered employees subject to random testing by the consortium.

(c) A driver shall only be tested while the driver is performing safety-sensitive functions; just before the driver is to perform safety-sensitive functions; or just after the driver has ceased performing such functions.

(d) Each motor carrier shall require that each driver who is notified of selection for random testing proceeds to the testing site immediately. However, if the driver is performing a safety-sensitive function at the time of notification, the motor carrier shall instead ensure that the driver ceases to perform the safety-sensitive function and proceeds to the testing site as soon as possible.

Option 2

(a) Each motor carrier shall require its drivers to submit to an alcohol test when requested to do so by a Federal, State or local official who is carrying out the requirements of this section and part 350 of this chapter.

(b) A driver shall submit to an alcohol test when requested to do so by a Federal, State or local official who is carrying out the requirements of this section and part 350 of this chapter.

(c)(1) The number of random tests performed in the State shall equal (10 to 50) percent of the number of commercial driver's license (CDL) holders in the State as of July 1 each year or as of a certain date mutually agreed upon by the State and the FHWA.

(2) Random alcohol testing may be performed in conjunction with other driver and/or vehicle inspections performed under the authority of part 350 of this chapter at various locations and times, including but not limited to, weigh stations, roadside, terminal and other motor carrier fixed locations.

(3) Random alcohol testing must be administered in conformance with the requirements of this part and part 40 of this title.

(4) Random alcohol testing conducted by Federal, State or local officials required under this part and part 350 of this chapter shall be administered without regard to any probable cause standard found in State or local law. The consequences of such non-probable cause random alcohol testing shall be limited to those set forth in this part.

(5) Random alcohol testing conducted by Federal, State or local officials where probable cause is independently established without regard to administering random alcohol testing in accordance with this part or part 350 of this chapter shall be administered in accordance with State or local law and not in accordance with this part. The consequences of such probable cause random alcohol testing shall be determined pursuant to State or local law and if applicable, in accordance with § 383.51 of this chapter.

(6) A driver's refusal to be tested under this part when requested to do so by a Federal, State or local official, pursuant to part 350 of this chapter or compatible State or local authority, shall be deemed as tantamount to a 0.04 or greater alcohol concentration level under this part.

(7) Pursuant to this part and part 350 of this chapter, the State or local officials participating under this program shall input into SAFETYNET all required random alcohol testing data.

(8) A Federal, State or local official must provide written notification to the appropriate State of licensure within five working days of any alcohol concentration test result of 0.02 or greater.

§ 382.307 Reasonable suspicion testing.

(a) Each motor carrier shall require any driver to submit to an alcohol test,

when the motor carrier has reasonable suspicion to believe that the driver has violated the prohibitions in this part.

(b) The motor carrier's determination that reasonable suspicion exists to require the driver to undergo an alcohol test shall be based on specific, contemporaneous, articulable observations concerning the appearance, behavior, speech or body odors of the driver. The required observations shall be made by a supervisor who is trained in detecting the symptoms of alcohol misuse. The supervisor who makes the determination that reasonable suspicion exists shall not conduct the breath alcohol test on that driver.

(c) Alcohol testing is authorized by this section only if the observations required by paragraph (b) are made during or just preceding the period of the work day that the covered driver is required to be in compliance with this part. A driver may be required to undergo reasonable suspicion testing for alcohol while the driver is performing safety-sensitive functions; just before the driver is to perform safety-sensitive functions; or just after the driver has ceased performing such functions.

§ 382.309 Return to duty testing.

Each motor carrier shall ensure that before a driver returns to duty requiring the performance of a safety-sensitive function after engaging in conduct prohibited by subpart B of this part, the driver shall undergo a return to duty alcohol test with a result indicating an alcohol concentration of less than 0.02.

§ 382.311 Follow-up testing.

Following a determination under § 382.605(b) that a driver is in need of assistance in resolving problems associated with alcohol misuse, each motor carrier shall ensure that the driver is subject to unannounced follow-up alcohol testing as directed by a substance abuse professional in accordance with the provisions of § 382.605(c)(2)(ii).

§ 382.313 [Reserved]

§ 382.315 Exceptions for testing performed by consortiums.

(a) Pre-employment/pre-duty testing and random testing need not be performed directly by the motor carrier provided that the motor carrier directs or approves such testing program of a contractor or previous motor carrier prior to using a driver participating in the program.

(b) A motor carrier who exercises paragraphs (a) of this section or § 382.301(b) shall contact the alcohol testing program in which the driver participates or participated and shall obtain the following information:

(1) Name and address of the program(s).

(2) Verification that the driver participates or participated in the program(s).

(3) Verification that the program(s) conform to part 40 of this title.

(4) Verification that the driver is qualified under the rules of this part, including that the driver has not refused to be tested for alcohol.

(5) The date the driver was last tested for alcohol.

(6) The results of any tests taken within the previous six months and any other violations of subpart B of this part.

(7) The results of any referrals to a substance abuse professional for all violations of subpart B of this part.

(c) The motor carrier shall retain the information required by this section as specified in § 382.401.

(d) A motor carrier who uses, but does not employ, such a driver more than once a year must assure itself once every six months that the driver participates in an alcohol testing program that meets the requirements of this part.

Subpart D—Handling Of Test Results, Record Retention and Confidentiality

§ 382.401 Retention of records.

(a) *General Requirement.* Each motor carrier shall maintain records of its alcohol misuse prevention program as provided in this section. The records shall be maintained in a secure location with controlled access.

(b) *Period of Retention.* Each motor carrier shall maintain the records in accordance with the following schedule:

(1) *Five years.* Records of driver alcohol test results with results indicating an alcohol concentration of 0.02 or greater, documentation of refusals to take required alcohol tests, calibration documentation, and driver evaluation and referrals shall be maintained for a minimum of five years.

(2) *Two years.* Records related to the collection process (except calibration of evidential breath testing devices) and training shall be maintained for a minimum of two years.

(3) *One year.* Records of negative test results (as defined in part 40 of this title) shall be maintained for a minimum of one year.

(c) *Types of records.* The following specific records shall be maintained.

(1) Records related to the collection process:

(i) Collection logbooks, if used;

(ii) Documents relating to the random selection process;

(iii) Calibration documentation for evidential breath testing devices;

(iv) Verification of breath alcohol technician training;

(v) Documents generated in connection with decisions to administer reasonable suspicion alcohol tests;

(vi) Documents generated in connection with decisions on post-accident tests;

(vii) Documents verifying existence of a medical explanation of the inability of a driver to provide adequate breath for testing; and

(viii) Consolidated annual reports as required by § 382.403.

(2) Records related to test results:

(i) The motor carrier's copy of the alcohol test form, including the results of the test;

(ii) Documents related to the refusal of any driver to submit to an alcohol test required by this part;

(iii) Documents presented by a driver to dispute the result of an alcohol test administered under this part.

(3) Records related to other violations of this part.

(4) Records related to evaluations:

(i) Records pertaining to a determination by a substance abuse professional concerning a driver's need for assistance, and

(ii) Records concerning a driver's compliance with recommendations of the substance abuse professional.

(5) Records related to education and training:

(i) Materials on alcohol misuse awareness, including a copy of the motor carrier's policy on alcohol misuse;

(ii) Documentation of compliance with the requirements of § 382.601;

(iii) Documentation of training provided to supervisors for the purpose of qualifying the supervisors to make a determination concerning the need for alcohol testing based on reasonable suspicion; and

(iv) Certification that any training conducted under this part complies with the requirements for such training.

§ 382.403 Reporting of results in a management information system.

(a) Each motor carrier shall submit to the Federal Highway Administration, when requested, an annual report covering the calendar year, summarizing the results of its alcohol misuse prevention program.

(b) Each motor carrier that is subject to more than one DOT agency alcohol rule shall identify each driver covered by the regulations of more than one DOT agency. The identification will be by the total number and category of covered function. Prior to conducting any alcohol test on a driver subject to the rules of more than one DOT agency,

the motor carrier shall determine which DOT agency rule or rules authorizes or requires the test. The test result information shall be directed to the appropriate DOT agency or agencies.

(c) Each motor carrier shall ensure the accuracy and timeliness of each report submitted by the motor carrier or a consortium.

(d) Each motor carrier notified shall submit the required annual reports no later than February 15 of each year. The report shall be submitted on the form specified by the FHWA. Each report shall contain:

(1) Number of drivers by employee category;

(2) Number of drivers subject to testing under the alcohol misuse rules of another DOT Agency, identified by each agency;

(3)(i) Number of initial tests by type of test and employee category; and

(ii) Number of confirmatory tests, by type of test and employee category

(4) Number of confirmatory alcohol tests indicating an alcohol concentration of 0.04 or greater, by type of test and employee category;

(5) Number of confirmatory alcohol tests indicating an alcohol concentration of 0.02 or greater but less than 0.04;

(6) Number of persons denied a position as a driver following a pre-employment/pre-duty alcohol test indicating an alcohol concentration of 0.04 or greater;

(7) Number of drivers with a confirmatory alcohol test indicating an alcohol concentration of 0.04 or greater who were returned to duty in driver positions (having complied with the recommendations of a substance abuse professional as described in §§ 382.503 and 382.605;)

(8) Number of drivers who were administered alcohol and drug tests at the same time, with both a positive drug test result and an alcohol test result indicating an alcohol concentration of 0.04 or greater;

(9) Number of drivers who were found to have violated other provisions of subpart B of this part, and the action taken in response to the violation;

(10) Number of drivers who refused to submit to an alcohol test required under this part, and the action taken in response to the refusal;

(11) Number of supervisors who have received training during the reporting period in determining the existence of reasonable suspicion of alcohol misuse.

§ 382.405 Access to facilities and records.

(a) Except as required by law or expressly authorized or required in this section, no motor carrier shall release driver information that is contained in records required to be maintained under § 382.401.

(b) A driver is entitled, upon written request, to obtain copies of any records pertaining to the driver's use of alcohol, including any records pertaining to his or her alcohol tests. The motor carrier shall promptly provide the records requested by the driver. Access to a driver's records shall not be contingent upon payment for records other than those specifically requested.

(c) A motor carrier shall permit access to all facilities utilized in complying with the requirements of this part to the Secretary of Transportation, any DOT agency, or any State or local officials with regulatory authority over the motor carrier or any of its drivers.

(d) Each motor carrier shall make available copies of all results for motor carrier alcohol testing conducted under this part and any other information pertaining to the motor carrier's alcohol misuse prevention program, when requested by the Secretary of Transportation, any DOT agency, or any State or local officials with regulatory authority over the motor carrier or any of its drivers.

(e) When requested by the National Transportation Safety Board as part of an accident investigation, motor carriers shall disclose information related to the motor carrier's administration of a post-accident alcohol test administered following the accident under investigation.

(f) Records shall be made available to a subsequent motor carrier upon receipt of a written request from the driver. Disclosure by the subsequent motor carrier is permitted only as expressly authorized by the terms of the driver's request.

(g) A motor carrier may disclose information required to be maintained under this part pertaining to a driver to the driver or the decisionmaker in a lawsuit, grievance, or other proceeding initiated by or on behalf of the individual, and arising from the results of an alcohol test administered under this part, or from the motor carrier's determination that the driver engaged in conduct prohibited by subpart B of this part (including, but not limited to, a worker's compensation, unemployment compensation, or other proceeding relating to a benefit sought by the driver.)

(h) A motor carrier shall release information regarding a driver's records as directed by the specific, written consent of the driver authorizing release of the information to an identified person. Release of such information by the person receiving the information is permitted only in accordance with the terms of the driver's consent.

Subpart E—Consequences For Drivers Engaging in Alcohol-Related Conduct

§ 382.501 Removal from safety-sensitive function.

(a) Except as provided in subpart F of this part, no driver shall perform safety-sensitive functions if the driver has engaged in conduct prohibited by subpart B of this part or an alcohol rule of another DOT agency.

(b) No motor carrier shall permit any driver to perform safety-sensitive functions if the motor carrier has determined that the driver has violated this section.

§ 382.503 Required evaluation and testing.

No driver who has engaged in conduct prohibited by subpart B of this part shall perform safety-sensitive functions unless the driver has met the requirements of § 382.605. No motor carrier shall permit a driver to perform safety-sensitive functions unless the driver has met the requirements of § 382.605. Nothing in this section shall be construed to prohibit the continued performance of safety-sensitive functions necessary to respond to an emergency.

§ 382.505 Other alcohol-related conduct.

(a) No driver tested under the provisions of subpart C of this part who is found to have an alcohol concentration of 0.02 or greater but less than 0.04 shall perform or continue to perform safety-sensitive functions for a motor carrier, nor shall a motor carrier permit the driver to perform or continue to perform safety-sensitive functions, until the start of the driver's next regularly scheduled duty period, but not less than 24 hours following administration of the test.

(b) Except as provided in paragraph (a) of this section, no motor carrier shall take any action under this part against a driver based solely on test results showing an alcohol concentration less than 0.04. This does not prohibit an employer with authority independent of this part from taking any action otherwise consistent with law.

(c) Nothing in this section shall be construed to prohibit the continued performance of safety-sensitive functions necessary to respond to an emergency.

§ 382.507 Additional consequences for alcohol concentration violations.

(a)(1) *Discovered by a motor carrier.* A driver who is found through testing under this part to have an alcohol concentration of 0.04 or greater is

prohibited from driving for the periods specified in paragraph (a)(2) of this section.

(2) *Duration of prohibited driving periods:* (i) *Second violation.* A driver who, during any three-year period, is found to have an alcohol concentration of 0.04 or greater twice in separate incidents, is prohibited from driving any commercial motor vehicle, as defined in this part or part 390 of this subchapter, for a period of 60 consecutive days.

(ii) *Third and subsequent violations.* A driver who, during any three-year period, is found to have an alcohol concentration of 0.04 or greater three or more times in separate incidents, is prohibited from driving any commercial motor vehicle, as defined in this part or part 390 of this subchapter, for a period of 120 consecutive days.

(b)(1) *Discovered by a Federal, State or local government official.* A driver who is found to have an alcohol concentration of 0.02 or greater by a Federal, State or local official shall be placed out-of-service from driving any commercial motor vehicle, as defined in this part or part 390 of this subchapter, for a minimum period of 24 hours.

(2) A driver who is found to be in violation of § 382.201 twice within three years by a Federal, State or local official shall:

(i) Be placed out of service for a 24-hour period,

(ii) Be prohibited from driving any commercial motor vehicle, as defined in this part or part 390 of this chapter, for a period of 60 consecutive days commencing upon completion of the State's licensing review process, if any; and

(iii) Have his/her commercial driver's license suspended, revoked or canceled for at least 60 days upon completion of the State's licensing review process, if any.

(3) A driver who is found to be in violation of § 382.201 three or more times within three years by a Federal, State or local official shall:

(i) Be placed out of service for a 24-hour period,

(ii) Be prohibited from driving any commercial motor vehicle, as defined in this part or part 390 of this chapter, for a period of 120 consecutive days commencing upon completion of the State's licensing review process, if any; and

(iii) Have his/her commercial driver's license suspended, revoked or canceled for at least 120 days upon completion of the State's licensing review process, if any.

(c) *Out-of-service orders.* (1) Any driver who is issued an out-of-service order by a Federal, State or local official under this section shall report such issuance to his or her motor carrier within 24 hours.

(2) No driver shall violate the terms of an out-of-service order issued under this section.

(3) A driver shall be prohibited from driving a commercial motor vehicle, as defined in this part and in part 390 of this chapter, for not less than five consecutive days, if the driver fails to inform the motor carrier of the issuance of an out-of-service order as required by this section.

(4) Any driver who violates an out-of-service order under this part shall be prohibited from driving any commercial motor vehicle, as defined in this part or in part 390 of this chapter, and have his/her commercial driver's license suspended, revoked or canceled, upon completion of the State's licensing review process, if any:

(i) On a first offense for 90 days, and he/she shall be subject to a civil penalty of not less than $1,000, and

(ii) On any subsequent offense within three years of a previous offense, for not less than one year and not more than five years, and he/she shall be subject to a civil penalty of not less than $1,000.

(5) Any motor carrier that allows, permits, authorizes, requires, or otherwise knowingly uses a driver to operate a commercial motor vehicle in violation of an out-of-service order shall be subject to a civil penalty of not more than $10,000.

(6) Any motor carrier who is notified by a driver under paragraph (b)(1) of this section, or through other means has knowledge of the issuance of an out-of-service order to its driver, shall notify the State official which issued the commercial driver's license to the driver receiving the out-of-service order no later than five days of being notified or obtaining knowledge of the issuance of the order.

(d) A driver who refuses to be tested for alcohol under the provisions of this part shall not drive any commercial motor vehicle, as defined in this part or part 390 of this chapter, for a period of not less than one year.

(e) No motor carrier shall knowingly use a driver to drive any commercial motor vehicle, as defined in this part or part 390 of this chapter, during the prohibition periods specified under this section, when the driver is in violation of any of the requirements of this subpart. A motor carrier that knowingly uses a driver to violate this subpart shall be subject to the penalty provisions of 49 U.S.C. 521(b).

(f) No motor carrier shall knowingly use a driver who has been found to have violated any requirements of this part to drive any commercial motor vehicle, as defined in this part or in part 390 of this chapter, or perform any other safety-sensitive functions regulated by any DOT agency, until the driver has complied with the requirements of this part, including the completion of any evaluation, treatment, or return to duty testing required by the substance abuse professional, and any other applicable DOT agencies' regulations.

(g) A driver shall be prohibited from driving for a period of one year following an alcohol test indicating an alcohol concentration of 0.02 or greater when the driver has been involved in a fatal accident.

§ 382.509 Disqualifications.

(a) Nothing in this subpart shall be construed to restrict the authority of Federal, State or local officials from implementing § 383.51 of this chapter. A driver whose test under § 382.201 conducted by Federal, State or local officials which results in an alcohol concentration of 0.04 or greater, shall be subject to the disqualifications contained in § 383.51(b)(3) of this chapter.

(k) Notwithstanding the provisions of this part, the penalty provisions of § 391.15 of this chapter remain applicable within this part for actions taken by Federal Highway Administration officials.

Subpart F—Alcohol Misuse Information, Training, and Referral

§ 382.601 Motor carrier obligation to promulgate a policy on the misuse of alcohol.

(a) *General requirements.* Each motor carrier shall provide educational materials that explain the requirements of this part and the motor carrier's policies and procedures with respect to meeting those requirements. Each motor carrier shall provide written notice to every driver and to representatives of driver organizations of the availability of this information.

(b) *Required content.* The materials to be made available to drivers shall include detailed discussion of at least the following:

(1) The identity of the person designated by the motor carrier to answer driver questions about the materials;

(2) The categories of drivers who are subject to the provisions of this part;

(3) Sufficient information about the safety-sensitive functions performed by those drivers to make clear what period of the work day the driver is required to be in compliance with this part;

(4) Specific information concerning driver conduct that is prohibited by this part;

(5) The circumstances under which a driver will be tested for alcohol under this part;

(6) The procedures that will be used to test for the presence of alcohol, protect the driver and the integrity of the sample, safeguard the validity of the test results, and ensure that those results are attributed to the correct driver;

(7) The requirement that a driver submit to alcohol tests administered in accordance with this part;

(8) An explanation of what constitutes a refusal to submit to an alcohol test and the attendant consequences;

(9) The consequences for drivers found to have violated subpart B of this part, including the requirement that the driver be removed immediately from safety-sensitive functions, and the procedures under § 382.605; and

(10) The consequences for drivers found to have an alcohol concentration of 0.02 or greater but less than 0.04.

(c) *Optional provision.* The materials supplied to drivers may also include information on additional motor carrier policies with respect to the use or possession of alcohol, including any consequences for a driver found to have a specified alcohol level, that are based on the motor carrier's authority independent of this part. Any such additional policies or consequences must be clearly and obviously described as being based on independent authority.

§ 382.603 Training for supervisors.

Each motor carrier shall ensure that persons designated to determine whether reasonable suspicion exists to require a driver to undergo alcohol testing under § 382.307 receive at least 60 minutes of training on the physical, behavioral, speech, and performance indicators of probable alcohol misuse.

§ 382.605 Referral, evaluation, and treatment.

(a) Each driver who has engaged in conduct prohibited by subpart B of this part shall be advised by the motor carrier of the resources available to the driver in evaluating and resolving problems associated with the misuse of alcohol, including the names, addresses, and telephone numbers of substance abuse professionals and counselling and treatment programs.

(b) Each driver who engages in conduct prohibited under subpart B of this part shall be evaluated by a substance abuse professional who shall determine what assistance, if any, the employee needs in resolving problems associated with alcohol misuse.

(c)(1) Before a driver returns to duty requiring the performance of a safety-sensitive function after engaging in conduct prohibited by subpart B of this part, the driver shall undergo a return to duty alcohol test with a result indicating an alcohol concentration of less than 0.02.

(2) In addition, each driver identified as needing assistance in resolving problems associated with alcohol misuse —

(i) Shall be evaluated by a substance abuse professional to determine that the driver has properly followed the rehabilitation program prescribed under paragraph (b) of this section, and

(ii) Shall be subject to unannounced follow-up alcohol tests administered by the motor carrier following the driver's return to duty. The number and frequency of such follow-up testing shall be determined by a substance abuse professional, but shall consist of at least six tests in the first 12 months following the driver's return to duty. Follow-up testing shall not exceed 60 months from the date of the driver's return to duty. The substance abuse professional may terminate the requirement for follow-up testing at any time after the first six tests have been administered, if the substance abuse professional determines that such testing is no longer necessary.

(d) Evaluation and rehabilitation may be provided by the motor carrier, by a substance abuse professional under contract with the motor carrier, or by a substance abuse professional not affiliated with the motor carrier. The choice of substance abuse professional and assignment of costs shall be made in accordance with motor carrier/driver agreements and motor carrier policies.

(e) The requirements of this section with respect to referral, evaluation and rehabilitation do not apply to applicants who refuse to submit to a pre-employment/pre-duty alcohol test or who have a pre-employment/pre-duty alcohol test with a result indicating an alcohol concentration of 0.04 or greater.

PART 383—COMMERCIAL DRIVER'S LICENSE STANDARDS; REQUIREMENTS AND PENALTIES

5. The authority citation for part 383 continues to read as follows:

Authority: Title XII of Pub. L. 99–570, 100 Stat. 3207–170; 49 U.S.C. 3102; 49 U.S.C. App. 2505; 49 CFR 1.48.

6. Section 383.5 is amended by revising the definition of *serious traffic violation* to read as follows.

§ 383.5 Definitions.

* * * * *

Serious traffic violation means conviction, when operating a commercial motor vehicle, of:

(1) Excessive speeding, involving any single offense for any speed of 15 miles per hour or more above the posted speed limit;

(2) Reckless driving, as defined by State or local law or regulation, including but not limited to offenses of driving a commercial motor vehicle in willful or wanton disregard for the safety of persons or property;

(3) Improper or erratic traffic lane changes;

(4) Following the vehicle ahead too closely;

(5) Testing under Part 382 which results in:

(i) A verified positive controlled substances test, *Option 1* (ii) An alcohol concentration of 0.04 or greater, *Option 2* (ii) An alcohol concentration of 0.02 or greater; or

(6) A violation, arising in connection with a fatal accident, of State or local law relating to motor vehicle traffic control (other than a parking violation). (Serious traffic violations exclude vehicle weight and defect violations.)

* * * * *

7. Section 383.72 is revised to read as follows:

§ 383.72 Implied consent to alcohol testing.

Any person who holds a CDL shall be deemed to have consented to such testing as is required of him/her by any State or jurisdiction in the enforcement of part 382 of this chapter, § 383.51(b)(2)(i) and § 392.5(a)(2). Consent is implied by driving a commercial motor vehicle.

PART 392—DRIVING OF MOTOR VEHICLES

8. The authority citation for part 392 continues to read as follows:

Authority: 49 App. U.S.C. App. 2505; 49 U.S.C. 3102; 49 CFR 1.48.

9. Section 392.5 is amended by revising the title of the section, paragraphs (a) and (b)(2) to read as follows:

§ 392.5 Alcohol prohibition.

(a) No driver shall—

(1) Use alcohol or be under the influence of alcohol, within 4 hours before going on duty or operating, or having physical control of, a commercial motor vehicle; or

(2) Use alcohol, be under the influence of alcohol, or have any measured alcohol concentration or detected presence of alcohol, while on duty, or operating, or in physical control of a commercial motor vehicle; or

(3) Be on duty or operate a commercial motor vehicle while the driver possesses an alcoholic beverage. However, this does not apply to possession of alcohol which is manifested and transported as part of a shipment.

(b) * * *

(2) Be on duty or operate a commercial motor vehicle if, by the driver's general appearance or conduct or by other substantiating evidence, the driver appears to have used alcohol within the preceding four hours.

* * * * *

PART 395—HOURS OF SERVICE OF DRIVERS

10. The authority citation for part 395 continues to read as follows:

Authority: 49 U.S.C. 3102; 49 U.S.C. App. 2505; and 49 CFR 1.48.

11. Section 395.2 is amended by adding a new paragraph (10) to the definition of *On-Duty time* to read as follows:

§ 395.2 Definitions.

* * * * *

On-Duty Time

* * * * *

(10) All time providing a breath or urine sample in order to comply with random, reasonable suspicion, post-accident or follow-up testing required by part 382 of this chapter when directed by a motor carrier.

* * * * *

[FR Doc. 92-29678 Filed 12-10-92; 10:00 am]

BILLING CODE 4910-62-M

Federal Highway Administration

49 CFR Part 382

[FHWA Docket No. MC-93-3]

RIN 2125-AD11

Controlled Substances and Alcohol Use and Testing; Foreign-Based Motor Carriers and Drivers

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Advance notice of proposed rulemaking (ANPRM).

SUMMARY: The FHWA is requesting comments on the applicability of alcohol and controlled substances testing requirements for foreign-based drivers of motor carriers under the Omnibus Transportation Employee Testing Act of 1991. This action is taken in conjunction with the notices of proposed rulemakings published elsewhere in today's **Federal Register** on alcohol and controlled substances testing and involves current FHWA regulations requiring controlled substances testing.

The overall goal of alcohol and controlled substances testing is to ensure that drivers who misuse alcohol and/or controlled substances do not operate a commercial motor vehicle, thereby reducing accidents, injuries and fatalities on highways nationwide.

DATES: Written, signed comments must be received on or before February 16, 1993.

ADDRESSES: Submit written, signed comments to FHWA Docket No. MC-93-3, room 4232, Office of the Chief Counsel, 400 Seventh Street, SW., Washington, DC 20590. All comments received will be available for examination at the above address from 8:30 a.m. to 3:30 p.m., e.t., Monday through Friday, except Federal legal holidays.

FOR FURTHER INFORMATION CONTACT: Mr. David Miller, Office of Motor Carrier Standards, (202) 366-2981, or Mr. David Sett, Office of the Chief Counsel, (202) 366-0834, Federal Highway Administration, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except legal Federal holidays.

The public is urged to obtain information through the Department of Transportation's Anti-Drug Information Center (ADIC) system. The public may access the system by dialing (800) 225-3784 using a touch tone telephone. Access to a computer system may also be made using a personal computer connected via modem on (800) 225-3804. A user fee will be charged for certain services provided by the system.

SUPPLEMENTARY INFORMATION:

I. Background

On November 21, 1988, the FHWA, along with certain other agencies of the Department of Transportation (the Department), adopted regulations requiring pre-employment/use, periodic, post-accident, reasonable cause and random drug testing of commercial motor vehicle drivers of motor carriers. On its face, the FHWA rule applies to all covered drivers while operating in the United States, regardless of whether they are based in a foreign country or the United States The rule provided, however, that it would not apply to any person for whom compliance would violate the domestic laws or policies of another country. The rule as originally published further provided that in any event it would not be effective until January 1, 1990, with respect to any person for whom a foreign government contends that application of the rules raises questions of compatibility with that country's laws or policies. See 53 FR 47134.

On September 27, 1989, the FHWA delayed the effective date of drug testing requirements for foreign-based employees of foreign-based motor carriers to January 1, 1991. See 54 FR 39546.

In a December 27, 1989, revision to the drug testing rule, the effective date was again delayed, until January 2, 1992, with respect to any foreign-based employee of a foreign-domiciled carrier. See 54 FR 53294. Further delays were published on April 24, 1991 (56 FR 18994), and July 14, 1992 (57 FR 31277), currently making the rule applicable to foreign-based employees of foreign-domiciled carriers on January 2, 1995. This date is also applicable to persons covered by similar rules issued by other DOT agencies.

The Department and other elements of the U.S. Government have entered into discussions with foreign governments to attempt to resolve any conflict between our current drug rules and foreign government laws or policies. The FHWA has allowed additional time to permit the Department to try to achieve our goal of a drug-free transportation system while respecting the national sovereignty of other countries. Drug testing is a part of the FHWA's continuing multilateral discussions with Canada and Mexico aimed at making the regulations governing commercial motor vehicle operations compatible in those countries.

Meanwhile, as mandated by the Omnibus Transportation Employee Testing Act of 1991, the FHWA has published elsewhere in today's **Federal Register** separate NPRM's on controlled substances and alcohol misuse. Omnibus Transportation Employee Testing Act of 1991, Public Law 102-143, title V, sec. 5, 105 Stat. 917 (the Act). The new rules would replace the current drug testing rule and would institute alcohol testing. In recognition of the ongoing discussions on foreign applicability, and to avoid the possibility of making numerous delaying revisions such as were necessitated with the current drug rule, the proposed rules expressly exclude foreign-based drivers and motor carriers. The issue is being considered instead in this advance notice of proposed rulemaking, and may ultimately be incorporated in the final rules on

controlled substances and alcohol misuse.

II. The Department's and FHWA's Legal Authority for Foreign Employer Testing Programs

The Act provides for coverage by the Department's drug and alcohol testing rules of activities in the U. S. of foreign employers. The relevant provisions of the Act for the aviation industry provide that FAA regulations shall establish a program which requires air carriers *and foreign air carriers* to conduct pre-employment, reasonable suspicion, random, and post accident testing for use, in violation of law or Federal regulation, of alcohol or a controlled substance. (Sec. 3 of the Act, amending sec. 614(a)(1) of the Federal Aviation Act (emphasis added)). Further, the Act provides that in prescribing regulations under this section, the FAA Administrator shall only establish requirements applicable to foreign air carriers that are consistent with the international obligations of the United States, and the Administrator shall take into consideration any applicable laws and regulations of foreign countries. (Sec. 3 of the Act, amending sec. 614(e)(3) of the Federal Aviation Act.) The portion of the Act affecting the railroad industry contains similar language that provides that FRA regulations shall establish a program which requires *railroads* to conduct pre-employment, reasonable suspicion, random, and post-accident testing of all railroad employees responsible for safety sensitive functions for use, in violation of law or Federal regulation, of alcohol or a controlled substance. (Sec. 4 of the Act, amending sec. 202(r)(1) of the Federal Railroad Safety Act of 1970 (emphasis added).) In carrying out the provisions of this subsection, the Secretary shall only establish requirements that are consistent with the international obligations of the United States, and the Secretary shall take into consideration any applicable laws and regulations of foreign countries. (Sec. 4 of the Act, amending § 202(r)(1) of the Federal Railroad Safety Act of 1970.) The portion of the Act affecting the motor carrier industry also includes language of this kind that provides that FHWA regulations shall establish a program which requires *motor carriers* to conduct pre-employment, reasonable suspicion, random, and post-accident testing of the operators of commercial motor vehicles for use, in violation of law of Federal regulation, of alcohol or a controlled substance. (Sec. 5(a)(1) of the Act, creating sec. 12020(a) of the Commercial Motor Vehicle Safety Act of 1986 (emphasis added).) In issuing regulations under this section, the Secretary shall only establish requirements that are consistent with the international obligations of the United States, and the Secretary shall take into consideration any applicable laws and regulations of foreign countries. (Sec. 5(a)(1) of the Act, creating sec. 12020(e)(3) of the Commercial Motor Vehicle Safety Act of 1986.) There are no similar provisions applicable to the transit industry, since the Federal Transit Administration drug and alcohol testing provisions do not cover foreign employers.

Under these similar provisions, FAA, FRA and FHWA have the authority and obligation to require drug and alcohol tests for safety sensitive employees of foreign employers. The FAA provisions specifically extend coverage to "foreign air carriers," and the FHWA and FRA provisions cover "motor carriers" and "railroads," respectively, which definitions include employers based in this country or in a foreign country. Moreover, the legal authority extends to all kinds of testing required by the Act: reasonable suspicion, post-accident, pre-employment, and random (subject to U.S. international obligations).

It is the Department's and the FHWA's policy to carry out the Act's requirements using a territorial jurisdiction approach. That is, the Department interprets its statutory authority and obligation for drug and alcohol testing to apply to foreign employers who conduct operations in the United States, with respect to those operations. This does not mean that all operations of such a transportation employer would be subject to the rules. For example, a foreign employer's operations within its own country would not be subject to these rules. Following the same policy, only those employees of a foreign transportation employer who perform safety-sensitive functions in operations within the U.S. would be subject to testing.

For each of the three industries involved, the Act requires the Department and the FHWA to act consistent with the international obligations of the U.S., and to take foreign countries' laws and regulations into account. (This could be relevant, for example, to the conduct of testing in some foreign countries.) The Department and the FHWA are sensitive to the concerns of foreign countries. We are also very much aware of a number of practical considerations that may arise as we implement the Act with respect to foreign employers. For these reasons, as well as to foster consistency in the implementation of very similar statutory provisions, the FRA, FHWA, and FAA are issuing advance notices of proposed rulemaking (ANPRMs) rather than notices of proposed rulemaking (NPRMs). We are seeking the public's views on a variety of issues and questions that may arise with respect to drug and alcohol testing by foreign employers.

III. General Problems and Issues

The following problems, questions, and issues appear to arise in the aviation, railroad, and motor carrier contexts. In responding to these questions and requests for comment, we ask that commenters distinguish responses relating to alcohol testing from those relating to drug testing, where the same response is not appropriate for both.

1. International Treaties and Foreign Laws

We seek information on any bilateral or multilateral treaty obligations of the U.S., or principles of international law, that may affect our implementation of the Act. If there are any international agreements under development that would affect drug and alcohol testing of foreign employers, we also seek information on them. In commenting on international obligations of the U.S., we request that commenters focus on any provisions that affect the ability of the United States to test employees conducting operations in the U.S., with the testing to take place in the United States.

In addition to international obligations, we seek comment on any laws or regulations of foreign countries that we should take into account in implementing the Act. We would like to obtain information on any laws or rules of specific foreign countries whose employers conduct U.S. operations that we should consider.

2. Pre-employment and Follow-Up Testing

Often, employees of foreign transportation employers are recruited and hired in the foreign country involved. For example, a Canadian employer may hire Canadian nationals in Canada, some of whom will subsequently conduct operations in the United States. The employer may not know, at the time of hire, which of its employees will operate in the U.S. In such a situation, should the employer be required to conduct pre-employment testing? If so, how, when and where would the foreign employer conduct pre-employment testing of the employees who were to operate in the U.S.?

Should all pre-employment testing be conducted in the U.S., or should the rules permit the employer to conduct tests in its own country? Where the employer could not, because of legal restraints on testing in its own country, conduct testing there, could the testing be arranged in the United States? For example, should the employer send the employee to a point in the United States for a test before the employee actually conducts an operation in this country? Should pre-employment testing be required at all in such a situation?

If an employee tests positive on any type of alcohol or drug test, the Department's existing and proposed rules require a return-to-duty test and follow-up tests, over a period of time. For an employee whose domicile, station, terminal, or reporting point, as applicable, is in a foreign country, and who comes into the U.S. occasionally, questions similar to those mentioned above for pre-employment testing may arise. If the employer does not conduct the tests in its own country, how does the employer arrange for the required tests to take place in the U.S.?

3. Random Testing

Should all of a foreign employer's covered employees who operate in the U.S. at any time have to be part of the random testing pool? How would foreign employers arrange for the unannounced, random testing of their employees in U.S. territory? In their own countries? Also, to meet random testing rate requirements, employers have to conduct a certain number of tests per year (e.g., under a 50 percent random testing rate, a number of tests each year equivalent to half the number of the employees in the random pool). Would it be practical for employers to meet this requirement, while maintaining randomness, if tests are conducted only in the U.S.? Are there circumstances in which foreign employers should not be subject to a random testing requirement?

4. Requirement for All Types of Tests

Should the Department refrain from requiring foreign employers to conduct certain kinds of tests? The Department anticipates little problem with requiring a post-accident or reasonable suspicion test in the U.S., following an accident or basis for reasonable suspicion that occurred in this country. However, as discussed above, there may be greater problems with other forms of testing. Is it desirable to exclude foreign employers from some or all types of alcohol or drug testing? Why or why not? Should the legal authority of the employer to conduct a certain kind of testing in its own country be considered in deciding whether to exclude employers in a certain country from a requirement? If some exclusions are desirable, how can this objective be reconciled with the testing requirements of the Act?

5. Other Compliance Activities

DOT drug and alcohol rules have a variety of other program requirements in addition to testing. These requirements pertain to employee assistance and training programs, substance abuse professionals, record retention and reporting, and many other subjects. Some of these activities or functions might well take place most conveniently in the foreign employer's country. Should some or all of the foreign employer's program activities be required or permitted to take place outside the U.S.? How would the Department monitor or enforce compliance with drug or alcohol program activities that take place outside the U.S.? How and where would Departmental personnel obtain access to information about the employers' implementation of program and testing requirements?

6. Testing Procedures

49 CFR part 40 governs testing under the DOT drug and alcohol testing rules of the three operating administrations involved (except for FRA post-accident testing). Part 40 compliance could raise a number of problems if any testing or collection is performed abroad. Some of these issues may apply even with respect to testing by foreign employers that occurs in the U.S. Some examples follow.

Drug testing under part 40 includes testing specimens at National Institute on Drug Abuse (NIDA)-certified laboratories, all of which are in the U.S. If specimen collection for drug testing is done outside the U.S., specimens would probably be sent to these laboratories for analysis. What practical problems does this create (e.g., timeliness of transmission of specimens and associated paperwork), and how could they be solved? If drug specimen collection or alcohol testing is permitted to be conducted outside the U.S., what language or training problems would need to be overcome, and what is the best way of dealing with these problems (e.g., translations of DOT requirements or forms)? In drug testing, there is a requirement for medical review officers (MROs) to verify positive tests and perform other functions. Should MROs (who, under current rules, must be physicians licensed in the U.S.) have to perform these functions, or should physicians licensed in the foreign countries involved be able to participate as well? The same question can be asked for substance abuse professionals who would evaluate people who test positive for alcohol and drugs. If personnel licensed in the U.S. were required for this function, would this create difficult logistical problems for the program? Would there be problems in obtaining or using evidential breath testing devices (EBTs) on the National Highway Traffic Safety Administration's Conforming Products List (which part 40 requires for alcohol testing) in other countries, if testing is permitted to be conducted outside the U.S.?

Should there be a method of accepting a foreign country's testing procedures in lieu of some or all of part 40 procedures, if testing is permitted to be conducted in foreign countries? The Department seeks comment on any other part 40-related problems that may occur in the context of testing of foreign operators.

7. Consequences of Positive Tests

The consequence of a "positive" test is removal from a safety-sensitive position, until the employee follows the rule's procedures for reinstatement in the safety sensitive position. However, the application of the DOT drug and alcohol testing rules to foreign employers is intended only to affect U.S. operations. Consequently, the Department would not assert jurisdiction to require that an employee of a foreign employer who tested positive not perform safety-sensitive functions in operations outside the United States. However, such an employee would be prohibited from conducting any safety-sensitive functions in the U.S., until the employee follows the rule's procedures for reinstatement in the safety sensitive position. How would foreign employers make sure that an employee who tested positive did not engage in operations in the U.S., until reinstatement requirements had been met? How would the Department monitor compliance with this requirement?

8. Costs

What is the number of employees who would be affected by a requirement to test persons performing safety-sensitive functions in the U.S. for foreign employers? Do commenters anticipate that foreign operators' positive test rates (which can affect costs significantly) be higher, lower, or about the same as the positive test rates of U.S. employers for the employees who would be subject to these rules? Are there costs unique to drug and alcohol program activities that may occur outside the U.S. that the

Department should consider in estimating the costs of the rule? Are there any positive or negative trade or competitive effects of testing (or not testing) employees of foreign employers, for either U.S. or foreign companies?

IV. Rulemaking Analyses and Notices

The FHWA requests comments on whether to require foreign-based employees of foreign-domiciled motor carriers to be tested for the use of controlled substances and alcohol. The FHWA believes there is good cause to promulgate an amendment with advance notice and opportunity to comment. The FHWA has prepared a regulatory evaluation for FHWA Docket Nos. MC–92–19 and MC–92–23 in which the FHWA figured the cost of testing foreign operators of commercial motor vehicles. Those evaluations, although not specifically broken apart for foreign based drivers, does include this group of drivers and should be referred to for costs associated with this rulemaking. The FHWA does not have any knowledge about how many foreign based drivers would be subject to this rulemaking.

Executive Order 12291 (Federal Regulation) and DOT Regulatory Policies and Procedures

The FHWA has determined that this document does not contain a major rule under Executive Order 12291. However, the FHWA considers this document to be significant because of public interest in the drug and alcohol testing programs and the international impact of this document.

Regulatory Flexibility Act

In compliance with the Regulatory Flexibility Act (5 U.S.C. 601–612), the FHWA has evaluated the effects of this rule on small entities, however the FHWA does not believe that we can make a full assessment of whether this rulemaking will have an adverse economic impact on small entities at this time. The FHWA does not know how many small entities would be subject to this action. It should be noted, however, the Omnibus Act mandates alcohol and controlled substances testing irrespective of the size of the entities.

For these reasons, the FHWA cannot certify that this action will or will not have a significant economic impact on a substantial number of small entities.

Executive Order 12612 (Federalism Assessment)

This action has not been analyzed in accordance with the principles and criteria contained in Executive Order 12612. The FHWA requests comments on whether this rule will have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Executive Order 12372 (Intergovernmental Review)

Catalog of Federal Domestic Assistance Program Number 20.217, Motor Carrier Safety. The regulations implementing Executive Order 12372 regarding intergovernmental consultation of Federal programs and activities apply to this program.

Paperwork Reduction Act

The FHWA has not determined the impact this rulemaking would have on the collection of information requirements for purposes of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501–3520.

National Environmental Policy Act

The agency has analyzed this action for the purpose of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) and has determined that this action would not have any effect on the quality of the environment.

Regulation Identification Number

A regulation identification number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

List of Subjects in 49 CFR Part 382

Controlled substances testing, Alcohol testing, Highway safety, Highways and roads, Motor carriers, Motor vehicle safety.

Authority: 23 U.S.C. 315; 23 CFR 1.48.

Issued on: December 2, 1992.

BILLING CODE 4910–22–M

49 CFR Part 391

[FHWA Docket No. MC–93–2]

RIN 2125–AC81

Qualifications of Drivers; Controlled Substances Testing; Recordkeeping and Reporting Requirements

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The FHWA is proposing to amend its controlled substances testing requirements. This proposal revises the recordkeeping and reporting requirements to be consistent with an NPRM also being published in today's **Federal Register** by the Department of Transportation, Office of the Secretary, regarding the collection and reporting of drug testing data and would implement the proposed DOT system. Together, the two NPRM's would require motor carriers subject to the drug testing requirements to maintain specific information and report annually to the FHWA, if requested to do so, certain information about their drug testing programs. A representative sample of motor carriers would be randomly selected to submit the data. The random selection would generate sufficient data to produce statistically valid results. The FHWA would use the data to analyze its current approach to deter and detect illegal drug use within the motor carrier industry and, as appropriate, plan a more efficient and effective means to attain program goals.

DATES: Written, signed comments on these proposals must be received on or before April 14, 1993.

ADDRESSES: Submit written, signed comments to FHWA Docket No. MC–93–2, room 4232, HCC–10, Office of the Chief Counsel, Federal Highway Administration, 400 Seventh Street, SW., Washington, DC 20590. All comments received will be available for examination at the above address from 8:30 a.m. to 3:30 p.m., e.t., Monday through Friday, except legal Federal holidays. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: *For information regarding program issues:* Mr. David Miller, Office of Motor Carrier Standards, (202) 366–2981, Federal Highway Administration, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590. *For information regarding legal issues:* Mr. David Sett, Office of Chief Counsel, (202) 366–0834, Federal Highway Administration, Department of

Transportation, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except legal Federal holidays.

SUPPLEMENTARY INFORMATION:

Background

The FHWA published in the **Federal Register** a final rule on November 21, 1988, setting forth regulations to require motor carriers who operate commercial motor vehicles in interstate commerce to have an anti-drug program, including testing of commercial motor vehicle drivers for the use of controlled substances (53 FR 47134). Testing under this rule must be conducted prior to employment/use, periodically, upon reasonable cause, after certain reportable accidents, and randomly. Generally, interstate drivers of commercial motor vehicles with gross vehicle weight ratings (GVWR) of more than 26,000 pounds, vehicles transporting hazardous materials which are required to be placarded, or vehicles designed to transport more than 15 passengers, including the driver, are subject to this rule.

On the same date, November 21, 1988, the U.S. Department of Transportation, Office of the Secretary (Department), published an interim final rule, "Procedures for Transportation Workplace Drug Testing Programs" (53 FR 47002). On December 1, 1989, the Department published a final rule amending certain portions of the November 21, 1988, interim final rule. (54 FR 49854).

On November 6, 1989, the FHWA published a final rule clarifying the types of testing that must be implemented by December 21, 1989 (54 FR 46616). This **Federal Register** publication also deferred implementation of the random and mandatory post-accident testing requirements pending resolution of a lawsuit in which a preliminary injunction was imposed on such tests.

On February 1, 1990, the FHWA published an interim final rule (55 FR 3546) amending the requirements for pre-employment/pre-use and post accident testing. This interim final rule also included interpretations and clarifications of the November 21, 1988, final rule.

On April 26, 1991, the Ninth Circuit Court of Appeals upheld the FHWA drug testing regulations in their entirety *International Brotherhood of Teamsters, Chauffeurs, et al.* v. *Department of Transportation*, 932 F.2d 1292 (9th Cir. 1991). The FHWA published a final rule on August 16, 1991, providing an implementation schedule for random and mandatory post-accident testing. (56 FR 40806).

Proposed Recordkeeping and Reporting Requirements

Section 391.87, Notification of test results and recordkeeping, requires motor carries to maintain:

(1) All records related to the administration and results of the drug testing program;

(2) Certain information in the driver's qualification file; and

(3) Certain summary information on a calendar year basis.

In addition, § 391.87 prescribes procedures for the communication of drug test results among the medical review officer (MRO), the driver, the motor carrier and others once the results have been received by the MRO from the testing laboratory.

In the course of administering the anti-drug rule, the FHWA has received numerous inquiries regarding the clarification of these procedures. Interested individuals have generally expressed their concern about the paperwork burden associated with the controlled substances testing regulations. The following discussion should clarify most of the concerns that have been voiced.

The FHWA controlled substances testing requirements, and by reference the Department's rule, established minimum paperwork requirements. The documentation is needed to minimize the improper identification of urine specimens, ensure that the correct information is transmitted to the proper individuals and ensure compliance with the requirements. The custody and control form (see 49 CFR part 40, appendix A) provides for positive tracking of the identification of the urine specimen from the point of collection, through the laboratory performing the analysis, to the MRO. The collection site personnel are required to send a copy of the form to the motor carrier. The MRO receives two copies (one from the collection site personnel and one from the laboratory with the test results). In those cases where the result is positive, the MRO verifies or reverses laboratory results through contact with the donor and then transmits his/her findings to the motor carrier. The motor carrier is required to maintain the information it receives from the MRO in the driver's qualification file and maintain an annual summary of that and other information. The Department's proposed § 40.41, Reporting and review of results, would establish a standard DOT-wide Management Information System (MIS) and require that such standardized annual reports be submitted as specified by the appropriate Operating Administration (OA). With regard to controlled substances testing within the motor carrier industry, the FHWA is the appropriate OA. The following proposal is in concert with the Department's NPRM.

The FHWA proposes to revise 49 CFR 391.87(h) to require motor carriers to maintain the following information on an annual (calendar year) basis for drug testing:

1. Number of drivers by employee category. This data is necessary to assess the scope of the rule's application and provide a basis for determining if random testing meets the required 50 percent level.

2. Number of drivers subject to testing under the anti-drug rules of more than one DOT Agency, identified by each agency. This data is necessary to review multi-modal implementation so that policy can be designed accordingly.

3. Number of specimens collected by type of test (e.g., pre-employment, periodic, random, etc.) and employee category. This data is needed to check compliance with the rules by category and to review collection, testing and the review process.

4. Number of positives verified by a Medical Review Officer (MRO) by type of test, type of drug and employee category. This data, along with the number of tests performed, permits the calculation of positive rates necessary to determine the extent and type of drug use. Further, analysis of this data over time will provide a measure of the effectiveness of the drug testing rules in deterring drug use.

5. Number of negatives verified by a MRO by type of test, and employee category. This data is needed to check compliance with the rules and to review the application of the components of the program.

6. Number of persons denied a position as a driver following a verified positive controlled substances test. This data provides an assessment of whether the testing program is being implemented as required, provides a measure of the impact of the drug testing rules on the motor carrier industry, and yields information on the prevalence of drug use in the applicant pool.

7. Number of drivers verified positive by a MRO, who were returned to duty in driving positions during the reporting period. This data provides information on employer policy implementation regarding reentry requirements and rehabilitation of identified drug users.

8. Number of drivers with tests verified positive by a MRO for multiple drugs. This data provides information on the extent of multiple drug use within the motor carrier industry.

9. Number of drivers who refused to submit to a controlled substances test required under this part, and the action taken in response to the refusal(s). This data provides information on employer policy implementation regarding refusals and subsequent employer actions.

10. Number of drivers and supervisors who have received required training during the reporting period. This data provides information on training provided during the current reporting period and a cumulative count of drivers and supervisory personnel on the payroll as of each December 31 who receive the required drug training.

Section 391.87 currently requires motor carriers to maintain much of the same information contained in this proposal. In complying with the proposed rule, motor carriers or their MROs would not be required to perform any computations more complex than simple arithmetic. The information the FHWA is proposing motor carriers to develop, retain, and possibly submit is available to motor carriers from their respective laboratories, MROs and their own personnel files.

The FHWA proposes, in another NPRM published in today's **Federal Register**, to include alcohol testing to the MIS requirements. The FHWA is proposing the alcohol testing form in this document as well. Motor carriers would be required to maintain the following information on an annual (calendar year) basis for alcohol testing:

1. Number of covered employees by employee category. This data is necessary to assess the scope of the rule's application and provide a basis for determining if random testing meets the required (10 to 50 percent) level.

2. Number of covered employees subject to testing under the alcohol misuse rule of another DOT agency, identified by each agency. This data is necessary to review multi-modal implementation so that policy can be designed accordingly.

3. (i) Number of initial tests by type of test and employee category. (ii) Number of confirmatory tests, by type of test and employee category. This data is needed to check the compliance with the rules by category and to review collection and testing process.

4. Number of confirmatory alcohol tests indicating an alcohol concentration of .04 or greater, by type of test and employee category. This data is needed to check the compliance with the rules by category and to review collection and testing process.

5. Number of confirmatory alcohol tests indicating an alcohol concentration of .02 or greater but less than .04. This data is needed to check the compliance with the rules by category and to review collection and testing process.

6. Number of persons denied a position as a covered employee following a preemployment/pre-duty alcohol test indicating an alcohol concentration of .04 or greater. This data provides an assessment of whether the testing program is being implemented as required, provides a measure of the impact of the drug testing rules on the industries, and yields information on the prevalence of drug use in the applicant pool.

7. Number of covered employees with a confirmatory alcohol test indicating an alcohol concentration of .04 or greater who were returned to duty in covered positions (having complied with the recommendations of a substance abuse professional as described in DOT agency regulations). This data provides information on policy implementation regarding reentry requirements and rehabilitation of identified alcohol misusers.

8. Number of covered employees who were administered alcohol and drug tests at the same time, with both a positive and drug test result and an alcohol test result indicating an alcohol concentration of .04 or greater. This data provides information on the extent of multiple drug and alcohol use in the regulated industries.

9. Number of covered employees who were found to have violated other provisions of DOT agency regulations, and the action taken in response to the violation. This data provides information on whether drivers that are also pilots, pipeline inspectors, maintenance of way inspectors, etc. have had prior violations of similar regulations and the outcome of each violation.

10. Number of covered employees who refused to submit to an alcohol test required under this part, and the actions taken in response to the refusal. This data provides information on employer policy implementation regarding refusals and subsequent employer actions.

11. Number of supervisors who have received training during the reporting period in determining the existence of reasonable suspicion of alcohol misuse. This data provides information on training provided during the current reporting period and a cumulative count of covered employees and supervisory personnel on payroll as of December 31 who have received the required alcohol training.

The Department is proposing a standard format for use by motor carriers and other regulated entities for submission of the data. The FHWA believes that such forms will facilitate recordkeeping and data submission. Copies of the forms are included as an appendix to this NPRM and would be included as appendix H to 49 CFR chapter III, subchapter B. Included with the forms in the appendix are descriptions of each data element and instructions for submitting the required information. Commenters should review the appendix for a complete description of each data element.

The FHWA anticipates that motor carriers will be using third parties such as consortia, driver leasing companies, other motor carriers, unions, to perform much of the drug testing required under this rule. Also, a significant number of drivers will be used by motor carriers availing themselves of the exception to the pre-employment/use drug test provided in the current rule. Regardless, it should be noted that the motor carrier is still responsible for ensuring that a driver has been tested and the results of the test are included in the driver's qualification file as required by 49 CFR part 391, subpart H. Suppose a driver was a member of a consortium while working for two interstate motor carriers and both motor carriers were satisfied that the consortium was performing its work in accordance with the requirements of the controlled substances testing regulations (49 CFR part 391, subpart H and 49 CFR part 40). Both motor carriers would still be responsible for ensuring that required tests were performed and the results were retained by each motor carrier. The fact that a motor carrier does not perform the actual testing would not relieve the motor carrier of the responsibility to retain the information as specified in the rule.

Motor carriers who have chosen to use third parties to perform the drug testing requirements would also be responsible for submission of the information when requested. Information submitted by a third party on behalf of a motor carrier would have to clearly identify that the data being submitted is attributable to the specific motor carrier.

For those employers with some employees subject to the controlled substances and alcohol testing requirements of one DOT OA, and some employees subject to the requirements of another OA, a separate report must be retained for each OA. Each report must

include information pertinent only to that OA's requirements.

In those cases where an employee would be subject to the controlled substances and alcohol testing requirements of two or more DOT OA's, the results of each test performed would be attributed, for MIS purposes, to only one of the OAs' drug or alcohol testing rules, as determined by the motor carrier. For example, an employee drives a commercial motor vehicle for an employer which services pipelines, and is subject to requirements of both the FHWA and the Research and Special Programs Administration (RSPA). The employer must choose under which OA's reporting rules the employee will be covered. All employees with the same functions must be covered under the same OA's rules. If the employer chooses to cover the employee in the report required by RSPA, it should not include the employee in an FHWA report. The employer must note, however, in the RSPA report, the dual coverage with FHWA.

It is important to remember that the foregoing reporting requirements apply to MIS only. The results of all CMV drivers would still have to be retained in the driver's qualification file for purposes of complying with the FHWA drug testing rule, even where the information is reported to RSPA and not to FHWA.

However, for post-accident tests, the results would have to be submitted to the OA whose rules govern the required test regardless to which OA the employer decided to submit the MIS data for that employee. In the above example, if a pipeline company driver has a commercial motor vehicle accident which triggers a post-accident test solely under the FHWA's rules, in other words while driving the commercial motor vehicle, the result of this post-accident test must be reported, under the MIS, to the FHWA regardless of whether the employer chose to report the other tests to RSPA. In the different case of a test being performed because two or more OAs' rules require the test, the motor carrier would have to decide to which agency to report. In all circumstances, the MIS reporting requirements proposed in this NPRM would not relieve the motor carrier of reporting the accident to the FHWA, including the results of a post-accident test, as required by § 394.9(b) of the Federal Motor Carrier Safety Regulations (FMCSRs).

Note: The FHWA has published an NPRM which would remove the accident reporting requirements of 49 CFR part 394. (57 FR 33712)

The FHWA is also proposing that the summary information be compiled by the motor carrier and, if requested to do so, submitted to the FHWA by February 15 of the following year (e.g., 1992 data would be compiled no later than February 15, 1993). Motor carriers would not be required to submit the information to the FHWA unless requested to do so. Because of the immense size of the motor carrier industry (over 250,000 identified interstate motor carriers), the FHWA intends to randomly select motor carriers using the statistical sampling method Sampling with Replacement and would require these selected motor carriers to submit the required information to the FHWA.

The FHWA maintains a database of all known interstate motor carriers. The FHWA proposes to perform the following random selection based on nine random selection pools with one pool for each FHWA region. The FHWA proposes to assign a random number, which will be generated by a statistical computer program, to each active motor carrier on the database. The computer program will sort the motor carriers, in ascending or descending order, by the random number assigned to each carrier. The FHWA will then select a certain percentage each year, between two and ten percent, of those carriers subject to 49 CFR part 391, subpart H to be notified that a report must be submitted by the deadline. For example, the FHWA determines that two percent of the motor carriers will be required to submit data in a given year. The active motor carrier population for FHWA Region 7 (Kansas, Nebraska, Iowa and Missouri) for a given hypothetical year is 50,000. The FHWA determines that the first 1,000 motor carriers (50,000 multiplied by 0.02 (two percent) equals 1,000) in ascending order on the compiled list of randomly-ordered motor carriers for the region will be requested to submit the required report to the FHWA. The FHWA has strongly encouraged motor carriers to use this method in their random selection of drivers for testing under § 391.109.

The FHWA will also continue to examine drug testing records as part of its on-site review activities. While the summary information to be required by the proposed § 391.87(h) would not need to be completed and submitted until February 15 of the following year, the FHWA will continue to review motor carriers' drug testing programs at any time during the year.

Records Regarding the Administration of Drug Testing Program

The FHWA has received numerous requests for clarification of what is meant in the current rule by the "records regarding the administration" of the motor carriers' drug testing program. In order to spell out this requirement, the FHWA proposes to amend § 391.87(h) to require the maintenance and retention of all agreements with collection facilities, laboratories, MROs, consortia, of names and positions of company officials and their roles in the motor carrier's drug testing program, of monthly laboratory summaries, and of recordkeeping and testing procedures, including random testing selection and notification procedures.

Elsewhere in today's **Federal Register** is the parallel "MIS" NPRM regarding 49 CFR part 40. The preamble to that NPRM contains many comments, discussions and questions that should be considered in reviewing this NPRM. Your comments on this NPRM should indicate that you are responding to questions or provisions in the generic NPRM under 49 CFR part 40 or to this specific FHWA NPRM.

Rulemaking Analyses and Notices

Regulatory Impact

The action taken by the FHWA in this document proposes to amend subpart H of part 391 of the FMCSRs and is consistent with an NPRM also being published in today's **Federal Register** by the Department of Transportation, Office of the Secretary, regarding the collection and reporting of drug and alcohol testing data. The Department's proposed rule amends 49 CFR part 40 by setting forth a system to measure the effectiveness of drug and alcohol testing programs of the various operating administrations. This NPRM by FHWA implements the DOT system. Together, the two NPRMs would require motor carriers subject to the drug testing requirements of 49 CFR part 391 and the drug and alcohol testing requirements proposed elsewhere in today's **Federal Register**, to maintain specific information and report annually to the FHWA, if requested to do so, certain information about their drug and alcohol testing programs. A representative sample of motor carriers would be randomly selected to submit the data. The random selection would generate sufficient data to produce statistically valid results. The FHWA would use the data to analyze its current approach to deterring and detecting illegal drug use within the motor carrier industry and, as appropriate, plan a

more efficient and effective means to attain program goals. Interstate motor carriers are currently required to maintain most of the information that would be reported. The regulatory impact, therefore, is considered to be minimal to interstate motor carriers. Separate regulatory impact analyses have been prepared for the drug and alcohol NPRMs, proposed elsewhere in today's **Federal Register**, and should be referred to for additional information. The information may be obtained in FHWA Docket Numbers MC–92–19 and MC–92–23, which is available for inspection in the FHWA Docket room, 400 Seventh Street, SW., Washington, DC.

Executive Order 12291 (Federal Regulation) and DOT Regulatory Policies and Procedures

The FHWA has determined that this document does not contain a major rule under Executive Order 12291, but is a significant regulation under the DOT regulatory policies and procedures because of substantial congressional and public interest in precluding the operation of a commercial motor vehicle by a driver who uses illegal drugs. The impacts of these proposed provisions addressed in this document have already been considered by the impact documentation prepared for the November 21, 1988, final rule. Any changes to the November 21, 1988, final rule resulting from this document would not appreciably affect the impact documentation initially prepared for FHWA Docket No. MC–116.

Such impact documentation contained in the November 21, 1988, final rule includes a Regulatory Impact Analysis which is available for inspection in the Headquarters Office of the FHWA, 400 Seventh Street, SW., Washington, DC.

Regulatory Flexibility Act

In compliance with the Regulatory Flexibility Act (Pub. L. 96–354), the agency has evaluated the effects of this rulemaking on small entities. It is anticipated that the impacts resulting from the proposed amendments contained in this document do not differ significantly from those already considered in the adoption of the November 21, 1988, final rule. Accordingly, under the criteria of the Regulatory Flexibility Act, the FHWA hereby certifies that the action contained in this document will not have a significant economic impact on a substantial number of small entities which is in addition to that imposed by the November 21, 1988, final rule.

Executive Order 12612 (Federalism Assessment)

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this proposed rule, if promulgated, would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment in addition to that already prepared for the November 21, 1988, final rule.

Executive Order 12372 (Intergovernmental Review)

Catalog of Federal Domestic Assistance Program Number 20.217, Motor Carrier Safety. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980 (Pub. L. 96–511), the reporting and recordkeeping provisions that are included in this proposed regulation are being submitted for approval to the Office of Management and Budget (OMB).

National Environmental Policy Act

The agency has analyzed this action for the purpose of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) and has determined that this action would not have any effect on the quality of the environment.

Regulatory Identification Number

A regulatory identification number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross-reference this action with the Unified Agenda.

List of Subjects in 49 CFR Part 391

Controlled substances, Highways and Roads, Highway safety, Motor carriers, Motor vehicle safety.

Issued on: December 2, 1992.

Andrew H. Card, Jr.,

Secretary of Transportation.

Thomas D. Larson,

Administrator.

In consideration of the foregoing, the FHWA is proposing to amend title 49, Code of Federal Regulations, subchapter B, chapter III, part 391 as set forth below:

PART 391—QUALIFICATION OF DRIVERS

1. The authority citation for part 391 continues to read as follows:

Authority: 49 U.S.C. App. 2505; 49 U.S.C. 504 and 3102; 49 CFR 1.48.

2. In § 391.87, paragraph (h) is revised to read as follows:

§ 391.87 Notification of test results and recordkeeping.

* * * * *

(h) A motor carrier shall maintain all administrative records pertaining to its controlled substances testing program and an annual (calendar year) summary of the results of its controlled substances testing program performed under this subpart.

(1) The administrative records shall include agreements with collection facilities, laboratories, MROs, consortia, name and positions of company officials and their role in the motor carrier's drug testing program, monthly laboratory summaries, recordkeeping and testing procedures, including random testing selection and notification procedures.

(2) The summary shall include, as a minimum (See appendix H to subchapter B for more detail and format):

(i) Number of drivers by employee category;

(ii) Number of drivers subject to testing under the anti-drug rules of more than one DOT Agency, identified by each agency;

(iii) Number of specimens collected by type of test (e.g., pre-employment, random, reasonable cause, post-accident) and employee category;

(iv) Number of positives verified by a Medical Review Officer (MRO) by type of test, type of drug and employee category;

(v) Number of negatives verified by a MRO by type of test, and employee category;

(vi) Number of persons denied a position as a driver following a verified drug test;

(vii) Number of drivers verified positive by a MRO who were returned to duty as a driver during the reporting period;

(viii) Number of drivers with tests verified positive by a MRO for multiple drugs;

(ix) Number of drivers who refused to submit to a drug test required under this subpart, and the action taken in response in the refusal(s); and

(x) Number of drivers and supervisors who have received required training during the reporting period.

(3) The annual summary shall be completed and submitted, if requested,

to the FHWA, Office of Motor Carriers, 400 Seventh Street, SW., Washington, DC 20590 no later than February 15 of the following year.

3. Subchapter B is amended by adding appendix H to read as follows:

BILLING CODE 4910-22-M

APPENDIX H - DRUG AND ALCOHOL TESTING MIS DATA COLLECTION FORM

GENERAL INSTRUCTIONS

This reporting form includes three parts. Collectively, these parts address the data elements required in the Federal Highway Administration (FHWA) and the U.S. Department of Transportation (DOT) drug and alcohol testing regulations. Each part of the form is preceded by instructions which outline and explain the information requested and indicate the probable sources for this information. The three parts of the form are:

Section	Instructions Pages	Reporting Form Pages
I. ORGANIZATIONAL INFORMATION	i-ii	1-2
II. DRUG TESTING INFORMATION	iii-vii	3-7
III. ALCOHOL TESTING INFORMATION	viii-xi	8-11

I. ORGANIZATIONAL INFORMATION

INSTRUCTIONS

This part of the reporting form includes two sections. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. EMPLOYER INFORMATION	i	1
B. COVERED EMPLOYEES	ii	2

Page 1 **EMPLOYER INFORMATION** (Section A) requires the company name for which the report is done and a current address. Below this, a signature, date, and current telephone (including the area code) are entered by the person certifying the correctness and completeness of the form.

Page 2

COVERED EMPLOYEES (Section B) requires a count for each employee category that must be tested under DOT regulations. There is only one category of covered employees for FHWA, and that is "Drivers" in the tables. The most likely source for this information is the employer's personnel department. These counts should be based on the company records for the reported year.

Additional information must be completed if your company employs personnel who perform duties covered by the drug and alcohol rules of more than one DOT operating administration. **NUMBER OF EMPLOYEES COVERED BY MORE THAN ONE DOT OPERATING ADMINISTRATION**, requires that you identify the number of employees in each employee category under the appropriate additional operating administration(s).

For Office Use Only

II. DRUG TESTING INFORMATION

INSTRUCTIONS

The following instructions are to be used as a guide for completing the drug testing information in the Federal Highway Administration (FHWA) and the U.S. Department of Transportation (DOT) **Drug and Alcohol Testing Management Information System Data Collection Form**. These instructions outline and explain the information requested and indicate probable sources for this information. A sample testing results table with a narrative explanation is provided on pages v-vi as an example to facilitate the process of completing the form correctly.

This part of the reporting form includes four sections. These sections address the data elements required in the regulations. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. JOB APPLICANT TESTING INFORMATION	iv	4
B. EMPLOYEE TESTING	vi	4-6
C. OTHER TESTING/PROGRAM INFORMATION	vi	6
D. TRAINING/EDUCATION	vii	7

Sections A and B are used to summarize the drug testing results for covered employees. There are six tables to be completed (one in Section A and five in Section B). The first table (Section A) is where you enter the data on pre-employment testing. The five tables in Section B are for entering drug testing data on periodic, random, post-accident, reasonable cause, and return to duty testing, respectively. Items necessary to complete these tables include:

1) the number of specimens collected in each employee category;
2) the number of specimens tested which were verified negative and verifed positive for any drug(s), and
3) individual counts of those specimens which were verified positive for each of the five drugs.

Do not include results of quality control (QC) samples submitted to the testing laboratory in any of the tables.

A sample table with detailed instructions is provided for Section A, **JOB APPLICANT TESTING INFORMATION**. The format and explanations used for the sample table apply to all six of the tables in Sections A and B.

Information on actions taken with those persons testing positive is required at the end of both Sections A and B. Specific instructions for providing this latter information are given after the instructions for completing the tables in Sections A and B.

Page 4

JOB APPLICANT TESTING INFORMATION (Section A) requires information for pre-employment testing. All numbers entered into this table should be separated into the category of employment for which the applicant was applying. A sample table with example numbers is presented on page v.

Three types of information are necessary to complete the left side of this table. The first blank column with the heading "**NUMBER OF SPECIMENS COLLECTED,**" requires a count for all collected specimens by employee category. It should not include refusals to test. The second blank column with the heading "**NUMBER OF SPECIMENS VERIFIED NEGATIVE,**" requires a count for all completed tests by employee category that were verified negative by your Medical Review Officer (MRO).

The third blank column with the heading "**NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS,**" refers to the number of specimens provided by job applicants that were verified positive. "Verified positive" means the results were verified by your MRO.

The right hand portion of this table, with the heading "**NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG,**" requires counts of positive tests **for each** of the five drugs for which tests were done, i.e., marijuana (THC), cocaine, phencyclidine (PCP), opiates, and amphetamines. The number of specimens positive for each drug should be entered in the appropriate column for that drug type. Again, "verified positive" refers to test results verified by your MRO.

If an applicant tested positive for more than one drug; for example, both marijuana and cocaine, that person's positive results would be included once in each of the appropriate columns (marijuana and cocaine).

A sample table is provided on page v with example numbers.

Page 4

Below the table for pre-employment testing information is a box with the heading **"Number of persons denied a position as a covered employee following a verified positive drug test"**. This is simply a count of those persons who were not placed in a covered position because they tested positive for one or more drugs.

SAMPLE APPLICANT TEST RESULTS TABLE

The following example is for Section A, **JOB APPLICANT TESTING INFORMATION**, which summarizes pre-employment testing results. The procedures detailed here also apply to the tables in Section B which require you to summarize testing results for employees. This example will use the category "Drivers" (which is the only category of employees for FHWA) to illustrate the procedures for completing the form.

A Urine specimens were collected for 157 job applicants for operator positions during the reporting year. This information is entered in the first blank column of the table in the row marked "Drivers".

B The Medical Review Officer (MRO) for your company reported that 153 of those 157 specimens from applicants for operator positions were negative (i.e., no drugs were detected). Enter this information in the second blank column of the table in the row marked "Drivers".

C The MRO for your company reported that 4 of those 157 specimens from applicants for operator positions were positive (i.e., a drug or drugs were detected). Enter this information in the third blank column of the table in the row marked "Drivers".

D With the 4 specimens that tested positive, the following drugs were detected:

Specimen	Drugs
#1	Marijuana
#2	Amphetamines
#3	Marijuana and Cocaine (Multi-drug specimen)
#4	Marijuana

PRE-EMPLOYMENT TESTING

EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
Operator	157	153	4	3	1	0	0	1
Maintenance	107	105	2	1	0	0	1	0
	0	0	0	0	0	0	0	0
TOTAL	264	258	6	4	1	0	1	1

A B C D E

Marijuana was detected in three (3) specimens, cocaine in one (1), and amphetamines in one (1). This information is entered in the columns on the right hand side of the table under each of these drugs. Since two different drugs were detected in specimen #3 (multi-drug), entries are made in both the marijuana and the cocaine columns for this specimen. Information on multi-drug specimens must also be entered in Section C, **OTHER TESTING/PROGRAM INFORMATION**, on page 6 of the reporting form.

Note that adding up the numbers for each type of drug in a row ("NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG") will not always match the number entered in the third column, "NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS". The total for the numbers on the right hand side of the table may differ from the number of specimens testing positive since some specimens may contain more than one drug.

Remember that the same procedures indicated above are to be used for completing all of the tables in Sections A and B.

Pages 4-6 — **EMPLOYEE TESTING** (Section B), as indicated, requires information for company employees in a **covered position** only (i.e. "Drivers"). A separate table must be completed for each category of test. These categories include: (1) periodic, (2) random, (3) post-accident, (4) reasonable cause, and (5) return to duty testing. These tables are to be filled out like the sample table above. Again, these numbers **do not** include refusals for testing.

Page 6 — Following these tables that summarize **EMPLOYEE TESTING**, you must provide counts for employees who have tested positive and are currently in, or have completed rehabilitation, and have returned to work in a covered position. Report this information only for employees who tested positive during this reporting period. This information should be available from the personnel office and/or drug program manager.

Page 6 — **OTHER TESTING/PROGRAM INFORMATION** (Section C) requires that you complete a table dealing with specimens positive for more than one drug and a table dealing with employees who refused to submit to a drug test.

Page 6 — **SPECIMENS VERIFIED POSITIVE FOR MORE THAN ONE DRUG** requires information on specimens that contained more than one drug. Indicate the **EMPLOYEE CATEGORY** and the **NUMBER OF VERIFIED POSITIVES**, then check the appropriate columns indicating the combination of drugs reported as positive. For example, if marijuana and cocaine were detected in 3 driver specimens, then you would write "Drivers" as the employee category, "3" as the number of verified positives, and "3" in the columns for "Marijuana" and "Cocaine". If marijuana and opiates were detected in 2 driver specimens, then you would write "Drivers" as the employee category, "2" as the number of verified positives, and "2" in the columns for "Marijuana" and "Opiates".

Page 6

EMPLOYEES WHO REFUSED TO SUBMIT TO A DRUG TEST requires information on the **NUMBER OF COVERED EMPLOYEES** who refused to submit to a drug test required under this regulation, and a description of the **ACTION TAKEN** in response to the refusal. An example of an action taken would be "removed from covered duties pending termination".

Page 7

TRAINING/EDUCATION (Section D) requires information on the number of covered employees and supervisory personnel who have received the required drug training during the current reporting period.

READ BEFORE COMPLETING THE REMAINDER OF THIS FORM:

1. All items refer to the **current** reporting period **only** (for example, January 1, 1993 - December 31, 1993).

2. This report is only for testing **REQUIRED BY THE FEDERAL HIGHWAY ADMINISTRATION (FHWA) AND THE U.S. DEPARTMENT OF TRANSPORTATION (DOT)**:

   - Results should be reported only for employees in **COVERED POSITIONS** as defined by FHWA/DOT drug testing regulations.

   - The information requested should only include testing for marijuana (THC), cocaine, phencyclidine (PCP), opiates, and amphetamines using the standard procedures required by DOT regulation 49 CFR Part 40.

3. Information on refusals for testing should only be reported in Section C ("OTHER TESTING/PROGRAM INFORMATION"). Do not include refusals for testing in other sections of this report.

4. Do not include the results of any quality control (QC) samples submitted to the testing laboratory in any of the tables.

5. Complete all items; DO NOT LEAVE ANY ITEM BLANK. If the value for an item is zero (0), place a zero (0) on the form.

This part of the form requires information on VERIFIED POSITIVE and VERIFIED NEGATIVE drug tests. These are the results that are reported to you by your Medical Review Officer (MRO).

A. JOB APPLICANT TESTING INFORMATION

PRE-EMPLOYMENT TESTING								
EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
Drivers								

Number of persons denied a position as a covered employee following a verified positive drug test: [ ]

B. EMPLOYEE TESTING

PERIODIC TESTING								
EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
Drivers								

B. EMPLOYEE TESTING (continued)

RANDOM TESTING									
EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
Drivers								

POST-ACCIDENT TESTING									
EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
Drivers								

REASONABLE CAUSE TESTING									
EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
Drivers								

B. EMPLOYEE TESTING (continued)

RETURN TO DUTY TESTING								
EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
Drivers								

Number of employees, currently in or having completed rehabilitation or otherwise qualified to return to duty, who have returned to work in a covered position during this reporting period: ____

C. OTHER TESTING/PROGRAM INFORMATION

SPECIMENS VERIFIED POSITIVE FOR MORE THAN ONE DRUG						
EMPLOYEE CATEGORY	NUMBER OF VERIFIED POSITIVES	Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines

EMPLOYEES WHO REFUSED TO SUBMIT TO A DRUG TEST	
NUMBER OF COVERED EMPLOYEES	ACTION TAKEN

D TRAINING/EDUCATION

Training During Current Reporting Period

Number of covered employees who have received initial training on the consequences, manifestations, and behavioral cues of drug use as required by FHWA drug testing regulations: [ ]

Number of supervisory personnel who have received initial training on the specific contemporaneous physical, behavioral, and performance indicators of probable drug use as required by FHWA drug testing regulations: [ ]

Number of covered employees who have received recurrent or refresher training on the consequences, manifestations, and behavioral cues of drug use: [ ]

Number of supervisory personnel who have received recurrent or refresher training on the specific contemporaneous physical, behavioral, and performance indicators of probable drug use: [ ]

III. ALCOHOL TESTING INFORMATION

INSTRUCTIONS

The following instructions are to be used as a guide for completing the alcohol testing information for the Federal Highway Administration (FHWA) and the U.S. Department of Transportation (DOT) **Drug and Alcohol Testing Management Information System Data Collection Form**. These instructions outline and explain the information requested and indicate probable sources for this information. A sample testing results table with a narrative explanation is provided on pages ix-x as an example to facilitate the process of completing the form correctly.

This part of the reporting form includes four sections. These sections address the data elements required in the regulations. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. JOB APPLICANT TESTING INFORMATION	ix	8
B. EMPLOYEE TESTING	x	9-10
C. OTHER TESTING/PROGRAM INFORMATION	xi	11
D. TRAINING/EDUCATION	xi	11

Sections A and B are used to summarize the alcohol testing results for covered employees. There are six tables to be completed (one in Section A and five in Section B). The first table (Section A) is where you enter the data on pre-employment/pre-duty testing. The five tables in Section B are for entering alcohol testing data for random, post-accident, reasonable suspicion, return to duty, and follow-up testing, respectively. Items necessary to complete these tables include:

1) the number of initial alcohol tests performed for each employee category;
2) the number of confirmatory alcohol tests performed for each employee category;
3) the number of confirmatory test results which were equal to or greater than 0.04; and
4) the number of confirmatory test results which were equal to or greater than 0.02, but less than 0.04.

A sample table with detailed instructions is provided for Section A, **JOB APPLICANT TESTING INFORMATION**. The format and explanations used for the sample table apply to all six of the tables in Sections A and B.

Information on actions taken with those persons whose alcohol test results were 0.04 or greater is required at the end of both Sections A and B. Specific instructions for providing this latter information are given after the instructions for completing the tables in Sections A and B.

Page 8 **JOB APPLICANT TESTING INFORMATION** (Section A) requires information for pre-employment/pre-duty testing. All numbers entered into this table should be separated into the category of employment for which the applicant was applying. A sample table with example numbers is presented on page x.

Four types of information are necessary to complete the left side of this table. The first blank column with the heading "**NUMBER OF INITIAL TESTS**" requires a count of all initial alcohol tests performed for each employee category. It should not include refusals to test. The second blank column with the heading "**NUMBER OF CONFIRMATORY TESTS**" requires a count of all confirmatory alcohol tests performed for each employee category.

The third blank column with the heading "**NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04**" requires a count for each employee category.

The fourth blank column with the heading "**NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02, BUT LESS THAN 0.04**" requires a count for each employee category.

A sample table is provided on page x with example numbers.

Page 8 Below the table for pre-employment testing information is a box with the heading "**Number of persons denied a position as a covered employee following a pre-employment/pre-duty alcohol test indicating an alcohol concentration of 0.04 or greater**". Enter the appropriate number in the box provided.

SAMPLE APPLICANT TEST RESULTS TABLE

The following example is for Section A, **JOB APPLICANT TESTING INFORMATION**, which summarizes pre-employment/pre-duty testing results. The procedures detailed here also apply to the tables in Section B which require you to summarize testing results for employees. This example will use the category "Drivers" (which is the only category of employees for FHWA) to illustrate the procedures for completing the form.

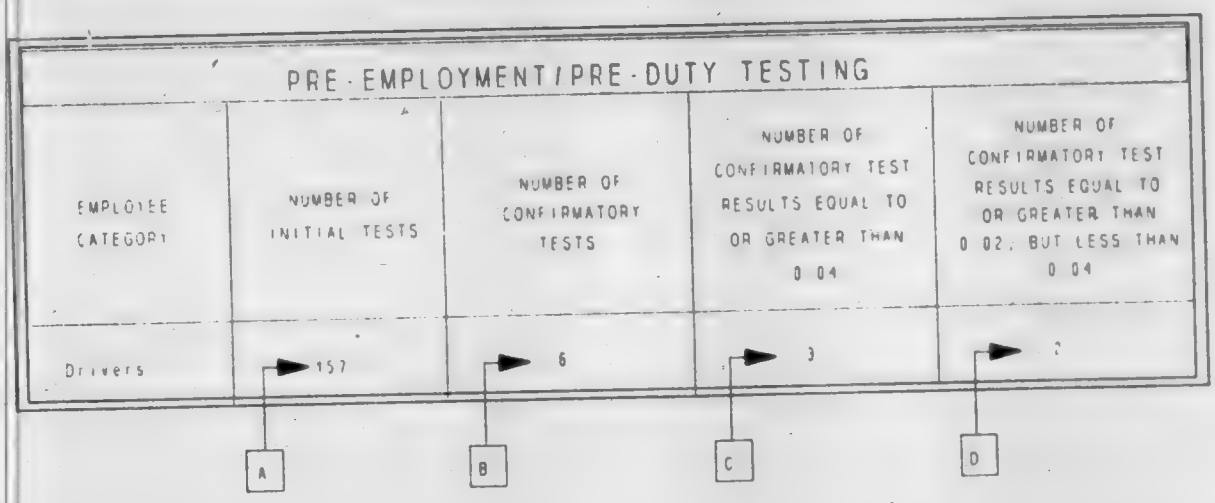
A Initial tests were performed on 157 job applicants for driver positions during the reporting year. This information is entered in the first blank column of the table in the row marked "Drivers".

B Confirmatory tests were necessary for 6 of the 157 applicants for driver positions. Enter this information in the second blank column of the table in the row marked "Drivers". The confirmatory test results for these 6 applicants were the following:

Applicant	Confirmation Result
#1	0.06
#2	0.01
#3	0.11
#4	0.04
#5	0.03
#6	0.02

C The confirmatory test results for 3 of the applicants for driver positions were equal to or greater than 0.04. Enter this information in the third blank column of the table in the row marked "Drivers".

D The ccnfirmatory test results for 2 of the applicants for driver positions were equal to or greater than 0.02, but less than 0.04. Enter this information in the fourth blank column of the table in the row marked "Drivers".



Note that adding up the numbers for confirmation results in columns three and four will not always match the number entered in the second column, "NUMBER OF CONFIRMATORY TESTS". These numbers may differ since some confirmatory test results may be less than 0.02.

Remember that the same procedures indicated above are to be used for completing all of the tables in Sections A and B.

Pages 9-10 **EMPLOYEE TESTING** (Section B), as indicated, requires information for company employees in **covered positions** only. A separate table must be completed for each category of test. These categories include: (1) random, (2) post-accident, (3) reasonable suspicion, (4) return to duty, and (5) follow-up testing. These tables are to be filled out like the sample table above. Again, these numbers **do not** include refusals for testing.

x

Page 10 — Following the table that summarizes return to duty testing, you must provide a count of the **"Number of employees with a confirmatory alcohol test indicating an alcohol concentration of 0.04 or greater who were returned to duty in a covered position (having complied with the recommendations of a substance abuse professional as described in DOT regulations)"**. Report this information only for employees who were tested during this reporting period. This information should be available from the personnel office and/or alcohol program manager.

Pages 11 — **OTHER TESTING/PROGRAM INFORMATION** (Section C) requires that you provide information on employees who tested positive for drugs and alcohol (at the same time), information on violations of other alcohol provisions (not necessarily resulting in positive alcohol tests), and information on employees who refused to submit to an alcohol test.

Page 11 — **Number of employees administered drug and alcohol tests at the same time resulting in a verified positive drug test and an alcohol test indicating an alcohol concentration of 0.04 or greater**, requires that a count of all such employees be entered in the indicated box.

Page 11 — **VIOLATIONS OF OTHER ALCOHOL PROVISIONS/PROHIBITIONS OF THIS REGULATION**, requires information on the **NUMBER OF COVERED EMPLOYEES** committing such a violation, a description of the **VIOLATION** committed (e.g., pre-duty alcohol use, on duty alcohol use, on duty alcohol possession), and a description of the **ACTION TAKEN** in response to the violation.

Page 11 — **EMPLOYEES WHO REFUSED TO SUBMIT TO AN ALCOHOL TEST** requires information on the **NUMBER OF COVERED EMPLOYEES** who refused to submit to an alcohol test as required under this regulation, and a description of the **ACTION TAKEN** in response to the refusal.

Page 11 — **TRAINING/EDUCATION** (Section D) requires information on the number of supervisory personnel who have received the required alcohol training during the current reporting period.

READ BEFORE COMPLETING THE REMAINDER OF THIS FORM:

1. All items refer to the **current** reporting period **only** (for example, January 1, 1993 - December 31, 1993).

2. This report is only for testing **REQUIRED BY THE FEDERAL HIGHWAY ADMINISTRATION (FHWA) AND THE U.S. DEPARTMENT OF TRANSPORTATION (DOT)**:

   - Results should be reported only for employees in **COVERED POSITIONS** as defined by FHWA/DOT alcohol testing regulations.
   - The information requested should only include testing for alcohol using the standard procedures required by DOT regulation 49 CFR Part 40.

3. Information on refusals for testing should only be reported in Section C ("OTHER TESTING/PROGRAM INFORMATION"). Do not include refusals for testing in other sections of this part of the report.

4. Complete all items; DO NOT LEAVE ANY ITEM BLANK. If the value for an item is zero (0), place a zero (0) on the form.

A. JOB APPLICANT TESTING INFORMATION

PRE-EMPLOYMENT/PRE-DUTY TESTING				
EMPLOYEE CATEGORY	NUMBER OF INITIAL TESTS	NUMBER OF CONFIRMATORY TESTS	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02, BUT LESS THAN 0.04
Drivers				

Number of persons denied a position as a covered employee following a pre-employment/pre-duty alcohol test indicating an alcohol concentration of 0.04 or greater: [ ]

B. EMPLOYEE TESTING

RANDOM TESTING				
EMPLOYEE CATEGORY	NUMBER OF INITIAL TESTS	NUMBER OF CONFIRMATORY TESTS	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02, BUT LESS THAN 0.04
Drivers				

POST-ACCIDENT TESTING				
EMPLOYEE CATEGORY	NUMBER OF INITIAL TESTS	NUMBER OF CONFIRMATORY TESTS	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02, BUT LESS THAN 0.04
Drivers				

REASONABLE SUSPICION TESTING				
EMPLOYEE CATEGORY	NUMBER OF INITIAL TESTS	NUMBER OF CONFIRMATORY TESTS	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02, BUT LESS THAN 0.04
Drivers				

B. EMPLOYEE TESTING (continued)

RETURN TO DUTY TESTING				
EMPLOYEE CATEGORY	NUMBER OF INITIAL TESTS	NUMBER OF CONFIRMATORY TESTS	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02, BUT LESS THAN 0.04
Drivers				

Number of employees with a confirmatory alcohol test indicating an alcohol concentration of 0.04 or greater who were returned to duty in a covered position (having complied with the recommendations of a substance abuse professional as described in FHWA regulations): [ ]

FOLLOW-UP TESTING				
EMPLOYEE CATEGORY	NUMBER OF INITIAL TESTS	NUMBER OF CONFIRMATORY TESTS	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02, BUT LESS THAN 0.04
Drivers				

C. OTHER TESTING/ PROGRAM INFORMATION

Number of employees administered drug and alcohol tests at the same time resulting in a verified positive drug test and an alcohol test indicating an alcohol concentration of 0.04 or greater: [ ]

VIOLATIONS OF OTHER ALCOHOL PROVISIONS/PROHIBITIONS OF THIS REGULATION		
NUMBER OF COVERED EMPLOYEES	VIOLATION	ACTION TAKEN

EMPLOYEES WHO REFUSED TO SUBMIT TO AN ALCOHOL TEST	
NUMBER OF COVERED EMPLOYEES	ACTION TAKEN

D. TRAINING/EDUCATION

Training During Current Reporting Period

Number of supervisors who have received the required training in determining the existence of reasonable suspicion of alcohol misuse: [ ]

[FR Doc. 92-29680 Filed 12-10-92; 10:00 am]
BILLING CODE 4910-22-C

49 CFR Part 382

[FHWA Docket No. MC–92–23]

RIN 2125–AD06

Federal Motor Carrier Safety Regulations; Controlled Substances and Alcohol Use and Testing; Commercial Driver's License Standards, Requirements and Penalties; Hours of Service of Drivers

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FHWA is requesting comments on a proposed rule which would mandate testing of drivers who operate commercial motor vehicles (CMV) for the use of controlled substances. This action is being taken in response to the Omnibus Transportation Employee Testing Act of 1991 and complements existing regulatory prohibitions on controlled substances use. This proposal is consistent with a companion NPRM published by the FHWA on alcohol testing and an NPRM on alcohol and drug testing procedures published by the Office of the Secretary, U.S. Department of Transportation. These two NPRMs are published elsewhere in today's **Federal Register**.

The overall goal of testing is to ensure that persons who use controlled substances are not allowed to operate a commercial motor vehicle which, in turn, would reduce accidents, fatalities, and injuries in motor carrier operations.

DATES: Comments must be received on or before April 14, 1993.

ADDRESSES: All signed, written comments should refer to the docket number MC–92–23 and should be submitted to HCC–10, room 4232, Office of the Chief Counsel, 400 Seventh Street, SW., Washington, DC 20590. All comments received will be available for examination at the above address from 8:30 a.m. to 3:30 p.m., e.t., Monday through Friday, except Federal legal holidays.

FOR FURTHER INFORMATION CONTACT: Mr. David Miller, Office of Motor Carrier Standards, (202) 366–2981, or Mr. David Sett, Office of the Chief Counsel, (202) 366–0834, Federal Highway Administration, Department of Transportation, 400 Seventh Street SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except Federal legal holidays.

Additional information on existing regulatory requirements in this area may be obtained through the Department of Transportation's Anti-Drug Information Center (ADIC) system. The public may access the system by dialing (800) 225–3784 using a touch tone telephone. Access to a computer system may also be made using a personal computer connected via modem on (800) 225–3804. A user fee will be charged for certain services provided by the system.

SUPPLEMENTARY INFORMATION:

I. Statutory Authority

The Omnibus Transportation Employee Testing Act of 1991 (the Act) was signed by President Bush on October 28, 1991, as part of the 1992 Department of Transportation and Related Agencies Appropriations Act, Public Law 102–143, title V, 105 Stat. 917, 952 (1991). The Act requires the Secretary of Transportation to promulgate regulations for alcohol and controlled substances testing for persons in safety-sensitive positions in four modes of transportation: motor carrier, airline, railroads and mass transit. The requirements of the Act are addressed in the Office of the Secretary of Transportation's NPRM preamble to amend 49 CFR part 40 which are published elsewhere in today's issue of the **Federal Register** and are fully incorporated herein.

Section 5 of the Act addresses the requirements for motor carriers. This section amends the Commercial Motor Vehicle Safety Act of 1986 (CMVSA), Public Law 99–570, 100 Stat. 3207–170 (codified at 49 U.S.C. app. 2701–2718). The CMVSA establishes the requirements for the commercial driver's license (CDL). The FHWA has implemented the CDL provisions of the CMVSA through the publication of several final rules. A discussion of the CDL requirements, including who is required to obtain a CDL, is included under section V, Commercial driver's license program, later in this preamble.

The Act requires the Secretary to issue regulations by October 28, 1992, requiring motor carriers to conduct pre-employment, reasonable suspicion, random and post-accident testing of drivers for the use of alcohol or a controlled substance which use constitutes a violation of law or Federal regulation. Congress recognized that the FHWA has already issued regulations for controlled substances testing (49 CFR part 391, subpart H) and that the procedures for testing are similar to the scientific and technical guidelines established by the Department of Health and Human Services. See 49 CFR part 40. The FHWA believes it is the intent of Congress that FHWA's current controlled substances regulations be incorporated into the regulations required to be issued under the Omnibus Act. (See section III, Regulatory history, below.)

The Act provides for several significant changes to the current controlled substances testing requirements. These changes include:

1. Testing for controlled substances and alcohol use;
2. Using the definition of a commercial motor vehicle as defined in the CMVSA;
3. Requiring a test after all accidents in which there is a fatality;
4. Requiring that a split sample urine specimen for controlled substances be collected;
5. Requiring pre-employment, reasonable suspicion, random and post-accident testing;
6. Allowing, but not requiring, periodic testing;
7. Requiring referral to a substance abuse professional and providing for the opportunity for rehabilitation;
8. Expressly preempting inconsistent State or local laws;
9. Gives the Secretary the authority to determine sanctions for drivers who use controlled substances or alcohol in violation of Federal regulation but are not under the influence as defined by the CMVSA; and
10. Testing consistent with international obligations of the United States.

II. Regulatory History

The FHWA published in the **Federal Register** a final rule on November 21, 1988, setting forth regulations to require motor carriers who operate commercial motor vehicles in interstate commerce to have an anti-drug program, including the testing of commercial motor vehicle drivers for the use of controlled substances. See 53 FR 47134, codified at 49 CFR part 391, subpart H. That rule required carriers to conduct five types of controlled substances tests: pre-employment/use, periodic, reasonable cause, post-accident and random. Generally, interstate drivers of commercial motor vehicles with a gross vehicle weight rating (GVWR) more than 26,000 pounds, vehicles transporting hazardous materials which are required to be placarded, or vehicles designed to transport more than 15 passengers, including the driver, are covered by this final rule.

On the same date, November 21, 1988, the Office of the Secretary, U.S. Department of Transportation (OST) published an interim final rule, "Procedures for Transportation Workplace Drug Testing Programs." See 53 FR 47002, later codified at 49 CFR

part 40. On December 1, 1989, the OST published a final rule amending certain portions of the interim final rule, see 54 FR 49854. These final and interim final rules are being referred to in this document as the "OST rule."

Subsequent to the publication of our November 21, 1988, FHWA final rule, the FHWA published several notices relating to the controlled substances testing requirements. These publications are summarized as follows:

1. Final rule, November 6, 1989: Clarifies which types of tests must be performed by December 21, 1989, and deferred implementation of random and post-accident testing until a preliminary injunction was resolved. 54 FR 46616.

2. Final rules, September 27, 1989, December 27, 1989, April 24, 1991, and July 14, 1992: Delaying the effective date of the controlled substances regulations to foreign motor carriers and their drivers. 54 FR 39546; 53294; 56 FR 18994; 57 FR 31277.

3. Interim final rule, February 1, 1990: Amends the requirements for preemployment/use and post-accident testing and includes several interpretations and technical amendments. 55 FR 3546.

4. Final rule, August 16, 1991: Provides for an implementation schedule for random and post-accident testing based on favorable court action. 56 FR 40806.

Subsequent to the publication of our November 21, 1988 final rules, the OST published two additional documents relating to controlled substances testing as follows:

1. Notice of proposed rulemaking, July 13, 1990: Revision of the duties of the medical review officer with respect to negative tests. 55 FR 28782.

2. Notice of end of transition period, November 6, 1989: Requires the use of a custody and control form which conforms with the December 1, 1990, final rule. 55 FR 46669.

The OST has also published an advance notice of proposed rulemaking on alcohol abuse prevention programs in the transportation industry on November 2, 1989. 54 FR 46326.

All of the above referenced documents are available from the Anti-Drug Information Center (ADIC). See the **FOR FURTHER INFORMATION CONTACT** section of this Preamble for access information.

III. Legal Issues

Many of the legal issues arising from the FHWA's testing program have been addressed in the Legal Authority/Issues section of the OST general preamble for alcohol testing published in today's **Federal Register**. However, those issues unique to or highlighted by FHWA's rule and regulatory environment are more fully discussed in Section IV, Legal Issues, of the FHWA's alcohol testing rule also published in today's **Federal Register**.

IV. Commercial Driver's License Program

The current CDL regulations in 49 CFR part 383 do not contemplate testing of CMV drivers for controlled substances. Notwithstanding, the existing CDL sets forth significant penalty actions for controlled substances offenses by CMV drivers in that—

1. The commercial driver's license information system (CDLIS) prevents drivers from obtaining multiple licenses, which formerly allowed drivers to continue to drive despite revocation of a license by one State for controlled substances use convictions;

2. The CDLIS and its supporting information network allow controlled substances convictions in other States to be forwarded quickly to the driver's State of record for licensing action; and

3. A driver's conviction for driving under the influence of a controlled substance or using a CMV in the commission of certain controlled substances-related felonies result in disqualification of the driver's CDL for periods ranging from one year to life, depending on the number of offenses and the hazardous nature of the cargo. These sanctions constitute powerful deterrents against involvement with controlled substances by CMV drivers, and the program as a whole provides a strong foundation for the additional controlled substances testing requirements proposed herein.

See Section V, *Commercial driver's license program*, of the FHWA's alcohol testing rule published in today's **Federal Register** for additional discussion of the CDL program.

V. Removal of Part 391, Subpart H

This proposed rule will replace 49 CFR part 391, subpart H controlled substances testing. The present regulations for controlled substances testing are contained as a subpart to the FHWA's driver qualification regulations in part 391 which are only applicable to drivers subject to part 391. The Omnibus Act requires the FHWA to expand the scope of persons required to be tested beyond those subject to part 391. Generally, parts 390 through 399 of title 49 subchapter B are only applicable to motor carriers and drivers who operate in interstate commerce.

The Omnibus Act requires all operators of CMVs subject to the CDL requirements to be tested for controlled substances and alcohol. This expanded scope of persons will encompass far more drivers than have ever been subject to parts 390 through 399. The group will include, but is not limited to, drivers and their employers, operating wholly in intrastate commerce; employed directly by Federal, State and local governments, including school districts; and drivers with restricted use CDLs or drivers in a State that does not recognize State option waiver CDLs, i.e., farm vehicle operators, firefighters and operators of emergency equipment.

For these reasons, the FHWA believes simply changing part 391 to conform to the Omnibus Act would not be prudent. The FHWA believes that the existing controlled substances testing requirements should be moved to a new part 382 and updated to conform to the Omnibus Act.

The FHWA proposes to make part 391, subpart H ineffective on the various implementation dates of part 382 to enable motor carriers to continue to use the existing regulations until all requirements of part 382 are to be complied with fully.

Table I shows the existing regulations at 49 CFR part 391, subpart H and the section where the FHWA proposes to move the existing regulation into this proposal.

VI. Proposal

A new part 382 to title 49, Code of Federal Regulations, Controlled Substances and Alcohol Testing is proposed which would contain the new requirements of the Omnibus Transportation Employee Testing Act of 1991. This NPRM proposes controlled substances testing requirements as subparts G through L of new part 382. The companion NPRM on alcohol testing, also published in today's **Federal Register**, includes subparts A through F of part 382.

Based on comments received on this NPRM and the companion NPRM on alcohol testing, the FHWA will consider integration of the two proposals in one final rule.

SECTION-BY-SECTION ANALYSIS

Part 382—Controlled Substances and Alcohol Testing

Subpart G—Controlled Substances Use and Testing

Section 382.701 Purpose and scope

This section is taken from the current controlled substances testing regulations at § 391.81. Paragraph (c) of the current regulations has been moved to proposed § 382.911(e).

Section 382.703 Applicability

Currently, the FHWA's controlled substances testing requirements are part of the driver qualification standards. The requirements apply to motor carriers and drivers of the motor carriers operating in CMVs greater than 26,000 pounds GVWR who are involved in interstate commerce and are subject to the FMCSRs. Private and for-hire motor carriers of property and for-hire motor carriers of passengers are subject to the FMCSRs. However, the FMCSRs include several general exemptions for certain types of transportation, such as fire trucks and rescue vehicles involved in an emergency, governmental operations and school bus operations. Therefore, drivers involved in the exempted transportation operations are not currently required to comply with the FHWA's controlled substances testing requirements. In addition, anyone who is not required to meet the physical qualifications requirements, such as farm custom operations, apiarian industries and certain farm vehicle drivers, are also exempt from the controlled substances testing requirements. Finally, while the FMCSRs generally apply to commercial motor vehicles exceeding 10,000 pounds GVWR, the drug testing provisions of part 391 apply only to drivers of commercial motor vehicles exceeding 26,000 pounds GVWR.

The Act amends the CVMSA, and therefore, the definitions of "commercial motor vehicle" and "commerce" in the CVMSA apply. This means that the testing requirements of the Act extend to interstate and intrastate operations in commercial motor vehicles exceeding 26,000 pounds GVWR and that the FMCSR exemptions stated above and listed in 49 CFR 390.3(f) do not apply.

The FHWA is therefore proposing that the class of drivers who are required to obtain a CDL are the same drivers who would be subject to the controlled substances testing requirements of this rule. Because they are the subject of a companion rule, the FHWA is also proposing that motor carriers and drivers for those motor carriers subject to the alcohol and controlled substances testing requirements of the Federal Transit Administration (FTA), formerly the Urban Mass Transportation

Administration, be excluded from the requirements of this rule.

By the same token, the FHWA is proposing that any entity operating under a waiver of all CDL requirements, approved or authorized by the FHWA, would not be subject to the controlled substances testing requirements of the Act. This exemption from testing does not extend to holders of restricted CDLs. Accordingly, the measure of applicability is: if a person is required to obtain a CDL, that driver and the employing motor carrier must comply with these proposed controlled substances testing requirements.

This means there would be certain entities who are not required to comply with the FMCSRs, but who would now be subject to the requirements of this rule. For example, governmental and school bus drivers as well as drivers of private motor carriers of passengers would now be required to submit to tests. Governmental operations include all levels of government, Federal, State and local. Private motor carriers of passengers would include, but not be limited to, civic and church organizations.

Table II shows which groups have waivers or restricted CDLs and which groups will be required to be tested under this rule.

TABLE II—COMMERCIAL DRIVER'S LICENSE (CDL) WAIVERS

Type	CDL requirement	Tests required
Full Waiver		
Of all CDL requirements for vehicles owned/operated by Dept. of Defense.		
Non-Civilian Military Personnel —Active Duty Military Personnel —Active Duty Reserves and Natl Guard —National Guard Military Technicians	No CDL required	No controlled substances or alcohol testing required under 49 CFR Pt. 382.
State Option Waiver		
States may waive all CDL requirements, if waiver conditions are met.		
Farm Vehicle Operators	If State waives the individual If State DOES NOT waive the individual	No testing is required. Controlled Substances and Alcohol testing is required.
Firefighters and Other Operators of Emergency Equipment	If State waives the individual If State DOES NOT waive the individual	No testing is required. Controlled Substances and Alcohol testing is required.
Limited Waiver/Restricted CDL		
States may waive CDL knowledge and skills testing and issue restricted CDLs.		
Farm-Related Service Industries —Farm retail outlets & suppliers —Agri-chemical businesses —Livestock feeders —Custom Harvesters	The operators of these vehicles ARE required to obtain a Restricted CDL.	See Note.
Isolated Sections of Alaska	The operators of these vehicles ARE required to obtain a Restricted CDL.	See Note.

Note: Controlled substances and alcohol testing is required of these operators. Additionally, these operators shall have a pre-employment/pre-duty test for controlled substances and alcohol each time the State requires the license to be revalidated for these operators.

The FHWA is proposing the same applicability with the CDL to comply with the intent of Congress and estimates that this proposal will add about two million drivers to the current estimate of three million drivers subject to the current controlled substances testing requirements.

Paragraph (c) of this section excepts those drivers from controlled substances testing requirements who are based at or depart from home terminals in foreign nations. Implementation of controlled substances testing of foreign-domiciled commercial motor vehicle operators, mandated by the Act, will be considered in an advanced notice of proposed rulemaking published elsewhere in today's **Federal Register**. Comments on this issue should be submitted to that docket.

Section 382.705 Controlled Substances Testing Procedures

This section, similar to proposed § 382.105, Alcohol testing procedures, requires all motor carriers performing controlled substances testing to use the procedures described and set forth in 49 CFR part 40 for controlled substances testing.

Section 382.707 Definitions

The definitions unique to this part are included in this section. The terms common to title 49, chapter III, subchapter B, are already included in 49 CFR 390.5, Definitions, and are applicable to this part, unless otherwise defined. The terms, "commerce" and "commercial motor vehicle," are taken from 49 CFR part 383, the requirements for a CDL. These definitions expand the applicability to intrastate operations as well as the other operations currently exempted from the FMCSR.

The term *accident* is proposed and is identical to that being proposed in another rulemaking on accident-reporting requirements. See 57 FR 33712.

The term *on-duty* is proposed to be defined here and a conforming amendment to 49 CFR 395.2, Definitions, is also being proposed to ensure that motor carriers maintain control over the controlled substances testing procedures in those cases where the motor carrier directs the driver to

provide a urine specimen for testing under the requirements of this rule, i.e. all those except pre-employment and return-to-duty testing. The FHWA strongly encourages comments on this proposal.

The FHWA is also proposing a definition of the term "consortium" to indicate that persons other than the motor carrier may perform the actual testing and other functions, provided, however, that these functions are at the direction and/or approval (when they are done prior to the motor carrier's knowledge as may be in the case of a driver-based consortium) of the motor carrier. The FHWA will continue to hold the motor carrier responsible for compliance with these proposed requirements.

The other definitions remain the same as currently in 49 CFR part 391, subpart H.

Section 382.709 Preemption of State and Local Laws

The FHWA is proposing to add § 382.709, Preemption of State and local laws to be consistent with section 5(e)(1) of the Act. This section is similar to the proposed § 382.109. The Act contains an express preemption of State and local requirements that are "inconsistent with" the Federal controlled substances rules applicable to the highway, aviation, and transit industries. As proposed, State and local requirements are preempted whenever it is not possible to comply with both the Federal and the State or local requirements or whenever compliance with the State or local requirements would frustrate the Federal requirement. For example, a State requirement prohibiting controlled substances testing of commercial motor vehicle truck drivers would be preempted to the extent compliance with it would prevent compliance with a controlled substances test required under this part. Also, a local requirement for a blood test to confirm controlled substance use by a commercial motor vehicle motor coach driver would be preempted since it would frustrate accomplishment of the Federal rule, which does not require confirmatory blood testing.

The FHWA shares the same concern as expressed by the Congress regarding current and proposed State legislation which does or would prohibit or restrict drug and alcohol testing of certain classes of individuals and that these restrictions may impinge upon the ability to effectively implement these proposed rules. See S. Rep. No. 54, 102d Cong., 1st Sess. 33 (1991).

Paragraph (b) of proposed § 382.709 states that nothing in this part preempts State and local laws that impose criminal, civil or administrative penalties or other sanctions on a driver found, without regard to testing required by this part, to have operated a commercial motor vehicle while using controlled substances in violation of law or Federal regulation. The FHWA is committed to working with State and local officials in preventing all persons from operating a CMV while using controlled substances.

Section 382.711 Other Requirements Imposed by Motor Carriers

This section, similar to proposed § 382.111, explains that these proposed rules would not affect the motor carrier's policies or programs for prohibiting controlled substances use, testing or rehabilitation, except as provided for in these proposed rules. That is, unless these rules specifically address a motor carrier's program or policy element and the motor carrier's program or policy element does not frustrate or supersede these rules, the motor carrier may have more stringent rules. These more stringent rules must be clearly distinguished to the driver that the more stringent rules are based upon the motor carrier's own authority to impose such rules.

The Americans with Disabilities Act of 1990 (ADA), and relevant Equal Employment Opportunity Commission (EEOC) guidelines, require no changes to the current regulations for drug testing, part 391, subpart H, or the proposed rule. The FHWA's drug testing requirements are designed to detect current users of controlled substances. Under the ADA, current illegal users of controlled substances are expressly excluded from the definition of person with a disability and are therefore not protected by the ADA. Employers are not prohibited by the ADA from taking adverse employment actions against employees for detected drug use. Consistent with this approach, the FHWA rules simply do not contemplate the consequences of drug use on the employment relationship.

Employers may prohibit the use of drugs on the job under the ADA, which is also consistent with FHWA prohibitions. Finally, though there is no conflict between the ADA and FHWA rules, the EEOC guidelines provide that it is a defense to a charge of discrimination under the ADA that a challenged action is required by other Federal law or regulation, such as the FHWA rules on controlled substances.

Section 382.713 Requirement for Notice

This section is similar to proposed § 382.113 which provides that prior to subjecting a driver to a controlled substances test in accordance with these proposed rules, the motor carrier or Federal, State or local official must notify the driver that the test shall be performed in accordance with these proposed rules. No motor carrier shall misrepresent that a test is being performed pursuant to this part. Motor carriers or their agents shall not use the Federal standard custody and control form for testing which is not required by any Federal agency. If this form is used, it shall be a violation.

Section 382.715 Starting Date for Controlled Substances Programs

The implementation schedule proposed is consistent with the schedule used in the November 21, 1988, final rule for controlled substances testing and is the same as proposed § 382.115 for alcohol testing programs. The FHWA is proposing to allow approximately one year from the effective date for larger carriers and approximately two years for smaller carriers. The number of drivers a motor carrier is using on the effective date of the final rule will be the factor used to determine if a carrier is large or small. Fifty or more drivers will designate a motor carrier as large and less than 50 drivers will designate a motor carrier as small for the purposes of implementing the requirements of this rule. The FHWA is eliminating application of the term "drivers subject to testing" as used in the November 21, 1988, final rule.

The FHWA believes that a one year period is sufficient time to implement the controlled substances testing requirements, including the changes contained in part 40 as proposed in today's **Federal Register**, in the operations of these larger motor carriers without any significant economic or operational burdens. Motor carriers that are currently testing drivers in accordance with 49 CFR part 391, subpart H may implement these proposed regulations on or after the effective date of the final rule, but no later than the starting date delineated in this section.

Subpart H—Prohibitions and Consequences

Section 382.801 Controlled Substances Use

The FHWA currently has very stringent controlled substances use prohibitions in the FMCSRs. These prohibitions, which apply to both

drivers of CMVs and motor carriers, are being revised and included in this section and § 382.803. Drivers shall be prohibited from using controlled substances.

Section 382.803 Controlled Substances Testing

As stated in proposed § 382.801, this prohibition applies to both drivers of CMVs and motor carriers. As with § 382.801, drivers shall also be prohibited from testing positive for controlled substances while driving commercial motor vehicles. This requirement is directly from the Omnibus Act, which requires a testing program to determine if a CMV driver has used a controlled substance in violation of law or Federal regulation.

Section 382.805 Refusal to Submit to a Required Controlled Substances Test

This section, which is similar to proposed § 382.211, provides that drivers shall not refuse to submit to required tests and that the motor carrier shall not permit a driver who refuses to be tested to perform safety-sensitive functions.

Subpart I—Controlled Substances Tests Required

The FHWA is not proposing to require periodic testing. The Act gives the Secretary such discretion only for this type of testing. Based upon the FHWA's experience with controlled substances testing, the FHWA has decided to eliminate periodic testing upon the effective date of this rule. The current controlled substances testing regulations allow motor carriers to discontinue periodic testing for a driver when that driver has had one pre-employment, one periodic, or one random test and the motor carrier is randomly testing at a 50 percent testing rate. It is FHWA's understanding that many carriers are indeed discontinuing periodic testing for controlled substances after the driver has had one of these tests. The FHWA believes the other types of testing will adequately detect and deter controlled substances use. Therefore, the FHWA is proposing to eliminate periodic testing for the use of controlled substances.

The sections for pre-employment/pre-duty, post-accident, random, reasonable suspicion, return-to-duty, and follow-up testing listed below are similar to the alcohol testing sections, §§ 382.301 through 382.311, published elsewhere in today's **Federal Register**.

Section 382.901 General

Proposed § 382.901(a) is identical to the current § 391.97(d). Proposed paragraph (b) requires all controlled substances testing specimens collected to use the "split sample" collection procedure (49 CFR part 40). This provision is mandated by the Omnibus Transportation Employee Testing Act (Pub. L. 102–143).

Section 382.903 Pre-Employment/Pre-Duty Testing

Motor carriers shall test for controlled substances use drivers or driver-applicants it intends to hire or use, prior to the first time the driver operates a CMV. The motor carrier may not use the driver unless and until the result of the test is negative.

An exception from the testing requirement will be allowed if the driver has had a prior pre-employment controlled substances test performed under this subpart or another DOT agency rule in the past six months which indicated a negative test result and has had no subsequent verified positive test results.

Section 382.905 Post-Accident Testing

The FHWA is strongly committed to ensuring that drivers who are involved in an accident are tested for the use of controlled substances. The Act requires FHWA to test for controlled substances each commercial motor vehicle operator who was involved in an accident in which there was loss of any human life. The FHWA is proposing to use this requirement plus a requirement that any accident in which a motor vehicle is required to be towed away from the accident scene and the driver receives a citation for a moving violation of a State or local traffic law, a post accident test is required to be performed. This additional criteria is currently required in the existing 49 CFR part 391, subpart H, except for the motor vehicle involved in an accident, and required to be towed away from the accident scene which will replace the amount of property damage criterion.

Post accident testing may have to be performed not only when an accident occurs while the driver is actually driving a commercial motor vehicle, but also, in an accident involving a fatality, when the driver is performing a safety-sensitive function. For instance, a driver parks a truck improperly, on the travelled portion of the highway. Another motorist collides with the truck and the motorist is killed. The driver of the truck will be required, by this rule, to be tested for controlled substances. Post-accident testing must also be performed when the driver receives a citation arising from the accident.

The FHWA is proposing that drivers must be tested as soon as possible, but within eight hours of the accident. The FHWA has received a recommendation from the National Transportation Safety Board to shorten the time frame for post-accident testing. For this reason, the FHWA proposes to require a test within a shorter time frame than the current rule. However, in the event, for valid reasons (as documented by the motor carrier) the test can not be conducted within the eight-hour time frame, the driver must be tested as soon as possible, but prior to twenty-four hours elapsing. Failure to complete a test on a driver within the prescribed twenty-four hours following an accident would be justifiable only if valid reasons (as determined by FHWA) can be documented. After the twenty-four hour, the motor carrier should cease all attempts to take a urine specimen for a controlled substances test and must document why the test could not be submitted.

Valid reasons would include, but are not limited to, securing hazardous materials loads, providing first-aid treatment, assisting in securing the accident site, being detained or arrested by law enforcement officials and a driver who has a ureterosigmoidostomy or is unconscious. A driver would also be prohibited from driving a CMV for a minimum of one year if the driver refused to be tested.

Although stated in general terms in subpart L of this proposal, the FHWA believes that a statement that motor carriers be required to provide drivers with the necessary post-accident procedures and instructions prior to operating a CMV, on a continuous basis, be made within the body of this section. Additionally, motor carriers would be required to maintain the information relating to the controlled substances test or the need for a test, if one was not performed. This information would include the valid reasons when a test was not performed under the recordkeeping requirements in § 382.1013 of this proposed rule.

The FHWA proposes in § 382.905(f) to allow tests done by Federal, State or local officials having independent authority to require controlled substances tests to meet the requirements of this section if the results of the test are obtained by the motor carrier and the testing was performed in conformance with the applicable Federal, State or local requirements for controlled substances testing. This means that if a National Park Service Police officer, State Highway Patrol officer, municipal police officer, or similar official has independent authority to require a controlled substances test after an accident, this test may be deemed as a

completed test by the motor carrier if the official used an approved or applicable testing methodology for his/her jurisdiction and the motor carrier obtains the results of the test. This will allow motor carriers to accept tests done by law enforcement officials, such as, but not limited to, blood tests, saliva tests, or hair tests when these tests are approved in the jurisdiction of the law enforcement official and the results are for the NIDA-five controlled substances and at the 49 CFR part 40 cutoff levels.

§ 382.907 Random Testing

The FHWA is proposing random testing that is similar to the current requirements of 49 CFR part 391 subpart H. The FHWA is proposing that the testing rate will remain the same as subpart H at 50 percent of the number of driver positions used by the motor carrier. A motor carrier's driver positions are determined by how many drivers the motor carrier has on average during a one year period. If the motor carrier's driver population fluctuates, the FHWA expects motor carriers to adjust their random selections based on the number of drivers in a testing cycle.

The motor carrier would select drivers for testing at various times and would ensure that the selection was based on statistically-valid methods. The driver selected would be notified only when he/she would be able to provide a urine specimen immediately upon notification. That is, the driver, once notified, would proceed directly to the collection site and provide a specimen without performing further work or taking any other actions which do not lead to the submission of the specimen.

The motor carrier must spread testing reasonably throughout a 12 month period. Medium and large carriers, those with seven or more drivers, must select driver's names at least once each quarter under the current drug regulations. The FHWA will expect similar performance under this proposal. Also motor carriers must ensure that each driver has an equal chance of being tested during the selection of driver's names.

The FHWA has had many inquiries from owner-operators and the public on how owner-operators comply with the random testing requirements. It has been the Department of Transportation's view that owner-operators are not allowed to have a random testing program on their own. Owner-operators must meet the conditions of random testing, which include that the random selection process be unannounced. The FHWA believes that the requirement of unannounced testing requires that an owner-operator must join a consortium, group or have a neutral, unbiased third party select a date for testing and the third party keeps the date confidential from the driver until that date arrives. Owner-operators, under this proposal, will be expected to perform the same type of random selection process.

Section 382.911 Reasonable Suspicion Testing

The term "reasonable suspicion" is defined as "the actions, appearance, behavior, conduct, speech or body odors of a driver contemporaneous with the operation of a CMV which are indicative of the use of controlled substances." As with the current controlled substances testing requirements, unless it is not feasible, at least one supervisor or motor carrier official must make the required observations. The person making the observations and determining that the driver must be tested for controlled substances use must be trained in detecting the symptoms of controlled substances use. The observations must be documented and signed by the observers within 24 hours of the observation. A copy of the documentation shall be attached to the results of the test and retained for a minimum of one year.

Section 382.913 Return-to-Duty Testing

This proposed section requires the motor carrier to conduct return-to-duty testing after a violation of this part and prior to allowing the driver to drive a commercial motor vehicle. A motor carrier is required to test a driver who has violated any of the controlled substances prohibitions in subpart H of this part prior to that driver again performing safety-sensitive functions, such as driving a commercial motor vehicle.

Section 382.914 Follow-Up Testing

This section requires testing after a determination by a substance abuse professional that the driver is in need of assistance (rehabilitation), but that such testing cannot exceed five years and is in addition to the other types of testing. The SAP may discontinue the testing at any time after the required six follow-up tests.

Section 382.915 Exceptions for Testing Performed by Consortiums

This section provides that pre-employment/pre-duty testing and random testing need not be performed directly by the motor carrier provided that the motor carrier directs or approves such testing program prior to using a driver participating in the program. The FHWA recognizes the high driver turnover rate in the motor carrier industry and believes that the provisions of this proposed section will minimize additional unnecessary tests while ensuring that drivers who use controlled substances while operating a CMV or on duty are identified and prohibited from performing safety-sensitive tasks.

The proposed conditions under which a motor carrier may use a driver without testing the driver for pre-employment/pre-duty are similar to the conditions presently included in 49 CFR 391.103. The information that a motor carrier is to obtain from a third-party testing service provider is similar to that contained in 49 CFR 391.103 and 391.109.

Section 382.917 Split Sample Testing

This proposed section sets forth the driver's rights regarding the testing of a subdivided portion of the driver's specimen upon a verified positive test result. The Omnibus Act gives a driver who has tested positive the right to request that the split sample be tested at a different laboratory. The Act does not specify who is to choose the laboratory and who is to pay for the test. The proposed paragraph gives the driver the right to request a different laboratory to test the secondary split sample. The FHWA is restating that the request for testing the split sample must be made within 72 hours of being notified that the original sample is verified as positive. This time period is required by 49 CFR part 40. The FHWA believes, though, that it must be restated in this section because many drivers do not have copies of 49 CFR part 40 and this provision is important to them. The driver has, by this regulation, up to 72 hours to request the secondary sample be tested to confirm the presence of the controlled substance(s) identified in the primary split samples test. A motor carrier or its agent, the medical review officer, may allow a longer time period. Regardless of whether the driver requests a test of the secondary split sample, all consequences shall begin as soon as the verified positive is reported to the driver. If the test is canceled, the consequences shall cease at that time. The source of payment for the analysis of the split sample test is not provided, but is a labor/management issue.

The FHWA will require that a motor carrier report to FHWA instances in which a verified positive test result is converted to a canceled test because the split sample result is negative. The report will be made to the FHWA's Regional Director, Office of Motor Carriers for the region in which the motor carrier has its principal place of business. The regional and division

offices of the Office of Motor Carriers enforce and implement the controlled substances testing regulations. For this reason, motor carriers must keep the local offices informed of any problems they are having with the procedures or regulations. The FHWA does not expect many instances where these reports will be necessary, since the FHWA has never been informed of such an event occurring under the current regulations, which allow, but do not require, motor carriers to perform split sample testing. The reports will assist the FHWA and DOT in quality control assessments.

Section 382.919 Canceled Tests

This section specifies when a resubmission of a canceled test is required and when it is prohibited. Many motor carriers performing testing under the current rules believe that when a random test is canceled by the laboratory and/or the medical review officer that a driver must submit a new specimen for testing. This is not correct. Only pre-employment, return-to-duty and reasonable suspicion tests, where reasonable suspicion is still documentable, must be conducted again. Like random tests, post-accident tests which are canceled, must not be redone.

Random and post-accident testing are deterrent aspects of the controlled substances testing program. The FHWA believes that the acts of submission of urine for testing are themselves deterrents to controlled substances use. This is not to say that the FHWA condones only submission of urine under the random or post-accident testing requirements without the laboratory and medical review officer functions also taking place. The FHWA, though, believes that a cancellation of a test by the laboratory under its criteria for cancellation of tests should not subject a driver to a resubmission for that test. The random or post accident test would be recorded as having been performed, but that a canceled result was obtained.

Under existing regulations, a canceled test may be corrected by certain administrative procedures. This will continue under 49 CFR part 40. Additionally, part 40 allows employers or motor carriers to directly observe the next required FHWA or DOT controlled substances test, when certain criteria have been met which indicate a possible adulteration of the previous specimen. These criteria are precise and must be followed when a motor carrier chooses to perform a direct observation of a driver urinating.

Subpart J—Notification of Controlled Substances Test Results and Recordkeeping

This subpart identifies the various notifications and recordkeeping requirements between each party: Motor carrier; laboratory; medical review officer; driver and substance abuse professional.

Section 382.1001 Laboratory Notifications

Proposed § 382.1001 requires laboratories to notify medical review officers, in accordance with the procedures set forth in 49 CFR part 40.

Section 382.1003 Medical Review Officer Notifications to the Tested Individual

The FHWA is proposing to continue to afford drivers who have tested positive for controlled substances the opportunity to discuss a positive test result and present to the medical review officer the affirmative defense that the driver's use of the controlled substance(s) was prescribed by a licensed health care professional. This section is similar to the current § 391.97. The medical review officer contacts the driver after a confirmed positive test for this reason. When the medical review officer is unable to contact a driver directly after a confirmed positive test finding, the motor carrier will be contacted by the medical review officer and will be required to instruct the driver to contact the medical review officer prior to the driver being dispatched, going on duty, or continuing on duty. Many medical review officers have informed FHWA and the Office of the Secretary of Transportation in various forums that drivers often do not contact them immediately. The provision that a driver must contact the medical review officer prior to performing a safety-sensitive function is added to assist medical review officers in reviewing the results quicker and reducing the time necessary to verify a test as negative or positive.

Medical review officers have also reported to FHWA that many drivers leave the motor carrier's employ or never join the motor carrier's work force after submission of a urine specimen. This greatly reduces the medical review officer's ability to contact the driver and verify the test result. Motor carriers will, therefore, be expected to make reasonable efforts to contact a tested driver, to allow the individual to provide an alternative medical explanation to the medical review officer and be referred to a substance abuse professional if the test is verified as positive.

Section 382.1005 Medical Review Officer Notifications to the Motor Carrier

Proposed § 382.1005 requires medical review officers to notify motor carriers of the results of a controlled substances test. An initial notification may be made orally and/or by electronic transmission, but in all cases a written notification must be forwarded to the motor carrier within 3 business days. Medical review officers would also be required to report to the motor carrier the medical review officer's inability to contact a driver to discuss possible alternative medical explanations as an affirmative defense for the use of a controlled substance.

Section 382.1007 Motor Carrier Notifications

This section proposes that motor carriers would be required to notify driver-applicants of the results of pre-employment tests, if the driver requests the results within 60 days after the driver is notified about the disposition of the employment application. This section also proposes that drivers be notified after any other type of test required by subpart I of this proposal.

Motor carriers would also be required to notify drivers when the medical review officer has contacted a designated management official due to an inability to contact the driver directly. As a follow up, motor carriers must notify the medical review officer that the driver has been contacted and has been instructed to contact the medical review officer.

Section 382.1009 Laboratory Recordkeeping and Record Retention

The FHWA is well aware of the paperwork burdens associated with this proposed rule and has analyzed the need for every document required to be collected and retained. The FHWA is describing the documents which must be maintained in very general terms, allowing motor carriers and their agents (laboratories, medical review officers and third party service providers) to customize the documents to fit their particular operation. The documents may be maintained electronically and shall be made available to the FHWA in written form upon demand.

Section 382.1011 Medical Review Officer Recordkeeping and Record Retention

Section 382.1011 proposes the medical review officer's recordkeeping and record retention requirements.

Section 382.1013 Motor Carrier Record Retention

Section 382.1013 proposes a motor carrier's requirements for recordkeeping.

Section 382.1015 Reporting of Results in a Management Information System

The FHWA, along with the other DOT agencies, is proposing to establish a management information system (MIS) to obtain and analyze the controlled substances testing program and alcohol testing program information. This section sets forth the requirements for this system.

Elsewhere in today's **Federal Register** is a parallel "MIS" NPRM regarding 49 CFR part 40 and 49 CFR part 391, subpart H. The preamble to the 49 CFR part 40 NPRM contains many comments, discussions and questions that should be considered in reviewing this NPRM. Your comments on this NPRM should indicate that you are responding to questions or comments found in the generic NPRM under 49 CFR part 40, this specific NPRM (FHWA Docket No. MC–92–23, the alcohol testing NPRM (FHWA Docket No. MC–92–19), or the NPRM for changing 49 CFR part 391, subpart H (FHWA Docket No. MC–93–2).

Section 382.1017 Access to Individual Records

The FHWA is proposing that all records prepared in response to this proposed rule be maintained in a secure and confidential manner. No person may release information on an individual test, or other information pertaining to a violation of this part which is attributed to an individual, unless such a specific release is authorized by the tested individual, required by law or otherwise expressly authorized by this part. This proposal will provide for adequate security and confidentiality of test results and other information.

The FHWA is further proposing to require that a driver have access to the driver's records upon written request. This proposal is in addition to the requirement that a driver be notified of the results of a test.

Proposed paragraph (f) requires a motor carrier to make available to another motor carrier, upon written request of a driver, the information requested by the driver regarding the driver's participation in the motor carrier's controlled substances testing program. The FHWA believes this proposed requirement will provide the motor carrier, wishing to hire/use a driver who has previously driven for another motor carrier subject to this part, with the necessary information regarding the driver's participation in the program of the previous motor carrier. This paragraph complements the existing requirements in 49 CFR 383.35 and 391.23. These sections require a motor carrier to check previous employment of a person it intends to hire/use as a driver of a commercial motor vehicle.

The FHWA would like to receive comments regarding whether a driver may be required as a condition of employment to provide a signed authorization allowing the new motor carrier to obtain results from prior tests performed by the driver's preceding employing motor carriers. The FHWA recognizes that a problem exists in the industry with drivers who, after testing positive for controlled substances, seek employment with another motor carrier without informing the hiring motor carrier of the previous tests. This problem is exacerbated by the high turnover rate of drivers in the industry. The FHWA has received numerous comments and suggestions from interested parties in favor of requiring drivers to release previous tests for controlled substances to a hiring motor carrier. The FHWA is seeking comments on the feasibility of these suggestions for controlled substances test results.

This section requires a motor carrier to release all information relating to this part and permit access to all facilities utilized in complying with this part when requested by the FHWA, another DOT agency, the Secretary of Transportation or State or local officials with regulatory authority over the controlled substances use program of a motor carrier. The facilities may include collection sites, record storage areas and the offices and records of substance abuse professionals (SAP). In addition, information relating to an accident under investigation by the National Transportation Safety Board (NTSB) shall be released to the NTSB when so requested.

Section 382.1017(d) imposes on medical review officers the requirement that medical review officers make available copies of all test results and other records pertaining to the motor carrier's controlled substances misuse prevention program, when requested by appropriate government agencies. This represents a change from the current rule in part 391, subpart H, which imposes such a requirement only on motor carriers. Direct access to medical review officer records is being proposed in response to comments from motor carriers and medical review officers administering current controlled substances testing programs. Many medical review officers have expressed a desire to report positive test results directly to FHWA, but feel constrained by the lack of a provision expressly authorizing such release. Such a reporting mechanism could be an important check on motor carriers who do not retain records of positive test results.

As an agent of the motor carrier, the medical review officer is subject to the access requirements imposed expressly on the motor carrier. As the rule is currently written, however, there may also be some justification for treating the medical review officer and the motor carrier as different entities in regard to release of information. See, *e.g.*, 49 CFR 391.89(a), medical review officer access provisions; 49 CFR 391.89(b), motor carrier access provisions. In any event, FHWA currently may obtain medical review officer generated information on positive test results through access to motor carriers records. Obtaining the information directly from the medical review officer would raise no additional privacy considerations for the driver, and would serve as an effective aid in enforcement. This may prove particularly important given the additional consequences for positive test results in the proposed rule. Because evaluation, rehabilitation and driving prohibition periods will result from positive tests under the proposed rule, there will be an even greater incentive on the part of motor carriers to not retain reports of positive results.

It is not being proposed to expressly permit access to medical review officer facilities utilized in complying with the rule, only to medical review officer records. Access to facilities would not aid in solving the problem of motor carriers ignoring positive test results and continuing to administer tests on the driver until a negative result is achieved, recorded and maintained.

The FHWA requests comments on this proposal expressly granting the FHWA access rights to medical review officer records. Are medical review officers reluctant to share the information directly with the FHWA under the current rule? What is the scope of the problem of motor carriers not retaining records of positive results? Will the proposed requirements solve the problem?

In responding to this issue, possible alternatives should be addressed in detail. For instance, reporting information to the FHWA by medical review officers could be made voluntarily. Commenters may also consider what specific items of medical review officer information, if not all,

should be made available to the FHWA. Perhaps only verified positive test results should be reported directly to the FHWA. Should medical review officers be allowed to report to the FHWA laboratory confirmed positive test results which are not verified as positive by the medical review officer? Medical review officers are not allowed under the current rules to report unverified positive test results to the motor carrier.

The FHWA is also proposing in paragraph (g) that a motor carrier may release information maintained under this part to certain individuals in a proceeding initiated by or on behalf of the driver. This paragraph will ensure that relevant facts relating to a person's use of controlled substances maintained by a motor carrier are made available in proceedings.

Subpart K—Consequences For Drivers Engaging In Controlled Substances-Related Conduct

§ 382.1101 Removal From Safety-Sensitive Function

This section is similar to § 382.501 of the proposed alcohol rule.

§ 382.1103 Required Evaluation

This section is similar to § 382.503 of the proposed alcohol rule.

§ 382.1105 Other Controlled Substances-Related Conduct

This section is similar to § 382.505 of the proposed alcohol rule.

§ 382.1107 Additional Consequences for Controlled Substances Violations

Section 5(f) of the Act directs the Secretary to determine appropriate sanctions for drivers who are determined to have used controlled substances through testing developed under this Act or used controlled substances in violation of law or Federal regulation, but are not under the influence of controlled substances as provided in the CMVSA. Regulations issued pursuant to the CMVSA impose disqualifications and penalties for driving under the influence of controlled substances, see § 383.51, and other controlled substances misuse, see § 392.5. These consequences are intended to rid the highways of drivers who continually violate alcohol misuse prohibitions and thereby pose a threat to the public.

When a violation of § 382.803 involving a verified positive controlled substances test result is identified by a motor carrier, the motor carrier would be prohibited from using the driver for the periods provided in the rule. The motor carrier would be required to document the violation, and both the motor carrier and the driver would be required to comply strictly with the consequences noted in this section, subject to the additional consequences in paragraphs (c) through (e) for failure to comply. There would be no licensing sanctions.

However, the current CDL disqualifications of one year for a first offense and lifetime for subsequent offenses upon conviction of operating a commercial motor vehicle while under the influence of a controlled substance remain applicable.

Proposed paragraph (b) prohibits a driver who refuses to be tested from driving any commercial motor vehicle for no less than one year. The FHWA believes that a strong disincentive to refuse to comply with this proposed rule is needed. This proposal is similar to the requirement of 49 CFR 383.51(b)(3)(i) which requires a driver who refuses to undergo alcohol testing required by a State or local jurisdiction under a probable cause determination to be disqualified for one year upon a conviction for such refusal.

Proposed § 382.1107(c) would require that motor carriers who knowingly use drivers who have violated these rules, will be subject to 49 U.S.C. 521(b) penalty provisions. These provisions provide for civil forfeiture penalties of up to $10,000 for violations of motor carrier safety regulations.

Proposed § 382.1107(d) prohibits a person found to have violated the controlled substances misuse prohibition and testing rules of another DOT agency from operating a CMV until the driver complies with the requirements of that DOT agency.

As explained above, subpart L of this proposed rule includes other actions which must be taken prior to a driver operating a commercial motor vehicle after having violated the prohibitions in §§ 382.801 through 382.805. These actions include an evaluation by the substance abuse professional and a finding that the driver has properly followed any instructions given. A driver needing assistance must also be tested for controlled substances use and the results must indicate a negative test result.

Proposed § 382.1107(e) prohibits drivers from driving a commercial motor vehicle following a fatal accident in which their controlled substances tests shows a verified positive test result. This prohibition is similar to the current drug rule in part 391, in which a driver is disqualified for one year following a positive drug test result after he or she is involved in a fatal accident. 49 CFR 391.117(b).

Table III indicates FHWA proposed consequences for violations of the proposed controlled substances prohibitions. Table IV indicates the post-accident testing requirements and additional penalties that would be imposed for prohibited actions during and after an accident.

TABLE III.—DRIVER CONTROLLED SUBSTANCES PROHIBITIONS AND CONSEQUENCES

First offense	Second offense within a three-year period	Third offense within a three-year period	Refusal to be tested
Consequences			
Professional Referral, and (*)	Professional Referral, 60-day driving suspension, and (*).	Professional Referral, 120-day driving suspension, and (*).	One year minimum driving prohibition and (*).

Prohibited Activities: Use or tests positive for controlled substances.
(*)—Driver must submit a urine specimen which has a negative result.

TABLE IV.—POST ACCIDENT CONTROLLED SUBSTANCES TESTING AND PENALTIES

[Testing Requirements—Controlled Substances Test: Within eight hours of accident]

	Penalties	
	No fatalities	Fatal accident
Refusal to submit to testing	One year suspension	One year suspension.

TABLE IV.—POST ACCIDENT CONTROLLED SUBSTANCES TESTING AND PENALTIES—Continued

[Testing Requirements—Controlled Substances Test: Within eight hours of accident]

	Penalties	
	No fatalities	Fatal accident
Leave accident scene prior to testing	One year suspension	One year suspension.
Verified positive test result:	(1) Professional Referral (2) 120 day driving suspension, and (3) Driver must submit a urine specimen which has negative result.	(1) Professional Referral. (2) One year suspension, and (3) Driver must submit a urine specimen which has a negative result.

Qualifying Accident: Any accident involving the death of a human being, or any accident in which the driver receives a citation for a moving traffic violation arising from the accident (as defined by State or local law), and (1) There was bodily injury requiring medical treatment away from the accident scene, or (2) One or more motor vehicles incurred disabling damage as a result of the accident and must be transported away from the scene by a tow truck or other motor vehicle.

Section 382.1109 Disqualifications

As stated above, the penalty provisions of the CDL regulations are not affected in any way by this proposed rule. The authority of State and local officials to implement the disqualifications included in 49 CFR part 383 are not affected by this proposed rule. Drivers found by Federal, State or local officials to be driving under the influence of controlled substances will be subject upon conviction to disqualifications of from one year to lifetime under § 383.51(b).

Subpart L—Controlled Substances Misuse Information, Training, and Referral

Section 382.1201 Motor Carrier Obligation To Promulgate a Policy on the Misuse of Controlled Substances

This section proposes that motor carriers provide drivers with sufficient information regarding the motor carrier's controlled substances use program. The FHWA is proposing, as a minimum, that at least ten specific items be included in the materials a motor carrier makes available to its drivers.

Though the form of this material is not specified in the proposed rule, the materials must be available to all drivers at all times. Therefore, while the material may initially be presented to drivers in a course/seminar setting, the FHWA anticipates that the material will also be posted or otherwise made available to drivers on a continuing basis and updated as necessary to reflect current information and procedures.

Section 382.1203 Training for Supervisors and Company Officials

This section requires that persons who may make determinations regarding reasonable suspicion testing must receive a minimum of 60 minutes of training prior to making any such determinations. The content of the training, i.e., course outlines, instructor's materials, participant's materials, video tapes, etc. must be maintained by the motor carrier. In addition, the motor carrier must also maintain a list of all supervisors and company officials who have taken the training and the date(s) they received the training.

Section 382.1205 Referral, Evaluation, and Treatment

Refer to the Office of the Secretary's Common Preamble for a detailed discussion of this section. This section is identical to proposed § 382.605 in a companion rulemaking on alcohol testing in today's **Federal Register**.

VII. Regulatory Analyses and Notices

Regulatory Impact Analysis

This proposed rule will require motor carriers to test drivers for the use of controlled substances. This rule will affect trucking companies, passenger carriers, State and local governments and anyone who operates a commercial motor vehicle on the public highways.

Executive Order 12291 (Federal Regulation) and DOT Regulatory Policies and Procedures

The FHWA has determined that this document is a major rule under Executive Order 12291 and a significant regulation under the regulatory policies and procedures of the DOT. A draft regulatory impact analysis has been prepared and a copy has been placed in the docket. A summary is included here.

Economic Impact Analysis

The Act requires among other things, testing of safety-sensitive employees in the highway industry for use of controlled substances in violation of the law or Federal regulations. The Act specifically mandates privacy in collection techniques, testing safeguards, confirmation of positive results, confidentiality of test results and scientific random selection of employees for testing. The Act further mandates pre-employment, random, post-accident, and reasonable suspicion testing.

Within the framework of these legislative mandates the FHWA is proposing a controlled substances testing program that minimizes the economic impact to the industry by utilizing established procedures, equipment, techniques, and safeguards that are already available to employers. The proposed rule will not require the development of new technologies, or the need to create an extensive cadre of testing personnel. In the majority of cases, an employer's controlled substances testing program will be an incremental expansion of existing drug testing programs, utilizing the same facilities, personnel, and records systems that currently exist.

The following summarizes the preliminary industry cost and benefit evaluation for the final rule on controlled substances testing. The rule is intended to prohibit absolutely controlled substances when operating a commercial motor vehicle. The rule will require pre-employment/pre-duty, random, post-accident, reasonable suspicion, and return-to-duty controlled substances testing for approximately 5,000,000 drivers of commercial motor vehicles.

The economic cost to the motor carrier industry will be substantial and include, in addition to the cost of the test, the cost of administering a testing program, the cost of replacement drivers, the occasional court cost, and for owner-operators the potential loss of livelihood.

Notwithstanding these costs to the motor carrier industry, the FHWA believes that substantial benefits exceeding the costs will accrue as a result of this proposal. There will be benefits due to the prevention of fatalities, personal injuries, property damage, and lost productivity resulting from accidents attributed to neglect or error on the part of commercial motor vehicle drivers whose judgment or motor skills were diminished by the use of controlled substances. Benefits will

also accrue from a reduction in absenteeism and pilferage.

The assumptions and cost factors used in preparing the economic impact estimate have been developed by the FHWA. This regulatory impact analysis is in the docket for this rulemaking and is subject to review. Cost data were furnished by motor carriers, motor carrier industry associations, and trade publications.

The benefit cost analysis is a direct arithmetic comparison between the identified and quantified cost of a controlled substances testing program and the economic value of the benefits expected to be derived therefrom. The preliminary cost-benefit analysis is for a ten year period beginning with 1993; assumes a random testing rate of 50 percent, a deterrance rate of 70 percent the first year, then gradually increasing to approximately 95 percent.

The estimated total cost consists of: setting up and administrating a testing program, the cost of pre-employment, random, post accident, reasonable suspicion, and follow-up testing. Costs were estimated using the cost of a testing program for all types of testing operated exclusively by motor carriers and their testing contractors.

The estimated value of the benefits is the cost associated with projected reduction in commercial motor vehicle accidents by the assumed 5 percent of drivers that will have used controlled substances and includes fatalities, injuries, property damage, traffic delays, and emergency services that will not occur by removing or deterring these drivers from the highways. Additional benefits will also result from the reduction in absenteeism and pilferage.

Summary of Benefits and Costs

Costs and benefits are total for the 10 year analysis period in assumed 1993 dollars, based on a 50 percent random testing rate.

Controlled substances testing program	Random testing rate	10 year benefits (billions)	10 year costs (billions)	Benefit cost ratio
Motor Carrier	50%	$42.55	$2.39	17.79

In other words for every $1.00 spent on this testing program there would be returned in benefits $17.79.

Regulatory Flexibility Act

In compliance with the Regulatory Flexibility Act (Pub. L. 96–354), the FHWA has evaluated the effects of this rulemaking on small entities. This final rule would require motor carriers to test drivers for the use of controlled substances. It will have a significant adverse economic impact on small entities. Because the Omnibus Act mandates controlled substances testing irrespective of the size of the entities, the FHWA is unable to lessen the economic impact on them.

For these reasons, the FHWA hereby certifies that this action will have a significant economic impact on a substantial number of small entities.

Executive Order 12612 (Federalism Assessment)

This proposal adds part 382 of the FMCSRs pertaining to testing for controlled substances by drivers of commercial motor vehicles operating in commerce on public roads and highways. These proposed requirements directly affect motor carriers and the drivers for these motor carriers. This document preempts State or local laws and regulations that are inconsistent with this proposed rule, as required by the Omnibus Transportation Employee Testing Act of 1991. Therefore, the agency does not have to prepare a Federalism Assessment for this proposal.

Executive Order 12372 (Intergovernmental Review)

Catalog of Federal Domestic Assistance Program Number 20.217, Motor Carrier Safety. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.

Paperwork Reduction Act

The information collection requirements in part 382, subpart J of this rule have been submitted to the Office of Management and Budget for approval under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

National Environmental Policy Act

The agency has analyzed this action for the purpose of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) and has determined that this action would not have any effect on the quality of the environment.

Regulation Identification Number

A regulation identification number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

List of Subjects in 49 CFR Part 382

Controlled Substances, Highways and roads, Highway safety, Motor carriers, Motor vehicle safety, Hours of service.

Issued on: December 2, 1992.

T. D. Larson,

Administrator.

Andrew Card,

Secretary of Transportation.

In consideration of the foregoing, the FHWA proposes to amend title 49, Code of Federal Regulations, subchapter B, chapter III, as set forth below:

1. Chapter III is amended by adding subparts G, H, I, J, K and L of part 382 as proposed elsewhere in this separate part of today's Federal Register as follows:

Part 382—CONTROLLED SUBSTANCES AND ALCOHOL USE AND TESTING

Subpart G—Controlled Substances Use And Testing

Sec.

382.701 Purpose.
382.703 Applicability.
382.705 Controlled substances testing procedures.
382.707 Definitions.
382.709 Preemption of State and local laws.
382.711 Other requirements imposed by motor carriers.
382.713 Requirement for notice.
382.715 Starting date for controlled substances testing programs.

Subpart H—Prohibitions and Consequences

382.801 Controlled substances use.
382.803 Controlled substances testing.
382.805 Refusal to submit to a required controlled substances test.

Subpart I—Controlled Substances Tests Required

382.901 General.
382.903 Pre-employment/pre-duty testing.
382.905 Post-accident testing.
382.907 Random testing.

382.909 [Reserved]
382.911 Reasonable suspicion testing.
382.913 Return-to-duty testing.
382.914 Follow-up testing.
382.915 Exceptions to testing performed by consortiums.
382.917 Split sample testing.
382.919 Canceled tests.

Subpart J—Notification of Controlled Substance Test Results and Recordkeeping

382.1001 Laboratory notifications.
382.1003 Medical review officer notifications to the tested individual.
382.1005 Medical review officer notifications to the motor carrier.
382.1007 Motor carrier notifications.
382.1009 Laboratory recordkeeping and record retention.
382.1011 Medical review officer recordkeeping and record retention.
382.1013 Motor carrier record retention.
382.1015 Reporting of results in a management information system.
382.1017 Access to individual records.

Subpart K—Consequences for Drivers Engaging in Controlled Substances-Related Conduct

382.1101 Removal from safety-sensitive function.
382.1103 Required evaluation.
382.1105 Other controlled substances-related conduct.
382.1107 Additional consequences for controlled substances violations.
382.1109 Disqualifications.

Subpart L—Controlled Substances Use Information, Training, And Referral

382.1201 Motor carrier obligation to promulgate a policy on the misuse of controlled substances.
382.1203 Training for supervisors and company officials.
382.1205 Referral, evaluation, and treatment.

Authority: 49 U.S.C. app. 2505; 49 U.S.C. app. 2701 *et seq.*; 49 U.S.C. 3102; 49 CFR 1.48.

* * * * *

Subpart G—Controlled Substances Use and Testing

§ 382.701 Purpose.

(a) The purpose of this subpart is to reduce highway accidents that result from driver use of controlled substances, thereby reducing fatalities, injuries and property damage.

(b) Subparts G through L prescribe minimum Federal safety standards to deter the use of controlled substances as defined in part 40 of this title (marijuana, cocaine, opiates, amphetamines and phencyclidine (PCP).

§ 382.703 Applicability.

(a) This part applies to all motor carriers and drivers as defined in this part who are required under part 383 of this chapter to obtain a commercial driver's license, except for motor carriers and their drivers who are required to conform to the controlled substances testing requirements of the Federal Transit Administration of the Department of Transportation found in part 653 of this title or have obtained a full waiver or State option waiver from the part 383 requirements.

(b) An owner-operator motor carrier who employs himself/herself as a driver must comply with both the rules in this part that apply to motor carriers and the rules in this part that apply to drivers.

(c) The requirements of this part do not apply to any employee whose place of reporting or point of departure (home terminal) for motor carrier transportation services is located outside the territory of the United States.

§ 382.705 Controlled substances testing procedures.

Each motor carrier shall ensure that all controlled substances testing conducted under this part complies with the procedures set forth in part 40 of this title. The provisions of part 40 of this title that address controlled substances testing are incorporated by reference and are made applicable to motor carriers by this part.

§ 382.707 Definitions.

Words or phrases used in this part are defined in § 390.5 of this chapter, except as provided herein—

Accident means an occurrence involving a commercial motor vehicle engaged in the operations of a motor carrier who is subject to this part resulting in:

(1) The death of a human being; or

(2) Bodily injury to a person who, as a result of the injury, immediately receives medical treatment away from the scene of the accident; or

(3) One or more motor vehicles incurring disabling damage as a result of the accident and transported away from the scene by a tow truck or other motor vehicle.

Canceled test means that a test was not performed by a Department of Health and Human Services, National Institute on Drug Abuse (NIDA) certified laboratory or the medical review officer determines that a procedural error or adulteration occurred which invalidates the test result.

Collection site means a place where individuals present themselves for the purpose of providing urine specimens to be analyzed for specified controlled substances. The site must possess all necessary personnel, materials, equipment, facilities, and supervision to provide for the collection, security, temporary storage, and transportation or shipment of the samples to a laboratory.

Commerce means (1) any trade, traffic or transportation within the jurisdiction of the United States between a place in a State and a place outside of such State, including a place outside of the United States and (2) trade, traffic, and transportation in the United States which affects any trade, traffic, and transportation described in paragraph (1) of this definition.

Commerial motor vehicle means a motor vehicle or combination of motor vehicles used in commerce to transport passengers or property if the motor vehicle—

(1) Has a gross combination weight rating or gross combination weight of 26,001 or more pounds inclusive of a towed unit with a gross vehicle weight rating or gross vehicle weight of more than 10,000 pounds; or

(2) Has a gross vehicle weight rating or gross vehicle weight of 26,001 or more pounds; or

(3) Is designed to or transport(s) 16 or more passengers, including the driver; or

(4) Is of any size and is used in the transportation of materials found to be hazardous for the purposes of the Hazardous Materials Transportation Act and which require the motor vehicle to be placarded under the Hazardous Materials Regulations (part 172, subpart F of this title).

Confirmed positive test means that the test a laboratory certified by the Department of Health and Human Services, National Institute on Drug Abuse (NIDA) has determined that one or more controlled substances was found in a specimen of human urine at or above the level specified in § 40.29 of this title.

Consortium means an entity, including a group or association of employers, motor carriers, or contractors, that provides controlled substances testing services as required by this part or other DOT alcohol testing rules and that acts on behalf of the employers.

Controlled substance or drug has the meaning assigned by 21 U.S.C. 802 and includes all substances listed on Schedules I through V as they may be revised from time to time (21 CFR part 1308).

Disqualification means either:

(1) The suspension, revocation, cancellation, or any other withdrawal by a State of a person's privileges to drive a commercial motor vehicle; or

(2) A determination by the FHWA, under the rules of practice for motor carrier safety contained in part 386 of this chapter, that a person is no longer

qualified to operate a commercial motor vehicle under parts 382 or 391 of this chapter; or

(3) The loss of qualification which automatically follows conviction of an offense listed in § 383.51; or

(4) The loss of qualification which automatically follows a violation of the controlled substances prohibitions as specified in this subchapter.

DOT Agency means an agency (or operating administration) of the United States Department of Transportation administering regulations requiring controlled substances testing (14 CFR parts 65, 121, and 135; 33 CFR part 95; 46 CFR parts 4 and 17; 49 CFR parts 199, 219, 382 and 653).

Driver means any person who operates a commercial motor vehicle. This includes, but is not limited to, full time, regularly employed drivers; casual, intermittent or occasional drivers; leased drivers and independent, owner-operator contractors who are either directly employed by or under lease to a motor carrier or who operate a commercial motor vehicle at the direction of or with the consent of a motor carrier. For the purposes of pre-employment/pre-duty testing only, the term driver includes a person applying to a motor carrier to drive a commercial motor vehicle.

Employer means a motor carrier and any other person designated in a DOT agency controlled substance rule as an employer.

FHWA means the Federal Highway Administration, U.S. Department of Transportation.

Health care professional means a person who is licensed, certified, and/or registered, in accordance with applicable State laws and regulations, to prescribe controlled substances. The term includes, but is not limited to, doctors of medicine (MD), doctors of osteopathy (DO), doctors of dental surgery (DDS), physician assistants, advanced practice nurses, and doctors of chiropractic.

Medical review officer or M.R.O. means a licensed doctor of medicine (M.D.) or osteopathy (D.O.) with knowledge of drug abuse disorders that is employed or used by a motor carrier to conduct drug testing in accordance with this part.

Motor carrier means any person (including the United States, a State, District of Columbia or a political subdivision of a State) who owns or leases a commercial motor vehicle or assigns persons to operate such a vehicle. The term *motor carrier* includes a motor carrier's agents, officers and representatives as well as employees responsible for hiring, supervising, training, assigning, or dispatching drivers and employees concerned with the installation, inspection, and maintenance of commercial motor vehicle equipment and/or accessories.

Negative test result means that a motor carrier's medical review officer has verified that a Department of Health and Human Services, National Institute on Drug Abuse (NIDA) certified laboratory's negative test result is accurate. A negative test result also means that there was not a sufficient quantity of any controlled substance in the specimen of human urine to meet the screening or confirmation levels specified in 49 CFR 40.29.

On-duty means all on duty time as defined in § 395.2, under *On-duty time*, of this subchapter and includes all time submitting urine specimens for controlled substances testing and performing any other functions contained in this part and in part 40 of this title with respect to controlled substances testing.

Performing (a safety-sensitive function) means a driver is considered to be performing a safety-sensitive function during any period in which he or she is actually performing, ready to perform, or immediately available to perform any of those on-duty functions set forth in § 395.2, under *On-Duty time*, (1) through (7) of this chapter.

Principal place of business means a single location designated by the motor carrier, normally its headquarters, where records required by parts 382, 387, 390, 391, 395, 396, 397 and 398 of this chapter will be maintained.

Refuse to submit to a test means that a driver failed or refuses to provide an adequate urine specimen without a valid medical explanation after he or she has received notice of the requirement to be tested in accordance with this part or engages in conduct that clearly obstructs the collection process. The notice of the requirement to be tested may be made by the motor carrier.

Safety-sensitive function means any of those on-duty functions set forth in § 395.2, under *On-duty time*, paragraphs (1) through (7) of this chapter.

Substance abuse professional means a licensed physician (Medical Doctor or Doctor of Osteopathy), or a licensed or certified psychologist, social worker, or employee assistance professional with knowledge of and clinical experience in the diagnosis and treatment of substances abuse disorders.

Verified positive test means that the test a motor carrier's medical review officer has determined that a Department of Health and Human Services, National Institute on Drug Abuse (NIDA) certified laboratory's confirmed positive test result is the result of prohibited controlled substances use.

§ 382.709 Preemption of State and local laws.

(a) Except as provided in paragraph (b) of this section, this part preempts any State or local law, rule, regulation, or order to the extent that:

(1) Compliance with both the State or local requirement in this part is not possible; or

(2) Compliance with the State or local requirement is an obstacle to the accomplishment and execution of any requirement in this part.

(b) This part shall not be construed to preempt provisions of State criminal law that impose sanctions for reckless conduct leading to actual loss of life, injury, or damage to property, whether the provisions apply specifically to transportation employees (including drivers) or employers (including motor carriers) or to the general public.

§ 382.711 Other requirements imposed by motor carriers.

Except as expressly provided in this part, nothing in this part shall be construed to affect the authority of motor carriers, or the rights of drivers, with respect to the use of controlled substances, including authority and rights with respect to controlled substances testing and rehabilitation.

§ 382.713 Requirement for notice.

Before performing a controlled substances test under this part, each motor carrier shall notify a driver or driver-applicant that the controlled substances test is required by this part. No motor carrier shall falsely represent that a controlled substances test is administered under this part.

§ 382.715 Starting date for controlled substances testing programs.

(a) Large motor carriers. Each motor carrier with fifty or more drivers on [the effective date of the final rule] shall implement the requirements of this part on [date one year after the effective date of the final rule].

(b) Small motor carriers. Each motor carrier with fewer than fifty drivers on [the effective date of the final rule] shall implement the requirements of this part on [date two years after the effective date of the final rule].

(c) All motor carriers shall have a controlled substances misuse program that conforms to this part by [date two years after the effective date of the final rule] or by the date a motor carrier begins motor carrier operations, whichever is later.

Subpart H—Prohibitions and Consequences

§ 382.801 Controlled substances use.

Except as provided in § 382.901(a) of this part, no driver shall perform a safety-sensitive function, if the driver uses any controlled substances in violation of this part. No motor carrier having actual knowledge that a driver has used controlled substances shall permit the driver to perform a safety-sensitive function or continue to perform a safety-sensitive function.

§ 382.803 Controlled substances testing.

Except as provided in § 382.901(a), no driver shall report for duty, remain on duty or perform a safety-sensitive function, if the driver tests positive for controlled substances. No motor carrier having actual knowledge that a driver has tested positive for controlled substances shall permit the driver to perform or continue to perform safety-sensitive functions.

§ 382.805 Refusal to submit to a required controlled substances test.

No driver shall refuse to submit to a post-accident controlled substances test required under § 382.905, a random controlled substances test required under § 382.907, a reasonable suspicion controlled substances test required under § 382.911, or a follow-up controlled substances test required under § 382.914. No motor carrier shall permit a driver who refuses to submit to such a test to perform or continue to perform safety-sensitive functions.

Subpart I—Controlled Substances Tests Required

§ 382.901 General.

(a) This subpart does not prohibit a motor carrier from requiring a driver to notify the motor carrier of therapeutic or prescription controlled substance use.

(b) All controlled substances testing done in accordance with this part shall be performed using all part 40 of this title split sample collection procedures.

§ 382.903 Pre-employment/pre-duty testing.

(a) Prior to the first time a driver performs safety-sensitive functions for a motor carrier, the driver shall undergo testing for controlled substances. No motor carrier shall allow a driver to perform safety-sensitive functions unless the driver has been administered a controlled substances test with a negative test result.

(b) A motor carrier is not required to administer a controlled substance test as required by paragraph (a) of this section, if:

(1) The driver has undergone a pre-employment controlled substance test required by this subpart or the controlled substance testing rule of another DOT agency within the previous six months, with a negative test result; and

(2) The motor carrier ensures, by obtaining the information required by § 382.915(d), that no prior motor carrier of the driver of whom the motor carrier has knowledge has records of a violation of this part or the controlled substances misuse rule of another DOT agency within the previous six months.

§ 382.905 Post-accident testing.

(a) As soon as practicable following an accident involving a commercial motor vehicle, each motor carrier shall test for controlled substances each surviving driver:

(1) Who was performing safety-sensitive functions with respect to the vehicle, if the accident involved the loss of human life; or

(2) Who receives a citation under State or local law for a moving traffic violation arising from the accident.

(b) If a test required by this section is not administered within eight hours following the accident, the motor carrier shall prepare a written report to be kept in the motor carrier's files stating the reasons the test was not promptly administered. If a controlled substances test required by this section is not administered within 24 hours following the accident, the motor carrier shall cease attempts to administer a controlled substances test and shall prepare the report.

(c) A driver who is subject to post-accident testing who leaves the scene of an accident without a valid reason, except to submit to a test, may be deemed by the motor carrier to have refused to submit to testing. Nothing in this section shall be construed to require the delay of necessary medical attention for injured people following an accident or to prohibit a driver from leaving the scene of an accident for the period necessary to obtain assistance in responding to the accident or to obtain necessary emergency medical care.

(d) A motor carrier shall provide drivers with necessary post-accident information, procedures and instructions, prior to the driver operating a commercial motor vehicle, so that drivers will be able to comply with the requirements of this section.

(e) The results of any post accident tests for the use of controlled substances performed by Federal, State, or local officials having independent authority to require a driver to submit to a test, shall be considered to meet the requirements of this section provided such tests conform to applicable Federal, State or local requirements, and that the results of the tests for the controlled substances identified in part 40 of this title and cut-off levels required by this part are obtained by the motor carrier.

§ 382.907 Random testing.

(a) Each motor carrier shall, at various times, randomly select drivers for unannounced controlled substances testing. The selection of drivers shall be made by use of a scientifically valid method, such as a random-number table or a computer-based random number generator that is matched with drivers' Social Security numbers, payroll identification numbers, or other comparable identifying numbers. Each driver shall have an equal chance of being tested under the selection process used.

(b) During each 12-month period following the start of random controlled substances testing by the motor carrier, the motor carrier shall meet the following conditions:

(1) The dates for administering unannounced testing of randomly-selected drivers shall be spread reasonably throughout the 12-month period; and

(2) The number of drivers randomly selected for testing during the 12-month period shall be equal to an annual rate of not less than 50 percent of the total number of drivers subject to controlled substances testing under this part or the controlled substances rule of another DOT agency. If the motor carrier conducts random testing through a consortium, the annual rate may be calculated for each individual motor carrier or for the total number of drivers and DOT covered employees subject to random testing by the consortium.

(c) Each motor carrier shall require that each driver who is notified of selection for random testing proceeds to the testing site immediately. However, if the driver is performing a safety-sensitive function at the time of notification, the motor carrier shall instead ensure that the driver ceases to perform the safety-sensitive function and proceeds to the collection site as soon as possible.

§ 382.909 [Reserved]

§ 382.911 Reasonable suspicion testing.

(a) Each motor carrier shall require any driver to submit to a controlled substances test, when the motor carrier has reasonable suspicion to believe that the driver has violated the prohibitions in this part.

(b) The motor carrier's determination that reasonable suspicion exists to require the driver to undergo a controlled substances test shall be based on specific, contemporaneous, articulable observations concerning the appearance, behavior, speech or body odors of the driver. The required observations shall be made by a supervisor or management official who is trained in detecting the symptoms of controlled substances use. The supervisor who makes the determination that reasonable suspicion exists shall not conduct the controlled substances test collection on that driver. Documentation of the driver's conduct shall be prepared and signed by the witnesses within twenty four hours of the observed behavior or before the results of the tests are released, whichever is earlier. A motor carrier shall ensure that the driver is transported immediately to a collection site for the collection of a urine specimen.

(c) Controlled substances testing is authorized by this section only if the observations required by paragraph (b) of this section are made during or just preceding the period of the work day that the covered driver is required to be in compliance with this part. A driver may be required to undergo reasonable suspicion testing for controlled substances while the driver is performing safety-sensitive functions; just before the driver is to perform safety-sensitive functions; or just after the driver has ceased performing such functions.

(d) As part of reasonable suspicion drug testing programs established pursuant to this section, motor carriers may test for drugs in addition to those specified in this part only with approval granted by the Federal Highway Administrator under part 40 of this title and for substances for which the Department of Health and Human Services has established an approved testing protocol and positive threshold.

§ 382.913 Return to duty testing.

Each motor carrier shall ensure that before a driver returns to duty requiring the performance of a safety-sensitive function after engaging in conduct prohibited by subpart H of this part, the driver shall undergo a return to duty controlled substances tests with a result indicating a negative test result.

§ 382.914 Follow-up testing.

Following a determination under § 382.1205(b) that a driver is in need of assistance in resolving problems associated with controlled substances use, each motor carrier shall ensure that the driver is subject to unannounced follow-up testing as directed by a substance abuse professional in accordance with the provisions of § 382.1205(c)(2)(ii).

§ 382.915 Exceptions for testing performed by consortiums.

(a) A motor carrier may use a driver who is a regularly employed driver of another motor carrier without complying with § 382.903(a) and § 382.907 if the driver meets the requirement of § 391.65 of this chapter.

(b) A motor carrier may use a driver who is not tested by the motor carrier without complying with § 382.903(a), provided the motor carrier assures itself:

(1) That the driver has participated in a drug testing program that meets the requirements of this subpart within the previous 30 calendar days, and

(2) While participating in that program, the driver was either:

(i) Tested for controlled substances within the past 6 months (from the date of application with the motor carrier) as required by § 382.903, or

(ii) Participated in the drug testing program for the previous 12 months (from the date of application with the motor carrier).

(c) Pre-employment/pre-duty testing and random testing need not be performed directly by the motor carrier provided that the motor carrier directs or approves the testing program of a contractor or previous motor carrier prior to using a driver who has participated in such a program.

(d) A motor carrier who exercises either paragraphs (a), (b) or (c) of this section or § 382.903(b) shall contact the controlled substances testing program in which the driver participates or participated and shall obtain the following information:

(1) Name and address of the program(s);

(2) Verification that the driver participates or participated in the program(s);

(3) Verification that the program(s) conform to part 40 of this title;

(4) Verification that the driver is qualified under the rules of this part, including that the driver has not refused to be tested for controlled substances;

(5) The date the driver was last tested for controlled substances;

(6) The medical review officer's verified results, negative or positive, of any tests taken within the previous six months; and

(7) The results of any referrals to a substance abuse professional for all tests which indicated controlled substances use.

(e) The motor carrier shall retain the information required by this section as specified in § 382.1005.

(f) A motor carrier who uses, but does not employ, a driver more than once a year must assure itself once every six months that the driver participates in a controlled substances testing program that meets the requirements of this part.

§ 382.917 Split sample testing.

(a) A motor carrier or medical review officer must notify a driver, whose primary specimen verified positive for controlled substance use, that the driver may request that the medical review officer to direct the lab to send the "split sample" to the NIDA-certified laboratory specified by the (motor carrier/driver). This testing will determine whether the controlled substance found in the split specimen is present in any quantity in the split sample.

(b) A driver shall submit a request for testing of the split sample to the medical review officer within 72 hours of the driver's actual notification of the verified positive test result.

(c) If the test of the split sample fails to confirm the presence of the drugs(s) or drug metabolites(s), or if the split sample is unavailable, inadequate for testing or untestable, the medical review officer shall cancel the test.

(d) A motor carrier must report every occurrence of a split sample negative test result which is preceded by a primary verified positive test result to the Regional Director, Office of Motor Carriers for the region in which the motor carrier has located its principal place of business. The address of each regional office is listed in § 390.27 of this chapter. The report must be mailed within 15 calendar days of being notified by the medical review officer that the test result has been canceled.

§ 382.919 Canceled tests.

(a) A driver, whose urine specimen was submitted for testing for preemployment/pre-duty or return-to-duty controlled substances testing under this part, which is canceled by the laboratory or the medical review officer shall resubmit a urine specimen for testing, when the driver continues to seek employment or continued employment with the motor carrier.

(b) A driver whose urine specimen was submitted for testing for post-accident or random controlled substances testing under this part which is canceled by the laboratory or the medical review officer shall not resubmit a urine specimen for testing.

(c) A driver whose urine specimen was submitted for testing for reasonable

suspicion controlled substances testing under this part which is canceled by the laboratory or the medical review officer shall not resubmit a urine specimen for testing, unless the specific, contemporaneous, articulable observations concerning the appearance, behavior, speech or body odors of the driver continue to be present and documentation of the driver's conduct is prepared and signed by the witnesses within twenty four hours of the observed behavior or before the results of the new tests are released, whichever is earlier.

Subpart J—Notification of Controlled Substance Test Results and Recordkeeping

§ 382.1001 Laboratory notifications.

A laboratory shall notify the medical review officer of controlled substances results in accordance with the procedures in part 40 of this title.

§ 382.1003 Medical review officer notifications to the tested individual.

(a) Any driver who is alleged to have violated § 382.803 of this part through a confirmed positive test result shall have available as an affirmative defense, to be proven by the driver through clear and convincing evidence to the medical review officer, that his/her use of a controlled substance (except for the substance methadone) was prescribed by a health care professional who is familiar with the driver's medical history and assigned safety-sensitive functions.

(b) The medical review officer shall make reasonable efforts to contact a driver and make available to the tested individual the opportunity to discuss a laboratory confirmed positive test result. The medical review officer shall afford a tested individual the opportunity to discuss a confirmed positive controlled substances test result with the medical review officer before reporting the test result to the motor carrier as a verified positive. If a medical review officer is unable to contact a tested driver, after making and documenting all reasonable efforts, the medical review officer shall contact a designated management official of the motor carrier to arrange for the individual to contact the medical review officer prior to being dispatched, performing or continuing to perform safety-sensitive functions, to the extent practicable. The medical review officer may verify a positive test without having communicated with the driver about the results of the test if:

(1) The driver expressly declines the opportunity to discuss the results of the test, or

(2) Within five days after a documented contact by a motor carrier's designated management official instructing the driver to contact the medical review officer, the driver has not done so.

(c) All tests reported to the motor carrier by the medical review officer as a verified positive, in which the medical review officer did not discuss the results with the driver, shall be so noted and shall be accompanied by complete documentation of the medical review officer's efforts to contact the driver including contacts with a motor carrier's designated management official.

§ 382.1005 Medical review officer notifications to the motor carrier.

(a) The medical review officer may report to the motor carrier using any communications device, but in all instances a signed written notification must be forwarded within three business days of completion of the medical review officer's review, pursuant to part 40 of this title. A medical review officer shall report to a motor carrier clearly:

(1) That the controlled substances test being reported was in accordance with part 40 of this title and this part;

(2) The name of the individual for whom the test results are being reported;

(3) The type of test indicated on the custody and control form (i.e., random, post-accident, etc.);

(4) The date and location of the test collection;

(5) The identities of the persons or entities performing the collection, analysis of the specimens and serving as the medical review officer for the specific test;

(6) The verified results of a controlled substances test, either positive or negative, and if positive, the identity of the controlled substance(s) for which the test was verified positive.

(b) A medical review officer shall report to the motor carrier that a driver is unable to be contacted for a discussion in accordance with § 382.902, and that the driver must be contacted by the motor carrier as soon as practicable and requested to contact the medical review officer within 24 hours.

§ 382.1007 Motor carrier notifications.

(a) A motor carrier shall notify a driver of the results of a pre-employment/pre-duty controlled substance test conducted under this part, if the driver requests such results within 60 calendar days of being notified of the disposition of the employment application. A motor carrier shall notify a driver of the results of random, reasonable suspicion and post-accident tests for controlled substances conducted under this part if the test results are verified positive. The motor carrier shall also inform the driver which controlled substance or substances were verified as positive.

(b) The designated management official shall make reasonable efforts to contact and request each driver who submitted a specimen under the motor carrier's program, regardless of the driver's employment status, to contact and discuss the results of the controlled substances test with a medical review officer who has been unable to contact the driver.

(c) The designated management official shall notify the medical review officer that the driver has been notified to contact the medical review officer in accordance with § 382.902.

§ 382.1009 Laboratory recordkeeping and record retention.

A laboratory performing the analysis of urine specimens for controlled substances shall maintain the specimen and the records of the analysis as specified in part 40 of this title.

§ 382.1011 Medical review officer recordkeeping and record retention.

(a) A medical review officer shall be the sole custodian of individual's test results. A medical review officer shall maintain all dated records and notifications, identified by individual, for a minimum of five years for verified positive test results.

(b) A medical review officer shall maintain all dated records and notifications, identified by individual, for a minimum of one year for negative and canceled test results.

(c) No person may obtain the individual test results retained by a medical review officer, and no medical review officer shall release the individual test results of any driver to any person, without first obtaining specific written authorization from the tested driver. Nothing in this paragraph shall prohibit a medical review officer from releasing, to the employing motor carrier or to officials of the Secretary of Transportation, any DOT agency, or any State or local officials with regulatory authority over the controlled substances testing program under this part, the information delineated in § 382.1005(a).

§ 382.1013 Motor carrier record retention.

(a) *General Requirement.* Each motor carrier shall maintain records of its controlled substances misuse prevention program as provided in this section. The records shall be maintained

in a secure location with controlled access.

(b) *Period of Retention.* Each motor carrier shall maintain the records in accordance with the following schedule:

(1) *Five years.* Records of driver verified positive controlled substances test results, documentation of refusals to take required tests, and driver evaluations and referrals shall be maintained for a minimum of five years.

(2) *Two years.* Records related to the collection process and training shall be maintained for a minimum of two years.

(3) *One year.* Records of negative and canceled test results (as defined in part 40 of this title) shall be maintained for a minimum of one year.

(c) *Types of records.* The following specific records shall be maintained.

(1) Records related to the collection process:

(i) Collection logbooks, if used;

(ii) Documents relating to the random selection process;

(iii) Documents generated in connection with decisions to administer reasonable suspicion controlled substances tests;

(iv) Documents generated in connection with decisions on post-accident testing;

(v) Documents verifying existence of a medical explanation of the inability of a driver to provide a urine specimen for testing; and

(vi) Consolidated annual reports as required by § 382.1015.

(2) Records related to test results:

(i) The motor carrier's copy of the custody and control form;

(ii) Documents sent by the medical review officer to the motor carrier, including those required by § 382.1005.

(iii) Documents related to the refusal of any driver to submit to a controlled substances test administered under this part;

(iv) Documents presented by a driver to dispute the result of a controlled substance test administered pursuant to this part;

(3) Records related to evaluations:

(i) Records pertaining to a determination by a substance abuse professional concerning a driver's need for assistance; and

(ii) Records concerning a driver's compliance with recommendations of the substance abuse professional, including records pertaining to rehabilitation and return to duty/follow-up testing as required by a substance abuse professional.

(4) Records related to education and training:

(i) Materials on controlled substances use awareness, including a copy of the motor carrier's policy on controlled substances use;

(ii) Documentation of compliance with the requirements of § 382.501;

(iii) Documentation of training provided to supervisors for the purpose of qualifying the supervisors to make a determination concerning the need for controlled substances testing based on reasonable suspicion; and

(iv) Certification that any training conducted under this part complies with the requirements for such training.

(5) Notifications, by date and time, of persons required to be notified as required by this part, including but not limited to, randomly selected drivers for testing, drivers requested to contact a medical review officer, medical review officers that the designated management official has contacted the driver or driver-applicant etc.

§ 382.1015 Reporting of results in a management information system.

(a) Each motor carrier shall submit to the Federal Highway Administration, when requested, an annual report covering the calendar year, summarizing the results of its controlled substances misuse prevention program.

(b) Each motor carrier that is subject to more than one DOT agency controlled substances regulation shall identify each driver covered by the regulations of more than one DOT agency. The identification will be by the total number and category of covered safety sensitive functions (*e.g.*, drivers of commercial motor vehicles, airmen, pipeline inspectors, etc). Prior to conducting any controlled substance test on a driver subject to the regulations of more than one DOT agency, the motor carrier must determine which DOT agency regulation or regulations authorizes or requires the test. When a motor carrier determines that a test is required under U.S. Coast Guard or Research and Special Programs Administration (RSPA) regulations, as well as the requirements in this part, the motor carrier must use "split sample" testing procedures. The test result information shall be directed to the appropriate DOT agency or agencies.

(c) Each motor carrier shall ensure the accuracy and timeliness of each report submitted by the motor carrier or a consortium.

(d) Each motor carrier notified shall submit the required annual reports no later than February 15 of each year. The report shall be submitted on the form specified by the FHWA. Each report shall contain:

(1) Number of drivers by employee category;

(2) Number of drivers subject to testing under the anti-drug rules of more than one DOT Agency, identified by each agency;

(3) Number of specimens collected by type of test (i.e., pre-employment, random, return-to-duty, etc.) and employee category;

(4) Number of positives verified by a Medical Review Officer by type of test, type of drug and employee category;

(5) Number of negatives verified by a Medical Review Officer by type of test and employee category;

(6) Number of persons denied a position as a driver following a verified positive controlled substances test;

(7) Number of drivers with verified positive by a Medical Review Officer who were returned to duty in driving positions during the reporting period;

(8) Number of drivers with tests verified by a Medical Review Officer for multiple drugs;

(9) Number of drivers who refused to submit to a controlled substances test required under this part, and the action taken in response to the refusal(s); and

(10) Number of supervisors who have received required training during the reporting period.

§ 382.1017 Access to individual records.

(a) Except as required by law or expressly authorized or required in this section, no motor carrier shall release driver information that is contained in records required to be maintained under § 382.1013.

(b) A driver is entitled, upon written request, to obtain copies of any records pertaining to the driver's use of controlled substances, including any records pertaining to his or her controlled substances tests. The motor carrier shall promptly provide the records requested by the driver. Access to a driver's records shall not be contingent upon payment for records other than those specifically requested.

(c) Each motor carrier shall permit access to all facilities utilized in complying with the requirements of this part to the Secretary of Transportation, any DOT agency, or any State or local officials with regulatory authority over the controlled substances testing program under this part.

(d) Each motor carrier and medical review officer shall make available copies of all results for motor carrier controlled substances testing conducted under this part and any other information pertaining to the motor carrier's controlled substances misuse prevention program, when requested by the Secretary of Transportation, any DOT agency, or any State or local officials with regulatory authority over the motor carrier or its drivers.

(e) When requested by the National Transportation Safety Board as part of

an accident investigation, a motor carrier shall disclose information related to the motor carrier's administration of a post-accident controlled substances test administered following the accident under investigation.

(f) Records shall be made available to a subsequent motor carrier upon receipt of a written request from the driver. Disclosure by the subsequent motor carrier is permitted only as expressly authorized by the terms of the driver's request.

(g) A motor carrier may disclose information required to be maintained under this part pertaining to a driver to the driver or the decisionmaker in a lawsuit, grievance, or other proceeding initiated by or on behalf of the individual, and arising from the results of a controlled substances test administered under this part, or from the motor carrier's determination that the driver engaged in conduct prohibited by subpart H of this part (including, but not limited to, a worker's compensation, unemployment compensation, or other proceeding relating to a benefit sought by the driver).

(h) A motor carrier shall release information regarding a driver's records only as directed by the specific, written consent of the driver authorizing release of the information to an identified person. Release of such information by the person receiving the information is permitted only in accordance with the terms of the driver's consent.

Subpart K—Consequences For Drivers Engaging In Controlled Substances-Related Conduct

§ 382.1101 Removal from safety-sensitive function.

(a) Except as provided in subpart L of this part, no driver shall perform safety-sensitive functions if the driver has engaged in conduct prohibited by subpart H of this part or a controlled substances misuse regulation of another DOT agency.

(b) No motor carrier shall permit any driver to perform safety-sensitive functions if the motor carrier has determined that the driver has violated this section.

§ 382.1103 Required evaluation and testing.

No driver who has engaged in conduct prohibited by subpart H of this part shall perform safety-sensitive functions unless the driver has met the requirements of § 382.1205. No motor carrier shall permit a driver to perform safety-sensitive functions unless the driver has met the requirements of § 382.1205. Nothing in this section shall be construed to prohibit the continued performance of safety-sensitive functions necessary to respond to an emergency.

§ 382.1105 Other controlled substances-related conduct.

(a) No driver tested under the provisions of subpart I of this part who is found to have a verified positive controlled substances test result shall perform or continue to perform safety-sensitive functions for a motor carrier, nor shall a motor carrier permit the driver to perform or continue to perform safety-sensitive functions, until:

(1) The driver submits to a controlled substance test which has a verified negative result; and

(2) The driver completes any rehabilitation program prescribed by a substance abuse professional in accordance with subpart L of this part.

(b) Nothing in this section shall be construed to prohibit the continued performance of safety-sensitive functions necessary to respond to an emergency.

§ 382.1107 Additional consequences for controlled substances violations.

(a)(1) *General rule.* A driver who is found through testing under this part to have a verified positive controlled substances test result is prohibited from driving for the periods specified in paragraph (a)(2) of this section.

(2) *Duration of prohibited driving periods*—(i) *Second violation.* A driver who, during any 3-year period, is found to have a verified positive controlled substances test result twice in separate incidents, is prohibited from driving any commercial motor vehicle, as defined in this part or part 390 of this subchapter, for a period of 60 consecutive days.

(ii) *Third and subsequent violations.* A driver who, during any 3-year period, is found to have a verified positive controlled substances test result three or more times in separate incidents, is prohibited from driving any commercial motor vehicle, as defined in this part or part 390 of this chapter, for a period of 120 consecutive days.

(b) A driver who refuses to be tested for controlled substances under the provisions of subpart H of this part shall not drive any commercial motor vehicle, as defined in this part or part 390, for a period of not less than one year.

(c) No motor carrier shall knowingly use a driver to drive any commercial motor vehicle, as defined in this part or part 390 of this chapter, during the prohibition periods specified under this section, when the driver is in violation of any of the requirements of subpart H of this part. A motor carrier that knowingly uses a driver to violate this subpart shall be subject to the penalty provisions of 49 U.S.C. 521(b).

(d) No motor carrier shall knowingly use a driver who has been found to have violated any requirements of subpart H of this part to drive any commercial motor vehicle, as defined in this part or in part 390 of this subchapter, or perform any other safety-sensitive functions regulated by any DOT agency, until the driver has complied with the requirements of this part, including the completion of any evaluation, treatment, or return to duty testing required by the substance abuse professional, and any other applicable DOT agencies' regulations.

(e) A driver shall be prohibited from driving for a period of one year following a verified positive controlled substances test result when the driver has been involved in a fatal accident.

§ 382.1109 Disqualifications.

(a) Nothing in this subpart shall be construed to restrict the authority of Federal, State or local officials from implementing § 383.51 of this chapter. A driver who is convicted of driving a commercial motor vehicle under the influence of a controlled substance shall be subject to the disqualifications provided in § 383.51(b)(3) of this chapter.

(b) Notwithstanding the provisions of this part, the penalty provisions of § 391.15 of this chapter remain applicable within this part for actions taken by Federal Highway Administration officials.

Subpart L—Controlled Substances Use Information, Training, and Referral

§ 382.1201 Motor carrier obligation to promulgate a policy on the misuse of controlled substances.

(a) *General requirements.* Each motor carrier shall provide educational materials that explain the requirements of this part and the motor carrier's policies and procedures with respect to meeting these requirements. Each motor carrier shall provide written notice to every driver and to representatives of driver organizations of the availability of this information.

(b) *Required content.* The materials to be made available to drivers shall include detailed discussion of at least the following:

(1) The identity of the person designated by the motor carrier to answer driver questions about the materials;

(2) The categories of drivers who are subject to the provisions of this part;

(3) Sufficient information about the safety-sensitive functions performed by those drivers to make clear what period of the work day the driver is required to be in compliance with this part;

(4) Specific information concerning driver conduct that is prohibited by this part;

(5) The circumstances under which a driver will be tested for controlled substances under this part;

(6) The procedures that will be used to test for the presence of controlled substances, protect the driver and the integrity of the urine specimens, safeguard the validity of the test results, and ensure that those results are attributed to the correct driver;

(7) The requirement that a driver submit to controlled substances tests administered in accordance with this part;

(8) An explanation of what constitutes a refusal to submit to a controlled substances test and the attendant consequences;

(9) The consequences for drivers found to have violated subpart H of this part, including the requirement that the driver be removed immediately from safety-sensitive functions, and the procedures under § 382.1205 of this part.

(10) The requirement that a driver shall have the right to have the split sample specimen tested by a different NIDA-certified laboratory, when a request for such test is made by the driver to the medical review officer within 72 hours of being notified of a verified positive test result; and

(11) Optional provision. The materials supplied to drivers may also include information on additional motor carrier policies with respect to the use or possession of controlled substances, including any consequences for a driver found to have used controlled substances, that are based on the motor carrier's authority independent of this part. Any such additional policies or consequences must be clearly and obviously described as being based on independent authority.

§ 382.1203 Training for supervisors and company officials.

Each motor carrier shall ensure that persons designated to determine whether reasonable suspicion exists to require a driver to undergo controlled substances testing under § 382.911 receive at least 60 minutes of training on the physical, behavioral, speech, and performance indicators of probable controlled substances misuse.

§ 382.1205 Referral, evaluation, and treatment.

(a) A driver who has engaged in conduct prohibited by subpart H of this part shall be advised by the motor carrier of the resources available to the driver in evaluating and resolving problems associated with the misuse of controlled substances, including the names, addresses, and telephone numbers of substance abuse professionals and counseling and treatment programs.

(b) Each driver who engages in conduct prohibited by subpart H shall be evaluated by a substance abuse professional who shall determine what assistance, if any, the driver needs in resolving problems associated with controlled substances misuse.

(c)(1) Before a driver returns to duty requiring the performance of a safety sensitive function after engaging in conduct prohibited by subpart H of this part, the driver shall undergo a return-to-duty controlled substances test with a negative test result.

(2) In addition, each driver identified as needing assistance in resolving problems associated with controlled substances misuse—

(i) Shall be evaluated by a substance abuse professional to determine that the driver has properly followed the rehabilitation program prescribed under paragraph (b) of this section, and

(ii) Shall be subject to unannounced follow-up controlled substances tests administered by the motor carrier following the driver's return to duty. The number and frequency of such follow-up testing shall be determined by a substance abuse professional, but shall consist of at least six tests in the first 12 months following the driver's return to duty. Follow-up testing shall not exceed 60 months from the date of the driver's return to duty. The substance abuse professional may terminate the requirement for follow-up testing at any time after the first six tests have been administered, if the substance abuse professional determines that such testing is no longer necessary.

(d) Evaluation and rehabilitation may be provided by the motor carrier, by a substance abuse professional under contract with the motor carrier, or by a substance abuse professional not affiliated with the motor carrier. The choice of the substance abuse professional and assignment of costs shall be made in accordance with motor carrier/driver agreements and motor carrier policies.

(e) The requirements of this section with respect to referral, evaluation and rehabilitation do not apply to applicants who refuse to submit to a pre-employment/pre-duty controlled substances test or who have a pre-employment/pre-duty controlled substances test with a verified positive test result.

49 CFR Parts 217 and 219
Drug and Alcohol Testing Programs; Proposed Rules

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

49 CFR Part 219

[Docket No. RSOR–6; Notice No. 34]

RIN 2130–AA43

Alcohol Testing; Amendments to Alcohol/Drug Regulations

AGENCY: Federal Railroad Administration (FRA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: FRA proposes to amend and expand its current alcohol/drug testing requirements to include, for safety-sensitive employees, pre-employment and random testing for alcohol, to amend its existing regulations regarding control of alcohol and drug use in railroad operations by incorporating new procedures and safeguards with respect to breath and body fluid testing for alcohol, to make reasonable suspicion testing mandatory for both alcohol and drugs, and to make additional changes. The proposed amendments would conform FRA's regulations to the requirements of the Omnibus Transportation Employee Testing Act of 1991 and would also reflect experience derived from program administration.

DATES: (1) Any request to make an oral presentation must be received by January 4, 1993.

(2) Written comments must be received by April 14, 1993. Late filed comments will be considered to the extent practicable.

ADDRESSES: Comments shall be filed in triplicate with the Docket Clerk, Docket No. RSOR–6, Office of the Chief Counsel, Federal Railroad Administration, 400 7th Street, SW., room 8201, Washington, DC, 20590. Parties wishing the FRA to acknowledge receipt of their comments should submit with those comments a pre-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. RSOR–6." The postcard will be dated and time stamped and returned to the commenter. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons, between 8:30 a.m. and 5 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Walter C. Rockey, Executive Assistant to the Associate Administrator for Safety (RRS–3), Office of Safety, FRA, Washington, DC 20590 (Telephone: (202) 366–0897) or Patricia V. Sun, Trial Attorney (RCC–30), Office of Chief Counsel, FRA, Washington, DC 20590 (Telephone: (202) 366–4002).

SUPPLEMENTARY INFORMATION:

Background

On November 21, 1988 (53 FR 47103), FRA published a final rule containing amendments to its alcohol and drug regulations, which were first promulgated on August 2, 1985. These amendments established a random drug testing program and added new safeguards for urine drug testing, incorporating procedures from a Department of Transportation regulation, "Procedures for Transportation Workplace Drug Testing Programs" (49 CFR part 40), that had instituted standards for drug testing of transportation employees. FRA published additional amendments to its alcohol and drug regulations on December 27, 1989 (54 FR 53238) and June 4, 1990 (55 FR 22791). The current regulations are published as part 219, Title 49, Code of Federal Regulations.

On October 28, 1991, the President signed into law the Department of Transportation and Related Agencies Appropriations Act for Fiscal Year 1992, Pub. L. No. 102–143, Title V of which enacts legislation popularly known as the Omnibus Transportation Employee Testing Act of 1991 (hereinafter the "Act"). The Act amends the Federal Aviation Act, the Federal Railroad Safety Act, and the Commercial Motor Vehicle Safety Act, specifically mandating alcohol and drug countermeasures for the aviation, rail and commercial trucking segments of the transportation industry. In addition, the Act enacted similar requirements for mass transit. Language utilized in the several amendments was generally parallel, but the differing histories and industry contexts addressed by legislation were reflected in subtle ways. In the case of the rail provision, explicit language preserved existing alcohol/drug regulations, which had been the subject of multiple legislative hearings by the Senate Committee on Commerce, Science and Transportation, from which the Act had been reported on several occasions (See, *e.g.*, S. Rept. No. 101–172). The sponsors and the Committee had repeatedly emphasized that it was not their intention to disrupt or displace existing regulatory provisions applicable to railroads.

Nevertheless, the Act embodies express mandates that must be honored and that go beyond the four corners of existing regulations. Among the most important requirements pertinent to this NPRM are the following:

- Pre-employment alcohol testing, to complement the current requirement for pre-employment drug testing.
- Mandatory reasonable suspicion testing for both alcohol and drugs (in lieu of discretionary or "authorized" testing under broader "reasonable cause" provisions).
- Random alcohol testing, to complement the current requirement for random drug testing.

Split sample testing, which is currently permitted, will now be required as a safeguard to reassure the sober and responsible employee that he or she will not be threatened by an error in the testing process. (The requirement for split samples is addressed in the separate Notice of Proposed Rulemaking to amend the Procedures for Transportation Workplace Drug Testing published elsewhere in today's **Federal Register**.)

In addition, the legislation instructs the Secretary to issue requirements for rehabilitation programs which at a minimum provide for the identification and opportunity for treatment of railroad employees responsible for safety-sensitive functions. Here the statute uses language similar, but not identical to that employed in subpart E of part 219. As such, it is an apparent reference to employment-based mechanisms for evaluation of substance abuse disorders, referral of substance abusers to treatment resources, and determinations with respect to return to duty. FRA understands this provision to address the quality of employee assistance services, since FRA already requires that basic services be accessible and that the employment relationship be protected where the troubled employee steps forward and requests help (or is referred by a co-worker). Accordingly, FRA joins the other modal administrations in proposing professional requirements for employee assistance professionals ("substance abuse professionals").

The generic issues pertaining to alcohol misuse that are presented by the legislation are discussed in a DOT-wide preamble published by the Office of the Secretary of Transportation (hereinafter "OST") elsewhere in today's **Federal Register** (hereinafter common preamble). The common preamble is incorporated herein by reference.

Because the FRA rule already embodies the great majority of the requirements contemplated by the legislation in a manner well suited to the railroad industry, and because considerable effort has been expended in training industry personnel in those requirements, some of the preamble discussion is not directly applicable to

the proposals presented in this Notice. However, in each major subdivision of the section-by-section analysis set forth below, the basis for these differences is discussed.

The Federal Aviation Administration, Federal Highway Administration, Federal Transit Administration and Research and Special Projects Administration are also publishing alcohol testing NPRMs in today's **Federal Register**. Since FRA's proposed rule integrates the requirements of the Act into the existing structure of part 219, FRA's format differs from that of these operating administrations. FRA is therefore adding two appendixes to part 219. Appendix E contains a template that facilitates intermodal use by comparing each modal section to the corresponding language or concept in FRA's regulations. (Appendix D, which contains FRA's standard reporting form for the proposed management information system (MIS) discussed below, is published elsewhere in today's **Federal Register** as part of FRA's drug program management information system NPRM.)

Framework of the Railroad Proposal

The Act requires FRA to reexamine its existing alcohol/drug regulations. FRA has done so. Consistent with the Act's command, FRA now proposes minor adjustments in its existing regulatory program. These adjustments appear to be appropriate at this juncture due to the progress achieved under the existing rule and lessons learned as a result of additional experience in administering this program.

Among the adjustments proposed in this document are the following:

- Coverage of "safety-sensitive" employees would be reconsidered. FRA specifically proposes to include in the definition of covered employee any person engaged in the direct supervision of Hours of Service employees, including yardmasters.
- Although FRA proposes to retain its existing post-accident toxicology program, FRA proposes to reduce the number of low-damage collisions and derailments that would require testing. FRA is also prepared to consider any further adjustments in this program that may be warranted by experience, and welcomes comments on substitution of mandatory breath analysis for alcohol, together with conventional urinalysis for drugs, as a substitute for the existing program. In its final rule, FRA will amend appendix C to part 219 to include changes in post-accident sample collection and toxicology kits mandated by the new split sample procedures.

FRA has now been in almost continuous rulemaking on the issue of alcohol and drugs since 1983. This rulemaking offers the opportunity to bring some stability to this subject matter, so that attention can be turned to other, equally significant safety concerns in the field of human factors. FRA encourages active participation by the regulated community, including individual employees, employee organizations, and railroad companies.

Relationship to Existing Industry Programs

Following publication of the final rule on Certification of Locomotive Engineers (49 CFR part 240; 56 FR 28228, June 19, 1991), FRA received several inquiries regarding the effect of provisions of that rule with respect to implementation of voluntary alcohol/drug prevention programs with voluntary "mark-off" procedures, such as Operation Red Block, the rail peer prevention program. The question was whether, on railroads that permit either pre-duty or on-duty mark-offs without discipline, an engineer utilizing this procedure would be required to be handled under the mandatory certificate revocation procedures requiring a 9-month revocation period where a single violation of § 219.101 (on-duty use, possession, or impairment; BAC of .04 or greater) is established. FRA has responded to these inquiries indicating that the mark-off, by itself, does not give rise to actual knowledge on the part of the railroad that a violation has, in fact, occurred; and the railroad would not violate its duty to prevent violations by permitting the mark-off to go forward under established procedures. The reason for this position is that programs which attack co-worker tolerance of on-duty use of alcohol or drugs advance safety and add to the array of prevention techniques at work on the railroad.

The current regulatory proposals would adopt the same philosophy and approach. The objective of these programs is to enlist co-workers to apply pressure on a substance abuser to mark-off and seek assistance with his or her problem, thereby increasing the overall deterrent effect of anti-drinking policies. In this way the entire workforce takes responsibility for compliance. This collective responsibility is particularly valuable in work settings where supervisors are seldom present (as with many railroad assignments).

Most voluntary mark-offs should occur quietly, without fanfare, as if the employee had simply become ill. Abuses are limited by intervention on the part of employee prevention committees, which emphasize the unacceptability of the behavior and refer the troubled worker to the employee assistance program, as appropriate.

Experience teaches that a mark-off should be disallowed any time it is undertaken "in anticipation" of detection through supervisory observation or a chemical test. It is not enough that the mark-off occur prior to notice of the test, since at that point the employer could have adequate independent evidence to proceed without a test.

A violator who is about to be detected should not be able to use the program as a sanctuary. While the most manifest example of an invalid mark-off would be where the employee attempted to mark-off after receiving notice of a test, other, less obvious circumstances that should also invalidate an attempt to mark-off include: Mark-off to evade a supervisor who has just determined that reasonable suspicion exists to test the employee, or mark-off once the employee knows that testing collectors are on the job site (even if the employee had not received notice of a test at the time). Responsible peer prevention programs guard against abuses of this kind; and these programs are worthy of enthusiastic support.

SECTION BY SECTION ANALYSIS

Subpart A—General

Section 219.3 Application

Small Railroad Exclusion

As mentioned above, FRA is proposing a management information system, a new reporting system for alcohol and drug program information that would replace the data that railroads currently must submit in § 217.13(d) of the annual report. FRA would exempt small railroads, previously defined as employers with 15 or fewer covered employees that do not engage in joint operations, from the MIS reporting requirements in the new subpart I and the proposed recordkeeping requirements contained in the new subpart J. Small railroads will have little or no alcohol and drug program data to report, and correspondingly, few if any program records to keep.

No changes are contemplated for FRA's current exemption of small railroads from subparts D, E, F and G, since small entities would be exempted from the proposed alcohol testing amendments. FRA's previously published reasons for this treatment of small railroads remain valid. Employees of small railroads operate at low speed over private rights of way and are

subject to much closer supervision than employees of larger carriers. Compliance with breath alcohol testing would be more difficult for small railroads, particularly those situated in rural areas (as is very often the case). Requiring these isolated small entities to conduct random alcohol testing is therefore unnecessary, as evidenced by the fact that no employee from such a small entity has had a positive post-accident test in the six years of FRA's program.

FRA requests comment, however, on two small railroad issues. First, what should small railroads (who will not be required to conduct mandatory reasonable suspicion testing) be expected to do if faced with an obviously drunk employee reporting for duty, particularly if an evidential breath testing device (EBT) is not readily available on the railroad's property? Second, should small railroads, who are exempt from the employee assistance requirements of Subpart E, nevertheless be required to provide information on substance abuse services to their employees? (In the proposed section 219.23(d), larger railroads would be required to provide information to all of their employees (not just those who have been identified as having a substance-abuse problem) on the availability of substance abuse evaluation and treatment resources).

Section 219.5 Definitions

FRA proposes to define the concept of *alcohol concentration* in the alternative. When used with respect to blood, the existing definition would apply (grams per 100 milliliters of whole blood, expressed as a percent). When used with respect to breath analysis, the term would refer to the alcohol in a volume of breath expressed in terms of grams of alcohol per 210 liters of breath (as indicated by an evidential breath test under this part). The effect of this is to avoid fruitless controversy over the breath/blood partition. Contemporary motor vehicle statutes already embody this approach, consistent with recommendations of the National Highway Traffic Safety Administration. FRA needs a specific reference to alcohol concentration in blood because of the unique use of blood specimens under the post-accident testing program.

FRA proposes to expand its definition of *covered employee* to include supervisors for the first time in random alcohol and drug testing programs. Trainmasters, chief dispatchers, and others who directly supervise or control the actions of Hours of Service employees would be included, but coverage would be determined by function and not job title. FRA believes that the impact of this redefinition would be small, since many carriers already use their own authority to randomly test supervisory employees. Impairment of the faculties of the supervisor could result in issuance of instructions that could lead to unsafe practices or failure to identify unsafe practices by employees (including failure to identify or act on instances of alcohol/drug use or impairment). The supervisors involved would include supervisors of locomotive engineers, who have key roles in the administration of the locomotive engineer certification program (49 CFR part 240).

FRA solicits comment, however, on where the supervisory lines should be drawn. How direct must a manager's supervisory duties be, for him or her to be covered? How many persons would be included if only first-line supervisors of Hours of Service employees are included? To what extent may higher officers in the operating departments have occasion to issue safety-related instructions directly to train crews or dispatchers; and how should such cases be handled under the rule?

FRA introduces a new definition, *substance abuse professional* (SAP), which replaces the current definition of *EAP counselor* while carrying forward the same concept embodied in FRA's present rule. The new definition will accomplish two purposes. First, it provides a structure consistent with that of other regulated transportation industries. Second, the definition requires certification of the individual by an appropriate state regulatory body or an appropriate national standards organization. A physician qualified to practice in the field of substance abuse disorders would be within this definition.

FRA's current definition of EAP counselor recognizes that the counselor "owes a duty to the railroad to make an honest and fully informed evaluation of the condition and progress of the employee." This is important because the professional must place the interest of safety above other considerations when advising the employer concerning the return to duty decision. The Common Preamble requests comment on how best to carry this concept forward in the context of these proposed amendments.

FRA would also substitute *substance abuse professional* for *EAP counselor* wherever that term appeared in the text of the Locomotive Engineer Certification rule. Commenters are welcome to suggest other changes that may be necessary to conform the language of 49 CFR part 240 to the language of this part.

Section 219.9 Responsibility for Compliance

Paragraph (a)

FRA proposes to conform this section to the recently enacted Rail Safety Enforcement and Review Act (RSERA), Public Law No. 102–365, which amended the Federal Railroad Safety Act of 1970 (FRSA) (See 45 U.S.C. 438(a)). The proposed amendment makes clear that this part, like all regulations issued under authority of the FRSA, applies not only to railroads but also to any independent contractors, agents, lessors, and lessees who provide goods and services to railroads. The amendment would also raise the minimum penalty for violations of this part from $250 to $500, as mandated by the RSERA.

Section 219.11 General Conditions for Chemical Tests

Paragraph (c)(4)

A new paragraph would be added to provide for the release of breath alcohol test results to FRA; the release of body fluid test results for alcohol is already provided for in paragraph (d) of this section. Covered employees would be deemed to have consented to the release of alcohol test results to FRA.

Paragraph (g)

Since current requirements for supervisory training for drugs are three hours in duration, and since reasonable suspicion training for drugs will now be required rather than merely authorized, FRA proposes to make supervisory training mandatory for both alcohol and drugs, with a minimum of three hours set aside for the combined training. Programs should cover the signs and symptoms of drug abuse, and post-accident testing criteria and collection procedures. FRA also recommends that programs include training on long term indicators of substance abuse that could provide a basis for intervention and referral.

Reasonable suspicion training programs are required to be filed with FRA. FRA's Field Manual provides curriculum materials for this purpose. Most major railroads have previously provided training of this kind.

Section 219.13 Preemptive Effect

Section 219.13, which states the preemptive effect of safety regulations issued under the FRSA (See 45 U.S.C. 434), would remain unchanged. The Act expressly did not provide a new preemption standard; instead, it

amended the FRSA to require the Secretary to issue rules, regulations, standards, and orders relating to alcohol and drug use in railroad operations.

Section 219.19 Field Manual

FRA will revise its Field Manual to include guidance on the new random alcohol testing procedures. After revision is complete, FRA will publish a Notice in the **Federal Register** announcing where copies of the updated manual can be obtained.

Section 219.21 Information Collection

As discussed above, FRA is proposing a management information system which would replace FRA's existing reporting requirements in part 217. The drug program portion of the MIS is published elsewhere in a separate NPRM in today's **Federal Register**. FRA now proposes, in new § 219.801, data elements that are specifically tailored to capture employer information that will become available after mandatory alcohol testing has been implemented.

Section 219.23 Railroad Policies

The proposed standard alcohol testing custody and control form published elsewhere in today's **Federal Register** in the Department's revisions to 49 CFR part 40 would be incorporated into subpart H of part 219 of FRA's regulations. It is FRA's desire that this form provide both the requisite notice to the employee that the test is being conducted under Federal requirements and written confirmation of the basic reason for the test (*e.g.*, random selection, reasonable suspicion, etc.).

Under § 219.601(d), notice to all covered employees was a precondition of random drug testing implementation. The notice had to include, among other information, the consequences of a violation of § 219.102 of this part (or any applicable railroad rule) and the employee's rights under subpart E of this part. FRA proposes to expand upon this notice concept in § 219.23(d) to require every railroad to disseminate information to each covered employee on the policies and procedures that the railroad will institute to comply with the requirements of this part. The railroad may also supply materials on its voluntary mark-off program, if it has one.

As discussed earlier in the application section, FRA would now require railroads to publish information on identifying and treating substance abuse problems to each employee. FRA hopes that this will encourage the employee with a substance abuse problem to self-refer for treatment, since the names, addresses and telephone numbers of substance abuse professionals, treatment programs and counseling programs will be supplied to all employees, not just those who have been identified as needing treatment. An employee can thus obtain such information without fear of stigmatization.

When combined, the proposed information requirements in this section should reinforce each other in encouraging the employee with a substance abuse problem to seek treatment before detection.

Subpart B—Prohibitions

Section 219.101 Alcohol and Drug Use Prohibited

FRA proposes a new paragraph, § 219.101(a)(3), that would prohibit a safety-sensitive employee from using alcohol either for four hours before reporting to perform covered service, or for the period of time running from when the employee receives a "call," or notice to report for covered service, to when the employee actually reports for covered service, whichever is the lesser of the two periods. A railroad would also be prohibited, through the employer's duty to prevent violations of § 219.101 and § 219.102, from allowing an employee to report for covered service, or go or remain on duty in covered service, if the railroad has actual knowledge that the employee is in violation of § 219.101(a)(3). This proposal would conform to the OST pre-duty abstinence proposal published elsewhere in today's **Federal Register**.

Is this pre-duty prohibition workable, in light of the very real problem posed for "short-call" employees, such as those who operate trains in pool crew service and off extra boards and signal maintainers who are subject to call without notice round the clock to handle "trouble calls?" FRA solicits suggestions on this problem, but proposes to alleviate it by allowing these employees (who are typically subject to a call of no more than two hours prior to time of reporting), to be in compliance with the pre-duty prohibition if they abstain from using alcohol from the time they are called to the time they report, even if that period of abstention runs for less than four hours before reporting to perform covered service. FRA believes that to do otherwise would be to impose total prohibition of alcohol use on short-call employees, which FRA believes would reduce the credibility of the prohibitions and thereby potentially reduce overall compliance. Comment is, of course, welcome on this proposal.

Section 219.104 Responsive action.

Paragraph (a)

FRA would revise this paragraph to clarify when the hearing rights, return to service conditions, follow-up tests, and information requirements contained in this section and § 219.105(c) apply. These sections would apply when the railroad has persuasive evidence that an employee has violated § 219.101 or 219.102, or when an employee refuses to provide breath or a body fluid sample when required to by the railroad under a mandatory provision of this part (post-accident, reasonable suspicion, and random testing). These sections do not apply when an applicant's pre-employment or pre-duty test indicates the misuse of alcohol or controlled substances, or when an applicant refuses to submit to a pre-employment or pre-duty test.

Paragraph (c)

FRA proposes to consolidate all of the hearing procedures listed elsewhere in this part into one common section, § 219.104(c), for ease of reference. Thus, the paragraphs that outlined hearing procedures in § 219.213(b), for a refusal to undergo post-accident testing, and in § 219.609(b), for a refusal to undergo random testing, would be deleted. These paragraphs had merely restated procedural rights already contained in § 219.104(c); there would be no substantive changes made by this consolidation.

Paragraph (d), Return to Covered Service

FRA proposes deletion of its current procedures concerning optional blood tests and return to service tests for employees who test positive on a breath alcohol test, since all alcohol testing procedures would be subsumed into subpart H, which would incorporate by reference the new alcohol testing procedures proposed by OST in 49 CFR part 40 elsewhere in today's **Federal Register**.

Paragraph (e)

FRA also proposes that an employee's first year of followup testing after a post-removal return to covered service include a minimum of six unannounced tests. The proposed regulatory text provides that these follow-up tests would track the basis for the employee's removal; that is, an employee who was removed for misuse of controlled substances or for refusing to provide body fluid samples under a mandatory provision of this part would be follow-up tested only for drugs, while an employee who was removed for misuse

of alcohol or for refusing to provide breath under a mandatory provision of this part would be follow-up tested only for alcohol.

FRA is concerned about the issue of polyabuse, however, and seeks comment on requiring both forms of testing. Prior testimony and comments in this docket suggest that a significant number of employees combine drug misuse with alcohol misuse. Consequently, FRA's Locomotive Engineer Qualifications Rule (49 CFR part 240) requires a minimum of six unannounced drug tests and six unannounced alcohol tests in an employee's first year of follow-up testing. Should this pattern be extended to other safety-sensitive employees? The Common Preamble also seeks comment on this approach.

FRA's proposed testing minimums are based on experience gained in compliance reviews that have indicated insufficient attention to follow-up by some railroads. Railroads would remain free to schedule additional testing, if desired, for the 48 months following this first year of mandatory follow-up testing.

Additional follow-up tests would be permitted either under an established program approved by a substance abuse professional (*e.g.*, a qualified medical director) that treats all similarly situated employees the same (*e.g.*, unannounced tests averaging once per month for three years for all clinically diagnosed cocaine dependent employees) or per the judgment of the particular substance abuse professional handling an individual case. This is important to allow the employer to establish objective criteria where the substance abuse professional may be reluctant to take on an "enforcement" role (as opposed to a "therapeutic" role) in the context of a particular case.

Where evaluation has led to a medical work-up, the advice of a physician should be taken into account (physical dependencies, related medical conditions, etc.). The employer may return the employee to covered service only upon the recommendation of the substance abuse professional.

Paragraph (f)

FRA proposes this paragraph to cover those situations where an employee's test result indicates an alcohol concentration between .02 percent and .039 percent; this BAC would be below the level of per se prohibition, but could still indicate some level of impairment. In practice, FRA anticipates that the employee would be sent home for the duration of the anticipated assignment plus eight or ten hours (representing the normal rest period under the Hours of Service Act); however, in no case should the employee be allowed to report for covered service until a minimum of eight hours has elapsed since administration of the confirmatory test.

FRA joins other DOT agencies in proposing that a railroad be permitted to allow an offending employee to remain in the workplace and be restored to service after a later test indicating an alcohol concentration of less than .02. FRA is concerned, however, that this proposal could undermine Rule G, the longstanding railroad industry rule that bars working with any alcohol in the employee's system. Comment is requested on this industry-specific consideration.

Paragraph (g):

This proposed paragraph emphasizes that the due process and follow-up testing requirements contained in this section apply only when a railroad removes an employee in response to a test conducted under Federal authority.

Section 219.107 Consequences of Unlawful Refusals

As discussed later in § 219.300, FRA proposes a minimum nine month disqualification for a refusal to submit to a mandatory reasonable suspicion test. Since the same consequence is already required for refusal to submit to a post-accident or random test, FRA would consolidate the consequences of an unlawful refusal into one section for ease of reference. This consequence would also apply to refusal of a follow-up test. Any language in subparts C and G on the consequences of a refusal would be deleted and restated in the new § 219.107 without substantive change. Thus, § 219.213(a), on refusal to undergo post-accident testing, § 219.603 and § 219.609, on refusal to undergo random testing, and the new § 219.300(c), on refusal to undergo reasonable suspicion testing, would all refer the reader to § 219.107 for delineation of the consequences. This restructuring, similar to that proposed for hearing procedures in § 219.104, would underscore the uniformity of consequences for a refusal to submit to testing under this part.

Subpart C—Post-Accident Toxicological Testing

As mentioned in OST's NPRM, the Common Preamble discussion of post-accident testing does not apply to FRA's program, which unlike those of other modes, requires full toxicological testing following designated accidents and casualties. FRA is interested in comments on the possible use of breath alcohol testing as a substitute, for those cases where collection times might be shortened.

Except for the proposed changes below, FRA would retain its existing subpart C. The amendments to testing criteria reflect the very low positive rates experienced in recent years.

Section 219.201 Events for Which Testing is Required

FRA proposes amending its property damage criteria for major train accidents and for impact accidents as follows:

Paragraph (a)(1)(iii) [Damage Threshold for Major Train Accidents]

FRA would redefine major train accidents by raising the amount of railroad property damage to require testing only after accidents that cause $1,000,000 or more in damage. In doing so, FRA hopes to capture fewer events by removing many track- and equipment-caused accidents from mandatory post-accident testing. FRA's fatality, passenger train, and hazardous materials criteria would remain unchanged.

During 1990 and 1991, 66 accidents involved damage between $500,000 and $1,000,000 (an average of 33 per year). Only 8 of these accidents (on average 4 each year) appear to have been primarily caused by human factors. These types of accidents tend to be derailments, predominantly caused by track or equipment. FRA believes that, where high-damage accidents are of sufficient public interest to warrant automatic post-accident testing, other qualifying criteria will generally apply (passenger train, release of hazardous materials accompanied by evacuation or injury, fatality, etc.). Even where other criteria do not apply, railroads will be required to conduct urine drug tests and breath alcohol tests if use or impairment is reasonably suspected. In addition, railroads will be authorized to conduct such tests if there is a reasonable belief that the particular employee played a role in the cause or severity of the accident. Comment is requested as to whether subpart D (urine, breath) testing should be required where there is such a belief. What logistical difficulties would be posed by such a requirement? To what extent would the complexity of testing requirements confound supervision seeking to implement the regulations?

Paragraph (a)(2)(ii) [Damage Threshold for Impact Accidents]

FRA would also raise the amount of railroad property damage for impact accidents, to include only those non-

injury accidents that cause $150,000 or more in damage. The National Transportation Safety Board (NTSB) uses the same reporting threshold (although the NTSB, unlike FRA, includes damage to lading). This damage threshold would allow FRA to capture data from virtually all of the events that the FRA and NTSB would investigate, while eliminating the requirement for testing following predominantly yard accidents.

Approximately 25 "impact accidents" each year fall between the existing $50,000 threshold and the proposed $150,000 threshold but do not qualify for testing under other criteria. Unlike accidents that qualify only under the $500,000 criterion, impact accidents are normally caused by human factors. However, many accidents that result in damage meeting the current $50,000 criterion are low speed switching events, often involving overspeed impact with standing equipment. Most of these events involving damage of less than $150,000 are not sufficiently serious to warrant investigation by either FRA or NTSB, given the effort expended by the railroad in its own investigation and other priorities of the investigating agencies. NTSB, for instance, investigates only about five accidents per year that fall in this range. Even though most impact accidents do involve human factors, few positive tests have resulted in recent years. Further, as in the case of the $500,000 criterion, railroads already have in place for-cause drug testing programs that would replace mandatory post-accident testing; and the other measures implemented through the Act will result in equally extensive use of breath alcohol testing in these circumstances. Again, comment is requested as to whether Subpart D testing should be required for these events (between the existing $50,000 threshold and the proposed $150,000 threshold) where there is a reasonable belief that the particular employee contributed to the accident, as well as to any complications or problems that might result.

Together, these two proposed changes in testing criteria would reduce by more than one-third the number of cases in which invasive blood testing would be required. FRA believes that railroads will conduct testing under subpart D or their own for-cause testing programs, and this data is required to be reported to FRA.

Paragraph (b) [Exceptions]

FRA solicits comment on whether accidents that otherwise qualify but are clearly attributable to vandalism should be excepted from post-accident testing. FRA believes that the fairness policy behind the existing exceptions for grade crossing and "Act of God" accidents applies equally here, since accidents caused by acts of vandalism are likewise wholly beyond the control of the employees involved. Consistent with the other exceptions, the proposed vandalism exception would hold railroad supervisors to § 219.201(c)'s reasonable inquiry/good faith judgment standard when making determinations.

Section 219.205 Sample Collection and Handling

In its final rule, FRA will amend the procedures for obtaining, marking, preserving and handling post-accident samples set forth in appendix C to part 219 to reflect the modifications to procedures, toxicology kits, forms, and instructions required to accommodate the urine split sample procedures mandated by the Act.

FRA appendix C procedures already "split" blood samples into two 10 milliliter tubes (each of which is sealed). Post-accident experience to date shows that the first 10 milliliter tube has almost always been sufficient for FRA purposes. However, there are scenarios, such as a multi-drug positive, that could require more than 10 milliliters of blood for confirmation. Obviously, if blood from the second tube is required for testing, that tube can no longer stay intact as a split sample. FRA realizes that special aliquoting procedures may conceivably be necessary for these rare instances, and solicits comment thereupon.

Section 219.211 Analysis and Follow-up

FRA will add language specifying that the MRO must conduct a review and make a report for each post-accident positive result. This is already being done under the existing rule, but the need for clarification has been brought to FRA's attention.

Additional clarifying and conforming changes to Subpart C are proposed in the rule text below.

Subpart D—Authorization to Test for Cause

Section 219.300 Mandatory Reasonable Suspicion Testing

FRA would change the title of subpart D from "Authorization to Test for Cause" to "Testing for Cause" to emphasize that reasonable suspicion testing is no longer discretionary. Under the Act, reasonable suspicion testing for alcohol and controlled substances changes from an authorized option to a mandatory program. The accident/incident and rule violation components of FRA's for cause testing program would remain optional for both alcohol and drug testing.

FRA expects that alcohol and drug reasonable suspicion testing will frequently interrelate, since supervisory observations will often be unable to target a particular substance as the medium of abuse. FRA suggests the following process: in cases that involve obvious alcoholic beverages on the breath or that involve symptoms consistent with either alcohol or controlled substance use, the employer should start with breath analysis. If the test indicates a BAC of .04 percent or more, the employer would have the option of conducting drug urinalysis. If the breath test is negative, the employer should conduct a urine drug test to continue the search for an explanation. (Cannabinoids and opiates sometimes produce symptoms that are also consistent with use of alcohol.) Where controlled substance use is specifically suspected, only a urine drug test should be conducted. (Additional guidance and examples can be found in the common preamble.)

FRA also proposes to add long-time decline in job performance as another factor that the employer may consider when determining whether to conduct a reasonable suspicion test on an employee. Indicators such as absenteeism, tardiness, and excessive and unsupported use of sick leave, have repeatedly been demonstrated to have a direct correlation with substance abuse. These could be considered, however, only in connection with contemporaneous observations of behavior or performance.

As in all other types of testing, FRA would specify a nine month disqualification from covered service for any employee who refused a reasonable suspicion test, since refusal would be a separate offense. Consistent with prior decisions on FRA-mandated testing, attachment of this definite consequence to a refusal serves a number of important purposes:

- It would provide a sanction for failure to provide a specimen as specifically required by agency rule (i.e., the offense would not go unpunished). This sanction could be carried out by the employer without any federal involvement.
- It would avoid serious conflict with employer policies, which typically treat refusal as insubordination (a serious rule violation in the railroad industry).
- It would encourage production of the specimen by the substance abuser, thus providing critical initial

information (confirmation that a controlled substance or prohibited concentration of alcohol was present and the identity of the controlled substance) to facilitate intervention by helping to break through the employee's barrier of denial.

FRA would require two trained supervisors, where feasible, to make a drug test reasonable suspicion determination. For alcohol, however, where the signs and symptoms of abuse are well-known, FRA believes that a determination by one trained supervisor that the criteria for reasonable suspicion exist is sufficient for testing. No pattern of abuse has been observed with regard to reasonable suspicion determinations under existing rules.

Supervisors will be expected to know the signs and symptoms of both alcohol abuse and drug abuse. (FRA notes that many substance abusers are polyabusers who abuse more than one controlled substance or combine alcohol abuse with drug abuse). Supervisors would be trained in accordance with the revised program requirements contained in § 219.11(g). FRA believes that most present supervisors have already received training of this kind.

Section 219.301 Testing for Reasonable Cause

As discussed above, FRA would retain accident/incident and rule violation testing as authorized options, while adding the criteria for mandatory reasonable suspicion to the circumstances that constitute reasonable cause for administration of breath alcohol tests and/or urine drug tests under this section. In addition, FRA would clarify the criteria for accident/incident testing for both alcohol and drugs, by emphasizing that this authority could be used to test only when a supervisory employee has "a reasonable belief, based on affirmative evidence of unsafe conduct, that the employee's acts or omissions contributed to the occurrence or severity of the accident or incident". FRA proposes including this phrase to stress that railroads may not use FRA accident/incident authority as a pretext for unnecessary testing. Some carriers have interpreted the current version of this section to mean that the mere happening of an accident constitutes grounds to test an employee, by assuming that the employee's failure to avoid or prevent the accident is equivalent to contributing to the accident. The proposed language would underscore that this is not an acceptable interpretation; the employer must be able to articulate a factual basis for believing the employee deliberately or negligently contributed to the occurrence or severity of the accident or incident before electing to test that employee.

Subpart F—Pre-employment Tests

Section 219.501 Pre-Employment Tests.

Paragraph (a)

Pursuant to the statutory mandate, FRA proposes to require pre-employment breath alcohol tests, in addition to urine drug tests. This section would be reorganized for clarity.

Paragraph (e):

FRA proposes a "grandfathering" provision to allow a covered employee who has "passed" both a pre-employment alcohol and a pre-employment drug test administered under the regulations of another DOT agency to be exempt from the testing requirements of § 219.501(a), if the railroad ensures (through a check of the records of any prior employer of whom the railroad has notice) that the employee has had no violations of this part or of the alcohol and drug misuse rules of another DOT agency within the last six months.

Subpart G—Random Testing Programs

FRA proposes various technical and conforming amendments to the random drug testing provisions and also proposes to add a new section addressing random alcohol testing.

Additionally, for both alcohol and drug random testing programs (§§ 219.601(b)(2) and 219.607(b)(2)), FRA proposes allowing any railroad that tests through a consortium to calculate its annual testing rate in one of two ways. FRA would allow a consortium to calculate for each member employer or calculate for the total number of covered employees subject to random testing by the consortium.

Section 219.607 Railroad Random Alcohol Testing Programs

FRA proposes, for the most part, to duplicate the notice requirements and criteria for plan approval that were used to implement random drug testing, including gradual submission and implementation schedules that would allow smaller carriers additional time to develop and execute random alcohol testing plans. However, FRA would not repeat the phase-in provisions of § 219.601(b)(2), which allowed each railroad to incrementally increase its random testing rate, so long as the railroad's program conducted testing at the required annualized rate (proposed to be set in the range of 10–50 percent) by the end of the first year of testing. At the time of random drug testing implementation, few carriers had even anecdotal experience in how to design and manage a random drug testing program, and technological capabilities were unknown. By contrast, alcohol testing technology has long been validated through widespread use by law enforcement, and all but the smallest or newest of carriers now have experience in overseeing substance abuse programs. FRA believes that carriers can achieve any reasonable testing rate at the inception of random alcohol testing without any phase-in; commenters are invited to discuss this assumption.

The short half-life of alcohol in the body will have to be considered. FRA proposes to offer railroads the flexibility to conduct random alcohol testing at any time the employee reports for work and at any time during the duty tour (except for when the employee is expressly relieved of any responsibility for the performance of safety-sensitive duties). For instance, some railroads perform all random drug tests at the end of the work day. To be effective with respect to employees reporting for duty, it may be necessary to require that at least some breath alcohol tests be performed at the beginning of the day or in the midst of the duty tour. Moreover, there may be situations in which it is not possible to conduct a urine collection and a breath test within the allowed hours of service. Certain railroads may find it more advantageous from the point of view of deterrence and efficiency to do "sweep" type random alcohol tests requiring all employees marking off duty or reporting for duty at a given point, on any given day, to be tested (with the location and date selected by use of objective and neutral criteria).

Another option that FRA is considering would be to adopt a modified version of the Federal Highway Administration's proposed § 382.809 (published in their alcohol NPRM elsewhere in today's **Federal Register**) which would limit an employer's time period within which to notify an employee of his or her selection for random alcohol testing selection to within 30 minutes before to 30 minutes after the employee operates a commercial motor vehicle. For rail purposes, FRA would allow the employer a notification period running from 30 minutes before to 30 minutes after the employee performs safety-sensitive functions, plus applicable travel time. FRA is interested in comment on the feasibility of this proposal. Is a one hour notification

window too short? How should travel time be defined and computed?

The important factor is that the date or time of the test should not be predictable from the point of view of the employee. It has been suggested that random tests should be encouraged at the beginning of the duty tour to promote deterrence; however, this ignores the scenario in which the employee reports sober to avoid detection but then proceeds to drink on the job. Pre-duty testing may be an obvious strategy for those employees who come into contact with the public and are closely observed during their duty tour, but the pattern of testing must be varied to be effective for most railroad employees.

Subpart H—Procedures and Safeguards for Urine Drug Testing and for Breath Alcohol Testing

Section 219.707 Review by MRO of Urine Drug Testing Results

Paragraph (d)

FRA proposes to delete the retest option contained in § 219.709, which allowed an employee 60 days to request that the remainder of his or her original specimen be retested under the procedures specified in that section. However, an employee whose test result indicates the presence of a controlled substance would still have 60 days (from when he or she received actual notice of the test results) to request a test of his or her split sample. The split sample is a second sample, taken at the same time as the original, and mandated by the Act.

FRA is concerned that a 72 hour period (the statutory minimum, and the period specified in the OST split sample procedures published in today's **Federal Register**) may be too short to allow an employee to obtain timely advice on how to exercise his or her rights, particularly where weekends, holidays, personal injuries and other potential delay factors are involved. Should the original 60-day period be retained, since all post-accident positive samples must be retained for two years anyway? FRA solicits comment on whether this additional protection for employees is necessary.

Subpart I—Annual Report

Section 219.801 Reporting of Alcohol Misuse Prevention Program Results in a Management Information System

As discussed earlier, FRA is proposing a comprehensive plan to obtain and analyze employer alcohol and drug program data. The information collection requirements for alcohol programs are included in this NPRM; FRA is publishing a separate NPRM elsewhere in today's **Federal Register** that contains comparable elements for drug program data and introduces the MIS in greater detail. Once a year, railroads would be required to submit a standard form containing both sets of data to FRA. (A new appendix D, which sets forth FRA's proposed mode-specific form, is included in the drug program MIS.) FRA would use this railroad feedback to evaluate its regulations to determine whether they are achieving their intended purpose.

Subpart J—Recordkeeping Requirements

Sections 219.901 and 219.903 Retention of Breath Alcohol Testing Records and Urine Drug Testing Records

FRA proposes similar recordkeeping retention requirements for alcohol and drug misuse prevention programs. The alcohol and drug record data formerly contained in § 219.713 would be integrated into both sets of recordkeeping.

Section 219.905 Access to Facilities and Records

FRA proposes to replace § 219.713's language on access to records with a new section following the discussion in the common preamble that would allow an employer to release an employee's alcohol and drug test records only with the written consent of the employee, with the exceptions of when access is requested by a DOT mode or when access is requested by a decisionmaker in a legal proceeding initiated by or on behalf of the employee.

Section 219.104 proceedings originate upon the employee's demand for a post-suspension hearing. Thus, while the employer may make the determination of whether to remove or merely suspend an employee, the employee is the initiator of the proceedings. This interpretation, consistent with the current language of 49 CFR part 40, affords due process protections to the employee while permitting the employer to disclose the employee's records to the decisionmaker. In keeping with common language proposed today to DOT agency alcohol programs, FRA requests comment as to whether the employer may also disclose an employee's records to the decisionmaker in related proceedings arising indirectly from the employee's violation of this part, such as Federal Employer's Liability Act or railroad unemployment compensation proceedings.

Request for Comments

Parties commenting on these proposed testing requirements are requested to file their comments with both the DOT's Docket in the part 40 rulemaking and with FRA's in this rulemaking. FRA also asks commenters to highlight any FRA-specific issues regarding the testing requirements. FRA will make available an opportunity for oral presentations, as required by section 202 of the Federal Railroad Safety Act of 1970, [at locations and dates to be determined].

FRA reserves the right to modify its proposals in light of comments received.

Executive Order 12291 and DOT Regulatory Policy and Procedures

This proposal is not "major" under Executive Order 12291. It is significant under the Department of Transportation's Regulatory Policy and Procedures.

FRA is proposing to require railroads to test, randomly, their employees performing safety sensitive functions to determine if these employees are working with dangerous levels of alcohol in their blood. The railroads would also be required to test new employees before allowing them to perform safety-sensitive functions. The regulation would also change reasonable suspicion testing from a permitted option to a required program, although that change is not expected to have significant costs or benefits.

Alcohol causes railroad accidents by limiting the intoxicated employee's ability to respond safely to the challenges of the job. Many accidents have been caused by alcohol. The FRA estimates that about two percent of all accident costs, excluding trespassers and grade crossing accidents, are related to alcohol abuse, and would not exist but for alcohol use.

The proposed rule would be effective because it would deter employees from drinking when they consider the consequences of being caught by a random test. The FRA estimates that half of current drinking would be deterred.

This rule will affect approximately 200 railroads and 80,000 workers. The rule will reduce accident costs by about one third of one percent, or one million dollars in the first year. It will cost about 2.5 million dollars in the first year. Over ten years it will cost, in terms of net present value, about 8.4 million dollars, and return benefits of 13.1 million dollars, for a benefit to cost ratio of 1.6 to 1. The program will cost about $62 per employee screened, including the cost of confirmation testing.

The FRA estimates that half of the tests will be administered by railroads, and the other half by third party contractors. There will be about 22,000 screening tests in the first year, 11,000 of which will be tested by contractors, and 11,000 by railroads.

The Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 was enacted by Congress to ensure that small entities are not unnecessarily and disproportionately burdened by Government regulations. FRA certifies that this proposal would not have a significant economic impact on a substantial number of small entities.

FRA specifically solicits comment on means to limit any reporting burden on small entities and on the impact of the proposed reporting requirements on small railroads not subject to the current requirements (certain railroads with fewer than 400,000 manhours of employment).

Federalism Implications

The proposed rulemaking action would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, FRA has determined that this notice does not have sufficient federalism implications to warrant preparation of a Federalism assessment.

Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96–511) applies to this notice of proposed rulemaking because it changes several approved collections of information and initiates several new information collection requirements. As mentioned earlier, FRA will be publishing a Management Information System to collect both alcohol and drug misuse prevention program data. OST and FRA have estimated that for drug testing program data only, preparation of the annual report would require approximately 12–16 hours in the case of a small company with two million or less manhours, eight days-two weeks in the case of a medium company with two million to ten million manhours, and three weeks-two months in the case of a large company with in excess of ten million manhours. While there is no data available to corroborate the accuracy of these estimates, since MIS implementation has yet to take place, the manhours needed for railroads to institute a data system, and compile, maintain and prepare the information required for the alcohol data elements of the MIS system should be comparable. Parties are invited to submit written comments on this issue, and on the practicality of the new, comprehensive recordkeeping retention requirements that would replace § 219.713 for drug testing programs. Parties should address their views to Gloria D. Swanson, Federal Railroad Administration, room 8314, 400 Seventh Street, SW., Washington, DC 20590 and to the Regulatory Policy Branch (OMB No. 2130–526), Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW, Washington, DC 20530, Attention: Desk Officer for FRA. Copies of any such comments should also be submitted to the docket of this rulemaking at the address provided above, and to the docket for the DOT rulemaking published elsewhere in today's **Federal Register**.

FRA will request OMB approval of these revised information collection requirements. A **Federal Register** notice will be published when Paperwork Reduction Act approval is obtained. Current information collection requirements under part 219 were approved under OMB No. 2130–0526.

List of Subjects in 49 CFR Part 219

Alcohol and drug abuse, Railroad safety, Reporting and recordkeeping requirements.

Accordingly, for the reasons stated in the preamble, FRA proposes to amend 49 CFR part 219 as follows:

PART 219—CONTROL OF ALCOHOL AND DRUG USE

1. Authority for part 219 continues to read as follows:

Authority: 45 U.S.C. 431, 437, and 438, as amended; Pub. L. 100–342; and 49 CFR 1.49(m).

2. Part 219 is amended by removing the terms "EAP counselor" and "counselor" wherever they appear and by replacing them with "Substance abuse professional" and "professional" respectively; and by removing "$5,700 in 1989 and 1990" and by adding in its place "$6,300 in 1992" wherever this phrase appears in the text.

3. Section 219.3 is amended by revising paragraph (b)(2) to read as follows:

§ 219.3 Application.

* * * * *

(b) * * *

(b)(2) Subparts D, E, F, G, I, and J do not apply to a railroad that employs not more than 15 employees covered by the Hours of Service Act (45 U.S.C. 61–64b) and that does not operate on tracks of another railroad (or otherwise engage in joint operations with another railroad) except as necessary for purposes of interchange.

* * * * *

4. Section 219.5 is amended by adding, in alphabetical order, definitions for *alcohol concentration (or content), alcohol use, confirmatory test, consortium, DOT agency, initial alcohol test (or screening test), performing, refuse to submit,* and *substance abuse professional;* by removing the definition for *EAP counselor;* by revising the definitions for *alcohol, covered employee, covered service* and the first sentence of *independent,* as follows:

§ 219.5 Definitions.

As used in this part—

Alcohol means ethyl alcohol (ethanol).

Alcohol concentration (or content) means the alcohol in a volume of breath expressed in terms of grams of alcohol per 210 liters of breath (as indicated by an evidential breath test under this part) or grams of alcohol per 100 milliliters of whole blood. When the indicated alcohol concentration of a covered employee on an initial breath alcohol test is different from an indicated alcohol concentration on a confirmatory test, the employee shall be considered to have the lower indicated concentration.

Alcohol use means the consumption of any beverage, mixture or preparation, including any medication, containing alcohol.

* * * * *

Confirmatory test means a second analytical procedure, separate from the screening test, to determine the concentration of alcohol in a covered employee's system. The confirmatory test may or may not use a different chemical principle from that of the screening test, but shall employ a scientifically recognized method of testing capable of providing quantitative data regarding alcohol concentration. For specific requirements concerning breath analysis testing devices, see Part 40 of this title.

Consortium means an entity, including a group or association of employers or contractors, that provides alcohol testing as required by this part or other DOT alcohol testing regulation and that acts on behalf of the employers.

* * * * *

Covered employee means a person who has been assigned to perform service subject to the Hours of Service Act (45 U.S.C. 61–64b) during a duty tour, whether or not the person has performed or is currently performing such service, any person who performs such service, and any person

responsible for or who undertakes direct supervision or control of the aforementioned individuals with respect to their safety-sensitive duties. (An employee is not "covered" within the meaning of this part exclusively by reason of being an employee for purposes of section 2(a)(3) of the Hours of Service Act, as amended (45 U.S.C. 62(a)(3)).) For the purposes of pre-employment/pre-duty testing only, the term covered employee includes a person applying to perform a safety-sensitive function.

Covered service means service for a railroad that is subject to the Hours of Service Act (45 U.S.C. 61–64b), or service that involves direct supervision or control of persons performing such service, but does not include any period the employee is relieved of all responsibilities and is free to come and go without restriction.

* * * * *

DOT Agency means an agency (or "operating administration") of the United States Department of Transportation administering regulations requiring alcohol or controlled substance testing (14 CFR parts 65, 121, and 135; 49 CFR parts 199, 219, 382 and 654) in accordance with part 40 of this title.

* * * * *

Independent with respect to a medical facility, means not under the ownership or control of the railroad and not operated or staffed by a salaried officer or employee of the railroad. * * *

* * * * *

Initial alcohol test (or screening test) means an analytical procedure to determine whether a covered employee may have a prohibited concentration of alcohol in his or her system.

* * * * *

Performing (a safety-sensitive function): an employee is considered to be performing a safety-sensitive function during any period in which he or she is on duty and is actually performing, standing by to perform, or immediately available to perform such functions.

* * * * *

Refuse to submit (to an alcohol test) means that a covered employee fails to provide breath for testing without a valid medical explanation after he or she has received notice of the requirement to be tested in accordance with the provisions of this part, or engages in conduct that clearly obstructs the collection process.

* * * * *

Substance abuse professional means a licensed physician (Medical Doctor or Doctor of Osteopathy), or a licensed or certified psychologist, social worker, or employee assistance professional with knowledge of and clinical experience in the diagnosis and treatment of alcohol and drug related disorders.

* * * * *

5. In § 219.9, amend paragraph (a) by revising the first sentence as follows:

§ 219.9 Responsibility for compliance.

(a) Any person (including but not limited to a railroad; any manager, supervisor, official, or other employee or agent of a railroad; any owner, manufacturer, lessor, or lessee of railroad equipment, track, or facilities; any independent contractor providing goods or services to a railroad; and any employee of such owner, manufacturer, lessor, lessee, or independent contractor) who violates any requirement of this part or causes the violation of any such requirement is subject to a civil penalty of at least $500 and not more than $10,000 per violation, except that: Penalties may be assessed against individuals only for willful violations; where a grossly negligent violation or a pattern of repeated violations has created an imminent hazard of death or injury, or has caused death or injury, a penalty not to exceed $20,000 per violation may be assessed; and the standard of liability for a railroad will vary depending upon the requirement involved. * * *

(b) * * *

6. Section 219.11 is amended by revising paragraph (b)(2); by redesignating existing paragraph (g) as paragraph (h); and by adding paragraphs (c)(4) and (g) as follows:

§ 219.11 General conditions for chemical tests.

* * * * *

(b)(1) * * *

(2) In any case where an employee has sustained a personal injury and is subject to alcohol or drug testing under this part, necessary medical treatment shall be accorded priority over provision of the breath or body fluid sample. No employee who is unable to urinate normally (based on the judgment of a medical professional that catheterization would be required) as a result of a personal injury, resulting medical treatment, or renal failure shall be required to provide a urine sample. Nothing in this section shall bar use of a urine specimen made available as a result of catheterization undertaken for medical purposes, provided the circumstances of such collection are fully documented and the specimen is otherwise handled in accordance with the applicable requirements of this title.

* * * * *

(c) * * *

(4) The results of any breath tests for alcohol conducted by or for the treating facility.

* * * * *

(g) Each supervisor responsible for covered employees (except a working supervisor within the definition of coworker under this part) shall be trained in the signs and symptoms of alcohol and drug influence, intoxication and misuse consistent with a program of instruction on file with FRA under part 217 of this part. Such a program shall, at a minimum provide information concerning the acute behavioral and apparent physiological effects of alcohol and the major drug groups on the controlled substances list. The program shall also provide training on the qualifying criteria for post-accident testing contained in subpart C of this part, and the role of the supervisor in post-accident collections described in subpart C and appendix C of this part. The duration of such training shall be not less than 3 hours.

* * * * *

§ 219.15 [Reserved]

7. Section 219.15 is removed and reserved.

8. Section 219.23 is amended by revising the section heading; revising paragraphs (a) and (b); and adding paragraphs (d) through (g), so that the section reads as follows:

§ 219.23 Railroad policies.

(a) Whenever a breath or body fluid test is required of an employee under this part, the railroad shall provide clear and unequivocal written notice to the employee that the test is being required under Federal Railroad Administration regulations. Use of the mandated DOT form for urine drug testing or breath analysis satisfies the requirements of this paragraph.

(b) Whenever a breath or body fluid test is required of an employee under this part, the railroad shall provide clear, unequivocal written notice of the basis or bases upon which the test is required (*e.g.*, reasonable suspicion, violation of a specified operating/safety rule enumerated in subpart D, random selection, follow-up, etc.). Completion of the alcohol testing form or urine custody and control form indicating the basis of the test (prior to providing a copy to the employee) satisfies the requirement of this paragraph.

* * * * *

(d) Each covered employee who has engaged in conduct prohibited by

subpart B of this part shall be advised by the railroad of the resources available to the employee in evaluating and resolving problems associated with the misuse of alcohol and controlled substances, including the names, addresses, and telephone numbers of substance abuse professionals and counseling and treatment programs.

(e) Each railroad shall provide educational materials that explain the requirements of this part, and the railroad's policies and procedures with respect to meeting those requirements. Each railroad shall provide written notice to every covered employee and to representatives of that employee's class or craft (if applicable) of the availability of this information.

(f) *Required content.* The materials to be made available to employees shall include detailed discussion of at least the following:

(1) The identity of the person designated by the railroad to answer employee questions about the materials.

(2) The classes or crafts of employees who are subject to the provisions of this part.

(3) Sufficient information about the safety-sensitive functions performed by those employees to make clear that the period of the work day the covered employee is required to be in compliance with this part is that period when the employee is on duty and is required to perform or is available to perform covered service.

(4) A railroad utilizing the accident/incident and rule violation reasonable cause testing authority provided by this part shall provide prior notice (which may be combined with the notice required by §§ 219.601(d)(1) and 219.607(d)(1)), to covered employees of the circumstances under which they will be subject to testing.

(5) The circumstances under which a covered employee will be tested under this part.

(6) The procedures that will be used to test for the presence of alcohol and controlled substances, protect the employee and the integrity of the sample, safeguard the validity of the test results, and ensure that those results are attributed to the correct employee.

(7) The requirement that a covered employee submit to alcohol and drug tests administered in accordance with this part.

(8) An explanation of what constitutes a refusal to submit to an alcohol or drug test and the attendant consequences.

(9) The consequences for covered employees found to have violated subpart B of this part, including the requirement that the employee be removed immediately from safety-sensitive functions, and the procedures under § 219.104.

(10) The consequences for covered employees found to have an alcohol concentration of .02 or greater but less than .04.

(g) *Optional provisions.* The materials supplied to employees may also include information on additional railroad policies with respect to the use or possession of alcohol and drugs, including any consequences for an employee found to have a specific alcohol concentration, that are based on the railroad's authority independent of this part. Any such additional policies or consequences shall be clearly and obviously described as being based on independent authority.

9. Section 219.101 is amended by revising paragraph (a)(2)(ii); and adding a new paragraph (a)(3) as follows:

§ 219.101 Alcohol and drug use prohibited.

(a) * * *

(2) * * *

(ii) Having .04 or more alcohol concentration in the breath or blood; or

* * * * *

(3) No employee may use alcohol for whichever is the lesser of the following periods:

(i) Within four hours of reporting for covered service; or

(ii) After receiving notice to report for covered service.

* * * * *

10. Section 219.104 is amended by revising paragraphs (a), (d), and (e); and adding paragraphs (f) and (g) as follows:

§ 219.104 Responsive action.

(a) *Removal from covered service.* (1) If the railroad determines that an employee has violated § 219.101 or § 219.102, the railroad shall immediately remove the employee from covered service and the procedures described in paragraphs (b) through (e) of this section shall apply.

(2) If an employee refuses to provide breath or a body fluid sample or samples when required to by the railroad under a mandatory provision of this part, the railroad shall immediately remove the employee from covered service, and the procedures described in paragraphs (b) through (e) of this section shall apply.

(3) This section and the information requirements listed in § 219.105(c) do not apply to applicants who refuse to submit to a pre-employment/pre-duty test or who have a pre-employment/pre-duty test with a result indicating either an alcohol concentration equal to or greater than .04, or the misuse of controlled substances.

* * * * *

(d) *Return to covered service.* An employee who has been determined to have violated § 219.101 or § 219.102 or who refused to cooperate in a breath or body fluid test under this part shall not be returned to covered service unless the employee has—

(1) Been evaluated by a substance abuse professional to determine if the employee is affected by a psychological or physical dependence on alcohol or one or more controlled substances or by another identifiable and treatable mental or physical disorder involving misuse of alcohol or drugs as a primary manifestation;

(2) Been evaluated by a substance abuse professional to determine that the employee has properly followed the prescribed rehabilitation program; and

(3)(i) Presented a urine sample for testing under subpart H of this part that tested negative for controlled substances assayed (in the case of an employee who has been determined to have violated a prohibition of § 219.101 or § 219.102 regarding possession or misuse of controlled substances or who refused to provide a body fluid sample or samples when required to by the railroad under a mandatory provision of this part); or

(ii) Presented breath for testing under subpart H of this part that indicated an alcohol concentration of less than .02 (in the case of an employee who has been determined to have violated a prohibition of § 219.101 regarding possession or misuse of alcohol or who refused to provide breath when required to by the railroad under a mandatory provision of this part).

(e) *Follow-up testing.* An employee returned to service under the above-stated conditions shall continue in any program of counseling or treatment deemed necessary by the substance abuse professional and shall be subject to a reasonable program of follow-up testing without prior notice for a period of not more than 60 months following return to service, with a minimum of six tests to be performed on an unannounced basis during the first 12 months of follow-up testing. Such tests shall be performed consistent with the requirements of subpart H of this part.

(1) If the employee has been determined to have violated a prohibition of § 219.101 or § 219.102 regarding possession or misuse of controlled substances, or if the employee refused to provide a body fluid sample or samples when required to by the railroad under a mandatory provision of this part, the employee shall be subject to urine drug testing as specified in this section.

(2) If the employee has been determined to have violated a

prohibition of § 219.101 regarding possession or misuse of alcohol, or if the employee refused to provide breath when required to by the railroad under a mandatory provision of this part, the employee shall be subject to breath alcohol testing as specified in this section.

(f) No covered employee tested under the provisions of this part who is found to have an alcohol concentration of .02 or greater but less than .04 shall perform or continue to perform safety-sensitive functions for a railroad, nor shall a railroad permit the employee to perform or continue to perform safety-sensitive functions, until:

(1) The employee's alcohol concentration measures less than .02; or

(2) The start of the employee's next regularly scheduled duty period, but not less than eight hours following administration of the test.

(g) This section does not apply to actions based on breath or body fluid tests for alcohol or drugs that are conducted exclusively under authority other than that provided in this part (*e.g.*, testing under a company medical policy, for-cause testing policy wholly independent of subpart D of this part, or testing under a labor agreement).

11. Part 219 is amended by adding § 219.107 as follows:

§ 219.107 Consequences of unlawful refusal.

(a) An employee who refuses to provide breath or a body fluid sample or samples when required to by the railroad under a mandatory provision of this part shall be deemed disqualified for a period of nine (9) months.

(b) Prior to or upon withdrawing the employee from covered service under this section, the railroad shall provide notice of the reason for this action, and the procedures described in § 219.104(c) shall apply.

(c) The disqualification required by this section shall apply with respect to employment in covered service by any railroad with notice of such disqualification.

(d) The requirement of disqualification for nine (9) months does not limit any discretion on the part of the railroad to impose additional sanctions for the same or related conduct.

(e) Upon the expiration of the 9-month period described in this section, a railroad may permit the employee to return to covered service only under the same conditions specified in § 219.104(d), and the employee shall be subject to follow-up tests, as provided by that section.

12. In § 219.201, by revising paragraphs (a)(1)(iii) and (a)(2)(ii), as follows:

§ 219.201 Events for which testing is required.

(a) * * *

(1) * * *

(iii) Damage to railroad property of $1,000,000 or more.

(2) * * *

(ii) Damage to railroad property of $150,000 or more.

* * * * *

13. Section 219.203 is amended by revising paragraphs (a)(1), (c)(2), and revising the first sentence of paragraph (d)(2), as follows:

§ 219.203 Responsibilities of railroads and employees.

(a) *Employees tested.* (1) Following each accident and incident described in § 219.201, the railroad (or railroads) shall take all practicable steps to assure that all covered employees of the railroad directly involved in the accident or incident provide, for toxicological testing by FRA, two blood samples, consisting of a primary sample and a split sample, and two urine samples, consisting of a primary sample and a split sample (following the procedures described in this subpart and appendix C) to be retained at the laboratory designated in appendix B of this part. Such employees shall cooperate in the provision of samples as described in this subpart and appendix C.

(c) * * *

(2) In the case of an injured employee, the railroad shall request the treating medical facility to obtain the required samples.

(d) * * *

(2) If an injured employee is unconscious or otherwise unable to evidence consent to the procedure and the treating medical facility declines to obtain blood samples after having been acquainted with the requirements of this subpart, the railroad shall immediately notify FRA by toll free telephone (800–424–0201), stating the employee's name, the medical facility, its location, the name of the appropriate decisional authority at the medical facility, and the telephone number at which that person can be reached. * * *

* * * * *

14. Section 219.205 is amended by revising paragraph (a) as follows:

§ 219.205 Sample collection and handling.

(a) *General.* Samples shall be obtained, marked, preserved, handled, and made available to FRA consistent with the requirements of this section, and the technical specifications set forth in Appendix C to this part.

* * * * *

15. Section 219.209 is amended by adding a new last sentence to paragraph (a)(1); and by revising the first sentence of paragraph (b), as follows:

§ 219.209 Reports of tests and refusals.

(a)(1) * * * Notification shall be provided to the Office of Safety, FRA, at (202) 366–0501; an answering machine will record any notification calls made to this number outside of the Federal work week (8:30 a.m. to 5 p.m. EST or EDT).

* * * * *

(b) If the railroad is unable, as a result of non-cooperation of an employee or for any other reason, to obtain samples and cause them to be provided to FRA as required by this subpart, the railroad shall make a concise narrative report of the reason for such failure and, if appropriate, any action taken in response to the cause of such failure.

* * *

* * * * *

16. Section 219.211 is amended by revising the second sentence of paragraph (a); by revising the last sentence of paragraph (c); by revising the last sentence of paragraph (d); and by revising paragraphs (e), (h), and (i) as follows:

§ 219.211 Analysis and follow-up.

(a) * * * Samples are analyzed for alcohol and controlled substances specified by FRA under protocols specified by FRA and accepted by the Department of Health and Human Services. * * *

* * * * *

(c) * * * The Federal Railroad Administration shall not be bound by the railroad Medical Review Officer's determination, but that determination will be considered by FRA in relation to the accident/incident investigation and with respect to any enforcement action under consideration.

(d) * * * (However, as further provided in this section, FRA may provide results of testing under this subpart and supporting documentation to the National Transportation Safety Board.)

(e) An employee may respond in writing to the results of the test prior to the preparation of any final investigation report concerning the accident or incident. An employee wishing to respond shall do so by letter addressed to the Alcohol/Drug Program Manager, Office of Safety, FRA, 400 Seventh Street, SW., Washington, DC 20590, within 45 days of receipt of the

test results. Any such submission shall refer to the accident date, railroad and location, shall state the position occupied by the employee on the date of the accident/incident, and shall identify any information contained therein that the employee requests be withheld from public disclosure on grounds of personal privacy (but the decision whether to honor such request shall be made by the FRA on the basis of controlling law).

* * * * *

(h) Except as provided in § 219.201 (with respect to nonqualifying events), each sample (including each split sample) provided under this subpart is retained for not less than three months following the date of the accident or incident (two years from the date of the accident or incident in the case of a sample testing positive for alcohol or a controlled substance). Post-mortem specimens may be made available to the National Transportation Safety Board (on request).

(i) An employee (donor) may, within 60 days of the date of the toxicology report, request that the employee's split blood and/or urine sample be tested by the designated laboratory or by another laboratory certified by the Department of Health and Human Services under that Department's Guidelines for Federal Workplace Drug Testing Programs that has available an appropriate, validated assay for the fluid and compound declared positive. Since some analysts may deteriorate during storage, detected levels of the compound shall, as technically appropriate, be reported and considered corroborative of the original test result. Any request for a split sample test shall be in writing, specify the railroad, accident date and location, be signed by the employee/donor, be addressed to the Associate Administrator for Safety, FRA, Washington, DC 20590, and be designated "Administratively Confidential: Attention Alcohol/Drug Program Manager."

17. Section 219.213 is amended by revising paragraphs (a) and (b) as follows:

§ 219.213 Unlawful refusals; consequences.

(a) *Disqualification.* (1) An employee who refuses to cooperate in providing blood or urine samples following an accident or incident specified in this subpart shall be withdrawn from covered service and shall be deemed disqualified for covered service for a period of nine (9) months in accordance with the conditions specified in § 219.107.

(b) *Procedures.* Prior to or upon withdrawing the employee from covered service under this section, the railroad shall provide notice of the reason for this action and an opportunity for hearing before a presiding officer other than the charging official. The employee shall be entitled to the procedural protections set out in § 219.104(d).

* * * * *

18. Subpart D is amended by revising the heading of the subpart and adding § 219.300 as follows:

Subpart D—Testing For Cause

§ 219.300 Mandatory reasonable suspicion testing.

(a) *Requirements.* (1) A railroad shall require a covered employee to submit to a breath alcohol test when the railroad has reasonable suspicion to believe that the employee has violated any prohibition of subpart B of this part concerning alcohol. The railroad's determination that reasonable suspicion exists to require the covered employee to undergo an alcohol test must be based on specific, contemporaneous, articulable observations concerning the appearance, behavior, speech or body odors of the employee.

(2) A railroad shall require a covered employee to submit to a urine drug test when the railroad has reasonable suspicion to believe that the employee has violated the prohibitions of subpart B of this part concerning controlled substances. The railroad's determination that reasonable suspicion exists to require the covered employee to undergo a drug test must be based on specific, contemporaneous, articulable observations concerning the appearance, behavior, speech or body odors of the employee. Such observations may include indications of the chronic and withdrawal effects of drugs.

(3) In weighing the significance of such contemporaneous observations, the railroad may also consider any pertinent information concerning long-term decline in job performance (*e.g.*, absenteeism, tardiness, excessive and unsupported use of sick leave).

(b) When the railroad has reasonable suspicion to believe that the employee has violated the prohibitions of subpart B concerning use of alcohol or controlled substances, or both, such that the employee may be currently under the influence of or impaired by alcohol, by a controlled substance, or by alcohol in combination with a controlled substance, the railroad shall promptly conduct a breath alcohol test. If the breath alcohol test does not yield evidence of a violation of § 219.101, then the railroad shall promptly require the employee to submit to a urine drug test.

(c)(1) With respect to a breath alcohol test, one supervisor trained in accordance with § 219.11(g) may make the reasonable suspicion determination. The supervisor who makes the determination to test an employee may not also serve as the breath alcohol technician for purposes of conducting the breath alcohol test on that employee.

(2) With respect to a urine drug test, at least two supervisors trained in accordance with § 219.11(g) shall be required to make the reasonable suspicion determination.

(d) Nothing in this section shall be construed to require the conduct of breath alcohol testing or urine drug testing when the employee is apparently in need of immediate medical attention.

18. Section 219.301 is amended by removing and reserving paragraph (b)(1); revising the introductory text to paragraphs (b), (b)(2) and (c) introductory text; and removing paragraphs (f) and (g), as follows:

§ 219.301 Testing for reasonable cause.

(a) * * *

(b) *Reasonable cause for breath tests.* In addition to reasonable suspicion as described in § 219.300, the following circumstances constitute reasonable cause for the administration of breath alcohol tests under this section:

(1) [Reserved].

(2) *Accident/incident.* The employee has been involved in an accident or incident reportable under part 225 of this title, and a supervisory employee of the railroad has a reasonable belief, based on affirmative evidence of unsafe conduct, that the employee's acts or omissions contributed to the occurrence or severity of the accident or incident; or

(3) * * *

(c) *Reasonable cause for urine test.* In addition to reasonable suspicion as described in § 219.300, each of the conditions set forth in paragraphs (b)(2) ("accident/incident") and (b)(3) ("rule violation") of this section as constituting reasonable cause for breath alcohol testing also constitutes reasonable cause with respect to urine drug testing.

* * * * *

19. Part 219 is amended by adding a new § 219.302 as follows:

§ 219.302 Prompt sample collection; time limitation.

(a) Testing under this subpart may only be conducted promptly following the observations or events upon which the testing decision is based, consistent with the need to protect life and property.

(b) No employee shall be required to participate in breath alcohol or urine drug testing under this subsection after the expiration of an eight hour period from—

(1) The time of the observations or other events described in this section; or

(2) In the case of an accident/incident, the time a responsible railroad supervisor receives notice of the event providing reasonable cause for conduct of the test.

(c) An employee may not be tested under this subpart if that employee has been released from duty under the normal procedures of the railroad. An employee who has been transported to receive medical care is not released from duty for purposes of this section. Nothing in this section prohibits the subsequent testing of an employee who has failed to remain available for testing as required (*i.e.*, who is absent without leave).

(d) As used in this subpart a "responsible railroad supervisor" means any responsible line supervisor (*e.g.*, a trainmaster or road foreman of engines) or superior official in authority over the employee to be tested.

(e) In the case of a urine drug test, the eight-hour requirement is satisfied if the employee has been delivered to the collection site (where the collector is present) and the request has been made to commence collection of the urine specimens within that period.

(f) Section 219.23 prescribes the notice to an employee that is required to provide breath or a body fluid sample under this part.

20. Part 219 is amended by revising § 219.303 to read as follows:

§ 219.303 Breath test procedures and safeguards.

The conduct of breath alcohol testing under this subpart is governed by subpart H of this part and part 40 of subtitle A of this title.

§§ 219.307 and 219.309 [Removed]

21. Part 219 is amended by removing §§ 219.307 and 219.309.

22. Subpart F is amended by revising the subpart heading to read as follows:

Subpart F—Pre-employment Tests

23. Section 219.501 is revised to read as follows:

§ 219.501 Pre-employment tests.

(a) Prior to the first time a covered employee performs safety-sensitive functions for an employer, the employee shall undergo testing for alcohol and drugs. No railroad shall allow a covered employee to perform safety-sensitive functions, unless the employee has been administered an alcohol test with a result indicating an alcohol concentration less than .04 and has been administered a test for drugs with a result that did not indicate the misuse of controlled substances. If a pre-employment/pre-duty test result under this section indicates an alcohol content of .02 or greater but less than .04, the provisions of § 219.104(f) shall apply. This requirement shall apply to final applicants for employment and to employees seeking to transfer for the first time from non-covered service to duties involving covered service. The tests shall be accomplished through breath analysis and analysis of urine samples.

(b) The conduct of breath alcohol testing and urine drug testing under this subpart is governed by subpart H of this part and part 40 of subtitle A of this title.

(c) As used in subpart H with respect to a test required under this subpart, the term covered employee includes an applicant for pre-employment and pre-duty testing only. In the case of an applicant who declines to be tested and withdraws the application for employment, no record shall be maintained of the declination.

(d) A railroad is not required to administer an alcohol and drug test required by paragraph (a) of this section, if:

(1) The employee has undergone an alcohol test required by this section or the alcohol misuse regulation of another DOT agency within the previous six months, with a result indicating an alcohol concentration less than .04; and

(2) The employee has undergone a drug test required by this section or the drug misuse regulation of another DOT agency within the previous six months, with a result that did not indicate the misuse of a controlled substance; and

(3) The railroad ensures that no prior employer of the covered employee of whom the railroad has knowledge has records of a violation of this subpart or the alcohol and drug misuse regulations of another DOT agency within the previous six months.

24. Part 219 is amended by revising § 219.503 to read as follows

§ 219.503 Notification; records.

The railroad shall provide for medical review of the urine drug test results as provided in subpart H of this part. The railroad shall notify the applicant of the results of the urine and breath tests in the same manner as provided for employees in subpart H. Records shall be maintained confidentially and shall be retained in the same manner as required under subpart J for employee test records, except that such records need not reflect the identity of an applicant whose application for employment in covered service was denied.

§ 219.505 [Amended]

25. Section 219.505 is amended by revising the section heading to read "Refusals," removing the designation from paragraph (a), and removing paragraph (b).

26. Part 219 is amended by revising the heading of Subpart G as follows:

Subpart G—Random Alcohol and Drug Testing Programs

27. Section 219.601 is amended by revising paragraph (b)(2)(iii) and the undesignated paragraph following it, revising (b)(7), and revising the first two sentences of paragraph (c) as follows:

§ 219.601 Railroad random drug testing programs.

* * * * *

(b) * * *

(2) * * *

(iii) * * *

During each subsequent 12-month period the program shall select for testing a sufficient number of employees so that the number of tests conducted will equal at least 50 percent of the number of covered employees. Annualized percentage rates shall be determined by reference to the total number of covered employees employed by the railroad at the beginning of the particular twelve-month period or by an alternate method specified in the plan approved by the Associate Administrator for Safety. If the railroad conducts random testing through a consortium, the annual rate may be calculated for each individual employer or for the total number of covered employees subject to random testing by the consortium.

* * * * *

(7) Each time an employee is notified for random drug testing the employee will be informed that selection was made on a random basis.

(c) *Approval.* The Associate Administrator for Safety will notify the railroad in writing whether the program is approved as consistent with the criteria set forth in this part. If the Associate Administrator for Safety determines that the program does not conform to those criteria, the Associate Administrator for Safety will inform the railroad of any matters preventing approval of the program, with specific explanation as to necessary revisions.

* * *

* * * * *

§ 219.603 [Amended]

28. Section 219.603 is amended by revising the section heading to read "Participation in drug testing."; by removing the designation and heading "(a) *Participation*" from paragraph (a); and removing paragraphs (b) and (c).

29. Section 219.605 is amended by redesignating paragraph (b) as paragraph (c); adding a new final sentence to newly designated paragraph (c), and adding a new paragraph (b) as follows:

§ 219.605 Positive drug test results; procedures.

(a) * * *

(b) If the test result of the primary sample is positive, the employee may request that the split sample be tested in accordance with the procedures outlined in part 40 of this title.

(c) * * * The responsive action required in § 219.104 is not stayed pending the result of the test of the split sample.

30. Part 219 is amended by adding a new § 219.607 as follows:

§ 219.607 Railroad random alcohol testing programs.

(a) Each railroad shall submit for FRA approval a random alcohol testing program meeting the requirements of this subpart. A Class I railroad (including the National Railroad Passenger Corporation) or a railroad providing commuter passenger service shall submit such a program not later than [*6 months after publication of the final rule*]. A Class II railroad shall submit such a program not later than [*12 months after publication of the final rule*]. A Class III railroad (including a switching and terminal or other railroad not otherwise classified) shall submit such a program not later than [*18 months after publication of the final rule*]. A railroad commencing operations after the pertinent date specified in this paragraph shall submit a random alcohol testing program not later than 30 days prior to such commencement. The program shall be submitted to the Associate Administrator for Safety, FRA, for review and approval. If, after approval, a railroad desires to amend the random alcohol testing program implemented under this subpart, the railroad shall file with FRA a notice of such amendment at least 30 days prior to the intended effective date of such action. A program responsive to the requirements of this section or any amendment to the program shall not be implemented prior to approval.

(b) *Form of programs.* Random alcohol testing programs submitted by or on behalf of each railroad under this subpart shall meet the following criteria, and the railroad and its managers, supervisors, officials and other employees and agents shall conform to such criteria in implementing the program:

(1) Selection of covered employees for testing shall be made by a method employing objective, neutral criteria which ensure that every covered employee has a substantially equal statistical chance of being selected within a specified time frame. The method may not permit subjective factors to play a role in selection, *i.e.*, no employee may be selected as the result of the exercise of discretion by the railroad. The selection method shall be capable of verification with respect to the randomness of the selection process, and any records necessary to document random selection shall be retained for not less than 24 months from the date upon which the particular samples were collected.

(2) During each 12-month period the program shall select for testing a sufficient number of employees so that the number of tests conducted will equal at least (10–50) percent of the number of covered employees, with testing to be spread reasonably through the 12-month period. Annualized percentage rates shall be determined by reference to the total number of covered employees employed by the railroad at the beginning of the particular twelve-month period or by an alternate method specified in the plan approved by the Associate Administrator for Safety. If the railroad conducts random testing through a consortium, the annual rate may be calculated for each individual employer or for the total number of covered employees subject to random testing by the consortium.

(3) Railroad random testing programs shall ensure to the maximum extent practicable that each covered employee shall perceive the possibility that a random alcohol test may be required at any time the employee reports for work and at any time during the duty tour (except any period when the employee is expressly relieved of any responsibility for performance of safety-sensitive duties).

(4) Testing shall be conducted promptly, as provided in § 219.715(a).

(5) The program shall include testing procedures and safeguards, and, consistent with this part, procedures for action based on tests where the employee is found to have violated § 219.101.

(6) An employee shall be subject to testing only while on duty. Only employees who perform covered service for the railroad shall be subject to testing under this part. In the case of employees who during some duty tours perform covered service and during others do not, the railroad program shall specify the extent to which, and the circumstances under which they shall be subject to testing. To the extent practical within the limitations of this part and in the context of the railroad's operations, the railroad program shall provide that employees shall be subject to the possibility of random testing on any day they actually perform covered service.

(7) Each time an employee is notified for random alcohol testing the employee will be informed that selection was made on a random basis.

(c) *Approval.* The Associate Administrator for Safety will notify the railroad in writing whether the program is approved as consistent with the criteria set forth in this part. If the Associate Administrator for Safety determines that the program does not conform to those criteria, the Associate Administrator for Safety will inform the railroad of any matters preventing approval of the program, with specific explanation as to necessary revisions. The railroad shall resubmit its program with the required revisions within 30 days of such notice. Failure to resubmit the program with the necessary revisions will be considered a failure to implement a program under this subpart.

(d) *Implementation.*

(1) No later than 45 days prior to commencement of random alcohol testing, the railroad shall publish to each of its covered employees, individually, a written notice that they will be subject to random alcohol testing under this part. Such notice shall state the date for commencement of the program, shall state that the selection of employees for testing will be on a strictly random basis, shall describe the consequences of a determination that the employee has violated § 219.101 or any applicable railroad rule, and shall inform the employee of the employee's rights under subpart E of this part. A copy of the notice shall be provided to each new covered employee on or before the employee's initial date of service. Since knowledge of Federal law is presumed, nothing in this paragraph creates a defense to a violation of § 219.101. This notice may be combined with the notice or policy statement required by § 219.23.

(2) Each Class I railroad (including the National Railroad Passenger Corporation) and each railroad providing commuter passenger service shall implement its approved random alcohol testing program not later than [*12 months after publication of the final*

rule]. Each Class II railroad shall implement its approved random testing program not later than [*18 months after publication of the final rule*]. Each Class III railroad (including a switching and terminal or other railroad not otherwise classified) shall implement its approved random testing program not later than [*24 months after publication of the final rule*]. In the case of a railroad commencing operations after the pertinent date set forth in paragraph (a) of this section for filing of a program, the railroad shall implement its approved random testing program not later than the expiration of 60 days from approval by the Administrator or by the pertinent date set forth in this paragraph, whichever is later.

31. By adding § 219.609 as follows:

§ 219.609 Participation in alcohol testing.

A railroad shall, under the conditions specified in this subpart and subpart H of this part, require a covered employee selected through the random testing program to cooperate in breath testing to determine compliance with § 219.101, and the employee shall provide the required breath and complete the required paperwork and certifications. Compliance by the employee shall be excused only in the case of a documented medical or family emergency.

32. Part 219 is amended by adding § 219.611 as follows:

§ 219.611 Test result indicating prohibited alcohol concentration; procedures.

Procedures for administrative handling by the railroad in the event an employee's confirmatory test indicates an alcohol concentration of .04 or greater are set forth in § 219.104.

33. Part 219 is amended by revising the heading of subpart H as follows:

"Subpart H—Procedures and Safeguards for Urine Drug Testing and for Breath Alcohol Testing"

§ 219.703 [Amended]

34. Part 219 is amended by revising the heading of § 219.703 to read *"Drug testing procedures."*

35. Section 219.707 is amended by revising the section heading and the first sentence of paragraph (a); by redesignating existing paragraph (d) as paragraph (e); and by adding a new paragraph (d) as follows:

§ 219.707 Review by MRO of Urine Drug Testing Results.

(a) Urine drug test results reported positive by the laboratory as provided in part 40 of this title shall not be deemed positive or disseminated to any person (other than to the employee tested in a medical interview, if conducted) until they are reviewed by a Medical Review Officer (MRO) of the railroad as required by part 40 of this title and this section.

* * *

(b) * * *

(d) The MRO shall direct the employee's split sample to be tested in accordance with the procedures specified in 49 CFR part 40 if, within 60 days of the employee's having actual notice that he or she tested positive, the employee makes such a request to the MRO.

* * * * *

§§ 219.709 and 219.713 [Reserved]

36. Part 219 is amended by removing and reserving §§ 219.709 and 219.713.

37. Part 219 is amended by adding § 219.715 as follows:

§ 219.715 Alcohol testing procedures.

(a) Each covered employee who is notified of selection for breath alcohol testing and who is not performing a safety-sensitive function at the time of notification shall proceed to the testing site immediately. The railroad shall ensure that an employee who is performing a safety-sensitive function at the time of notification shall, as soon as possible without affecting safety, cease to perform the safety-sensitive function and proceed to the testing site.

(b) Each railroad shall ensure that all breath alcohol testing conducted under this part complies with the procedures set forth in part 40 of this title. The provisions of part 40 of this title that address alcohol testing are made applicable to employers by this part.

38. Part 219 is amended by adding a new subpart I as follows:

Subpart I—Annual Report

§ 219.801 Reporting alcohol misuse prevention program results in a management information system.

(a) Each railroad shall submit to FRA an annual report covering the calendar year, summarizing the results of its alcohol misuse prevention program.

(b) Each railroad that is subject to more than one DOT agency alcohol regulation shall identify each employee covered by the regulations of more than one DOT agency. The identification will be by the total number and category of covered functions. Prior to conducting any alcohol test on a covered employee subject to the regulations of more than one DOT agency, the railroad shall determine which DOT agency regulation or rule authorizes or requires the test. The test result information shall be directed to the appropriate DOT agency or agencies.

(c) Each railroad shall ensure the accuracy and timeliness of each report submitted by the railroad or a consortium.

(d) Each railroad shall submit the required annual reports no later than February 15 of each year. The report shall be submitted on the form specified by the FRA. Each report shall contain:

(1) Number of covered employees by employee category (i.e., train service, engine service, dispatcher/operator, signal, covered supervisory, other).

(2) Number of covered employees in each category subject to alcohol testing under the alcohol misuse regulation of another DOT agency, identified by each agency.

(3)(i) Number of initial tests by type of test (i.e., pre-employment and "covered service," random, post-positive return to duty, etc.), type of authority (FRA, or, for accident/incident and rule violation cause testing, railroad) and employee category.

(ii) Number of confirmatory tests, by type of test and employee category.

(4) Number of confirmatory alcohol tests indicating an alcohol concentration of .04 or greater, by type of test and employee category.

(5) Number of confirmatory alcohol tests indicating an alcohol concentration of .02 or greater but less than .04, by type of test and employee category.

(6) Number of persons denied a position as a covered employee following a pre-employment/pre-duty alcohol test indicating an alcohol concentration of .04 or greater.

(7) Number of covered employees with a confirmatory alcohol test indicating an alcohol concentration of .04 or greater who were returned to service in covered positions (having complied with the recommendations of a substance abuse professional as described in § 219.104(d).

(8) Number of covered employees who were administered alcohol and drug tests at the same time, with both a positive drug test result and an alcohol test result indicating an alcohol concentration of .04 or greater.

(9) Number of covered employees who were found to violate other provisions of subpart B of this part, and the action taken in response to the violation.

(10) Number of covered employees who refused to submit to an alcohol test required under this part, and the action taken in response to the refusal.

(11) Number of covered employees and supervisors who have received training during the reporting period in determining the existence of reasonable suspicion of alcohol misuse.

(e) Annual reporting for calendar year 1992 and prior years shall be governed by the provisions of § 217.13 of this chapter in effect during the subject calendar period.

39. Part 219 is amended by adding subpart J as follows:

Subpart J—Recordkeeping Requirements

§ 219.901 Retention of breath alcohol testing records.

(a) *General requirement.* Each railroad shall maintain records of its alcohol misuse prevention program as provided in this section. The records shall be maintained in a secure location with controlled access.

(b) *Period of retention.* Each railroad shall maintain the records in accordance with the following schedule:

(1) *Five years.* Records of employee alcohol test results with results indicating an alcohol concentration of .02 or greater, documentation of refusals to take required alcohol tests, calibration documentation, and employee evaluation and referrals shall be maintained for a minimum of five years.

(2) *Two years.* Records related to the collection process (except calibration of evidential breath testing devices) and training shall be maintained for a minimum of two years.

(3) *One year.* Records of negative test results (as defined in part 40 of this title) shall be maintained for a minimum of one year.

(c) *Types of records.* The following specific records must be maintained.

(1) Records related to the collection process:

(i) Collection logbooks, if used.

(ii) Documents relating to the random selection process.

(iii) Calibration documentation for evidential breath testing devices.

(iv) Verification of breath alcohol technician training.

(v) Documents generated in connection with decisions to administer reasonable suspicion alcohol tests.

(vi) Documents generated in connection with decisions on post-accident testing.

(vii) Consolidated annual reports to FRA.

(viii) Documents verifying the existence of a medical explanation of the inability of a covered employee to provide an adequate breath sample.

(2) Records related to test results:

(i) The railroad's copy of the alcohol test form, including the results of the test.

(ii) Documents related to the refusal of any covered employee to submit to an alcohol test required by this part.

(iii) Documents presented by a covered employee to dispute the result of an alcohol test administered under this part.

(3) Records related to other violations of this part.

(4) Records related to evaluations:

(i) Records pertaining to a determination by a substance abuse professional concerning a covered employee's need for assistance.

(ii) Records concerning a covered employee's compliance with the recommendations of the substance abuse professional.

(5) Records related to evaluation and training:

(i) Materials on alcohol misuse awareness, including a copy of the railroad's policy on alcohol misuse.

(ii) Documentation of compliance with the requirements of § 219.23.

(iii) Documentation of training provided to supervisors for the purpose of qualifying the supervisors to make a determination concerning the need for alcohol testing based on reasonable suspicion.

(iv) Certification that any training conducted under this part complies with the requirements for such training.

§ 219.903 Retention of urine drug testing records.

(a) *General requirement.* Each railroad shall maintain records of its drug misuse prevention program as provided in this section. The records shall be maintained in a secure location with controlled access.

(b) *Period of retention.* Each railroad shall maintain the records in accordance with the following schedule:

(1) *Five years.* Records of employee positive drug test results, documentation of refusals to take required drug tests, and employee evaluation and referral shall be maintained for a minimum of five years.

(2) *Two years.* Records related to the collection process and training shall be maintained for a minimum of two years.

(3) *One year.* Records of negative test results (as defined in part 40 of this title) shall be maintained for a minimum of one year.

(c) *Types of records.* The following specific records must be maintained.

(1) Records related to the collection process:

(i) Collection logbooks, if used.

(ii) Documents relating to the random selection process.

(iii) Documents generated in connection with decisions to administer reasonable suspicion drug tests.

(iv) Documents generated in connection with decisions on post-accident testing.

(v) Consolidated annual reports to FRA.

(vi) Documents verifying the existence of a medical explanation of the inability of a covered employee to provide a urine sample.

(2) Records related to test results:

(i) The railroad's copy of the drug test custody and control form, including the results of the test.

(ii) Documents related to the refusal of any covered employee to submit to a drug test required by this part.

(iii) Documents presented by a covered employee to dispute the result of a drug test administered under this part.

(3) Records related to other violations of this part.

(4) Records related to evaluations:

(i) Records pertaining to a determination by a substance abuse professional concerning a covered employee's need for assistance.

(ii) Records concerning a covered employee's compliance with the recommendations of the substance abuse professional.

(5) Records related to evaluation and training:

(i) Materials on drug misuse awareness, including a copy of the railroad's policy on drug misuse.

(ii) Documentation of compliance with the requirements of § 219.23.

(iii) Documentation of training provided to supervisors for the purpose of qualifying the supervisors to make a determination concerning the need for drug testing based on reasonable suspicion.

(iv) Certification that any training conducted under this part complies with the requirements for such training.

§ 219.905 Access to facilities and records.

(a) Except as required by law or expressly authorized or required in this section, no railroad shall release covered employee information that is contained in records required to be maintained under §§ 219.901 and 219.903.

(b) A covered employee is entitled, upon written request, to obtain copies of any records pertaining to the employee's use of alcohol or drugs, including any records pertaining to his or her alcohol or drug tests. The railroad shall promptly provide the records requested by the employee. Access to an employee's records shall not be contingent upon payment for records other than those specifically requested.

(c) Each railroad shall permit access to all facilities utilized in complying with the requirements of this part to the Secretary of Transportation or any DOT agency with regulatory authority over

the railroad or any of its covered employees.

(d) Each railroad shall make available copies of all results for railroad alcohol and drug testing programs conducted under this part and any other information pertaining to the railroad's alcohol and drug misuse prevention program, when requested by the Secretary of Transportation or any DOT agency with regulatory authority over the railroad or covered employee.

(e) Records shall be made available to a subsequent railroad upon receipt of written request from the covered employee. Disclosure by the subsequent railroad is permitted only as expressly authorized by the terms of the employee's request.

(f) A railroad may disclose information required to be maintained under this part pertaining to a covered employee or the decisionmaker in a lawsuit, grievance, or other proceeding initiated by or on behalf of the individual, and arising from the results of an alcohol or drug test administered under this part, or from the railroad's determination that the employee engaged in conduct prohibited by subpart B of this part (including, but not limited to, a Federal Employers' Liability Act, worker's compensation, unemployment compensation, or other proceeding relating to a benefit sought by the employee).

(g) A railroad shall release information regarding a covered employee's records as directed by the specific, written consent of the employee authorizing release of the information to an identified person. Release of such information by the person receiving the information is permitted only in accordance with the terms of the employee's consent.

40. Part 219 is amended by adding appendix E, as follows:

Appendix E to Part 219—Outline of FRA Regulation on Control of Alcohol and Drug Use

Modal	FRA
General	
Purpose	§219.1
Applicability	§219.3
Alcohol testing procedures.	§219.715(b)
Definitions	§219.5
Preemption	§219.13
Other requirements imposed by employers.	§§219.1(b), 219.11(g), 219.101(c), 219.104(c)(4),(c)(5), 219.301(b)(4), 219.401(e)(3), 219.403(a), 219.405(a)
Requirement for notice.	§§219.23(a),(b),(c), 219.503, 219.607(b)(7), 219.607(d)(1)
Starting date for alcohol testing programs.	§§219.5, 219.607(d)(2)
Prohibitions	
Alcohol concentration.	§§219.101(a), 219.105
Behavior and appearance.	§§219.101(a), 219.105
On-duty use	§§219.101(a), 219.105
Pre-duty use	§§219.101(a)(3), 219.105
Use following an accident.	§§219.203(b)(4), 219.213(a)
Refusal to submit to a required alcohol test.	§§219.104(d), 219.107, 219.213(a)(1), 219.300(c), 219.603(a), (b)(1), 219.609(a), (b)(1)

Employer obligation to promulgate a policy on alcohol.	§219.23(e),(f),(g)
Training for supervisors.	§219.11(g)
Referral, evaluation, and treatment.	§§219.1(b), 219.11(g), 219.23(d), 219.104(a), (d)

Issued in Washington, DC, on December 2, 1992.

Andrew H. Card, Jr.
Secretary.

Gilbert E. Carmichael,
Administrator, Federal Railroad Administration.

[FR Doc. 92-29682 Filed 12-10-92; 10:00 am]

BILLING CODE 4910-06-M

Federal Railroad Administration

49 CFR Part 219

[Docket No. RSOR-6; Notice No. 33]

RIN 2130-AA43

International Application: Alcohol/Drug Regulations

AGENCY: Federal Railroad Administration (FRA), DOT.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: Foreign railroads operating within the United States have been subject to regulations issued by the Federal Railroad Administration (FRA) on the control of alcohol and drug use since February 10, 1986. The Omnibus Transportation Employee Testing Act of 1991 ("Act"), however, requires FRA to amend its existing regulations by (among other changes) incorporating new procedures and safeguards with respect to breath and body fluid testing for alcohol, and mandating reasonable suspicion testing for both alcohol and drugs. In this advance notice of proposed rulemaking (ANPRM), FRA seeks comment on issues arising from the international application of the new statutory requirements.

DATES: Written comments must be received by February 16, 1993. Late filed comments will be considered to the extent practicable.

ADDRESSES: Comments shall be filed in triplicate with the Docket Clerk, Docket No. RSOR-6, Office of the Chief Counsel, Federal Railroad Administration, 400 7th Street, SW., room 8201, Washington, DC, 20590. Parties wishing the FRA to acknowledge receipt of their comments should submit with those comments a pre-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. RSOR-6." The postcard will be dated and time stamped and returned to the commenter. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by

interested persons, between 8:30 a.m. and 5 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Walter C. Rockey, Executive Assistant to the Associate Administrator for Safety (RRS–3), Office of Safety, FRA, Washington, DC 20590 (Telephone: (202) 366–0897) or Patricia V. Sun, Trial Attorney (RCC–30), Office of Chief Counsel, FRA, Washington, DC 20590 (Telephone: (202) 366–4002).

SUPPLEMENTARY INFORMATION: Foreign railroads operating within the United States have been subject to regulations issued by the Federal Railroad Administration (FRA) on the control of alcohol and drug use (49 CFR part 219) since February 10, 1986. However, FRA has always determined that its random drug testing requirements do not apply in any situation where compliance would violate the domestic laws or policies of another country. FRA recently published a second final rule delaying application of random drug testing (subpart G) to railroad personnel based outside the United States until January 2, 1995, to allow for negotiations with foreign governments.

Covered service employees whose place of reporting or point of departure ("home terminal") for rail transportation services is located outside the United States have therefore not been subject to random drug testing, although such employees have always been subject to FRA's prohibitions on job-related use or possession of alcohol or drugs, reasonable cause testing, and post-accident testing (subparts B (except for return to service testing), C, and D) when operating in U.S. territory. Employee assistance policies (subpart E), pre-employment testing (subpart F), and return to service testing, like random testing, have remained subject to the law of where the employee is based (as determined by the employee's home terminal or reporting point). U.S. based crews have, of course, been subject to all components of FRA's program.

FRA's current approach is consistent with our prior discussions with Transport Canada. (As applied, FRA's regulations have affected only Canadian employees, since Mexican employees do not operate in U.S. territory.) With the enactment of the Omnibus Transportation Employee Testing Act of 1991, however, FRA now reexamines its testing program to determine how the Act's mandates will affect foreign employers. A discussion of departmental issues follows. FRA also invites commenters to raise mode-specific issues.

The Department's Legal Authority for Foreign Employer Testing Programs

The Omnibus Transportation Employee Testing Act of 1991, Public Law No. 102–143, provides for coverage by the Department's drug and alcohol testing rules of activities in the U.S. of foreign employers. The relevant provisions of the Act for the aviation industry provides that FAA regulations shall establish a program which requires air carriers *and foreign air carriers* to conduct preemployment, reasonable suspicion, random, and post accident testing for use, in violation of law or Federal regulation, of alcohol or a controlled substance. [Sec. 3 of the Act, amending § 614(a)(1) of the Federal Aviation Act (emphasis added).] In prescribing regulations under this section, the FAA Administrator shall only establish requirements applicable to foreign air carriers that are consistent with the international obligations of the United States, and the Administrator shall take into consideration any applicable laws and regulations of foreign countries. [Sec. 3 of the Act, amending § 614(e)(3) of the Federal Aviation Act.]

The portion of the Act affecting the railroad industry provides that FRA regulations shall establish a program which requires *railroads* to conduct preemployment, reasonable suspicion, random, and post-accident testing of all railroad employees responsible for safety sensitive functions for use, in violation of law or Federal regulation, of alcohol or a controlled substance. [Sec. 4 of the Act, amending § 202(r)(1) of the Federal Railroad Safety Act of 1970 (emphasis added).] In carrying out the provisions of this subsection, the Secretary shall only establish requirements that are consistent with the international obligations of the United States, and the Secretary shall take into consideration any applicable laws and regulations of foreign countries. [Sec. 4 of the Act, amending § 202(r)(1) of the Federal Railroad Safety Act of 1970.]

The portion of the Act affecting the motor carrier industry provides that FHWA regulations shall establish a program which requires *motor carriers* to conduct preemployment, reasonable suspicion, random, and post-accident testing of the operators of commercial motor vehicles for use, in violation of law of Federal regulation, of alcohol or a controlled substance. [Sec. 5(a)(1) of the Act, creating § 12020(a) of the Commercial Motor Vehicle Safety Act of 1986 (emphasis added).] In issuing regulations under this section, the Secretary shall only establish requirements that are consistent with the international obligations of the United States, and the Secretary shall take into consideration any applicable laws and regulations of foreign countries. Sec. 5(a)(1) of the Act, creating Section 12020(e)(3) of the Commercial Motor Vehicle Safety Act of 1986.

There are no similar provisions applicable to the transit industry, since the Federal Transit Administration drug and alcohol testing provisions do not cover foreign employers.

Under these similar provisions, FAA, FRA and FHWA have the authority and obligation to require drug and alcohol tests for safety sensitive employees of foreign employers. The FAA provisions specifically extend coverage to foreign air carriers, and the FHWA and FRA provisions cover motor carriers and railroads, respectively, which definitions include employers based in this country or in a foreign country. Moreover, the legal authority extends to all kinds of testing required by the Act: Reasonable suspicion, post-accident, preemployment, and random (subject to U.S. international obligations).

It is the Department's policy to carry out the Act's requirements using a territorial jurisdiction approach. That is, the Department interprets its statutory authority and obligation for drug and alcohol testing to apply to foreign employers who conduct operations in the United States, with respect to those operations. This does not mean that all operations of such a transportation employer would be subject to the rules. For example, a foreign employer's operations within its own country would not be subject to these rules. Following the same policy, only those employees of a foreign transportation employer who perform safety-sensitive functions in operations within the U.S. would be subject to testing.

For each of the three industries involved, the Act requires the Department to act consistent with the international obligations of the U.S., and to take foreign countries' laws and regulations into account. (This could be relevant, for example, to the conduct of testing in some foreign countries.) The Department is sensitive to the concerns of foreign countries. We are also very much aware of a number of practical considerations that may arise as we implement the Act with respect to foreign employers. For these reasons, as well as to foster consistency in the implementation of very similar statutory provisions, the FRA, FHWA, and FAA are issuing advance notices of proposed rulemaking rather than notices of proposed rulemaking (NPRMs). We are

seeking the public's views on a variety of issues and questions that may arise with respect to drug and alcohol testing by foreign employers.

General Problems and Issues

The following problems, questions, and issues appear to arise in the aviation, railroad, and motor carrier contexts. In responding to these questions and requests for comment, we ask that commenters distinguish responses relating to alcohol testing from those relating to drug testing, where the same response is not appropriate for both. In addition to these general issues, we also seek comment on any FRA-specific issues, or FRA-specific variations on these issues. We request that all responses, on both general and FRA-specific issues, be sent to the docket for this ANPRM.

1. International Treaties and Foreign Laws

We seek information on any bilateral or multilateral treaty obligations of the U.S., or principles of international law, that may affect our implementation of the Act. If there are any international agreements under development that would affect drug and alcohol testing of foreign employers, we also seek information on them. In commenting on international obligations of the U.S., we request that commenters focus on any provisions that affect the ability of the United States to test employees conducting operations in the U.S., with the testing to take place in the U.S.

In addition to international obligations, we seek comment on any laws or regulations of foreign countries that we should take into account in implementing the Act. We would like to obtain information on any laws or rules of specific foreign countries whose employers conduct U.S. operations that we should consider.

2. Pre-Employment and Follow-Up Testing

Often, employees of foreign transportation employers are recruited and hired in the foreign country involved. For example, a Canadian employer may hire Canadian nationals in Canada, some of whom will subsequently conduct operations in the U.S. The employer may not know, at the time of hire, which of its employees will operate in the U.S. In such a situation, should the employer be required to conduct pre-employment testing? If so, how, when and where would the foreign employer conduct pre-employment testing of the employees who were to operate in the U.S.?

Should all pre-employment testing be conducted in the U.S., or should the rules permit the employer to conduct tests in its own country? Where the employer could not, because of legal restraints on testing in its own country, conduct testing there, could the testing be arranged in the United States? For example, should the employer send the employee to a point in the United States for a test before the employee actually conducts an operation in this country? Should pre-employment testing be required at all in such a situation?

If an employee tests positive on any type of alcohol or drug test, FRA's existing and proposed rules require a return- to-service test and follow-up tests, over a period of time. For an employee whose home terminal or reporting point is in a foreign country, and who comes into the U.S. occasionally, questions similar to those mentioned above for pre-employment testing may arise. If the employer does not conduct the tests in its own country, how does the employer arrange for the required tests to take place in the U.S.?

3. Random Testing

Should all of a foreign employer's covered employees who operate in the U.S. at any time have to be part of the random testing pool? How would foreign employers arrange for the unannounced, random testing of their employees in U.S. territory? In their own countries? Also, to meet random testing rate requirements, employers have to conduct a certain number of tests per year (e.g., under a 50 percent random testing rate, a number of tests each year equivalent to half the number of the employees in the random pool). Would it be practical for employers to meet this requirement, while maintaining randomness, if tests are conducted only in the U.S.? Are there circumstances in which foreign employers should not be subject to a random testing requirement?

4. Requirement for All Types of Tests

Should the Department refrain from requiring foreign employers to conduct certain kinds of tests? The Department anticipates little problem with requiring a post-accident or reasonable suspicion test in the U.S., following an accident or basis for reasonable suspicion that occurred in this country (FRA currently requires this). However, as discussed above, there may be greater problems with other forms of testing. Is it desirable to exclude foreign employers from some or all types of alcohol or drug testing? Why or why not? Should the legal authority of the employer to conduct a certain kind of testing in its own country be considered in deciding whether to exclude employers in a certain country from a requirement? If some exclusions are desirable, how can this objective be reconciled with the testing requirements of the Act?

5. Other Compliance Activities

DOT drug and alcohol rules have a variety of other program requirements in addition to testing. These requirements pertain to employee assistance and training programs, substance abuse professionals, record retention and reporting, and many other subjects. Some of these activities or functions might well take place most conveniently in the foreign employer's country. Should some or all of the foreign employer's program activities be required or permitted to take place outside the U.S.? How would the Department monitor or enforce compliance with drug or alcohol program activities that take place outside the U.S.? How and where would Departmental personnel obtain access to information about the employers' implementation of program and testing requirements?

6. Testing Procedures

49 CFR part 40 governs testing under the DOT drug and alcohol testing rules of the three operating administrations involved (except for FRA post-accident testing). Part 40 compliance could raise a number of problems if any testing or collection is performed abroad. Some of these issues may apply even with respect to testing by foreign employers that occurs in the U.S. Some examples follow.

Drug testing under part 40 includes testing specimens at NIDA-certified laboratories, all of which are in the U.S. If specimen collection for drug testing is done outside the U.S., specimens would probably be sent to these laboratories for analysis. What practical problems does this create (*e.g.*, timeliness of transmission of specimens and associated paperwork), and how could they be solved? If drug specimen collection or alcohol testing is permitted to be conducted outside the U.S., what language or training problems would need to be overcome, and what is the best way of dealing with these problems (e.g., translations of DOT requirements or forms)? In drug testing, there is a requirement for medical review officers (MROs) to verify positive tests and perform other functions. Should MROs (who, under current rules, must be physicians licensed in the U.S.) have to perform these functions, or should physicians licensed in the foreign countries involved be able to participate

as well? The same question can be asked for substance abuse professionals who would evaluate people who test positive for alcohol and drugs. If personnel licensed in the U.S. were required for this function, would this create difficult logistical problems for the program? Would there be problems in obtaining or using evidential breath testers on the National Highway Traffic Safety Administration's Conforming Products List (which part 40 requires for alcohol testing) in other countries, if testing is permitted to be conducted outside the U.S.?

The Department seeks comment on any other part 40-related problems that may occur in the context of testing of foreign operators. Should there be a method of accepting a foreign country's testing procedures in lieu of some or all part 40 procedures, if testing is permitted to be conducted in foreign countries?

7. Consequences of Positive Tests

The consequence of a "positive" test is removal from a safety-sensitive position, until the employee follows the rule's procedures for reinstatement in the safety sensitive position. However, the application of the DOT drug and alcohol testing rules to foreign employers is intended only to affect U.S. operations. Consequently, the Department would not assert jurisdiction to require that an employee of a foreign employer who tested positive not perform safety-sensitive functions in operations outside the U.S. However, such an employee would be prohibited from conducting any safety-sensitive functions in the U.S., until the employee follows the rule's procedures for reinstatement in the safety sensitive position. How would foreign employers make sure that an employee who tested positive did not engage in operations in the U.S., until reinstatement requirements had been met? How would the Department monitor compliance with this requirement?

8. Costs

What is the number of employees who would be affected by a requirement to test persons performing safety-sensitive functions in the U.S. for foreign employers? Do commenters anticipate that foreign operators' positive test rates (which can affect costs significantly) be higher, lower, or about the same as the positive test rates of U.S. employers for the employees who would be subject to these rules? Are there costs unique to drug and alcohol program activities that may occur outside the U.S. that the Department should consider in estimating the costs of the rule? Are there any positive or negative trade or competitive effects of testing (or not testing) employees of foreign employers, for either U.S. or foreign companies?

Executive Order 12291 and DOT Regulatory Policy and Procedures

This anticipated rulemaking is not "major" under Executive Order 12291. It is significant under the Department of Transportation's Regulatory Policy and Procedures.

Other Regulatory Matters

At this preliminary stage, it is not yet possible to determine whether there will be a significant economic impact on a number of small entities, what the paperwork burden might be, or whether there will be any federalism implications. Each of these regulatory matters will be addressed fully at the time of publication of any notice of proposed rulemaking on this subject.

Paperwork Reduction Act

FRA has not yet determined whether this anticipated rule will contain a collection of information requirement for purposes of the Paperwork Reduction Act (Pub. L. 96–511).

List of Subjects in 49 CFR Part 219

Railroad safety, Control of alcohol and drug use.

Issued in Washington, DC., on December 2, 1992.

Federal Railroad Administration

49 CFR Parts 217 and 219

[Docket No. RSOR–5; Notice No. 35]

RIN 2130–AA64

Annual Reporting Requirements; Amendments to Alcohol/Drug Regulations

AGENCY: Federal Railroad Administration (FRA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: FRA proposes to amend and expand its current annual reporting requirements for data concerning control of alcohol and drug misuse in railroad operations. The proposed standard format for reporting is designed to elicit data in a manner compatible with related reporting requirements that would be embodied in the alcohol and drug misuse prevention programs applicable to other transportation industries. This action is necessary to provide comparable data for inclusion in a management information system designed to determine the effectiveness of such programs.

DATES: (1) Any request to make an oral presentation must be received by January 4, 1993.

(2) Written comments must be received by April 14, 1993. Late filed comments will be considered to the extent practicable.

(3) FRA proposes to make the final rule effective immediately on publication in the Federal Register.

ADDRESSES: Comments shall be sent to Docket Clerk, Docket No. RSOR–6, Office of the Chief Counsel, Federal Railroad Administration, 400 7th Street, S.W., Room 8201, Washington, D.C., 20590. Persons wishing the FRA to acknowledge receipt of their comments should submit with those comments a pre-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. RSOR–6." The postcard will be dated and time stamped and returned to the commenter. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons, between 8:30 a.m. and 5 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Don Shatinsky, Alcohol and Drug Program Manager (RRS–11), Office of Safety, FRA, Washington, DC 20590 (Telephone: (202) 366–0127) or Patricia V. Sun, Trial Attorney (RCC–30), Office of Chief Counsel, FRA, Washington, DC 20590 (Telephone: (202) 366–4002).

SUPPLEMENTARY INFORMATION:

Background

On November 21, 1988 (53 FR 47103), FRA published a final rule containing amendments to its alcohol and drug regulations, which were first promulgated on August 2, 1985. These amendments established a random drug testing program and added new safeguards for urine drug testing, incorporating procedures from a Department of Transportation regulation, "Procedures for Transportation Workplace Drug Testing Programs" (49 CFR part 40), that had instituted standards for drug testing of transportation employees. FRA published additional amendments to its alcohol and drug regulations on December 27, 1989 (54 FR 53238) and June 4, 1990 (55 FR 22791). The December 27, 1989 republication

significantly revised the alcohol/drug reporting requirements contained in 49 CFR 217.13(d) and provided the structure for 1990 and subsequent annual reports due before March 1 each year.

On November 27, 1989, the General Accounting Office (GAO) published a report on the status of the programs promulgated by the DOT regulations. A primary recommendation in the GAO report was that "[t]he Secretary of Transportation adopt evaluation criteria and provide the administrations with guidance on the types of program information they should be getting from employers to evaluate program success."

OST/FRA Proposal

The Office of Drug Enforcement and Program Compliance in the Office of the Secretary, DOT (hereinafter "OST"), therefore developed a comprehensive plan for a management information system (MIS) to obtain and analyze employer alcohol and drug program data. OST has identified standard data elements critical to the review and management of the operating administrations' alcohol and drug programs and is proposing, elsewhere in today's **Federal Register**, to amend its Procedures for Transportation Workplace Drug Testing (49 CFR part 40).

Employers who fall under two or more DOT Agency regulations requiring alcohol and drug testing, must submit data to each regulating operating administration (OA) for those employees covered by that OA's rule. Employees who perform functions covered by more than one OA should be identified by their employer as to which covered position they will be reported under. Alcohol and drug program data on dual covered employees should be reported to the appropriate OA. Generally, pre-employment, random, and return to duty tests should be reported to the OA that regulates the function used as the basis for employee category. Post-accident tests should be reported to the OA to whom that accident is reportable. Testing for cause should be reported to the OA based on the employee function requiring the test.

In order to elicit data that is useful for intermodal analysis, FRA proposes to repeal its existing reporting requirements (§ 217.13(d)) and substitute a MIS that includes both generic DOT elements and mode-specific refinements, reflecting industry practice and FRA and railroad programs already in place. Analysis of this data would provide an important means for monitoring implementation, compliance and enforcement, and for evaluating the effectiveness of the alcohol and drug program. (Also in today's **Federal Register**, FRA is separately proposing an analogous MIS to collect employer alcohol program data as part of a Notice of Proposed Rulemaking (NPRM) amending its alcohol and drug regulations in response to the Omnibus Transportation Employee Testing Act of 1991 ("Omnibus Act").)

A new subpart of part 219, subpart I, Reporting and Review of Results, would require railroads to submit MIS reports for each calendar year by February 15 of the following year. Subpart I would have the same applicability as subparts D, E, F and G; that is, all railroads not excluded under the small railroad exclusion in § 219.3 would be required to file annual alcohol/drug program reports.

As noted above, the proposed data collection form would incorporate format and data elements from the OST form, but with substantive changes unique to FRA. The preamble to OST's parallel NPRM contains comments, discussions and questions that should be considered when reviewing the proposals in FRA's NPRM. Commenters should therefore indicate whether they are responding to the departmental NPRM or the FRA NPRM. Persons filing comments on the OST proposal who wish to have those comments considered in this proceeding must provide copies of their filing to the FRA Docket Clerk at the address set forth above.

Adaptation of the OST MIS Format

OST and FRA recognize that FRA's regulatory provisions are not precisely parallel to those of the other modal administrations. In some cases, requirements are substantially the same, but carry different names; in others, common names tend to mask significant differences. Therefore, FRA has worked with OST to reconcile the various facets of the data collection instrument with the specific regulatory and industry context. The result is a form that should successfully elicit the data required for the OST MIS while using language more familiar to railroad reporting officers and better corresponding to the reality of railroad programs.

FRA's proposed MIS data elements include many required to be addressed in current FRA regulations (49 CFR 217.13(d)). However, the MIS elements are not coextensive with the current FRA requirements. Even where the data elements generally correspond, they are often not identical. Further, due to differences among industries and regulatory programs, the MIS elements do not include several sets of data that remain of importance with respect to the railroad industry.

The OST notice published elsewhere in today's **Federal Register** discusses the proposed standard requirements. The following discussion addresses some of the more prominent adaptations and additions proposed for the form that would be utilized by the railroads.

For each of the MIS data charts, FRA has entered standard rail employee categories (engine service, train service, dispatcher/train order operator, signal service, and other Hours of Service employees). Comment is solicited as to whether these categories adequately define the primary functional groups for which comparative analysis may be useful.

There are two data charts contained in the Part 40 form that do not appear in the FRA form:

First, there is no chart labeled "post-accident tests." Mandatory post-accident toxicological testing ("PATT"), as conducted by FRA, is designed to support accident investigations and to shed light on the role of alcohol, as well as other drugs. FRA requires railroads to obtain blood and urine samples after qualifying accidents and incidents, generally without regard to any threshold showing that the employee contributed to the accident/incident. Samples are then forwarded to an FRA contract laboratory, which analyzes them for alcohol and controlled substances that FRA has specified for the particular accident investigation. As all PATT testing is conducted by FRA's designated laboratory, and FRA maintains these test records, FRA finds it unnecessary to include questions about PATT results.

Second, there is no chart for periodic tests, since FRA does not require this form of testing.

In addition to these omissions, FRA proposes to adapt or supplement the OST format in the following respects:

In item D., "pre-employment tests," FRA has modified the caption to indicate that both pre-employment tests and first- time transfers from non-covered to covered service should be included.

In item E., following the chart for "random testing," FRA has inserted data elements derived from the current part 217 reporting requirements. These data elements are designed to follow the progress of employees identified as having violated the prohibitions on alcohol and drug use (§§ 219.101 and 219.102), with respect to discipline, evaluation, treatment, return to service and any later relapse.

The reporting format for "reasonable cause testing" data has been significantly altered. FRA has changed the caption to "testing for cause," to conform with the new subpart D heading published elsewhere today in FRA's Omnibus Act NPRM. FRA would change the title of subpart D from "Authorization to Test for Cause" to "Testing for Cause" to emphasize that reasonable suspicion testing is no longer discretionary. Under the Omnibus Act, reasonable suspicion testing for alcohol and controlled substances changes from an authorized option to a mandatory program. The accident/incident and rule violation components of FRA's for cause testing program would remain optional for both alcohol and drug testing.

The proposed OST (part 40) chart for "reasonable cause testing" would obviously not produce railroad data that would be comparable with other modes, since the FRA "testing for cause" provisions (49 CFR part 219, subpart D) are much more expansive than the reasonable cause provisions of other modal rules. Although testing for reasonable suspicion of current use or impairment (the sole basis for "testing for cause" of employees in other modes), will now be mandatory as required by the Omnibus Act, the FRA rule also authorizes testing following certain lesser-magnitude accidents and casualties and following enumerated rule violations.

"Reasonable cause testing," in other modes, is comparable to the reasonable suspicion component of FRA's testing for cause program, which requires testing where a supervisory employee has a reasonable suspicion that an employee is impaired or under the influence, based on specific, articulable observations about that employee. Data from these queries will be utilized for the intermodal "reasonable cause" analysis. The accident/incident component of FRA's testing for cause program is the portion actually analogous to "post-accident" testing as conducted by other modes. Supervisory employees are authorized to conduct testing where they have a reasonable suspicion that an employee's acts or omissions contributed to the cause or severity of a reportable accident. Data from these queries will be utilized for the intermodal "post-accident" analysis.

The third component of FRA's testing for cause program, the operating/safety rule component, authorizes testing when an employee has committed any of the specified operating rule violations. This type of testing for cause is unique to the FRA program.

FRA seeks information on all three types of testing for cause, and accordingly has included in section E of the form a separate chart for each testing for cause component. For the accident/incident and operating/safety rule components, each railroad may elect whether to test under the FRA rule (subpart D) or its own authority, and there are significant differences in the substances, testing assays, cutoffs, etc., between FRA-authorized testing using part 40 procedures and private activity. Although it might seem logical to ignore non-DOT/FRA testing for this purpose, that would result in the loss of data on the majority of railroad for-cause tests. Since these tests are both numerous and useful with respect to addressing the alcohol and drug misuse problem, FRA proposes to carry forward existing reporting requirements for this information. However, because of the technical differences that obtain, including testing for "other drugs," the reporting blocks have been modified to permit the reporting railroad to check off the type of authority under which it tested. In the rare case of a railroad using both FRA authority and the company program, the company would complete two copies of the pertinent charts to report testing for cause results from the FRA and railroad testing program. Section E also contains separate questions that request specific information on tests conducted under a railroad's own rules or collective bargaining agreements.

Following the three "testing for cause" charts, FRA proposes to add information from the existing reporting requirements concerning for-cause breath alcohol and urine alcohol testing. Like drug urinalysis, breath alcohol testing may be conducted as testing for cause under subpart D of the FRA regulation or otherwise "for cause" under a railroad's own program. Urine alcohol testing is not presently authorized under the FRA regulation (and is not included in the NPRM that FRA is publishing today proposing amendments in response to the Omnibus Act) due to the technical difficulties with this type of specimen and the apparent lack of interest in utilizing FRA authority for this purpose. However, properly conducted urine alcohol testing can add further capacity to detect and remedy alcohol safety problems. FRA thus proposes to continue to collect this information, as well.

FRA has denominated the OST chart "Return to Duty Testing" as "Post Positive Return to Service Testing" in order to emphasize that it only requests information on return-to-service tests that are required by § 219.104 of the FRA rule. It does not request information on the rather extensive testing undertaken by the railroads on employees returning to service following personal injuries, furloughs, and other periods out of service. Although this other testing is useful, it is generally undertaken with advance notice (for which a low positive rate would be expected) and is not required by the FRA rule.

The OST model chart on "test refusals" has also been modified to delineate the three forms of reasonable suspicion testing.

Finally, FRA has included a chart to collect information on follow-up urine drug testing for those employees who were returned to service after having tested positive in a federal random or for-cause test.

Section by Section Analysis

FRA proposes to add a new subpart I, addressing Annual Reporting Requirements, to part 219. Subpart I would provide data for the OST MIS and incorporate in a more useful format much of the data that FRA already requires. Section 219.3 of the existing regulations would be amended to add subpart I to the list of subparts (D, E, F and G) that do not apply to certain small railroads.

Approximately 60 railroads with 400,000 or more total manhours are currently required to submit annual operating rules and practices reports, including alcohol and drug program data, by March 1 of each following year. The new reporting requirements would expand the universe of reporting railroads to include all of those railroads (operating entities) that were required to file random drug testing programs for FRA approval (about 175 total). However, the smallest railroads, already excused from filing random testing plans, (those with fewer than 15 employees in covered service that do not operate on the tracks of another railroad or engage in joint operations) would likewise be excused under the new filing requirements.

Subpart I would require submission of annual reports to FRA providing the information required by the form and instructions set out in a new appendix D, which is reproduced below. Each report under the proposed subpart I would cover a calendar year. The closing date would be December 31 and the report would be due at FRA by February 15 of the following year. Comment is specifically requested on the feasibility of this 45 day interval for reporting the annual data.

As adapted for the railroad industry, the report must cover each of the following data elements:

1. Number of covered employees by employee category (ie., train service, engine service, dispatcher/operator, signal service, other). This data is necessary to assess the scope of the rule's application and provide a basis for determining if random testing meets the required annual testing percentage.

2. Number of covered employees in each category subject to testing under the anti-drug rules of more than one DOT agency, identified by each agency. This data is necessary to review multi-modal implementation so that policy can be designed accordingly.

3. Number of specimens collected by type of test (e.g., pre-employment/transfer, random, post-positive return to duty, etc.), type of authority (FRA, or, for accident/incident and operating/safety rule testing for cause, railroad) and employee category. This data is needed to check the compliance with the rules by category and to review collection, testing and the review process.

4. Number of positives verified by a Medical Review Officer (MRO) by type of test, type of drug and employee category. This data, along with the number of tests performed, permits the calculation of positive rates necessary to determine the extent of drug use and the specific drugs detected in the various categories of employees. Further, analysis of this data over time will provide a measure of the effectiveness of the drug testing rules in deterring drug use.

5. Number of negatives verified by a MRO by type of test, and employer category. This data is needed to check compliance with the rules by category and to review the application of the components of the programs.

6. Number of persons denied a position as a covered employee following a verified positive drug test. This data provides an assessment of whether the testing program is being implemented as required, provides a measure of the impact of the drug testing rules on the industries, and yields information on the prevalence of drug use in the applicant pool.

7. Number of covered employees verified positive by a MRO, who were returned to service in covered positions during the reporting period. This data provides information on employer policy implementation regarding reentry requirements and rehabilitation of identified drug users.

8. Number of employees with tests verified positive by a MRO for multiple drugs. This data provides information on the extent of multi-drug use in the regulated industries.

9. Number of covered employees who refused to submit to a drug test required under this part, and the action taken in response to the refusal(s). This data provides information on employer policy implementation regarding refusals and subsequent employer actions.

10. Number of covered employees and supervisors who have received required training during the reporting period. This data provides information on training provided during the current reporting period and a cumulative count of covered employees and supervisory personnel on payroll as of December 31 who have received the required drug training.

A new appendix D to part 219 would set forth a standard form to provide the data required by this regulation. Comments are specifically requested on the form and instructions.

Request for Comments

FRA requests written comment on these revised annual reporting requirements. FRA will make available an opportunity for oral presentations, as required by section 202 of the Federal Railroad Safety Act of 1970, upon request within the period specified under "DATES" above.

FRA specifically solicits comment on several issues. FRA is interested in comments on the utility and feasibility of gathering, maintaining, verifying, organizing and reporting the additional data that will be necessary to complete the proposed MIS data collection form. FRA believes that most of the required data elements can be readily derived from data already maintained under its existing data retention or reporting requirements, but realizes that many smaller railroads are not currently required to submit annual reports. These railroads have already been required, however, to submit and implement random testing plans, conduct pre-employment testing, and maintain records as required by § 219.713. FRA invites specific comment as to whether smaller railroads should be required to maintain and file the comprehensive data specified in the annual MIS reports.

In addition, FRA is aware that the proposed reports will include data that railroads are not required to report under its current annual reporting rule, *e.g.*, pre-employment testing results. FRA requests comment on the practicality of adding these new data elements to a railroad's established annual reporting system and invites suggestions as to alternative data collection methods.

The MIS as proposed will necessitate changes in railroad reporting systems. FRA is interested in any structural impediments railroads may face in modifying their data retrieval systems to fulfill the new reporting requirements. OST/FRA contemplate that the report filed in February 1994 should cover the entire 12 months of 1993, but one option would be to permit railroads to report data from the first half of 1993 in the old reporting format and data from the second half of 1993 in the new MIS format. Delay of the MIS requirements would allow railroads time to restructure the recordkeeping systems that they already have in place. FRA is interested in comments on whether this adjustment time is necessary, and also invites other options from commenters.

FRA notes that, although the adapted form appears lengthy, essentially no respondents would find it necessary to enter data (other than "0" to indicate no relevant activity) in all of the spaces provided. Commenting railroads are thus requested to focus on those elements actually relevant to their individual programs.

FRA reserves the right to modify the proposed reporting requirements in light of comments received.

Executive Order 12291 and DOT Regulatory Policy and Procedures

This proposal is not "major" under Executive Order 12291. It is significant under the Department of Transportation's Regulatory Policy and Procedures.

This notice proposes standardizing reporting requirements within DOT with retention of some rail-specific requirements. The purpose is to provide OST and FRA with critical data in order to make necessary policy and program evaluations which could lead to policy changes which make the rule more effective for safety. This data will provide significant input to evaluate the cost effectiveness of the programs and each part of the program. This modification would provide overall benefit to public safety by enhancing FRA's ability to ensure that this critical program is operating effectively. FRA anticipates that this requirement will cause minimal change in compliance burden and cost. Most of the program data requested would have been maintained in the implementation of an effective drug program under the current rule.

The Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 was enacted by Congress to ensure that small entities are not unnecessarily and disproportionately burdened by

Government regulations. FRA certifies that this proposal would not have a significant economic impact on a substantial number of small entities.

FRA specifically solicits comment on means to limit any reporting burden on small entities and regarding the impact of requiring reporting of small railroads not subject to current requirements (certain railroads with fewer than 400,000 manhours of employment).

Federalism Implications

The proposed rulemaking action would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, FRA has determined that this notice does not have sufficient federalism implications to warrant preparation of a Federalism assessment.

Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96–511) applies to this notice of proposed rulemaking because it changes several approved collections of information and initiates several new information collection requirements. OST and FRA estimate that preparation of the annual report would require approximately 12–16 hours in the case of a small company with two million or less manhours, 8 days-2 weeks in the case of a medium company with two million to ten million manhours, and 3 weeks-2 months in the case of a large company with in excess of ten million manhours. FRA solicits comments on the accuracy of the estimates, the practical utility of the information, and alternative methods that might be less burdensome to obtain this information. Persons desiring to comment on this topic should address their views to Gloria D. Swanson, Federal Railroad Administration, room 8314, 400 Seventh Street, SW., Washington, DC 20590 and to the Regulatory Policy Branch (OMB No. 2130–526), Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., Washington, DC 20530, Attention: Desk Officer for FRA. Copies of any such comments should also be submitted to the docket of this rulemaking at the address provided above.

FRA will request OMB approval of these revised information collection requirements. A **Federal Register** notice will be published when Paperwork Reduction Act approval is obtained. Current information collection requirements under part 219 were approved under OMB No. 2130–0526.

List of Subjects

49 CFR Part 217

Railroad operating rules, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 219

Control of alcohol and drug use, Railroad safety, Reporting and recordkeeping requirements.

In consideration of the foregoing, FRA proposes to amend parts 217 and 219, title 49, Code of Federal Regulations as follows:

PART 217—[AMENDED]

1. The authority citation for part 217 continues to read as follows:

Authority: 45 U.S.C. 431, 437 and 438, as amended; Pub. L. 100–342; and 49 CFR 1.49(m).

2. Section 217.13 is amended by deleting paragraph (d).

PART 219—[AMENDED]

3. The authority citation for part 219 continues to read as follows:

Authority: 45 U.S.C. 431, 437, and 438, as amended; Pub. L. 100–342; and 49 CFR 1.49(m).

4. Part 219 is amended by adding a new § 219.803 to subpart I, as follows:

Subpart I—Annual Report

* * * * *

§ 219.803 Reporting drug misuse prevention program results in a management information system.

(a) Each railroad shall submit to FRA an annual report covering the calendar year, summarizing the results of its drug misuse prevention program.

(b) Each railroad that is subject to more than one DOT agency drug regulation shall identify each employee covered by the regulations of more than one DOT agency. The identification will be by the total number and category of covered functions. Prior to conducting any drug test on a covered employee subject to the regulations of more than one DOT agency, the railroad shall determine which DOT agency regulation authorizes or requires the test. The test result information shall be directed to the appropriate DOT agency or agencies.

(c) Each railroad shall ensure the accuracy and timeliness of each report submitted by the railroad or a consortium.

(d) Each railroad shall submit the required annual reports no later than February 15 of each year. The report shall be submitted on the form specified by the FRA. Each report shall address each of the following data elements:

(1) Number of covered employees by employee category (*i.e.*, train service, engine service, dispatcher/operator, signal service, other).

(2) Number of covered employees in each category subject to testing under the anti-drug rules of more than one DOT agency, identified by each agency.

(3) Number of specimens collected by type of test (*e.g.*, pre-employment/transfer, random, post-positive return to duty, etc.), type of authority (FRA, or, for accident/incident and operating/safety rule testing for cause testing, railroad) and employee category.

(4) Number of positives verified by a Medical Review Officer (MRO) by type of test, type of drug and employee category.

(5) Number of negatives verified by a MRO by type of test, and employer category.

(6) Number of persons denied a position as a covered employee following a verified drug test.

(7) Number of covered employees verified positive by an MRO, who were returned to duty in covered positions during the reporting period.

(8) Number of employees with tests verified positive by an MRO for multiple drugs.

(9) Number of covered employees who refused to submit to a drug test required under this part, and the action taken in response to the refusal(s).

(10) Number of covered employees and supervisors who have received required training during the reporting period.

5. Part 219 is amended by adding a new appendix D as follows:

Appendix D to Part 219—Format and Instructions for Annual Report

Issued in Washington, DC, on December 2, 1992.

Andrew H. Card, Jr.,
Secretary.

Gilbert E. Carmichael,
Administrator, Federal Railroad Administration.

BILLING CODE 4910-06-M

APPENDIX B - DRUG AND ALCOHOL TESTING MIS DATA COLLECTION FORM

GENERAL INSTRUCTIONS

This reporting form includes three parts. Collectively, these parts address the data elements required in the Federal Railroad Administration (FRA) and U.S. Department of Transportation (DOT) drug and alcohol testing regulations. Each part of the form is preceded by instructions which outline and explain the information requested and indicate the probable sources for this information. The three parts of the form are:

Section	Instructions Pages	Reporting Form Pages
I. ORGANIZATIONAL INFORMATION	i-ii	1-2
II. DRUG TESTING INFORMATION	iii-vii	3-10
III. ALCOHOL TESTING INFORMATION	viii-xii	11-17

I. ORGANIZATIONAL INFORMATION

INSTRUCTIONS

This part of the reporting form includes two sections. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. RAILROAD EMPLOYER INFORMATION	i	1
B. COVERED EMPLOYEES	ii	2

Page 1 **RAILROAD EMPLOYER INFORMATION** (Section A) requires the company name for which the report is done and a current address. Below this, a signature, date, and current telephone (including the area code) are required certifying the correctness and completeness of the form.

Page 2

COVERED EMPLOYEES (Section B) requires a count for each Hours of Service Act employee category that must be tested under FRA/DOT regulations. For FRA this includes the following categories "Engine Service", "Train Service", "Dispatcher/Operator", "Signal Service", and "Other." The **OTHER** category is a count of employees performing covered service that are not included in specific preceding categories. Examples include yardmasters, hostlers (non-engineer craft), bridge tenders, switch tenders, etc. These counts should be based on the company records for the reported year. The **TOTAL** is a count of **all** covered employees for **all** categories combined, i.e., the sum of the column.

Additional information must be completed if your company employs personnel who perform duties covered by the anti-drug rules of more than one DOT operating administration. **NUMBER OF EMPLOYEES COVERED BY MORE THAN ONE DOT OPERATING ADMINISTRATION**, requires that you identify the number of employees in each employee category under the appropriate additional operating administration(s).

For Office Use Only

FRA DRUG AND ALCOHOL TESTING MIS DATA COLLECTION FORM

YEAR COVERED BY THIS REPORT: 19__

A. RAILROAD EMPLOYER INFORMATION

Company _____

Address _____

_____

_____

I, the undersigned, certify the attached Federal Railroad Administration Drug and Alcohol Management Information System Data Collection Form, is to the best of my knowledge and belief, a true, correct, and complete form for the period stated.

_____
Signature

_____
Title

_____
Date of Signature

_____
Phone Number

Title 18, U.S.C. Section 1001, makes it a criminal offense subject to a maximum fine of $10,000, or imprisonment for not more than 5 years, or both, to knowingly and willfully make or cause to be made any false or fraudulent statements or representations in any matter within the jurisdiction of any agency of the United States. The willful falsification of any information in this report may also subject the submitter to civil or criminal prosecution under Title 45, U.S.C. Section 438(e).

B. COVERED EMPLOYEES

COVERED EMPLOYEES						
EMPLOYEE CATEGORY	NUMBER OF COVERED EMPLOYEES	NUMBER OF EMPLOYEES COVERED BY MORE THAN ONE DOT OPERATING ADMINISTRATION				
		FAA	FHWA	FTA	RSPA	USCG
Engine Service						
Train Service						
Dispatcher/Operator						
Signal Service						
Other*						
TOTAL						

*Includes yardmasters, hostlers (non-engineer craft), bridge tenders, switch tenders, and other miscellaneous employees performing covered service as defined in 49 CFR 228.5 (c).

II. DRUG TESTING INFORMATION

INSTRUCTIONS

The following instructions are to be used as a guide for completing the drug testing information in the Federal Railroad Administration (FRA) and the U.S. Department of Transportation (DOT) **Drug and Alcohol Testing Management Information System Data Collection Form**. These instructions outline and explain the information requested. A sample testing results table with a narrative explanation is provided on pages iv-vi as an example to facilitate the process of completing the form correctly.

This part of the reporting form includes four sections. These sections address the data elements required in the regulations. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. JOB APPLICANT/COVERED SERVICE TRANSFER TESTING INFORMATION	iv	4
B. EMPLOYEE TESTING	vi	5-9
C. OTHER TESTING/PROGRAM INFORMATION	vii	10
D. TRAINING/EDUCATION	vii	10

Sections A and B are used to summarize the drug testing results for covered employees. There are seven tables to be completed (one in Section A and six in Section B). The first table (Section A) is where you enter the data on pre-employment testing. The six tables in Section B are for entering drug testing data on random testing, for cause testing (one table each for "for cause testing" due to accidents/injuries, rules violations, and reasonable suspicion), post-positive return to service testing, and follow-up testing, respectively. Items necessary to complete these tables include:

1) the number of specimens collected in each employee category;
2) the number of specimens tested which were verified negative and verified positive for any drug(s); and
3) individual counts of those specimens which were verified positive for each of the five drugs.

Do not include results of quality control (QC) samples submitted to the testing laboratory in any of the tables.

A sample table with detailed instructions is provided for Section A, **JOB APPLICANT/COVERED SERVICE TRANSFER TESTING INFORMATION**. The format and explanations used for the sample table apply to all seven of the tables in Sections A and B.

Information on actions taken with those persons testing positive is required at the end of both Sections A and B. Specific instructions for providing this latter information are given after the instructions for completing the tables in Sections A and B.

Page 4

JOB APPLICANT/COVERED SERVICE TRANSFER TESTING INFORMATION (Section A) requires information for pre-employment and covered service transfer testing. All numbers entered into this table should be separated into the category of employment for which the applicant was applying/transferring. A sample table with example numbers is presented on page v.

Three types of information are necessary to complete the left side of this table. The first blank column with the heading "**NUMBER OF SPECIMENS COLLECTED,**" requires a count for all collected specimens by employee category. It should not include refusals to test. The second blank column with the heading "**NUMBER OF SPECIMENS VERIFIED NEGATIVE,**" requires a count for all completed tests by employee category that were verified negative by your Medical Review Officer (MRO).

The third blank column with the heading "**NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS,**" refers to the number of specimens provided by job applicants that were verified positive. "Verified positive" means the results were verified by your MRO.

The right hand portion of this table, with the heading "**NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG,**" requires counts of positive tests for each of the five drugs for which tests were done, i.e., marijuana, cocaine, phencyclidine, opiates, and amphetamines. The number of specimens positive for each drug should be entered in the appropriate column for that drug type. Again, "verified positive" refers to test results verified by your MRO.

If an applicant/transferee tested positive for more than one drug, for example, both marijuana and cocaine, that person's positive results would be included once in each of the appropriate columns.

Each column in the table should be added and the answer entered in the row marked "**TOTAL**".

A sample table is provided on page v illustrating this procedure with example numbers.

Page 4

Below the table for **PRE-EMPLOYMENT AND "COVERED SERVICE" TRANSFER TESTING** is a box with the heading "**Number of applicants/transfers denied employment/transfer in a covered position following a verified positive drug test**". This is simply a count of those persons who were not hired/transferred into a covered position because they tested positive for one or more drugs.

SAMPLE APPLICANT TEST RESULTS TABLE

The following example is for Section A, **JOB APPLICANT/COVERED SERVICE TRANSFER TESTING INFORMATION**, which summarizes pre-employment/covered service transfer testing results. The procedures detailed here also apply to the tables in Section B which require you to summarize testing results for employees. This example will use the categories "Engine Service" and "Train Service" to illustrate the procedures for completing the form.

A — Urine specimens were collected for 157 job applicants for engine service positions during the reporting year. This information is entered in the first blank column of the table in the row marked "Engine Service".

B — The Medical Review Officer (MRO) for your company reported that 153 of those 157 specimens from applicants for engine service positions were negative (i.e., no drugs were detected). Enter this information in the second blank column of the table in the row marked "Engine Service".

C — The MRO for your company reported that 4 of those 157 specimens from applicants for engine service positions were positive (i.e., a drug or drugs were detected). Enter this information in the third blank column of the table in the row marked "Engine service".

D — With the 4 specimens that tested positive, the following drugs were detected:

Specimen	Drugs
#1	Marijuana
#2	Amphetamines
#3	Marijuana and Cocaine (Multi-drug specimen)
#4	Marijuana

Marijuana was detected in three (3) specimens, cocaine in one (1), and amphetamines in one (1). This information is entered in the columns on the right hand side of the table under each of these drugs. Since two different drugs were detected in specimen #3 (multi-drug), entries are made in both the marijuana and the cocaine columns for this specimen. Information on multi-drug specimens must also be entered in Section C, **OTHER TESTING/PROGRAM INFORMATION**, on page 10 of the reporting form.

PRE-EMPLOYMENT AND "COVERED SERVICE" TRANSFER TESTING

EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
Engine Service	157	153	4	3	1	0	0	1
Train Service	107	105	2	1	0	0	1	0
TOTAL	264	258	6	4	1	0	1	1

A B C D E

Please note that the sample data collection form also has information for train service workers on line two. The same procedures outlined for engine service positions should be followed for entering the data

on train service workers. With applicants for train service positions, 107 specimens were collected resulting in 105 verified negatives and 2 verified positives -- 1 for marijuana and 1 for opiates. This information is entered in the row marked "Train Service"

E

The last row, marked "TOTAL", requires you to add the numbers in each of the columns. With this example, 157 specimens from applicants for engine service positions were collected and 107 for applicants for train service positions. The total for that column would be 264 (i.e., 157+107). The same procedure should be used for each column, i.e., add all the numbers in that column and place the answer in the last row.

Note that adding up the numbers for each type of drug in a row ("NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG") will not always match the number entered in the third column, "NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS". The total for the numbers on the right hand side of the table may differ from the number of specimens testing positive since some specimens may contain more than one drug.

Remember that the same procedures indicated above are to be used for completing all of the tables in Sections A and B.

Pages 5-9 **EMPLOYEE TESTING** (Section B), as indicated, requires information for company employees in **covered positions** only. A separate table must be completed for each category of test. These categories include: (1) random testing, (2) for cause testing due to accidents/injuries, (3) for cause testing due to rule violations, (4) for cause testing due to reasonable suspicion, (5) post-positive return to service testing, and (6) follow-up testing. These tables are to be filled out like the sample table above. Again, these numbers **do not** include refusals for testing.

Pages 5-6 Following the table that summarizes **RANDOM TESTING**, you must provide **Additional Testing Data** on those employees who have tested positive. This includes disciplinary actions and results of evaluations and rehabilitations.

Pages 6 8 **EMPLOYEE TESTING - FOR CAUSE TESTING INFORMATION** requires three separate tables, one for accidents/injuries, one for rules violations, and one for reasonable suspicion. In the shaded portion of the tables for accidents/injuries and rules violations you must indicate whether the information in the table for testing was conducted under FRA authority or under railroad authority. **Reasonable suspicion testing is mandatory under FRA regulations and not subject to railroad discretion**.

The tables for accidents/injuries and rules violations contain two additional columns which must be completed for testing done under railroad authority. The first additional column, labeled "Other Prohibited," requires that you list any drugs, other than the five listed, that are tested under railroad rule (e.g., butalbital). The rightmost column, labeled "Combined," requires that you indicate whether any of these positives were in combination with one or more positive findings for the five

drugs (same specimen). If yes, you must attach details (e.g., 2 marijuana/butalbital).

Page 9 — Following the table that summarizes **POST-POSITIVE RETURN TO SERVICE TESTING**, you must provide counts for employees who have tested positive and are currently in, or have completed rehabilitation, and have returned to work in a covered position. Report this information only for employees who tested positive during this reporting period.

Page 10 — **OTHER TESTING/PROGRAM INFORMATION** (Section C) requires that you complete a table dealing with specimens positive for more than one drug and a table dealing with employees who refused to submit to a drug test.

Page 10 — **SPECIMENS VERIFIED POSITIVE FOR MORE THAN ONE DRUG** requires information on specimens that contained more than one drug. Indicate the **EMPLOYEE CATEGORY** and the **NUMBER OF VERIFIED POSITIVES**, then check the appropriate columns indicating the combination of drugs reported as positive. For example, if marijuana and cocaine were detected in 3 engine service specimens, then you would write "Engine service" as the employee category, "3" as the number of verified positives, and "3" in the columns for "Marijuana" and "Cocaine". If marijuana and opiates were detected in 2 engine service specimens, then you would write "Engine service" as the employee category, "2" as the number of verified positives, and "2" in the columns for "Marijuana" and "Opiates".

Page 10 — **EMPLOYEES WHO REFUSED TO SUBMIT TO A DRUG TEST** requires information on the **NUMBER OF COVERED EMPLOYEES** who refused to submit to a drug test required under this regulation, and a description of the **ACTION TAKEN** in response to the refusal. An example of an action taken would be "removed from covered duties pending termination".

Page 10 — **TRAINING/EDUCATION** (Section D) requires information on the number of supervisory personnel who have received the required drug training during the current reporting period.

READ BEFORE COMPLETING THE REMAINDER OF THIS FORM:

1. All items refer to the **current** reporting period **only** (for example, January 1, 1993 - December 31, 1993).

2. This report is only for testing **REQUIRED TO BE REPORTED BY THE FEDERAL RAILROAD ADMINISTRATION (FRA) AND THE U.S. DEPARTMENT OF TRANSPORTATION (DOT)**:

   - Results should be reported only for employees in **COVERED POSITIONS** as defined by FRA/DOT drug testing regulations.

   - The information requested should include testing for marijuana (THC), cocaine, phencyclidine (PCP), opiates, and amphetamines using the standard procedures required by DOT regulation 49 CFR Part 40 and other drugs where appropriate.

3. Information on refusals for testing should only be reported in Section C ("OTHER TESTING/PROGRAM INFORMATION"). Do not include refusals for testing in other sections of this report.

4. Do not include the results of any quality control (QC) samples submitted to the testing laboratory in any of the tables.

5. Complete all items; DO NOT LEAVE ANY ITEM BLANK. If the value for an item is zero (0), place a zero (0) on the form.

This part of the form requires information on VERIFIED POSITIVE and VERIFIED NEGATIVE drug tests. These are the results that are reported to you by your Medical Review Officer (MRO).

A. JOB APPLICANT/COVERED SERVICE TRANSFER TESTING INFORMATION

PRE-EMPLOYMENT AND "COVERED SERVICE" TRANSFER TESTING								
EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
Engine Service								
Train Service								
Dispatcher/ Operator								
Signal Service								
Other								
TOTAL								

Number of applicants/transfers denied employment/transfer in a covered position following a verified positive drug test: [ ]

B. EMPLOYEE TESTING - RANDOM TESTING INFORMATION

RANDOM TESTING								
EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
Engine Service								
Train Service								
Dispatcher/ Operator								
Signal Service								
Other								
TOTAL								

Additional Testing Data

1. Number of disciplinary actions taken (attach narrative statement describing type of disciplinary action taken): [ ]

2. Number of employees referred for evaluation: [ ]

3. Number of employees evaluated as not requiring formal treatment: [ ]

4. Number of employees evaluated as requiring outpatient treatment: [ ]

5 Number of employees evaluated as requiring inpatient treatment: [ ]

B EMPLOYEE TESTING - RANDOM TESTING INFORMATION (Continued)

Additional Testing Data

6. Number of employees failing to complete rehabilitation (as determined by clinical judgement or positive test on return-to-work urine analysis): ____

7. Number of employees who completed rehabilitation determined after investigation to have been involved in subsequent drug disciplinary offenses: ____

B. EMPLOYEE TESTING - TESTING FOR CAUSE INFORMATION

Note: If you used both FRA authority and railroad authority to conduct for cause drug testing for accidents/injuries or rules violations, please fill out a separate chart for each authority, i.e., one for FRA tests and one for railroad tests (extra sheets attached).

FOR CAUSE DRUG TESTING
DUE TO ACCIDENT*/INJURY
*(Accidents NOT qualifying under 49 CFR Part 219 Subpart C)

(Testing Conducted Under: FRA Rule___ Railroad Rule___)

EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG						
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines	Other Prohibited [1]	Combined [2]
Engine Service										
Train Service										
Dispatcher/ Operator										
Signal Service										
Other										
TOTAL										

B. EMPLOYEE TESTING - TESTING FOR CAUSE INFORMATION (continued)

FOR CAUSE DRUG TESTING
DUE TO RULES VIOLATION

(Testing Conducted Under: FRA Authority___ Railroad Authority__)

EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG						
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines	Other Prohibited [1]	Combined [2]
Engine Service										
Train Service										
Dispatcher/ Operator										
Signal Service										
Other										
TOTAL										

[1] Other drugs tested under railroad rule where the use was prohibited by 49 CFR 219.102.

[2] Indicate whether any of these positives were in combination with one or more positive findings for the five drugs (same specimen). If yes, attach details (e.g., 2 marijuana/butalbital).

B. EMPLOYEE TESTING - TESTING FOR CAUSE INFORMATION (continued)

FOR CAUSE DRUG TESTING REASONABLE SUSPICION								
EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
Engine Service								
Train Service								
Dispatcher/ Operator								
Signal Service								
Other								
TOTAL								

OPERATIONAL TESTS AND INSPECTIONS

The following items request information concerning the railroad's program for supervising its employees and ensuring that they are free from impairments caused by drugs:

1. Total number of covered employees observed in documented tests and inspections related to enforcement of the railroad's rules and policies on drug use (including, but not limited to, observations for which urine tests were conducted and observations after accidents/incidents and rule violations): ☐

2. Number of covered employees charged with a violation of the railroad's Rule G or similar rule or policy: ☐

B. EMPLOYEE TESTING - POST-POSITIVE RETURN TO SERVICE INFORMATION

POST-POSITIVE RETURN TO SERVICE TESTING									
EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
Engine Service								
Train Service								
Dispatcher/ Operator								
Signal Service								
Other								
TOTAL								

Note: The following question relates to post-positive 49 CFR Part 40 and Part 219 (other than Subpart C, "FRA Post Accident Testing").

Number of employees, currently in or having completed rehabilitation or otherwise qualified to return to duty, who have returned to work in a covered position during this reporting period: [ ]

B. EMPLOYEE TESTING - FOLLOW-UP TESTING INFORMATION

FOLLOW-UP TESTING									
EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
Engine Service								
Train Service								
Dispatcher/ Operator								
Signal Service								
Other								
TOTAL								

C. OTHER TESTING/PROGRAM INFORMATION

SPECIMENS VERIFIED POSITIVE FOR MORE THAN ONE DRUG						
EMPLOYEE CATEGORY	NUMBER OF VERIFIED POSITIVES	Marijuana (THC)	Cocaine	Phency-clidine (PCP)	Opiates	Amphet-amines

EMPLOYEES WHO REFUSED TO SUBMIT TO A DRUG TEST	
NUMBER OF COVERED EMPLOYEES	ACTION TAKEN

D. TRAINING/EDUCATION

Training During Current Reporting Period

Number of supervisory personnel who have received initial training on the specific contemporaneous physical, behavioral, and performance indicators of probable drug use as required by FRA drug testing regulations: [ ]

Number of supervisory personnel who have received recurrent or refresher training on the specific contemporaneous physical, behavioral, and performance indicators of probable drug use: [ ]

III. ALCOHOL TESTING INFORMATION

INSTRUCTIONS

The following instructions are to be used as a guide for completing the alcohol testing information for the Federal Railroad Administration (FRA) and the U.S. Department of Transportation (DOT) **Drug and Alcohol Testing Management Information System Data Collection Form**. These instructions outline and explain the information requested. A sample testing results table with a narrative explanation is provided on pages ix-xi as an example to facilitate the process of completing the form correctly.

This part of the reporting form includes four sections. These sections address the data elements required in the regulations. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. JOB APPLICANT/COVERED SERVICE TRANSFER TESTING INFORMATION	ix	11
B. EMPLOYEE TESTING	xii	12-16
C. OTHER TESTING/PROGRAM INFORMATION	xi	16-17
D. TRAINING/EDUCATION	xii	17

Sections A and B are used to summarize the alcohol testing results for covered employees. There are seven tables to be completed (one in Section A and six in Section B). The first table (Section A) is where you enter the data on pre-employment/pre-duty testing. The six tables in Section B are for entering alcohol testing data for random testing, for cause testing (one table each for "for cause testing" due to accidents/injuries, rules violations, and reasonable suspicion), post-positive return to service testing, and follow-up testing, respectively. Items necessary to complete these tables include:

1) the number of initial alcohol tests performed for each employee category;
2) the number of confirmatory alcohol tests performed for each employee category;
3) the number of confirmatory test results which were equal to or greater than 0.04; and
4) the number of confirmatory test results which were equal to or greater than 0.02, but less than 0.04.

A sample table with detailed instructions is provided for Section A, **JOB APPLICANT/COVERED SERVICE TRANSFER TESTING INFORMATION**. The format and explanations used for the sample table apply to all seven of the tables in Sections A and B.

Information on actions taken with those persons whose alcohol test results were 0.04 or greater is required at the end of both Sections A and B. Specific instructions for providing this latter information are given after the instructions for completing the tables in Sections A and B.

Page 11 **JOB APPLICANT/COVERED SERVICE TRANSFER TESTING INFORMATION** (Section A) requires information for pre-employment/pre-duty and covered service transfer testing. All numbers entered into this table should be separated into the category of employment for which the applicant was applying/transferring. A sample table with example numbers is presented on page x.

Four types of information are necessary to complete the left side of this table. The first blank column with the heading "**NUMBER OF INITIAL TESTS**" requires a count of all initial alcohol tests performed for each employee category. It should not include refusals to test. The second blank column with the heading "**NUMBER OF CONFIRMATORY TESTS**" requires a count of all confirmatory alcohol tests performed for each employee category.

The third blank column with the heading "**NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04**" requires a count for each employee category.

The fourth blank column with the heading "**NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02, BUT LESS THAN 0.04**" requires a count for each employee category.

Each column in the table should be added and the answer entered in the row marked "**TOTAL**".

A sample table is provided on page x with example numbers.

Page 11 Below the table for pre-employment testing information is a box with the heading "**Number of applicants/transfers denied employment/transfer following an alcohol test indicating an alcohol concentration of 0.04 or greater**". Enter the appropriate number in the box provided.

SAMPLE APPLICANT TEST RESULTS TABLE

The following example is for Section A, **JOB APPLICANT TESTING INFORMATION**, which summarizes pre-employment/pre-duty testing results. The procedures detailed here also apply to the tables in Section B which require you to summarize testing results for employees. This example will use the categories "Engine Service" and "Train Service" to illustrate the procedures for completing the form.

A Initial tests were performed on 157 job applicants for engine service positions during the reporting year. This information is entered in the first blank column of the table in the row marked "Engine Service".

B Confirmatory tests were necessary for 6 of the 157 applicants for engine service positions. Enter this information in the second blank column of the table in the row marked "Engine Service". The confirmatory test results for these 6 applicants were the following:

Applicant	Confirmation Result
#1	0.06
#2	0.01
#3	0.11
#4	0.04
#5	0.03
#6	0.02

C The confirmatory test results for 3 of the applicants for engine service positions were equal to or greater than 0.04. Enter this information in the third blank column of the table in the row marked "Engine Service".

D The confirmatory test results for 2 of the applicants for engine service positions were equal to or greater than 0.02, but less than 0.04. Enter this information in the fourth blank column of the table in the row marked "Engine Service".

E The last row, marked "TOTAL", requires you to add the numbers in each of the columns. With this example, 157 applicants for engine service positions and 107 applicants for train service positions were subjected to initial tests. The total for that column would be 264 (i.e., 157 + 107). The same procedure should be used for each column. (i.e., add all the numbers in that column and place the answer in the last row).

PRE-EMPLOYMENT/PRE-DUTY TESTING

EMPLOYEE CATEGORY	NUMBER OF INITIAL TESTS	NUMBER OF CONFIRMATORY TESTS	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02 BUT LESS THAN 0.04
Engine Service	157	6	3	2
Train Service	107	3	1	0
TOTAL	264	9	4	2

A B C D E

Please note that our sample data collection form also has information for train service workers on line two. The same procedures outlined for engine service should be followed for entering the data on train service workers. With applicants for train service positions, 107 initial tests were conducted resulting in 3 confirmatory tests. The confirmatory test result for 1 of the train service applicants was equal to or

x

greater than 0.04; no results were equal to or greater than 0.02, but less than 0.04. This information is entered in the row marked "Train Service".

Note that adding up the numbers for confirmation results in columns three and four will not always match the number entered in the second column, "NUMBER OF CONFIRMATORY TESTS". These numbers may differ since some confirmatory test results may be less than 0.02.

Remember that the same procedures indicated above are to be used for completing all of the tables in Sections A and B.

Pages 12-16 **EMPLOYEE TESTING** (Section B), as indicated, requires information for company employees in **covered positions** only. A separate table must be completed for each category of test. These categories include: (1) random testing, (2) for cause testing due to accidents/injuries, (3) for cause testing due to rule violations, (4) for cause testing due to reasonable suspicion, (5) post-positive return to service testing, and (6) follow-up testing. These tables are to be filled out like the sample table above. Again, these numbers **do not** include refusals for testing.

Pages 12-13 Following the table that summarizes **RANDOM TESTING**, you must provide **Additional Testing Data** on those employees who have tested positive. This includes disciplinary actions and the results of evaluations and rehabilitations.

Pages 13-15 **EMPLOYEE TESTING - TESTING FOR CAUSE INFORMATION** requires three separate tables, one for accidents/injuries, one for rules violations, and one for reasonable suspicion. In the shaded portion of the accidents/injuries table and the rules violations table you must indicate whether the information in the table for testing was conducted under FRA authority or under railroad authority. **Reasonable suspicion testing is mandatory under FRA regulations and not subject to railroad discretion.**

Page 15 Following the table that summarizes **POST-POSITIVE RETURN TO SERVICE TESTING**, you must provide a count of the **"Number of employees with a confirmatory alcohol test indicating an alcohol concentration of 0.04 or greater who were returned to duty in a covered position (having complied with the recommendations of a substance abuse professional as described in FRA regulations)"**. Report this information only for employees who were tested during this reporting period.

Pages 16-17 **OTHER TESTING/PROGRAM INFORMATION** (Section C) requires that you provide information on employees who tested positive for drugs and alcohol (at the same time), information on violations of other alcohol provisions (not necessarily resulting in positive alcohol tests), and information on employees who refused to submit to an alcohol test.

Page 16 **Number of employees administered drug and alcohol tests at the same time resulting in a verified positive drug test and an alcohol test indicating an alcohol concentration of 0.04 or greater**, requires that a count of all such employees be entered in the indicated box.

Page 16 **VIOLATIONS OF OTHER ALCOHOL PROVISIONS/PROHIBITIONS OF THIS REGULATION**, requires information on the **NUMBER OF COVERED EMPLOYEES** committing such a violation, a description of the **VIOLATION** committed (e.g., pre-duty alcohol use, on duty alcohol use, on duty alcohol possession), and a description of the **ACTION TAKEN** in response to the violation.

Page 17 **EMPLOYEES WHO REFUSED TO SUBMIT TO AN ALCOHOL TEST** requires information on the **NUMBER OF COVERED EMPLOYEES** who refused to submit to an alcohol test as required under this regulation, and a description of the **ACTION TAKEN** in response to the refusal.

Page 17 **TRAINING/EDUCATION** (Section D) requires information on the number of supervisory personnel who have received the required alcohol training during the current reporting period.

READ BEFORE COMPLETING THE REMAINDER OF THIS FORM:

1. All items refer to the **current** reporting period **only** (for example, January 1, 1993 - December 31, 1993).

2. This report is only for testing **REQUIRED TO BE REPORTED BY THE FEDERAL RAILROAD ADMINISTRATION (FRA) AND THE U.S. DEPARTMENT OF TRANSPORTATION (DOT)**:

   - Results should be reported only for employees in **COVERED POSITIONS** as defined by FRA/DOT alcohol testing regulations.
   - The information requested should only include testing for alcohol using the standard procedures required by DOT regulation 49 CFR Part 40.

3. Complete all items; DO NOT LEAVE ANY ITEM BLANK. If the value for an item is zero (0), place a zero (0) on the form.

A. JOB APPLICANT/COVERED SERVICE TRANSFER TESTING INFORMATION

PRE-EMPLOYMENT/PRE-DUTY TESTING

EMPLOYEE CATEGORY	NUMBER OF INITIAL TESTS	NUMBER OF CONFIRMATORY TESTS	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02, BUT LESS THAN 0.04
Engine Service				
Train Service				
Dispatcher/Operator				
Signal Service				
Other				
TOTAL				

Number of persons denied a position as a covered employee following a pre-employment/pre-duty alcohol test indicating an alcohol concentration of 0.04 or greater: [ ]

B. EMPLOYEE TESTING - RANDOM TESTING INFORMATION

RANDOM TESTING				
EMPLOYEE CATEGORY	NUMBER OF INITIAL TESTS	NUMBER OF CONFIRMATORY TESTS	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02, BUT LESS THAN 0.04
Engine Service				
Train Service				
Dispatcher/Operator				
Signal Service				
Other				
TOTAL				

Additional Testing Data

1 Number of disciplinary actions taken (attach narrative statement describing type of disciplinary action taken): [ ]

2. Number of employees referred for evaluation: [ ]

3. Number of employees evaluated as not requiring formal treatment: [ ]

4. Number of employees evaluated as requiring outpatient treatment: [ ]

5. Number of employees evaluated as requiring inpatient treatment: [ ]

B. EMPLOYEE TESTING - RANDOM TESTING INFORMATION (continued)

Additional Testing Data

6 Number of employees failing to complete rehabilitation (as determined by clinical judgement or positive test on return-to-work): ____

7 Number of employees who completed rehabilitation determined after investigation to have been involved in subsequent alcohol disciplinary offenses: ____

B EMPLOYEE TESTING - TESTING FOR CAUSE INFORMATION

Note: If you used both FRA authority and railroad authority to conduct for cause breath testing for accidents/injuries or rules violations, please fill out a separate chart for each authority, i.e., one for FRA tests and one for railroad tests (extra sheets attached).

FOR CAUSE ALCOHOL TESTING
DUE TO ACCIDENT*/INJURY

Part VI

Department of Transportation

Federal Transit Administration

49 CFR Parts 653 and 654
Drug and Alcohol Testing Programs; Proposed Rules

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

49 CFR Part 654

[Docket No 92-I]

RIN 2132-AA38

Prevention of Alcohol Misuse in Transit Operations

AGENCY: Federal Transit Administration, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: On October 28, 1991, President Bush signed the Omnibus Transportation Employee Testing Act of 1991, mandating the Federal Transit Administration to issue regulations on drug and alcohol testing for mass transit workers. This document proposes the agency's alcohol misuse prevention program. When finalized this rule should increase the safety of mass transit operations in general.

DATES: Comments on this proposed rule must be submitted by April 14, 1993.

ADDRESSES: Comments should be sent to the Rules Docket Clerk, Docket No.92-I, Federal Transit Administration, DOT, 400 Seventh St. SW., room 9316, Washington, DC 20590. Comments will be available for inspection at this address Monday through Friday from 9 a.m. through 5 p.m. If you would like acknowledgment of receipt of your comment please include a stamped, self-addressed postcard with your comment.

FOR FURTHER INFORMATION CONTACT: For legal questions contact Nancy M. Zaczek, Office of the Chief Counsel, Federal Transit Administration, DOT, 400 Seventh St, SW., room 9316, Washington, DC 20590. Telephone 202-366-4011 (voice); 202 366-2979 (TDD). For program issues contact Rhonda M. Crawley, Office of Safety, Federal Transit Administration, DOT, 400 Seventh St, SW., room 6432, Washington, DC 20590. Telephone 202-366-2896. Copies of the regulation are available in alternative formats upon request.

SUPPLEMENTARY INFORMATION:

I. General Notes

A. Name Change

Congress passed reauthorization legislation for several operating administrations of the Department of Transportation (DOT) in the Fall of 1991 (Intermodal Surface Transportation Efficiency Act of 1991, Pub. L. 102-240, December 18, 1991). One important provision involved the name change for the Urban Mass Transportation Administration (UMTA). We are now called the Federal Transit Administration (FTA). In addition, all references to the Urban Mass Transportation Act of 1964 were changed to the Federal Transit Act.

B. How To Read This Proposed Rule

Today's rule, as it affects transit operators, is in three pieces. The document you are reading now contains a proposed part 654, the substantive regulations for alcohol proposed by FTA for recipients of funds under the Federal Transit Act, as amended, and section 103(e)(4) of title 23 of the United States Code. There is a brief explanation of these provisions in the preamble section of this document with emphasis on how these provisions affect, in particular, the transit industry. The text of the substantive regulation we are proposing today for comment follows our preamble.

In addition, however, there is a long discussion of the entire Department of Transportation's efforts in the alcohol testing area in a separate preamble which precedes this document in this issue of the **Federal Register**. This DOT-wide preamble discusses provisions that all of the operating administrations have in common, so it should be read to ensure a complete understanding of today's substantive proposed rule.

Finally, there is a third document, consisting of its own rule and preamble, that contains the technical testing requirements that must be used in conjunction with the part 654 substantive regulations. This third document adds an alcohol subpart to 49 CFR part 40, the Department-wide drug testing procedures rule, and also is published elsewhere in today's issue of the **Federal Register**.

C. Other Related Documents

In addition to the alcohol rules being published today by FTA and several other operating administrations, there are a number of drug testing documents that will also be of interest to transit providers. Accompanying this alcohol NPRM in this separate part is FTA's proposed drug testing rule. The drug proposed rule contains a complete discussion of the issues involved for mandated drug testing. The Omnibus Transportation Employee Testing Act also mandated changes to current DOT testing procedures. Accordingly, in the part 40 proposed rule mentioned above, there are also drug-testing related changes.

Finally, the Department is issuing an advance notice of proposed rulemaking on issues related to random drug testing.

II. Background

On November 22, 1988, the FTA published a final rule requiring certain small and large operators, who were recipients of Federal Transit Act financial assistance, to develop and implement drug testing programs. On December 21, 1989, approximately 200 large transit systems certified compliance with that regulation and began implementing urine drug testing for 5 types of drugs of safety-sensitive employees, including their first line supervisors. Before this date, the FTA had never promulgated any drug or alcohol testing regulations for the transit industry.

On January 19, 1990, the United States Court of Appeals for the District of Columbia announced its decision that FTA did not have sufficient statutory authority to issue an anti-drug regulation on a national basis. (*Amalgamated Transit Union* v. *Skinner*, 894 F.2d 1362 (D.C. Cir. 1990)). Accordingly, on January 25, 1990, FTA published a notice in the **Federal Register** suspending its anti-drug regulation.

At the time of this suspension, the FTA, as well as DOT, indicated its commitment to acquiring the statutory mandate to reinstitute testing for the transit industry. These attempts were successful on October 28, 1991, when HR 2950, the Omnibus Transportation Employee Testing Act, (Pub. L. 102-143) was signed into law by President Bush.

Also in 1991, the FTA Office of Safety conducted a study to determine the extent of drug use in the transit industry. The study's findings, contained in a recently released report, analyze the results of two surveys designed to gather information on substance abuse policies and programs as well as drug and alcohol use patterns in the transit industry. Of the two surveys, one was completed by transit system managers and the other by safety-sensitive transit employees. (See "Substance Abuse in the Transit Industry", Rept. No. DC-90-7021; November, 1991.)

The agency survey sought information on substance abuse program policies and procedures, test results indicating drug or alcohol use during calendar year 1990, disciplinary procedures, employee training, and substance related accident data. The survey was mailed to four hundred transit systems. Three-hundred-six systems comprise the agency data base.

The employee survey was administered to 1,975 safety-sensitive employees at nine randomly selected

transit systems separated into three groups based on annual ridership. The employee questionnaire was focused solely on personal use of drugs and alcohol, and to a large extent, the questions were standardized to facilitate comparison with the National Institute on Drug Abuse (NIDA) Household Survey.

The study was designed to guarantee respondent confidentiality for both the agency and employee surveys. Since both surveys were voluntary, no data were collected from any system or employee who did not consent to participate.

The following are some key findings about alcohol use:

- Of the 306 systems in the data base, 78 percent conduct some type of drug testing and 58 percent conduct alcohol testing. However, when asked which substance was most prevalently abused by the workforce, 75 percent of the agencies identified alcohol.
- The personal use data provided in the 1988 and 1990 NIDA household surveys provide a benchmark for comparisons of the transit industry results with those of the general population. Those results indicate that self-reported alcohol use by transit employees was only slightly lower than reported use by the general population.
- About six percent of the safety-sensitive employees reported using alcohol within five hours before reporting to duty or during duty hours.
- Most of these duty-related drinkers were also high-volume drinkers of six to ten or more drinks each occasion.
- About two percent of alcohol test results confirmed consumption for all safety-sensitive employees.
- The average rate of alcohol tests indicating use for vehicle and equipment maintenance personnel is 3.7 percent, twice that for vehicle operators. Dispatchers also have an alcohol testing rate confirming use which is twice that of vehicle operators.

Based on the study's findings, the statutorily mandated testing for substance abuse is timely and well-founded. This rulemaking should aid in the control of alcohol misuse in the transit industry.

III. The Omnibus Transportation Employee Testing Act of 1991

The Omnibus Transportation Employee Testing Act of 1991 (the Act, title V, Pub. L. 102–143, October 28, 1991) mandates operating administrations within the Department of Transportation, including the FTA, to issue regulations on the misuse of alcohol by safety-sensitive employees. While there is a complete discussion of the various provisions of the Act in the Department-wide preamble found elsewhere in today's issue of the **Federal Register**, the following discussion highlights provisions concerning the FTA.

The Federal Transit Administration must issue regulations requiring recipients of sections 3, 9, and 18 of the Federal Transit Act, as amended, and section 103(e)(4) of title 23 of the United States Code to test safety-sensitive employees for the use of alcohol in violation of law or Federal regulation. The Act allows the FTA to defer to regulations issued by the Federal Highway Administration (FHWA), under the Commercial Motor Vehicle Safety Act of 1986, and the Federal Railroad Administration (FRA), under the Federal Railroad Safety Act of 1970 for operations covered by these statutes.

As a condition of FTA funding, the Act requires recipients to establish an alcohol testing program. The Act mandates four types of testing: pre-employment, reasonable suspicion, random, and post-accident. In addition, the statute permits periodic testing, under various circumstances.

The Act prescribes that certain testing procedures be followed to protect the integrity of the test as well as the privacy of the employee. Recipients performing any of the prescribed tests must promote, to the extent practicable, the individual's privacy while the specimen is being collected.

The Act does not mandate that recipients follow a particular course of action when a safety-sensitive employee has been found to have violated law or Federal regulation concerning the use of alcohol. Instead, the Act directs the FTA to issue regulations setting forth, as it deems appropriate, possible consequences for using alcohol, including education, counseling, rehabilitation programs and possible suspension or termination.

In authorizing this regulatory scheme, the Act has pre-empted all inconsistent State or local laws, rules, regulations, ordinances, standards, or orders. Provisions of State criminal law which impose sanctions for reckless conduct leading to actual loss of life, injury, or damage to property, however, are not pre-empted by the Act.

IV. Previous Action by the Department

On November 2, 1989, the Office of the Secretary of DOT published an Advance Notice of Proposed Rulemaking (ANPRM) to solicit ideas and information about alcohol use and possible future alcohol testing for transportation workers. (54 FR 46326) The ANPRM requested comments on the general question of whether additional Federal measures were necessary to respond to the problem of alcohol misuse among transportation industry employees. If a commenter believed further action was necessary, the ANPRM asked for recommendations whether the further action should be education; enforcement; alcohol testing; and/or state programs. The ANPRM also asked what activity should be prohibited. And, finally, the ANPRM asked what should be the consequences for an employee identified as using alcohol on the job, being under the influence while on the job, or improperly using alcohol before work.

Responses were received from transit authorities; small rural operators; trade unions; state and local governments; medical providers; and a number of individuals. The comments to this ANPRM are discussed in detail in the general preamble published by the DOT Secretary's Office elsewhere in today's issue of the **Federal Register**. What follows is a summary of the comments submitted to the ANPRM that specifically discuss the Federal Transit Administration or its programs.

FTA comments were evenly split for and against any proposed new Federal regulation in the area of alcohol misuse prevention. However, the majority of respondents conceded that a combination of education, testing and rehabilitation, coupled with additional financial assistance from the Federal Government, was necessary to ensure transportation safety.

A. Prohibition

The general consensus among commenters was that alcohol consumption by any safety-sensitive employee should be prohibited while on duty. Two commenters opined that alcohol prohibition should be applied to all employees while on duty or while on company property.

B. Education

Most commenters recommended that the Federal government provide funding for educational programs in alcohol misuse prevention.

C. Testing Method

Commenters expressed concern about the type and cost of implementing an alcohol testing program. Blood tests are perceived as the most accurate and most capable of withstanding legal challenge. However, some consider blood tests to be the most invasive to the individual. Some commenters opined that urine testing would require an observer during the collection process. Since alcohol dissipates much more rapidly in

the body than other drugs, commenters indicated that timing and sample collection are crucial for an accurate reading. Smaller systems raised concerns about the cost of any type of testing.

D. Grounds for Testing

Most commenters recommended employee testing for only reasonable cause or post-accident, that is, when an employee is believed to have consumed alcohol, or where an accident may have been due to alcohol consumption. Commenters further stated that alcohol testing should be for all employees involved directly or indirectly in transportation, including operators, supervisors, mechanics and service personnel.

E. Pre-Duty Abstinence

Comments from both labor and management expressed concern about enforcing behavior of employees off duty. One commenter indicated that local law prohibits the use of alcohol within 6 hours of reporting for work. Another commenter preferred a pre-duty abstinence rule for covered employees similar to the Federal Aviation Administration regulations that prohibit a person from performing under the influence of alcohol, or who has consumed any alcoholic beverage within eight hours of reporting for duty. Another commenter stated that the use of alcohol should be prohibited at least twelve hours before starting work.

F. What is a Positive Test?

Most employers commented that a blood alcohol concentration (BAC) level equal to or greater than .04 can result in immediate termination. One commenter suggested that penalties be more stringent for on-duty drivers and less stringent for other safety-sensitive persons in the transportation industry. One commenter stated that a .04 BAC level "sends a message of permissiveness" and preferred a zero tolerance level.

G. Consequences

Employers indicated that some form of disciplinary action is initiated, including temporary suspension or termination of employment, once a safety-sensitive employee's test indicates alcohol use. Commenters recommended allowing each recipient to establish its own disciplinary rules in accordance with its collective bargaining agreements and its past experience.

H. Rehabilitation

Most commenters stated that rehabilitation programs should be at the option of the employer and not be mandated by the Federal government. Local attitudes, labor/management agreements, and availability of rehabilitation services are some of the factors that may affect treatment policies. In addition, any requirement for employers to pay the cost of rehabilitation or to pay wages for an employee who is not working was strictly opposed. However, one commenter noted that "it is more cost effective to rehabilitate a skilled worker than to hire and train a new one."

V. Overview of Proposed Rule

This notice of proposed rulemaking (NPRM) would apply to recipients of funds under sections 3, 9, and 18 of the Federal Transit Act, as amended, and section 103(e)(4) of title 23 of the United States Code. It requires each transit operator (employer) to establish and conduct a multi-faceted alcohol misuse prevention program. A basic component of the regulation is that FTA operators must test safety-sensitive employees for the use of alcohol. There also must be education about the health and safety problems associated with alcohol misuse.

The regulation specifies that employers may not allow safety-sensitive employees to consume alcohol while performing a safety-sensitive function, for four hours before reporting for duty, or for eight hours following an accident or until an employee has actually been tested for alcohol following an accident, whichever occurs first. The NPRM proposes testing in the following situations:

1. Pre-employment/pre-duty (including transfer to a safety-sensitive position within the organization);
2. Reasonable suspicion;
3. Random;
4. Post-accident; and
5. Return to duty/follow-up.

The NPRM proposes the use of an evidential breath testing device, which has a printed read-out of each test result. The NPRM proposes different consequences, based on the measured alcohol level.

If the alcohol concentration is confirmed at or greater than .02, but less than .04, the covered employee must be removed from his or her safety-sensitive position. In addition, having removed the employee from his or her safety-sensitive function, an employer may elect to send that employee home for a minimum of eight hours or, after some period of time, retest the employee. The employee may not return to work within eight hours of the first test unless the employee's tested alcohol concentration measures less than .02.

If an alcohol test results in a confirmed alcohol concentration at .04 or greater, the covered employee must be removed from his or her safety-sensitive position, be told about educational and rehabilitation programs available, and be evaluated by a substance abuse professional. The proposed rule would allow the employer to require that the employee go through rehabilitation, although the proposed rule would not require the employer to pay for rehabilitation.

Each employer must have a policy statement which sets out its policies and procedures—including consequences—for its alcohol misuse prevention program. The policy also must include details concerning the timeframes during which employees are prohibited from using alcohol.

Finally, the regulation is directed at transit operators and recipients of Federal funds under sections 3, 9, and 18 of the Federal Transit Act, as amended, and section 103(e)(4) of title 23 of the United States Code. Because our statutory mandate directs us to develop regulations for our grantees, there is no language directed at the individual employee. In each case, it is the employer's responsibility to develop a program and implement that program in compliance with these regulations. In some cases this means having responsibility for the actions of its safety-sensitive employees.

VI. Section-by-Section Analysis

As mentioned earlier in this preamble, this section of the document highlights the various sections of the proposed rule, and should be read in conjunction with the Department-wide preamble, which precedes this document in this issue of the Federal Register. Where there is no discussion of a particular provision, there are no FTA-specific provisions or implications about which we seek comment. In these cases, we still ask that commenters direct their comments to the FTA docket on these provisions based on the FTA proposed regulatory text and the discussion of these provisions in the DOT-wide preamble.

Subpart A—General

A. Applicability (§ 654.3)

The FTA proposed rule contains a section specifically describing the applicability of the rule for various grantees under the Federal Transit Act, as amended, and section 103(e)(4) of

title 23 of the United States Code. This is necessary for clarity, since many FTA grantees have portions of their operations regulated by other operating administrations within the Department. In addition, the Act allows FTA to defer to alcohol testing regulations administered by the FRA under the Federal Railroad Safety Act of 1970 or the Federal Highway Administration under the Commercial Motor Vehicle Safety Act of 1986, if the Secretary deems that the operations are adequately covered by these other agencies. The FTA worked with other affected operating administrations of the DOT to reach consensus on which regulation should apply. This section sets out which regulation applies, under which circumstances.

1. *Federal Railroad Administration.* Several of our larger grantees have light or rapid rail subway systems regulated by FTA as well as heavy rail commuter systems, which also are subject to regulations of the Federal Railroad Administration. Section 654.3 states that, for purposes of the alcohol rule, entities or operations of entities currently governed by the FRA under the Federal Railroad Safety Act of 1970 will continue to conduct their alcohol program consistent with the provisions of the FRA regulations. These grantees must certify to the FTA that they are in compliance with the FRA regulations.

2. *Federal Highway Administration.* Grantees with safety-sensitive employees subject to the Commercial Drivers License Program of the FHWA are covered by the FTA alcohol testing program, not that of FHWA. However, drivers employed by FTA grantees, who are holders of Commercial Drivers Licenses, may be subject to other ramifications under the CDL Program. For example, conviction of a crime (*e.g.*, during under the influence) can lead to suspension or revocation of a commercial driver license. Since the FTA has no direct authority over employees, these ramifications would be in addition to those identified in today's proposed part 654.

3. *United States Coast Guard.* The Act does not provide the Secretary the discretion to defer to chemical testing regulations of the United States Coast Guard (Coast Guard) for its marine employers which are also FTA grantees. Further, the Act does not include any mandates affecting the Coast Guard, which already requires alcohol testing in certain circumstances.

In fact, the Coast Guard has a long history of requiring chemical testing (dangerous drugs and alcohol) by marine employers. Equally long is Coast Guard's relationship with individual marine employees, since it is the Coast Guard which issues and revokes a license, certificate, or document of a marine employee.

Thus, FTA grantees which are marine employers are subject to two sets of regulations, those of the Coast Guard found at 46 CFR parts 4 and 16 and 33 CFR part 95 (which are already in effect), and those of the FTA, which will be codified as today's part 654.

In addition, marine employees continue to be subject to Coast Guard regulations at 46 CFR parts 4, 5, and 16 and 33 CFR part 95, even though FTA's regulations do not apply directly to employees. FTA's authority is limited to its relationship with its grantee/employers.

In many cases, the FTA program regulation, as proposed in today's proposed rule, consists of more elements than the Coast Guard regulations affecting marine employers. As a general matter, an FTA grantee generally can rely on the FTA program elements of the regulation to also be in compliance with the Coast Guard regulations.

However, the FTA proposed mandatory testing would use breathalyzers, with testing done consistent with procedures found in 49 CFR part 40. Because the Coast Guard regulations authorizes the use of blood, their regulations include procedures which would not satisfy the requirements of the FTA testing mandates.

As noted earlier, if a grantee/employer complies with the program testing requirements of this part 654, when it becomes final, generally, the grantee also will be in compliance with the employer directed portion of the Coast Guard regulations. To assist in discerning where there may be differences between the two regulations, we have included an example below to show how the regulations are different. In addition, as we discuss specific sections in the Section-By-Section Analysis portion of this preamble, we have highlighted differences in the regulations.

For example, part 5 of the Coast Guard regulations specifies its statutory obligation to revoke a license, certificate or document of any person who has been shown at a hearing to be a user of or addicted to the use of a dangerous drug or to have been convicted of violating a dangerous drug law of the United States.

However, the FTA has no authority over the individual employee. In this example, a marine employer, which is a recipient of Federal Transit Act funds must use the program as set out in part 654. However, there are further responsibilities if the employer is dealing with an employee who has failed a chemical test, including providing specific notice to the Coast Guard of such confirmed alcohol test result. As noted in § 654.3, a grantee is directed to report in writing a test result indicating a concentration level of .04 or greater for an employee holding a license certificate of registry or merchant mariner's document to the nearest Coast Guard Officer in Charge, Marine Inspection (OCMI).

B. Alcohol Testing Procedures (§ 654.5)

This section mandates compliance with the testing procedures for alcohol testing being proposed as 49 CFR part 40 in a separate rulemaking document published elsewhere in today's issue of the **Federal Register** by the Secretary of DOT. The procedures are incorporated by reference into the substantive regulations in part 654, and thus must be complied with in conjunction with part 654.

C. Definitions (§ 654.7)

1. *Accident.* The proposed rule defines accident as an event involving a revenue service vehicle which meets one of four criteria:

(1) It must be reported under regulations of one of three other DOT operating administrations (FRA, FHWA, or Coast Guard);

(2) It results in a loss of human life;

(3) It results in injury requiring transfer to a medical facility; or

(4) It results in property damage with an estimated value of more than $1,000.

The agency is proposing $1,000 to be consistent with the threshold reporting amount of our section 15 reporting requirements. The amount is important in the context of whom must be tested in the "post-accident" setting, as well as who must refrain from using alcohol for a prescribed period of time after an accident.

The agency seeks comment on this provision, and in particular whether there should be more than one threshold amount that would trigger the definition of an accident. For example, there could be different floors based on the type of transit vehicle involved in the accident. For example, $1,000 could be the threshold for a transit van or a bus designated to carry 15 or fewer persons, but another amount—possibly $5,000—could be used for large buses and rail vehicles.

Is there another basis for distinguishing different dollar threshold amounts? What are they? The agency seeks data on this point, including

average accident property damage costs—by vehicle type if possible.

2. *Covered employee.* The proposed rule includes a definition of safety-sensitive functions. Anyone who performs a safety-sensitive function will be subject to the provisions of the rule. As proposed, the FTA defines a covered employee to be any individual who performs a safety-sensitive function, either directly employed by an FTA recipient or as a contractor to an FTA recipient. In this context a contractor need not perform under a formal contract—any ongoing relationship suffices to bestow contractor status.

The inclusion of contract service raised many questions in the suspended 1988 FTA drug testing rule. Several small operators believe including contractors may increase the difficulty of securing maintenance or other service typically provided on a contract-out basis. According to letters we received, many smaller properties use outside sources to conduct basic maintenance for their vehicles. These smaller providers do not believe these gas stations or other providers will agree to the provisions of the drug testing rule.

The FTA believes that, based on (1) Recent findings by Iowa State University in the preparation of a manual on maintenance service contracting and (2) Small operators' actual experiences related to this issue, anticipated compliance difficulties can be resolved satisfactorily.

Further, a colloquy on the floor during debate of our substance abuse testing legislation makes it clear that the sponsors of this legislation intended to include in testing anyone involved in a safety-sensitive position—whether it be a contractor or an employee. ("U.S. Cong. Rec.", S14766, October 16, 1991)

For these reasons, contract personnel who provide service to or work for a recipient in lieu of direct-hire safety-sensitive employees are included in the definition of "covered employee". This concept has been termed "standing in the shoes" of the employer, and as such are covered by the same regulations as the employer and its employees.

The agency seeks comment on this definition, particularly from small systems and those with directly related experiences.

3. *Employer.* The FTA has used the term *employer* to include anyone who is operating transit service, which is subject to this rulemaking. This includes small and large operators, as well as a consortium that may be formed to respond to the needs of several operators. The term *employer* is used instead of recipient to avoid any confusion about who has the responsibility under the rule, since States, which are the direct recipients of some FTA funds, usually do not run transit systems.

4. *Safety-sensitive.* The proposed rule defines safety-sensitive to include any function related to the operation of a revenue service vehicle; controlling the movement or dispatch of a revenue service vehicle; maintaining a revenue service vehicle, or directly supervising any employee performing one of these functions.

The agency is including maintenance functions in this definition, which drew comment in the 1985 drug testing rulemaking context. In response to these comments, FTA sponsored a recent study, "Substance Abuse in the Transit Industry", 1991. This national survey revealed that, for the 176 responding systems testing for alcohol in 1990, the test rate indicating alcohol use among vehicle operators was 1.82 percent; however, the average test rate indicating alcohol use for vehicle and equipment maintenance workers was 3.67 percent.

In addition, of the 1,075 safety-sensitive employees surveyed concerning their personal use of alcohol, six percent reported using alcohol within five hours before reporting to duty or during duty hours. Most of these duty-related drinkers were also high-volume drinkers of six to ten or more drinks per incidence.

Including maintenance functions in the definition of safety sensitive means that these workers also would be subject to post-accident testing. Currently, are maintenance employees tested for alcohol misuse? If yes, under what circumstances? Are maintenance employee attendance records and production reports reviewed for possible signs of alcohol misuse? Also, do we need the concept of "dispatching a vehicle" if the definition includes anyone who controls the movement of the vehicle?

Finally, while this definition includes the functions to be covered, the agency recognizes that each employer will have to make case-by-case determinations for some employees, based on the definition and other guidance material in the final rule.

5. *Small operator.* The definition of small operator in the FTA context is different from other operating administrations publishing proposed rules today. Because of the nature of our program—awarding grants to organizations based on program purpose and demographic size, we have defined a small operator as a recipient which operates in an area less than 200,000 in population. A large operator is defined as a recipient which operates in an area more than 200,000 in population. Other modes are basing the distinction between small and large operators on number of employees.

D. Pre-emption of State and Local Laws (§ 654.9)

The statute calls for Federal pre-emption in the field, voiding the effect of any inconsistent state or local law, ordinance, etc. While there is a complete discussion of this issue in the OST preamble, we would like to highlight this section for FTA readers.

The question of whether the FTA had authority to require grantees to implement a substance abuse program—and what was the effect of that Federal regulation in light of pre-existing inconsistent State provisions—was an impediment to implementing our 1988 drug testing regulation.

Congress included language in the Act indicating that no State (including State Constitutions) or local law continues in effect if it is inconsistent with the FTA alcohol testing regulation. Consistent with longstanding Department-wide interpretation of this type of pre-emption language, the regulation specifies that "inconsistent with" means that the regulation:

(1) Pre-empts a State or local requirement if compliance with the local requirement and the FTA regulation is not possible; or

(2) Pre-empts a State or local requirement if compliance with the local requirement is an obstacle to accomplishing the provisions of the FTA regulation.

On the other hand, the statute and the regulation do not pre-empt State criminal laws that impose sanctions for reckless conduct.

E. Starting Date for Alcohol Testing Programs (§ 654.15)

This section sets out a two-tier approach to mandatory compliance with these alcohol testing rules. For large operators, this section proposes compliance within one year of the final rule. As previously discussed, large operators are those operating in areas of 200,000 or more in population. We propose that small operators must comply within two years of the final rule, which includes operators operating in areas of less than 200,000 in population.

This is one of the few instances where the FTA regulation differs from other operating administration proposed rules. Other NPRM's key compliance to employers with over or under 25 employees. Because of the basic system used to administer the FTA grant program, we did not believe it feasible

to mandate compliance using this criterion. Accordingly, we have keyed the compliance dates to the population size of the area of operation.

F. Compliance a Condition of FTA Financial Assistance (§ 654.17)

The statute requires FTA to establish regulations for an alcohol testing program for recipients of Federal financial assistance under section 3, 9 or 18 of the Federal Transit Act, as amended or section 103(e)(4) of title 23, United States Code. The statute also states that a recipient shall not be eligible for such Federal financial assistance if the recipient fails to establish such a program in accordance with such regulations. Accordingly, continued FTA assistance under these four funding provisions is contingent upon compliance with the FTA substantive alcohol testing regulation, as well as the procedural alcohol testing regulation at part 40.

Paragraph (c) of this section sets out the role for the States in this program. Since the State is the recipient in the case of section 18 funds, and some section 9 funds, it is a "recipient" for purposes of this program. As such, the State has an affirmative obligation to certify compliance to FTA. However, in all cases, this money is funnelled to smaller entities which develop and administer programs consistent with FTA requirements. For purposes of this rule, FTA will require that each State certify compliance on behalf of its subrecipients who are subject to this rule. Each subrecipient must provide adequate assurances to its State so that the State can certify on its behalf.

A small entity will be subject to suspension of funding, through the State, if it is not possible for an appropriate certification to be made on its behalf, or if the FTA has reason to believe that the entity is not in compliance with the regulation in some other material way.

This section also states that any misrepresentation or action to mislead the FTA is a criminal violation under section 1001 of title 18 of the United States Code (see paragraph (b) of the section).

Subpart B—Prohibitions

A. Behavior and Appearance (§ 654.23)

The proposed rule would require an employer to remove an employee from a safety-sensitive function if the employer knows that the employee's behavior or appearance is characteristic of alcohol misuse or his or her ability to perform has been adversely affected by the use of alcohol.

The agency specifically seeks comment on this provision. As proposed, this option would be available to the employer in addition to the reasonable suspicion basis for testing. Are there currently standards such as this in use in the transit industry? Do such standards enhance the effectiveness of an alcohol testing program? Are there problems unique to the transit industry in integrating such a basis for removal into the program?

B. Pre-Duty Use (§ 654.27)

To ensure the safest possible workplace for transit industry employees and the safest possible service for transit system patrons, the FTA is proposing to prohibit employers with knowledge that a covered employee consumed alcohol four hours or less before reporting for duty from allowing that employee to perform or continue to perform a safety-sensitive function.

Because this requirement affects employees' off-duty behavior, the FTA seeks comments on the effect of this provision; transit systems that currently have similar work rules in place are particularly encouraged to provide any relevant information.

In addition, a covered employee who is on-call would have the opportunity to acknowledge the use of alcohol during the preceding four hours, and to take an alcohol test to determine whether or not he or she is able to perform his or her safety-sensitive function.

For a more complete discussion on the issues involved with pre-duty testing please refer to the DOT general preamble.

C. Use Following an Accident (§ 654.29).

The Federal Transit Administration has proposed that in an accident each employer must ensure that the covered employee refrains from alcohol consumption for eight hours following the accident or until a post-accident alcohol test is administered, whichever occurs first.

The agency believes that within eight hours most alcohol will be metabolized from an employee's system, thus making indicative test results problematic. Post-accident testing ensures that the employee has not misused alcohol while performing a safety-sensitive function. The prohibition on use following an accident for a stated period protects the covered employee from the assumption of alcohol misuse that could have contributed to an accident.

In 1991, a motorman whose train derailed killed five persons and injured 200. The motorman left the scene of the accident and subsequent tests showed that the blood of the motorman had an alcohol content twice the legal limit, ten hours after the crash. Prohibiting alcohol consumption following an accident pending the performance of post-accident testing provides liability protection for both the employer and the employee.

FTA solicits comments on this proposed prohibition. Are authorities currently restricting the consumption of alcohol by employees for a stated period between an accident and a post-accident test?

Subpart C—Tests Required

A. Pre-Employment/Pre-Duty (§ 654.41)

This section would require an employer to administer an alcohol test to a covered employee before the employee performs a safety-sensitive function. We anticipate that most employers will require the test as part of pre-employment testing, but seek information about whether this is accurate.

If testing is done at the pre-employment stage, and a new hire does not initially perform safety-sensitive functions, then this section would also require that this employee be given an alcohol test before he or she is transferred to a safety sensitive function.

Also proposed in this section is the employer's discretion to "accept" a test (and therefore not conduct its own preemployment/pre-duty test) if two conditions are met. First, that the employee has had an alcohol test conducted by a DOT agency that comports with the procedural testing requirements of 49 CFR part 40 within the previous six months, indicating an alcohol concentration less than .04; and, second, that the employer ensures that no previous employer of whom he has knowledge has any record of a violation of a DOT agency regulation.

The agency specifically seeks comment on this provision and whether it poses particular problems or solutions for the transit industry.

B. Post-Accident (§ 654.43)

The NPRM proposed post-accident testing for the misuse of alcohol in the case of any mass transit accident involving a loss of human life, or other serious bodily injury or significant property damage.

The FTA has proposed alcohol testing of all surviving safety-sensitive employees present and on duty in the vehicle at the time of the accident or any covered employee involved in the vehicle's most recent maintenance or other safety-sensitive function

preceding the vehicle being placed into revenue service.

The Act specifically requires substance abuse testing in the case of any accident involving the loss of human life. In other cases, the covered employee must be tested unless the employer determines that the employee's performance can be completely discounted as a contributing factor to an accident. Alcohol-misuse related accidents account for a substantial portion of all major accidents within the transit industry. In March 1991, alcohol tests showed that a bus driver was legally drunk two hours after a fatal accident. The driver pulled away from a bus stop, apparently unaware that the front right fender of the bus had struck and killed a pedestrian. Although this was the first fatal accident in that system's history, it demonstrates the need for post-accident testing.

What has been your authority's experience with post-accident testing of employees where there has been a fatality, serious bodily injury or property damage?

The agency specifically solicits statistics or information about accidents, such as the average cost, those involving only vehicle damage, those involving damage to property other than the provider's, human injury, etc.

While not provided for in this FTA proposed rule, Coast Guard regulations for an accident resulting in the death of a covered employee trigger a requirement to test the corpse for chemical substances. The provision is found in Coast Guard regulations at 46 CFR 4.06–30.

C. Retesting of Covered Employees With an Alcohol Concentration of .02 or Greater But Less Than .04 (§ 654.53)

To ensure that employees' rights are adequately protected, and because alcohol is a legal substance, the FTA is considering requiring employers to provide safety-sensitive employees who (1) Confirm at an alcohol concentration of .02 but less than .04 and (2) Are scheduled to perform safety-sensitive functions within eight hours, the opportunity for a retest. If the employee's alcohol level subsequently measures less than .02, or eight hours have elapsed since the confirmation test, the employee would be permitted to perform or continue to perform safety-sensitive functions. Any test conducted before the eight hours has elapsed should be as close as possible to the time the employee would report to work.

Also, the FTA is interested particularly in data on the potential costs of this provision, as well as its impact on productivity and actual operations.

Subpart D—Handling of Test Results, Record Retention, and Confidentiality

Reporting of Results in a Management Information System (§ 654.63)

Elsewhere in today's issue of the **Federal Register** is a DOT-wide procedural rule on alcohol and drug testing. Within this proposed rule, there is a model section on uniform data reporting requirements. While FTA's proposed rule contains the reporting requirements as well, it is the preamble to part 40 which discusses these provisions in detail. Accordingly, those interested especially in this section should read the complete discussion of the provisions in the part 40 preamble.

In commenting on these requirements please indicate either or both docket numbers, as appropriate, if you are responding to specific questions posed in the part 40 preamble, the substantive provisions in proposed part 40 or part 654, or none or all of the above.

Subpart E—Consequences for Employees Engaging in Prohibited Alcohol-Related Conduct

The most important provision in this subpart is the requirement that any safety-sensitive employee who is found to have an alcohol concentration of .02 or greater must be removed immediately from his or her safety-sensitive position. Similarly, if a supervisor has reasonable suspicion that an employee has consumed alcohol, he or she must make a reasonable suspicion finding and refer that employee to testing.

The mandated action when the alcohol content level is between .02 and .04 is that the employee must cease to perform a safety-sensitive function.

If an employee tests at or above .04, that employee must be assessed by a substance abuse professional. The employee must follow the recommendations of the SAP before he or she can return to work and would be subject to the mandatory follow-up tested described elsewhere in this preamble.

In addition, if the employer's policy so states, it is possible that the employee will be required to undergo rehabilitation before returning to a safety-sensitive function, with the approval of the substance abuse professional.

The issue of required rehabilitation, as well as possible suspension or termination are decisions left at the local level.

Subpart F—Alcohol Misuse Information, Training, and Referral

A. Employer Obligation To Promulgate a Policy on the Misuse of Alcohol (§ 654.81)

This section lists all of the elements which must be included in the policy statement developed by the employer and made available to each employee.

This section also notes that an employer may choose to have additional, consistent elements in its alcohol program. This section states that the policies and consequences must clearly describe the fact that they are based on independent authority.

B. Training for Supervisors (§ 654.83)

Training is required for supervisors making reasonable suspicion determinations, which result in alcohol testing. The section specifies that supervisors must receive 60 minutes of such training.

FTA is interested in determining if the proposed rule's training provisions provide enough training and if the provisions are consistent with current training efforts in the industry. For those employers who provide training, how much training do you provide? Is refresher training conducted periodically? Are drug and alcohol training activities combined, or are they separate? Are supervisors and non-supervisory personnel required to participate in substance abuse training? Is any training provided on an optional basis? How much training is provided:

(1) To all personnel;

(2) To personnel making reasonable suspicion determinations?

Data available to the FTA indicate that the success rate of supervisors involved in making reasonable suspicion determinations could be significantly increased with additional training. The agency seeks comment of the possibility of requiring an additional period of time, up to an additional hour, for supervisors making these reasonable suspicion determinations.

In addition, results of a recent internal study indicate that transit personnel who have been distributed educational materials, but not been provided with any inter-active training evidence little benefit from the brochures, etc. We are interested in knowing if any transit property has provided both kinds of education/training and whether there was a perceptible difference in performance, attitude, interpersonal skills or the like.

C. Referral, Evaluation, and Treatment (§ 654.85)

This section proposes that every covered employee who violates a prohibition in subpart B of this part must be evaluated by the employer's substance abuse professional. Part of the evaluation includes being informed about the resources available to deal with problems associated with alcohol misuse.

Concerning rehabilitation, the NPRM does not mandate that an employer provide it to a covered employee. The NPRM would require a covered employee whose alcohol concentration was .04 or greater to be assessed by a substance abuse professional. During this assessment, the substance abuse professional must inform the employee of different assistance that is available. Whether or not there is mandatory rehabilitation, and who pays for rehabilitation are decisions left to the local level. This position was strongly endorsed in the comments submitted on the ANPRM, discussed in an earlier section of this preamble.

Further, this position on rehabilitation is consistent with congressional debate on the topic. In particular, in a colloquy between Senators Denforth and Hollings, the Senators make it clear that rehabilitation is not mandated by the legislation, nor does the legislation specify who should pay for treatment, whether wages must be paid during treatment, or whether there is a right of reinstatement. The colloquy confirms the proposed rule's position that such arrangements can be left to negotiation between the employer and the employee. ("U.S. Cong. Rec.", S14770, October 16, 1991)

The substance abuse professional must also assess the employee to determine that the initial treatment advice was followed before the employee is allowed to return to work. It is this section as well that would require that any employee testing at .04 or greater would be subject to six follow-up tests within the first twelve months of returning to work.

D. Requirement To Certify Compliance (§ 654.87)

The proposed rule states that compliance is a condition of FTA funding and that each recipient must submit an annual certification affirming the establishment and implementation of an alcohol testing program consistent with the rule.

VII. Effect of the Americans With Disabilities Act of 1990 on Alcohol Testing Programs

Title I of the Americans With Disabilities Act of 1990 (ADA) focuses on responsibilities of employers for employees. A basic premise of title I is that a person with a disability must be provided a reasonable accommodation to work. It is possible that some covered workers will be considered persons with disabilities for purposes of protections under the ADA. For a more complete discussion of this issue please see the DOT-wide preamble preceding this FTA document in today's Federal Register.

VIII. Combined Rulemaking

The agency is considering combining the final FTA alcohol and drug testing regulations into one part in the Code of Federal Regulations. The advantage of having both requirements in one part is that the regulations could share common provisions. The disadvantage of having both requirements in one part is that the programs, in many essential ways, will be different, and combining them in one part may be confusing or difficult to understand. If the rules are not issued simultaneously, the integration would occur upon publication of the later-in-time final rule.

The agency seeks comment on the utility of combined provisions.

IX. Regulatory Process Matters

A. Executive Order 12291

The FTA has evaluated the industry costs and benefits of this alcohol testing rule, which requires that transit industry personnel who perform safety sensitive functions be covered by a program to control alcohol misuse in mass transportation operations. The FTA has determined that this rulemaking is not a major rule under Executive order 12291, because the required alcohol testing program is not likely to have costs of over $100 million in any one year.

The materials used in preparing the economic impact estimates for its preliminary regulatory evaluation are based on (1) data on the mass transit industry included in the National Urban Mass Transportation Statistics Section 15 Annual Reports and other reports; (2) data from the 1991 report entitled Substance Abuse in the Transit Industry prepared for the FTA by Booz, Allen & Hamilton, Inc; (3) data provided by the National Institute on Drug Abuse (NIDA); and (4) information gleaned from other agencies and individuals knowledgeable about alcohol misuse and testing in the United States.

Many of the questions raised in today's preamble seek to verify and expand the information the FTA currently has available to it. The preliminary regulatory impact analysis is available for public inspection in the public docket established for this rulemaking.

B. Departmental Significance

This rule is a "significant regulation" as defined by the Department's Regulatory Policies and Procedures, because it involves an important departmental policy and will probably generate a great deal of public interest. The purpose of this rule is to make mass transit systems safer by ensuring that safety sensitive employees do not misuse alcohol in the workplace.

C. Regulatory Flexibility Act

In accordance with 5 U.S.C. 603(a), the Federal Transit Administration has made a preliminary assessment of the possible effects of the rule on small businesses. To the extent possible, the agency has made efforts to acknowledge the differences between small and large entities, and to make accommodations in the rule as possible. At this time, the agency can not say whether there is a significant impact on a substantial number of small entities.

D. Paperwork Reduction Act

This rule includes information collection requirements subject to the Paperwork Reduction Act. A request for Paperwork Reduction Act approval will be submitted to the Office of Management and Budget in conjunction with this rule. Information collection requirements are not effective until Paperwork Act clearance has been received.

E. Executive Order 12612

This action has been reviewed under Executive order 12612, on Federalism. Although the Federal Transit Administration has determined that this action has significant federalism implications to warrant a federalism assessment, this rulemaking is mandated by Congress in the Omnibus Transportation Employee Testing Act of 1991. FTA has limited discretion.

The 1991 legislation mandates the Federal Transit Administration to issue regulations requiring that grantees of section 3, 9, and 18 of the Federal Transit Act of 1964 and 163(e)(4) of title 23 of the United States Code test their safety sensitive employees for the use of alcohol in violation of law or federal regulation.

Before passage of the Omnibus Transportation Employee Testing Act of

1991, safety issues were largely handled as a local matter. This Act makes the Federal role more clear by including specific Federal pre-emption language. This makes it clear that, in the area of substance abuse testing, Federal regulations are to take precedence over any inconsistent local specification.

Although Congress has pre-empted state or local law, the FTA has preserved the local role in mass transit safety. Testing programs created by virtue of a grantee's own authority and which are not inconsistent with this regulation, are not disturbed by this regulation.

F. National Environmental Policy Act

The agency has determined that this regulation has no environmental implications. Its purpose is to regulate the behavior of those safety-sensitive employees who work in the transit industry and will have no appreciable effect on the quality of the environment.

G. Energy Impact Implications

This regulation does not affect the use of energy because it regulates the behavior of those safety sensitive employees who work in the transit industry.

List of Subjects in 49 CFR Part 654

Alcohol testing, Mass transit, Grant programs—transportation, Reporting and recordkeeping requirements, Safety, and Transportation.

Accordingly, for the reasons cited above, the agency proposes to amend title 49 by adding a new part 654, to read as set forth below:

PART 654—PREVENTION OF ALCOHOL MISUSE IN TRANSIT OPERATIONS

Subpart A—General

Sec.

654.1 Purpose.
654.3 Applicability.
654.5 Alcohol testing procedures.
654.7 Definitions.
654.9 Pre-emption of State and local laws.
654.11 Other requirements imposed by employers.
654.13 Requirement for notice.
654.15 Starting date for alcohol testing programs.
654.17 Compliance a condition of FTA financial assistance.

Subpart B—Prohibitions

654.21 Alcohol concentration.
654.23 Behavior and appearance.
654.25 On-duty use.
654.27 Pre-duty use.
654.29 Use following an accident.
654.31 Refusal to submit to a required alcohol test.

Subpart C—Tests Required

654.41 Pre-employment/pre-duty testing.
654.43 Post-accident testing.
654.45 Random testing.
654.47 Reasonable suspicion testing.
654.49 Return-to-duty testing.
654.51 Follow-up testing.
654.53 Retesting of covered employees with an alcohol concentration of .02 or greater but less than .04.

Subpart D—Handling of Test Results, Record Retention, and Confidentiality

654.61 Retention of records.
654.63 Reporting of results in a management information system.
654.65 Access to facilities and records.

Subpart E—Consequences for Employees Engaging in Alcohol-Related Conduct

654.71 Removal from safety-sensitive function.
654.73 Required evaluation and testing.
654.75 Other alcohol-related conduct.

Subpart F—Alcohol Misuse Information, Training, and Referral

654.81 Employer obligation to promulgate a policy on the misuse of alcohol.
654.83 Training for supervisors.
654.85 Referral, evaluation, and treatment.
654.87 Requirement to certify compliance.

Appendix to Part 654—Sample Certifications of Compliance

Authority: Sec. 6, Pub. L. 102–143, October 28, 1991; 49 CFR 1.51.

Subpart A—General

§ 654.1 Purpose.

The purpose of this part is to establish programs designed to help prevent accidents and injuries resulting from the misuse of alcohol by employees who perform safety-sensitive functions for employers receiving assistance from the Federal Transit Administration (FTA).

§ 654.3 Applicability.

(a) Except as specifically excluded in paragraph (b) of this section, this part applies to—

(1) Any recipient of Federal financial assistance under section 3, 9, or 18 of the Federal Transit Act, as amended; and

(2) Any recipient of Federal financial assistance under section 103(e)(4) of title 23 of the United States Code.

(b) The specific commuter rail service of an FTA recipient, if this service is subject to alcohol regulations of the Federal Railroad Administration (FRA) (See § 219.3 of this title), is specifically excluded from applicability of this part, except for the certification requirement in § 654.87. (See the appendix to this part for specific certification language.)

(c) An employer with safety-sensitive employees subject to the requirements of the Commercial Drivers License Program or other program administered by the Federal Highway Administration that could subject these employees to alcohol misuse regulations issued by the Federal Highway Administration shall cover these workers under the alcohol program specified in this part 654.

(d)(1) A grantee with marine vessel crew members is subject to chemical testing regulations issued by the U.S. Coast Guard and the alcohol misuse testing program regulations specified in this part 654. Compliance with part 654 may generally be considered compliance with the comparable U.S. Coast Guard provisions in 46 CFR parts 4, 5, and 16.

(2) However, the Coast Guard regulations encompass sanctions and other ramifications for individual marine employees, whereas the FTA regulations apply to and have ramifications for grantees funded under the Federal Transit Act, as amended, and section 103(c)(4) of title 23 of the United States Code. Accordingly, in the case of covered marine employees, there are additional provisions which apply to FTA recipients. The Coast Guard regulations are contained in 33 CFR part 95 and 46 CFR parts 4, 5, and 16.

(3) Nothing in this part prohibits the Coast Guard from directing chemical testing or obtaining test records, as provided for in Coast Guard regulations at 46 CFR parts 4 and 16 and 33 CFR part 95. A grantee shall report in writing to the nearest Coast Guard Officer in Charge, Marine Inspection (OCMI) test results indicating an alcohol concentration of .04 or greater for an individual holding a license, certificate of registry, or merchant mariner's document.

§ 654.5 Alcohol testing procedures.

Each employer shall ensure that all alcohol testing conducted under this part complies with the procedures set forth in part 40 of this title. The provisions of part 40 that address alcohol testing are made applicable to employers by this part.

§ 654.7 Definitions.

As used in this part—

Accident means an occurrence associated with the operation of a revenue service vehicle, whether or not the vehicle is in revenue service, if—

(1) An individual dies or must be taken to a medical treatment facility;

(2) The occurrence results in property damage that is estimated to be more than $1,000; or

(3) The occurrence must be reported to the Federal Highway Administration, the Federal Railroad Administration, or is a reportable incident to the Coast Guard, under applicable regulations.

Administrator means the Administrator of the Federal Transit Administration or the Administrator's designee.

Alcohol means ethyl alcohol (ethanol).

Alcohol concentration (or content) means the alcohol in a volume of breath expressed in terms of grams of alcohol per 210 liters of breath as indicated by an evidential breath test under this part. When the indicated alcohol concentration of a covered employee on an initial alcohol test is different from an indicated alcohol concentration on a confirmatory test, the employee shall be considered to have the lower indicated concentration.

Alcohol use means the consumption of any beverage, mixture, or preparation, including any medication, containing alcohol.

Certification means the written affirmation by an FTA recipient that the recipient has complied with the provisions of this part. A valid certification is a condition of FTA funding and must meet the requirements of this part. Each certification must be authorized by the recipient's governing board or other authorizing official and must be signed by a party specifically authorized to do so. (See § 654.87 for requirements on certification.)

Confirmatory test means a second analytical procedure, separate from the screening test, to determine the concentration of alcohol in a covered employee's system. The confirmatory test may or may not use a different chemical principle from that of the screening test, but shall employ a scientifically recognized method of testing capable of providing quantitative data regarding alcohol concentration. For specific requirements concerning breath analysis testing devices see part 40 of this title.

Consortium means an entity, including a group or association of employers, recipients, subrecipients, or contractors, that provides alcohol testing as required by this part or other DOT alcohol testing rules, and which acts on behalf of the employers.

Covered employee means a person who performs a safety-sensitive function and is (1) Directly employed by an employer or (2) Employed by or contracts with a person or organization that provides service to the employer under contract or other agreement. This definition includes current employees transferring to a safety-sensitive function. For purposes of pre-employment/pre-duty testing only, the term *covered employee* includes a person applying to perform a safety-sensitive function.

DOT means the United States Department of Transportation.

DOT agency means an agency (or "operating administration") of the United States Department of Transportation administering regulations requiring alcohol testing (14 CFR part 61; 49 CFR parts 199, 219, 382, and 654) in accordance with part 40 of this title.

Employer means an entity engaging one or more covered employees that is subject to FTA regulations specifying requirements for an alcohol misuse prevention program. As used in this part, *employer* includes a large operator, a small operator, and any consortium or joint enterprise comprised of two or more employing entities requiring compliance with this part and part 40 of this title.

FTA means the Federal Transit Administration (formerly the Urban Mass Transportation Administration), an agency of the U.S. Department of Transportation.

Initial alcohol test (or screening test) means an analytical procedure to determine whether a covered employee may have a prohibited concentration of alcohol in his or her system.

Large operator means a recipient operating in an area of 200,000 or more in population.

Performing (a safety-sensitive function) means a covered employee is considered to be performing a safety-sensitive function and includes any period in which he or she is actually performing, ready to perform, or immediately available to perform such functions.

Recipient means a grantee of Federal financial assistance of Federal Transit Act funds (including a State) under sections 3, 9, or 18 or under section 103(e)(4) of title 23 of the United States Code.

Refuse to submit (to an alcohol test) means that a covered employee fails to provide adequate breath for testing without a valid medical explanation after he or she has received notice of the requirement to be tested in accordance with the provisions of this part, or engages in conduct that clearly obstructs the collection process.

Revenue service vehicle means a bus, van, car, rail car, locomotive, trolley car, trolley bus, vessel, or vehicle used on a fixed guideway or inclined plane and used to transport passengers.

Safety-sensitive function means any duty related to the safe operation of mass transportation service by an employer, including:

(1) Operating a revenue service vehicle, whether or not the vehicle is in revenue service;

(2) Controlling dispatch or movement of a revenue service vehicle;

(3) Maintaining a revenue service vehicle or equipment used in revenue service; or

(4) Directly supervising an employee who performs a function listed in paragraphs (1) through (3) of this definition.

Small operator means a recipient operating in an area of less than 200,000 in population.

Substance abuse professional means a licensed physician (Medical Doctor or Doctor of Osteopathy), or a licensed or certified psychologist, social worker, or employee assistance professional with knowledge of and clinical experience in the diagnosis and treatment of alcohol-related disorders.

§ 654.9 Pre-emption of State and local laws.

(a) Except as provided in paragraph (b) of this section, this part pre-empts any State or local law, rule, regulation, or order to the extent that:

(1) Compliance with both the State or local requirement and this part is not possible; or

(2) Compliance with the State or local requirement is an obstacle to the accomplishment and execution of any requirement in this part.

(b) This part shall not be construed to pre-empt provisions of State criminal law that impose sanctions for reckless conduct leading to actual loss of life, injury, or damage to property, whether the provisions apply specifically to transportation employees or employers or to the general public.

§ 654.11 Other requirements imposed by employers.

Except as expressly provided in this part, nothing in this part shall be construed to affect the authority of employers, or the rights of employees, with respect to the use or possession of alcohol, including authority and rights with respect to alcohol testing and rehabilitation.

§ 654.13 Requirement for notice.

Before performing an alcohol test under this part, each employer shall notify a covered employee that the alcohol test is required by this part. No employer shall falsely represent that a test is administered under this part.

§ 654.15 Starting date for alcohol testing programs.

(a) *Large employers.* Each recipient operating in an area of 200,000 or more in population on [*effective date of the*

final rule] shall implement the requirements of this part on [*date one year after the effective date of final rule*].

(b) *Small employers.* Each recipient operating in an area of 200,000 or less in population on [*effective date of final rule*] shall implement the requirements of this part on [*date two years after the effective date of final rule*].

(c) All employers shall have an alcohol misuse program that conforms to this part by [*date two years after the effective date of the final rule.*] or by the date the employer begins operations, whichever is later.

§ 654.17 Compliance a condition of FTA financial assistance.

(a) *General requirements.* (1) Compliance with this part is a condition of Federal Transit Administration financial assistance. Failure to certify compliance with these requirements, as specified in § 654.87 will suspend a grantee's eligibility for FTA funding. In addition, if FTA knows, or receives knowledge of, a grantee's noncompliance with the provisions of this part (including a false certification), the grantee becomes ineligible for continued FTA assistance.

(2) As a general matter, in assessing whether or not a recipient is in compliance with this part, the Administrator may determine to act on an isolated instance of violation or on a pattern or practice of noncompliance, at the Administrator's discretion and based on the particular facts of the situation.

(b) *Criminal violation.* A recipient is subject to criminal sanctions and fines for false statements or misrepresentations under § 1001 of title 18 of the United States Code (Crimes and Criminal Procedure).

(c) *State's role.* Each State shall certify compliance on behalf of its section 9 or 18 subrecipients, as applicable, whose grants the State administers. In so certifying, the State shall use due diligence to ensure that each subrecipient is complying with the requirements of this part. A section 9 or 18 subrecipient, through the administering State, is subject to suspension of funding.

Subpart B—Prohibitions

§ 654. 21 Alcohol concentration.

No employer having actual knowledge that a covered employee has an alcohol concentration of .04 or greater shall permit the employee to perform or continue to perform safety-sensitive functions.

§ 654.23 Behavior and appearance.

Notwithstanding the absence of a reasonable suspicion test under § 654.47, no employer having actual knowledge that a covered employee has reported for duty or remains on duty requiring the performance of safety-sensitive functions while the employee's behavior or appearance is characteristic of alcohol misuse or on the employee's ability to perform his or her assigned functions is adversely affected by alcohol use shall permit a covered employee to perform or continue to perform safety-sensitive functions. Each employer shall prohibit a covered employee whose behavior or appearance is characteristic of alcohol misuse or whose ability to perform his or her assigned functions is adversely affected by alcohol from reporting for duty or remaining on duty requiring the performance of safety-sensitive functions.

§ 654.25 On-duty use.

Each employer shall prohibit a covered employee from using alcohol while performing safety-sensitive functions. No employer having actual knowledge that a covered employee is using alcohol while performing safety-sensitive functions shall permit the employee to perform or continue to perform safety-sensitive functions.

§ 654.27 Pre-duty use.

(a) *General.* No employer having actual knowledge that a covered employee has used alcohol within four hours shall permit the employee to perform or continue to perform safety-sensitive functions. No employer having actual knowledge that a covered employee has used alcohol within four hours of performing safety-sensitive functions shall permit a covered employee to perform or continue to perform safety-sensitive functions.

(b) *On-call employees.* The employer shall establish a policy prohibiting the consumption of alcohol for the specified on-call hours of each covered employee who is on-call. At a minimum, the procedure shall ensure that the covered employee who is on call is capable of performing his or her safety-sensitive functions. The procedure shall include:

(1) The opportunity for the covered employee to acknowledge the use of alcohol at the time he or she is called to report to duty and the inability to perform his or her safety-sensitive function.

(2) The requirement that the covered employee take an alcohol test, if the covered employee has acknowledged the use of alcohol, but claims ability to perform his or her safety-sensitive function.

§ 654.29 Use following an accident.

Each employer shall ensure that any covered employee required to take a post-accident alcohol test under § 654.43 refrains from alcohol use for eight hours following the accident or until he or she undergoes a post-accident alcohol test, whichever occurs first.

§ 654.31 Refusal to submit to a required alcohol test.

Each employer shall require a covered employee to submit to a post-accident alcohol test required under § 654.43, a random alcohol test required under § 654.45, a reasonable suspicion alcohol test required under § 654.47, or a follow-up alcohol test required under § 654.51. No employer shall permit an employee who refuses to submit to such a test to perform or continue to perform safety-sensitive functions.

Subpart C—Tests Required

§ 654.41 Pre-employment/pre-duty testing.

(a) Prior to the first time a covered employee performs safety-sensitive functions for an employer, the employer shall ensure that the employee undergoes testing for alcohol. No employer shall allow a covered employee to perform safety-sensitive functions, unless the employee has been administered an alcohol test with a result indicating an alcohol concentration less than .04. If a pre-employment/pre-duty test result under this section indicates an alcohol concentration of .02 or greater but less than .04, the provisions of § 654.75 shall apply.

(b) An employer is not required to administer an alcohol test required by paragraph (a) of this section, if:

(1) The employee has undergone an alcohol test required by this section or the alcohol misuse rule of another DOT agency under part 40 of this title within the previous six months, with a result indicating an alcohol concentration less than .04; and

(2) The employer ensures that no prior employer of the covered employee of whom the employer has knowledge has records of a violation of this subpart or the alcohol misuse rule of another DOT agency within the previous six months.

§ 654.43 Post-accident testing.

(a) In the case of an accident involving the loss of human life, all surviving covered employees on duty and present in the vehicle at the time of the accident or involved in the vehicle's

maintenance or other preparation for revenue service during the time immediately preceding the vehicle being placed into revenue service shall be tested for alcohol.

(b) If there is no loss of human life, and as soon as practicable following the accident, each employer shall test for each surviving covered employee present and on duty in the vehicle at the time of the accident or involved in the vehicle's maintenance or other preparation for revenue service during the time immediately preceding the vehicle being placed into revenue service, if that employee's performance of the safety-sensitive function either contributed to an accident or cannot be completely discounted as a contributing factor to the accident. The decision not to administer a test under this section shall be based on the employer's determination, using the best available information at the time of the determination, that the employee's performance could not have contributed to the accident.

(c) If a test required by this section is not administered within two hours following the accident, the employer shall submit a report to the FTA Office of Safety stating the reasons the test was not promptly administered. If a test required by this section is not administered within eight hours following the accident, the employer shall cease attempts to administer an alcohol test and shall submit the same report. Nothing in this section shall be construed to require the delay of necessary medical attention for injured people following an accident or to prohibit a covered employee from leaving the scene of an accident for the period necessary to obtain assistance in responding to the accident or to obtain necessary emergency medical care.

(d) An employer shall ensure that a surviving covered employee submits to a post-accident test required by this section. A covered employee who is subject to post-accident testing who leaves the scene of the accident without a valid reason prior to submission to such test may be deemed by the employer to have refused to submit to testing.

§ 654.45 Random testing.

(a) Each employer shall, at various times, randomly select covered employees for unannounced alcohol testing. The selection of employees shall be made by use of a scientifically valid method, such as a random-number table or a computer-based random number generator that is matched with employees' Social Security numbers, payroll identification numbers, or other comparable identifying numbers. Each covered employee shall have an equal chance of being tested under the selection process used.

(b) During each 12-month period following the start of random alcohol testing by the employer, the employer shall meet the following conditions:

(1) The dates for administering unannounced testing of randomly-selected covered employees shall be spread reasonably throughout the 12-month period; and

(2) The number of employees randomly selected for testing during the 12-month period shall equal an annual rate of not less than [10–50] percent of the total number of employees subject to alcohol testing under this part or the alcohol misuse rule of another DOT agency. If the employer conducts random testing through a consortium, the annual rate may be calculated for each individual employer or for the total number of covered employees subject to random testing by the consortium.

(c) A covered employee shall only be tested while the employee is performing safety-sensitive functions; just before the employee is to perform safety-sensitive functions; or just after the employee has ceased performing such functions.

(d) Each employer shall require that each covered employee who is notified of selection for random testing proceeds to the testing site immediately. However, if the employee is performing a safety-sensitive function at the time of the notification, the employer shall instead require that the employee ceases to perform the safety-sensitive function and proceed to the testing site as soon as possible.

§ 654.47 Reasonable suspicion testing.

(a) Each employer shall require any covered employee to submit to an alcohol test when the employer has reasonable suspicion to believe that the employee has violated the prohibitions in this part.

(b) The employer's determination that reasonable suspicion exists to require the covered employee to undergo an alcohol test shall be based on specific, contemporaneous, articulable observations concerning the appearance, behavior, speech or body odors of the employee. The required observations shall be made by a supervisor who is trained in detecting the symptoms of alcohol misuse. The supervisor who makes the determination that reasonable suspicion exists shall not conduct the breath alcohol test on that employee.

(c) Alcohol testing is authorized by this section only if the observations required by paragraph (b) of this section are made during or just preceding the period of the work day that the covered employee is required to be in compliance with this part. A covered employee may be required to undergo reasonable suspicion testing for alcohol while the employee is performing safety-sensitive functions; just before the employee is to perform safety-sensitive functions; or just after the employee has ceased performing such functions.

§ 654.49 Return to duty testing.

Each employer shall ensure that before a covered employee returns to duty requiring the performance of a safety-sensitive function after engaging in conduct prohibited by subpart B of this part, the employee shall undergo a return to duty alcohol test with a result indicating an alcohol concentration of less than .02.

§ 654.51 Follow-up testing.

Following a determination under § 654.85(b) that a covered employee is in need of assistance in resolving problems associated with alcohol misuse, each employer shall ensure that the employee is subject to unannounced follow-up testing as directed by a substance abuse professional in accordance with the provisions of § 654.85(c)(2)(ii).

§ 654.53 Retesting of covered employees with an alcohol concentration of .02 or greater but less than .04.

Each employer shall retest a covered employee to ensure compliance with the provisions of § 654.75, if the employer chooses to permit the employee to perform a safety-sensitive function within 8 hours following the administration of an alcohol test indicating an alcohol concentration of .02 or greater but less than .04.

Subpart D—Handling of Test Results, Record Retention, and Confidentiality

§ 654.61 Retention of records.

(a) *General requirement.* Each employer shall maintain records of its alcohol misuse prevention program as provided in this section. The records shall be maintained in a secure location with controlled access.

(b) *Period of retention.* Each employer shall maintain the records in accordance with the following schedule:

(1) *Five years.* Records of employee alcohol test results with results indicating an alcohol concentration of .02 or greater, documentation of refusals to take required alcohol tests, calibration documentation, and employee evaluation and referrals shall

be maintained for a minimum of five years.

(2) *Two years.* Records related to the collection process (except calibration of EBT's) and training shall be maintained for a minimum of two years.

(3) *One year.* Records of negative test results (as defined in part 40 of this title) shall be maintained for a minimum of one year.

(c) *Types of records.* The following specific records shall be maintained.

(1) Records related to the collection process:

(i) Collection logbooks, if used.

(ii) Documents relating to the random selection process.

(iii) Calibration documentation for evidential breath testing devices.

(iv) Verification of breath alcohol technician training.

(v) Documents generated in connection with decisions to administer reasonable suspicion alcohol tests.

(vi) Documents generated in connection with decisions on post-accident tests.

(vii) Documents verifying existence of a medical explanation of the inability of a covered employee to provide adequate breath for testing.

(2) Records related to test results:

(i) The employer's copy of the alcohol test form, including the results of the test;

(ii) Documents related to the refusal of any covered employee to submit to an alcohol test required by this part.

(iii) Documents presented by a covered employee to dispute the result of an alcohol test administered under this part.

(3) Records related to other violations of this part.

(4) Records related to evaluations:

(i) Records pertaining to a determination by a substance abuse professional concerning a covered employee's need for assistance.

(ii) Records concerning a covered employee's compliance with the recommendations of the substance abuse professional.

(5) Records related to education and training:

(i) Materials on alcohol misuse awareness, including a copy of the employer's policy on alcohol misuse.

(ii) Documentation of compliance with the requirements of § 654.81 of this part.

(iii) Documentation of training provided to supervisors for the purpose of qualifying the supervisors to make a determination concerning the need for alcohol testing based on reasonable suspicion.

(iv) Certification that any training conducted under this part complies with the requirements for such training.

§ 654.63 Reporting of results in a management information system.

(a) Each employer shall submit to the FTA an annual report covering the calendar year, summarizing the results of its alcohol misuse prevention program.

(b) Each employer that is subject to more than one DOT agency alcohol regulation shall identify each employee covered by the regulations of more than one DOT agency. The identification will be by the total number and category of covered function. Prior to conducting any alcohol test on a covered employee subject to the regulations of more than one DOT agency, the employer shall determine which DOT agency regulation or regulations authorizes or requires the test. The test result information shall be directed to the appropriate DOT agency or agencies.

(c) Each employer shall ensure the accuracy and timeliness of each report submitted by the employer or a consortium.

(d) Each employer shall submit the required annual reports no later than February 15 of each year. The report shall be submitted on the form contained in appendix B to part 653 of this title. Each report shall contain:

(1) Number of covered employees by employee category.

(2) Number of covered employees in each category subject to testing under the alcohol misuse regulation of another DOT agency, identified by each agency.

(3)(i) Number of initial tests by type of test and employee category.

(ii) Number of confirmatory tests, by type of test and employee category.

(4) Number of confirmatory alcohol tests indicating an alcohol concentration of .04 or greater, by type of test and employee category.

(5) Number of confirmatory alcohol tests indicating an alcohol concentration of .02 or greater but less than .04.

(6) Number of persons denied a position as a covered employee following a pre-employment/pre-duty alcohol test indicating an alcohol concentration of .04 or greater.

(7) Number of covered employees with a confirmatory alcohol test indicating an alcohol concentration of .04 or greater who were returned to duty in covered positions (having complied with the recommendations of a substance abuse professional as described in §§ 654.73 and 654.85.)

(8) Number of covered employees who were administered alcohol and drug tests at the same time, with both a positive drug test result and an alcohol test result indicating an alcohol concentration of .04 or greater.

(9) Number of covered employees who were found to have violated other provisions of subpart B of this part and the action taken in response to the violation.

(10) Number of covered employees who refused to submit to an alcohol test required under this part, and the action taken in response to the refusal.

(11) Number of supervisors who have received training during the reporting period in determining the existence of reasonable suspicion of alcohol misuse.

§ 654.65 Access to facilities and records.

(a) Except as required by law or expressly authorized or required in this section, no employer shall release covered employee information that is contained in records required to be maintained under § 654.61.

(b) A covered employee is entitled, upon written request, to obtain copies of any records pertaining to the employee's use of alcohol, including any records pertaining to his or her alcohol tests. The employer shall promptly provide the records requested by the employee. Access to an employee's records shall not be contingent upon payment for records other than those specifically requested.

(c) Each employer shall permit access to all facilities utilized in complying with the requirements of this part to the Secretary of Transportation, the U.S. Coast Guard, or other DOT agencies with regulatory authority over the employer or any of its covered employees.

(d) Each employer shall make available copies of all results for employer alcohol testing conducted under this part and any other information pertaining to the employer's alcohol misuse prevention program, when requested by the Secretary of Transportation, the U.S. Coast Guard, or other DOT agencies with regulatory authority over the employer or covered employee.

(e) When requested by the National Transportation Safety Board as part of an accident investigation, employers shall disclose information related to the employer's administration of a post-accident alcohol test administered following the accident under investigation.

(f) Records shall be made available to a subsequent employer upon receipt of written request from the covered employee. Disclosure by the subsequent employer is permitted only as expressly authorized by the terms of the employee's request.

(g) An employer may disclose information required to be maintained under this part pertaining to a covered

employee to the employee or the decisionmaker in a lawsuit, grievance, or other proceeding initiated by or on behalf of the individual, and arising from the results of an alcohol test administered under this part, or from the employer's determination that the employee engaged in conduct prohibited by subpart B of this part (including, but not limited to, a worker's compensation, unemployment compensation, or other proceeding relating to a benefit sought by the employee) .

(h) An employer shall release information regarding a covered employee's records as directed by the specific, written consent of the employee authorizing release of the information to an identified person. Release of such information by the person receiving the information is permitted only in accordance with the terms of the employee's consent.

Subpart E—Consequences for Employees Engaging in Alcohol-related Conduct

§ 654.71 Removal from safety-sensitive function.

Except as provided in subpart F of this part, no employer shall permit any covered employee to perform safety-sensitive functions if the employer has determined that the employee has engaged in conduct prohibited by subpart B of this part or an alcohol misuse rule of another DOT agency.

§ 654.73 Required evaluation and testing.

No employer shall permit any covered employee who has engaged in conduct prohibited by subpart B of this part to perform safety-sensitive functions unless the employee has met the requirements of § 654.85. Nothing in this section shall be construed to prohibit the continued performance of safety-sensitive functions necessary to respond to an emergency.

§ 654.75 Other alcohol-related conduct.

(a) No employer shall permit a covered employee tested under the provisions of subpart C of this part who is found to have an alcohol concentration of .02 or greater but less than .04 to perform or continue to perform safety-sensitive functions, until:

(1) The employee's alcohol concentration measures less than .02; or

(2) The start of the employee's next regularly scheduled duty period, but not less than eight hours following administration of the test.

(b) Except as provided in paragraph (a) of this section, no employer shall take any action under this part against an employee based solely on test results showing an alcohol concentration less than .04. This does not prohibit an employer with authority independent of this part from taking any action otherwise consistent with law.

(c) Nothing in this section shall be construed to prohibit the continued performance of safety-sensitive functions necessary to respond to an emergency.

Subpart F—Alcohol Misuse Information, Training, and Referral

§ 654.81 Employer obligation to promulgate a policy on the misuse of alcohol.

(a) *General requirements.* Each employer shall provide educational materials that explain the requirements of this part and the employer's policies and procedures with respect to meeting those requirements. Each employer shall provide written notice to every covered employee and to representatives of employee organizations of the availability of this information.

(b) *Required content.* The materials to be made available to covered employees shall include detailed discussion of at least the following:

(1) The identity of the person designated by the employer to answer employee questions about the materials.

(2) The categories of employees who are subject to the provisions of this part.

(3) Sufficient information about the safety-sensitive functions performed by those employees to make clear what period of the work day the covered employee is required to be in compliance with this part.

(4) Specific information concerning employee conduct that is prohibited by this part.

(5) The circumstances under which a covered employee will be tested for alcohol under this part.

(6) The procedures that will be used to test for the presence of alcohol, protect the employee and the integrity of the breath testing process, safeguard the validity of the test results, and ensure that those results are attributed to the correct employee.

(7) The requirement that a covered employee submit to alcohol tests administered in accordance with this part.

(8) An explanation of what constitutes a refusal to submit to an alcohol test and the attendant consequences.

(9) The consequences for covered employees found to have violated the prohibitions imposed under subpart B, including the requirement that the employee be removed immediately from safety-sensitive functions, and the procedures under § 654.85 of this part.

(10) The consequences for covered employees found to have an alcohol concentration of .02 or greater but less than .04.

(c) *Optional provisions.* The materials supplied to covered employees may also include information on additional employer policies with respect to the use or possession of alcohol, including any consequences for an employee found to have a specified alcohol concentration, that are based on the employer's authority independent of this part. Any such additional policies or consequences shall be clearly and obviously described as being based on independent authority.

§ 654.83 Training for supervisors.

Every employer shall ensure that persons designated to determine whether reasonable suspicion exists to require a covered employee to undergo alcohol testing under § 654.47 receive at least 60 minutes of training on the physical, behavioral, speech, and performance indicators of probable alcohol misuse.

§ 654.85 Referral, evaluation, and treatment.

(a) Each covered employee who has engaged in conduct prohibited by subpart B of this part shall be advised by the employer of the resources available to the employee in evaluating and resolving problems associated with the misuse of alcohol, including the names, addresses, and telephone numbers of substance abuse professionals and counseling and treatment programs.

(b) Each covered employee who engages in conduct prohibited by subpart B shall be evaluated by a substance abuse professional who shall determine what assistance, if any, the employee needs in resolving problems associated with alcohol misuse.

(c)(1) Before a covered employee returns to duty requiring the performance of a safety-sensitive function after engaging in conduct prohibited by subpart B of this part, the employee shall undergo a return to duty alcohol test with a result indicating an alcohol concentration of less than .02.

(2) In addition, each covered employee identified as needing assistance in resolving problems associated with alcohol misuse:

(i) Shall be evaluated by a substance abuse professional to determine that the employee has properly followed any rehabilitation program prescribed under paragraph (b) of this section, and

(ii) Shall be subject to unannounced follow-up alcohol tests administered by the employer following the employee's

return to duty. The number and frequency of such follow-up testing shall be determined by a substance abuse professional, but shall consist of at least six tests in the first 12 months following the employee's return to duty. Follow-up testing shall not exceed 60 months from the date of the employee's return to duty. The substance abuse professional may terminate the requirement for follow-up testing at any time after the first six tests have been administered, if the substance abuse professional determines that such testing is no longer necessary.

(d) Evaluation and rehabilitation may be provided by the employer, by a substance abuse professional under contract with the employer, or by a substance abuse professional not affiliated with the employer. The choice of substance abuse professional and assignment of costs shall be made in accordance with employer/employee agreements and employer policies.

(e) The requirements of this section with respect to referral, evaluation, and rehabilitation, do not apply to applicants who refuse to submit to a pre-employment/pre-duty alcohol test or who have a pre-employment/pre-duty alcohol test with a result indicating an alcohol concentration of .04 or greater.

654.87 Requirement to certify compliance.

(a) Each recipient of FTA financial assistance shall certify annually to the applicable FTA Regional Office compliance with the requirements of this part. Large operators shall certify compliance initially by [DATE 12 MONTHS FROM PUBLICATION OF THE FINAL RULE]. Small operators and States shall certify compliance initially by [DATE 24 MONTHS FROM PUBLICATION OF THE FINAL RULE]. Each certification shall comply with the applicable sample certification provided in the appendix to this part.

(b) Each certification must be authorized by the organization's governing board or other authorizing official. Each certification must be signed by a party specifically authorized to do so. Each certification must comply with the applicable sample certification provided in the appendix to this part.

Appendix to Part 654—Sample Certifications of Compliance

This appendix contains two separate examples of certification language. The first example consists of the generally applicable certification language. Example II should be used by employers who are covered by Federal Railroad Administration's alcohol misuse prevention program regulations.

I.

(a) *For recipients who are large or small operators* I, (name), (title), certify that (name of recipient) and its contractors, as required, for (name of recipient), has established and implemented an alcohol misuse prevention program in accordance with the terms of 49 CFR part 654.

(b) *For States* certifying on behalf of its subrecipients and their contractors, as required, shall be as follows:

I, (name, title) on behalf of (STATE) certify that, to the best of my knowledge and as the result of due diligence, the entities on the attached list of Federal Transit Act subrecipients operating in this State have established and implemented alcohol misuse prevention programs in accordance with the terms of 49 CFR part 654.

II.

The text of the certification of an employer that provides commuter rail transportation service regulated by the Federal Railroad Administration shall be as follows:

I, (name), (title), certify that (name of recipient) and its contractors, as required, for (name of recipient), has an alcohol misuse prevention program that meets the requirements of the Federal Railroad Administration's regulations for employees regulated by the Federal Railroad Administration, and has established and implemented an alcohol misuse prevention program in accordance with the terms of 49 CFR part 654 for all other covered employees who perform safety-sensitive functions.

Issued: December 2, 1992.

Andrew H. Card, Jr.,

Secretary of Transportation.

Brian W. Clymer,

Administrator.

BILLING CODE 4910-57-M

Federal Transit Administration

49 CFR Part 653

[Docket No 92-H ; RIN 2132-AA37]

Prevention of Prohibited Drug Use in Transit Operations

AGENCY: Federal Transit Administration, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: On October 28, 1991, President Bush signed the Omnibus Transportation Employee Testing Act of 1991, mandating the Federal Transit Administration to issue regulations on drug and alcohol testing for mass transit workers. This document proposes the agency's drug use prevention program, which should increase the safety of mass transit operations.

DATES: Comments on this proposed rule must be submitted by April 14, 1993.

ADDRESSES: Comments should be sent to Docket Clerk, Docket No. 92-H, Federal Transit Administration, DOT, 400 Seventh St. SW., room 9316, Washington DC 20590. Comments will be available for inspection at this address Monday through Friday from 9 a.m. to 5 p.m. If you would like acknowledgment of receipt of your comment please include a stamped, self-addressed postcard with your comment.

FOR FURTHER INFORMATION CONTACT: For program issues, Judy Meade, Office of Safety, Federal Transit Administration, DOT, 400 Seventh St, SW., room 6432, Washington, DC 20590. Telephone: 202-366-2896. For legal questions, Susan Schruth, Office of the Chief Counsel, Federal Transit Administration, DOT, 400 Seventh St, SW., room 9316, Washington, DC 20590. Telephone: 202-366-4011 (voice); 202-366-2979 (TDD). Copies of the regulation are available in alternative formats upon request.

SUPPLEMENTARY INFORMATION:

I. General Note on Change of Agency's Name

Congress passed reauthorization legislation for several operating administrations of the Department of Transportation (DOT) in the Fall of 1991 (The Intermodal Surface Transportation Efficiency Act of 1991, Pub. L. 102-240, December 18, 1991). One important change was the renaming of the Urban Mass Transportation Administration (UMTA), which is now the Federal Transit Administration (FTA). In addition, all references to the Urban Mass Transportation Act of 1964, as amended, were changed to the Federal Transit Act, as amended (FT Act).

II. Background

On November 22, 1988, the FTA issued a final rule requiring recipients of Federal Transit Act financial assistance to develop and implement drug testing programs. This regulation was codified at 49 CFR part 653 and was the first time the FTA had required such a program. On December 21, 1989, approximately 200 large transit systems certified compliance with that regulation and began implementing urine drug testing of safety-sensitive employees (including first-line supervisors) for five types of drugs.

A. Litigation.

Shortly after its final rule was published in 1988, the FTA was sued by three unions representing most American transit workers. In these three suits, consolidated in the United States District Court for the District of

Columbia, the plaintiffs contended that FTA lacked statutory authority to issue a drug testing rule. Plaintiffs also argued that random testing was unconstitutional. Eventually plaintiffs conceded the constitutionality of drug testing, including random testing. After the district court upheld the regulation, the plaintiffs appealed.

On January 19, 1990, the United States Court of Appeals for the District of Columbia Circuit decided that FTA did not have statutory authority to issue an anti-drug regulation. (*Amalgamated Transit Union* v. *Skinner*, 894 F.2d 1362 (D.C. Cir. 1990)). Accordingly, on January 25, 1990, FTA published a notice in the **Federal Register** suspending its anti-drug regulation. (Today's proposed rule, when finalized, will replace the suspended part 653 with a new part 653.)

In the meantime, other agencies of the Department of Transportation have been sued on a number of different aspects of their respective drug testing regulations, and have prevailed in each case. In those cases, the testing procedures used, the five drugs tested for, the types of tests, including random, as well as the basic constitutionality of drug testing, have been upheld by the courts. Moreover, several transit systems successfully have defended challenges to their own drug and alcohol testing programs.

When FTA's 1988 drug rule was suspended, the FTA and DOT emphasized that statutory drug testing authority for the FTA was a key legislative goal. These attempts were successful on October 28, 1991, when the Omnibus Transportation Employee Testing Act (the Act, Pub. L. 102–143, Title V) was signed into law by President Bush.

Today's proposed rule carries out the mandate in the Act and is similar in many respects to the agency's suspended part 653. However, when today's rule is published in final form the 1988 suspended rule will be removed completely and the only remaining regulation will be that issued under the authority of the Omnibus Transportation Employee Testing Act.

B. Study

In 1991, the FTA Office of Safety conducted a study to determine the extent of substance abuse in the transit industry. ("Substance Abuse in the Transit Industry", DC–90–7021, 1991) The study's findings analyze the results of two surveys designed to gather information on substance abuse policies and programs as well as drug and alcohol use patterns in the transit industry. Of the two surveys, one was completed by transit system managers and the other by safety-sensitive transit employees.

The transit manager survey sought information on substance abuse program policies and procedures, positive test rates during calendar year 1990, disciplinary procedures, employee training, and substance-related accident data. The survey was mailed to 400 transit systems; 306 comprise the agency data base.

The employee survey was administered to 1,975 safety-sensitive employees at nine randomly selected transit systems divided into three groups based on annual ridership. The employee questionnaire was focused solely on personal use of drugs and alcohol and, to a large extent, the questions were standardized to facilitate comparison with the National Institute on Drug Abuse (NIDA) Household Survey.

Both studies guaranteed confidentiality. Since both surveys were voluntary, no data were collected from any system or employee who did not consent to participate.

The following are some key findings from the surveys concerning drug use:

- Of the 306 systems, 78 percent conduct some type of drug testing.
- The personal use data provided in the 1988 and 1990 NIDA household surveys provide a benchmark for comparisons of the transit industry results with those of the general population. Those results indicate that self-reported drug use by transit employees during the twelve months preceding the survey was somewhat lower than self-reported use by the general population. However, self-reported drug use by transit employees during the thirty days preceding the survey was almost identical to that reported by the general population.
- About seven percent of the safety-sensitive employees reported using drugs on the day before or the day of reporting to duty.
- Over ten percent of the safety-sensitive employees reported daily or weekly use of a duty-affecting drug.
- Slightly over four percent of all drug tests administered to safety-sensitive employees and job applicants in 1990 were confirmed positive.
- Positive drug test results were slightly higher for vehicle and equipment maintenance personnel than for vehicle operators.

III. The Omnibus Transportation Employee Testing Act of 1991

The Omnibus Transportation Employee Testing Act of 1991 (the Act) (Pub. L. 102–143, October 28, 1991) requires the FTA to issue regulations mandating testing for the use of certain drugs by safety-sensitive employees. The following highlights provisions of the Act affecting the FTA; see the section-by-section portion of this preamble for a more thorough discussion of the Act.

The Federal Transit Administration must issue regulations requiring recipients of funds under sections 3, 9, and 18 of the Federal Transit Act, as amended, and section 103(e)(4) of title 23 of the United States Code, to test safety-sensitive employees for the use of drugs in violation of law or Federal regulation. The FTA may defer to related regulations issued by the Federal Highway Administration (FHWA), under the Commercial Motor Vehicle Safety Act of 1986, or the Federal Railroad Administration (FRA), under the Federal Railroad Safety Act of 1970, for operations covered by these statutes.

As a condition of FTA funding, the Act requires recipients to establish an anti-drug program. Failure to establish such a program, or to properly carry it out, will result in a suspension of Federal transit funding.

The Act requires urine testing for controlled substances, which the Administrator determines are a risk to transportation safety. A controlled substance is defined in the Act as any substance under section 102(6) of the Controlled Substances Act (21 U.S.C. 802(6)). The Act further requires four types of drug testing: Pre-employment, reasonable suspicion, random, and postaccident. In addition, the statute permits periodic testing, under various circumstances.

The Act requires that the Department of Health and Human Services (DHHS) testing procedures be followed to ensure the integrity of the test and to protect the individual's privacy, to the extent practicable, while the specimen is being collected.

The Act does not require recipients to follow a particular course of action when a safety-sensitive employee has been found to have violated law or Federal regulation concerning the use of prohibited substances. Instead, the Act directs the FTA to issue regulations establishing, as it deems appropriate, possible consequences for using a prohibited substance in violation of the FTA regulation, including education, counseling, rehabilitation programs and suspension or termination.

In authorizing this regulatory scheme, the Act pre-empts State or local laws, rules, regulations, ordinances, standards, or orders inconsistent with the regulations issued by the FTA. However, provisions of State criminal

law which impose sanctions for reckless conduct leading to actual loss of life, injury, or damage to property are not pre-empted by the Act.

IV. Overview of Proposed Rule

The proposed rule (NPRM) applies to recipients of funds under sections 3, 9, and 18 of the Federal Transit Act, as amended, and section 103(e)(4) of title 23 of the United States Code. It would require each transit operator (employer) that receives these funds to establish and conduct a multi-faceted anti-drug program. A basic component of the regulation is the testing of safety-sensitive employees for the use of prohibited substances, but education and awareness about the problems associated with prohibited drug use also are required.

The regulation specifies that safety-sensitive employees may not use any of the five prohibited substances identified in the regulation (marijuana, cocaine, opiates, amphetamines, phencyclidine).

The NPRM proposes testing in the following situations:

1. Pre-employment (including transfer to a safety-sensitive position within the organization);
2. Reasonable suspicion;
3. Random;
4. Post-accident; and
5. Return to duty/follow-up (periodic).

The NPRM would require the use of the Department-wide drug testing procedures, contained in part 40 of title 49 of the Code of Federal Regulations. Part 40 is consistent with the DHHS "Scientific and Technical Guidelines for Drug Testing Programs" issued on April 11, 1988. These regulations include specifications on the chain of custody procedures to be used in collecting the sample, procedures for maximizing the privacy of the individual being tested and the like. Each of the existing drug testing programs of other DOT agencies is subject to these part 40 procedures.

If a covered employee fails to pass a drug test (as defined in this part 653), the employee must be removed from his or her safety-sensitive position. In addition, the employee must be told about educational and rehabilitation programs available. Further, the covered employee must be evaluated by a substance abuse professional. The proposed rule would allow the employer to require that the covered employee successfully complete rehabilitation, although the proposed rule would not require the employer to pay for rehabilitation.

Each employer must have a policy statement which describes its anti-drug program policies and procedures, including consequences.

Because the FTA is to issue a regulation requiring a drug testing program as a condition of financial assistance, this regulation applies to recipients of FT Act funds, *i.e.*, transit systems, Metropolitan Planning Organizations, and States, and will be enforced at that level by the FTA rather than at the employee level. (Concerning MPO's and States, they are affected by this regulation if they provide transit service or provide money to a subrecipient who provides transit service and if they currently are required to provide certifications of compliance on behalf of the subrecipient.) MPO's or States that provide transit service will be responsible for developing and implementing a program like any other employer. If an MPO or State does not provide transit service, but manages or funds transit providers, the MPO or State must ensure founded certifications are made to them by employers.

It is the employer's responsibility to develop a program and implement that program in compliance with this regulation. Failure to do so, or to do so properly, will result in a suspension of Federal transit funding.

Finally, a note about terminology. The agency has changed the way it refers to its grantees for purposes of this rulemaking. One principal reason is to use substance abuse language that is uniform among the agencies of the Department of Transportation. The other reason is to more accurately describe the different parties' responsibilities under this regulation.

FTA has its primary relationship with grantees. Many grantees are entities which both receive transit funds and run mass transit services. Typical among these are large transit operators under sections 3 and 9 of the Federal Transit Act, as amended.

In addition, some grantees (typically States) pass the money they receive as grantees to smaller subrecipients within their States. In these cases, the FTA recipient is not the actual transit operator.

To use a phrase which gets at the actual transportation service provider, the NPRM uses the term "employer." This term includes both the small and large operators, as well as those providing service under contract or other arrangement with the transit operator. All of these terms are spelled out in the definitions section and are explained in more detail in the following section-by-section discussion.

V. Section-by-Section Analysis

Subpart A—General

A. Applicability (§ 653.5)

The FTA proposed rule contains a section specifically describing the applicability of the rule to various recipients of funds under the Federal Transit Act, as amended. This is necessary because many FTA recipients have portions of their operations regulated by other agencies of the Department, and the Act allows FTA to defer to anti-drug regulations administered by the FRA under the Federal Railroad Safety Act of 1970, or the FHWA under the Commercial Motor Vehicle Safety Act of 1986, if the Secretary deems that the operations would be adequately covered by these other agencies. This section describes which regulation applies and under which circumstances. In deciding which regulation would apply, the FTA coordinated with the FRA, the FHWA, and the United States Coast Guard. All agencies concur in the following decisions.

1. *Federal Railroad Administration.* In addition to bus and rail operations, several of our larger grantees also have commuter rail operations, which are subject to regulations of the Federal Railroad Administration. Proposed § 653.5 states that, for purposes of the FTA anti-drug rule, entities or operations of entities currently governed by the FRA under the Federal Railroad Safety Act of 1970 will continue to conduct their anti-drug program consistent with the provisions of the FRA regulations. (See § 219.3 of this title.) The grantees must certify to the FTA that they are in compliance with the FRA anti-drug regulations and a proposed model certification is set out in the appendix to part 653.

2. *Federal Highway Administration.* Grantees with safety-sensitive employees subject to the Commercial Drivers License Program of the FHWA are covered by the FTA anti-drug regulation, not that of FHWA.

While FTA grantees can rely on this part 653 to meet FHWA drug testing program requirements, each affected grantee should be aware that individual drivers subject to the Commercial Drivers License requirements may be subject to further sanctions, such as revocation of his or her license, based on a drug conviction.

3. *United States Coast Guard.* The Act does not provide the Secretary the discretion to defer to chemical testing regulations of the United States Coast Guard (Coast Guard) for its marine employers which are also FTA grantees.

Further, the Act does not include any mandates affecting the Coast Guard, which already requires dangerous drug and alcohol testing in certain circumstances.

In fact, the Coast Guard has a long history of requiring chemical testing (dangerous drugs and alcohol) by marine employers. Equally long is Coast Guard's relationship with individual marine employees, since it is the Coast Guard which issues and revokes a license, certificate or document of a marine employee.

Thus, FTA grantees which are marine employers are subject to two sets of regulations, those of the Coast Guard found at 46 CFR parts 4 and 16 and 33 CFR part 95, and those of the FTA, which will be codified as today's part 653. In addition, marine employees continue to be subject to Coast Guard regulations at 46 CFR parts 4, 5, and 16 and 33 CFR part 95, even though FTA's regulations do not apply directly to employees. FTA's authority is limited to its relationship with its grantee/employers.

In many cases, the FTA program regulation, as proposed in today's proposed rule, consists of more elements than the Coast Guard regulations affecting marine employers. While some examples follow later, as a general matter, an FTA grantee generally can rely on the FTA program elements of the regulation to also be in compliance with the Coast Guard regulations.

For both the FTA and the Coast Guard, testing must be done consistent with procedures found in 49 CFR part 40. As mandated by the Act, however, FTA and the Office of the Secretary will propose a change to part 40, mandating a split sample procedure for specimens. When adopted as a provision of part 40 it may not apply to Coast Guard employers. If it does not, this would be an instance in which the procedural provisions of the two agencies' regulations differ.

As noted earlier, if a grantee/employer complies with the program testing requirements of this part 653, when it becomes final, generally, the grantee will also be in compliance with the employer directed portion of the Coast Guard regulations. To assist in discerning where there may be differences between the two regulations, we have included an example below to show how the regulations are different. In addition, as we discuss specific sections in the Section-By-Section Analysis portion of this preamble, we have highlighted differences in the regulations.

For example, part 5 of the Coast Guard regulations specifies its statutory obligation to revoke a license, certificate or document of any person who has been shown at a hearing to be a user of or addicted to the use of a dangerous drug or to have been convicted of violating a dangerous drug law of the United States.

However, the FTA has no authority over the individual employee. The FTA drug rule, as proposed, does allow the employer to terminate an employee based upon a verified positive drug test result.

In this example, a marine employer, which is a recipient of Federal Transit Act funds may use the program as set out in part 653. However, there are further responsibilities if the employer is dealing with an employee who has failed a chemical test for dangerous drugs, including providing specific notice to the Coast Guard of such verified positive drug test result.

B. Definitions (§ 653.7)

1. *Accident.* This definition is important because the regulation would require drug testing after an *accident.* The proposed rule defines accident as an event involving a revenue service vehicle that: must be reported under regulations of any one of three other DOT agencies (FRA, Coast Guard, and FHWA); results in a personal injury that requires removal to a medical facility; results in a loss of human life; or results in property damage with an estimated value of $1,000 or more.

This amount is for all property damage at the scene of the accident. It is not intended to be only damage to the transit vehicle. It could be other vehicle(s), trees, buildings, tunnels, etc. The agency is proposing this property damage floor to be consistent with current Section 15 reporting requirements.

The agency seeks comment on this provision, in particular on whether there should be more than one threshold which would trigger the definition of an accident. For example, there could be different floors based on the type of transit vehicle involved in the accident. For example, the floor might be $1,000 if the transit vehicle involved is a van or other vehicle designed to carry 15 or fewer passengers (including the driver), or $5,000 for an accident involving a rail car or full size bus. Is there another basis for distinguishing different dollar threshold amounts? What are they? The agency seeks data on this point, including average accident property damage costs—by vehicle type if possible.

Post-accident testing is another area in which marine employers must be aware of and comply with additional regulations of the United States Coast Guard. Specifically in this case there are procedures governing testing following a "serious marine incident" and procedures for testing corpses.

2. *Cancelled test.* This definition provides a category of test which is neither a positive or a negative test. In effect, it makes a determination that the test was not conducted. It has important effects, because, among other things, a cancelled test cannot be counted toward meeting the specified random rate.

There are many circumstances in which a test may be "cancelled". For example, the MRO may determine that the results are scientifically insufficient to warrant further action or are suspect because of irregularities in the administration of the test or observation of chain of custody procedures.

A laboratory may refuse to accept a sample caused by a problem with the chain of custody procedures followed, or because of the condition of the specimen. These also would be considered cancelled tests.

For purposes of compliance with this part, there are two types of cancelled tests which would require further testing: Pre-employment and return to duty. Mandating another test in these circumstances follows, since in neither case may an employer place an employee in a safety-sensitive position without the employee passing a drug test. Conversely, another test is not authorized in other cases, since it would serve no purpose: the other tests are situation specific and contingent upon timely testing.

3. *Covered Employee.* This definition is important because it classifies who is subject to the transit operator's drug testing program. The FTA would define a "covered employee" to be any individual who performs a safety-sensitive function, either directly employed by an FTA recipient or subrecipient or under contract to an FTA recipient or subrecipient. The proposed rule includes a definition of specific safety-sensitive functions subject to the provisions of the rule.

As proposed, these duties are related to the safe operation of a vehicle, including operating a revenue service vehicle and maintaining a revenue service vehicle or equipment used in revenue service. The definition of safety-sensitive includes those who supervise directly individuals performing such safety-sensitive functions.

In all cases, a covered employee tested under the authority of this FTA

rule must perform duties which fall within the definition of safety-sensitive.

The definition of covered employee also contains the concept of persons who are not employees of a transit operator, but who perform safety-sensitive functions for the transit operator on a regular or continuing basis. The part also includes a definition of contractor to make it clear that an ongoing relationship suffices to have the definition apply.

The inclusion of non-employee safety sensitive workers in the rule raised many issues during the agency's previous drug testing rulemaking. Many operators, and in particular small operators, contended that covering contract service workers could make it difficult for those transit operators who rely on contract maintenance or other service as their sole method of servicing.

On the other hand, the agency has received information from Iowa State University, that will be released in report form later this year, as well as first-hand experience submitted to the agency by small operators, that indicates that the problem is manageable. Further encouragement for the agency to cover these workers is contained in a colloquy on the Senate floor during debate on the legislation mandating this program in which its sponsors clearly indicate their intent to cover safety-sensitive contract workers as well as direct employees of the grantee. ("Cong. Rec.", S14766, October 16, 1991)

For these reasons, contract personnel who "stand in the shoes" of a recipient's own safety-sensitive employees are included in the definition of *covered employee*.

The agency seeks comment on this definition, particularly from small systems and those with directly related experiences.

4. *Employer*. As proposed, the employer has primary responsibility for developing the requisite drug testing program, including educational materials, policies, and testing processes. The FTA defines "employer" to include anyone who is operating transit service subject to this rulemaking. This includes small and large transit operators, as well as any consortium that may be formed to respond to the needs of several operators. The term "employer" is used instead of recipient to avoid any confusion about who has the responsibility under the rule, since States, which are the direct recipients of some FTA funds, usually do not run transit systems.

Under this NPRM, the original recipient of funds from the FTA must make the drug testing program certification, regardless of whether or not that recipient actually provides transit service. For example, a State is the recipient of funds from the FTA under the section 18 rural program but in most, if not all cases, service is provided by subrecipients spread throughout the State. The State, as the original recipient of FTA funds, would certify to the FTA that each subrecipient complies the drug testing regulation. If for some reason a particular subrecipient fails to establish a drug testing program, or fails to implement a program in accordance with the regulation, the FTA would enforce compliance through the State, by requiring it, for example, to suspend Federal funding to that particular subrecipient unless and until the problem is resolved. The same principle would apply in the case of a transit authority recipient and any subrecipients to which it provided Federal funds.

5. *Large operator*. We have defined a large operator as a recipient which operates in an area of 200,000 or more in population.

6. *Safety-sensitive*. The proposed rule defines safety-sensitive to include any function related to operating a revenue service vehicle; controlling the movement or dispatch of a revenue service vehicle; maintaining a revenue service vehicle; or directly supervising any employee performing one of these functions.

The agency is including maintenance workers in this definition, which drew comment in the 1988 drug testing rulemaking. As noted above, the findings of a recent survey indicate that in 1990 positive drug test results were slightly higher for maintenance employees than for vehicle operators. Including maintenance workers in the definition of safety-sensitive means that these workers also would be subject to post-accident testing.

The agency is interested in whether this provision will increase the number of employees tested by grantees already conducting drug testing. Do you conduct post-accident testing now? Do you currently test maintenance employees for drug use? If yes, under what circumstances? Are maintenance employee attendance records and production reports reviewed for possible signs of drug use?

While this definition includes the functions to be covered, the agency recognizes that each employer will have to make case-by-case determinations in designating which employees are safety sensitive, based on the definition and other guidance material in the final rule.

7. *Small operator*. We have defined a small operator as a recipient which operates in an area of less than 200,000 in population. This distinction is consistent with other FTA programs.

C. Determination of Prohibited Drugs (§ 653.9)

This section lists the five drugs to be tested for and determines that these drugs pose a threat to the safety of mass transit. The definition of prohibited drug in the statute specifically requires the Administrator to make such a finding. These drugs are: Marijuana, cocaine, amphetamines, opiates, and phencyclydine. Other DOT agencies currently test for these "big five" drugs, and they are also the only drugs for which DHHS has certified laboratories to test.

Current data collected by the agency, discussed elsewhere in this preamble, confirm that these five drugs are indeed appropriate for testing under this proposed rule.

D. Pre-Emption of State and Local Laws (§ 653.11)

The statute provides for Federal pre-emption in the field, voiding the effect of any inconsistent State or local law, ordinance, rule, regulation, standard or order.

Whether the FTA had authority to require grantees to implement a substance abuse program, and the effect of that requirement in light of State provisions to the contrary, was at the core of legal challenges to our previous drug testing regulation. Congress included language in the Act indicating that no State (including State Constitutions) or local law continues in effect if it is inconsistent with the FTA drug testing regulation. Consistent with longstanding Department-wide interpretation of this type of pre-emption language, the regulation specifies that "inconsistent with" means that the regulation:

(1) Pre-empts a State or local requirement if compliance with the local requirement and the FTA regulation is not possible; or

(2) Pre-empts a State or local requirement if compliance with the local requirement is an obstacle to accomplishing the provisions of the FTA regulation.

On the other hand, the statute and the regulation do not pre-empt State criminal laws that impose sanctions for reckless conduct.

E. Other Requirements Imposed By An Employer (§ 653.15)

This section makes clear that employers, as well as employees, may

add features beyond those required in this regulation for an anti-drug program. The only limitation is that any such additional features may not conflict or interfere with the implementation of the part 653 provisions. For example, if an employer tests for additional drugs, or for different cut-off levels of the five mandated drugs, the employer would have to conduct a separate urine collection from the covered employee. Nothing could interfere with the Federally-mandated chain of custody procedures.

As indicated in § 654.31, the employer must notify the employee whether a drug test is being conducted under the authority of part 653 or the employer's own authority.

F. Compliance With Testing Procedures Requirements (§ 653.17)

Recipients of FTA assistance must establish an anti-drug program that is consistent with the substantive drug testing requirements of this part 653 as well as the procedural drug testing regulation that has been issued by the Secretary at 49 CFR part 40. FTA recipients must comply with part 40 to be in compliance with part 653.

While each grantee must acquire a copy of the Secretary's part 40 procedural regulation, subpart D of the FTA's substantive regulation contains highlights of the procedural requirements. Further explanation of these requirements can be found in the section-by-section explanation of subpart D portion of this preamble.

G. Compliance as a Condition of FTA Financial Assistance (§ 653.19)

The statute requires FTA to establish a regulation for an anti-drug program for recipients of Federal financial assistance under section 3, 9 or 18 of the Federal Transit Act, as amended, or section 103(e)(4) of title 23, United States Code. The statute also states that a recipient shall not be eligible for such Federal financial assistance if the recipient fails to establish such a program in accordance with such regulations. Accordingly, continued FTA assistance is contingent upon compliance with this drug testing regulation (which includes compliance with 49 CFR part 40).

This section also states that any false misrepresentation or action to mislead FTA is a criminal violation under section 1001 of title 18 of the United States Code.

Paragraph (c) of this section describes the role of the States in this program. Since the State is the recipient in the case of section 18 funds (and may, in some cases, be such for small areas receiving section 9 assistance), it is a "recipient" for purposes of this program. States therefore must certify to FTA compliance with this regulation. However, in most if not all cases, this money is allocated to smaller entities which develop and administer programs consistent with FTA requirements. For purposes of this rule, FTA will require each State to certify compliance on behalf of its subrecipients who are subject to this rule. Each subrecipient must provide adequate assurances to its State so that the State can certify on its behalf.

A small entity will be subject to suspension of funding, through the State, if it is not possible for an appropriate certification to be made on its behalf, or if the FTA has reason to believe that the entity is not in compliance with the regulation in some other material way.

Subpart B—General Program Requirements

This subpart sets out the elements of the anti-drug program each employer must implement to be in compliance with this part.

There are four basic elements to the program: Developing and disseminating a policy statement; employee education and training; testing for five drugs under five different circumstances; and employee suspension, removal, or rehabilitation.

A. Policy Statement Contents (§ 653.23)

The proposed rule would require a policy statement, to be made available to every covered employee, incorporating the employer's position and information on virtually all aspects of the anti-drug testing program. In particular, the policy statement must articulate the employer's position on the following:

1. Specific categories of employees subject to testing.
2. Where to go to for information.
3. When and why an employee will be tested.
4. The consequences of failure to pass a drug test.
5. Program elements in addition to those required by FTA regulation.

The FTA expects each employer to articulate in the policy statement its response concerning a covered employee's failure to pass a drug test. This must include removal of the employee from his or her safety-sensitive position, evaluation of the covered employee, and possible referral for rehabilitation; it could include funding arrangements for rehabilitation (self-pay or employer-paid or some combination). The policy must indicate whether the employer would suspend or terminate a covered employee who has failed to pass a drug test, and the circumstances in which these actions would be taken.

The NPRM would not mandate employer-provided rehabilitation for a covered employee. Further, if the employer provides rehabilitation to a covered employee, the NPRM would not require that the employer pay for it. The NPRM would require a covered employee who fails to pass a drug test to be assessed by a substance abuse professional. During this assessment, the substance abuse professional must inform the covered employee of assistance that is available. While the agency encourages rehabilitation, whether there is mandatory rehabilitation, and who pays for rehabilitation, are decisions left at the local level.

This position on rehabilitation is consistent with congressional debate on the topic. In particular, in a colloquy between Senators Danforth and Hollings, the Senators make it clear that rehabilitation is not mandated by the legislation, nor does the legislation specify who should pay for treatment, whether wages must be paid during treatment, or whether there is a right of reinstatement. The colloquy confirms the proposed rule's position that such arrangements can be left to negotiation between the employer and employee. ("U.S. Cong. Rec.", S14770, October 16, 1991)

Concerning suspension and termination, the proposed rule iterates the statutory requirement but leaves to each employer the responsibility for developing and articulating the consequences of prohibited drug use as defined in the rule. The proposed rule specifies that anyone who fails to pass a drug test (regardless of where or when the substance was ingested) must be removed from his or her safety-sensitive position. This requirement must be included in the policy statement mandated under this section.

B. Education and Training Programs (§ 653.27)

The proposed rule would require that materials providing information about the health and safety consequences of drug use, a hotline telephone number, if available, and the employer's policy on drug use be provided to all covered employees. In addition, the proposed rule would require that employees receive training on personal health and safety issues related to drug use and behavioral cues that may indicate drug use. The purpose of this provision is to raise the consciousness of workers about

drug use and its detrimental effects on the workplace. One of the most effective tools an employer has in fighting drug use is the support and involvement of its employees. Education is the key to making this happen.

In addition to this general training for all covered employees, further training is required for supervisors making reasonable suspicion determinations, which result in drug testing. Paragraph (b)(2) of this section specifies that supervisors must receive 120 minutes of such training. Data available to the FTA indicate that the success rate of supervisors involved in making reasonable suspicion determinations could be significantly increased with more than 60 minutes of training, as required in the agency's previous drug testing rule. For this reason, the agency is proposing 120 minutes of training. However, the FTA has reduced the number of supervisors necessary to make reasonable suspicion referrals from two to one as a result of the industry's expressed concerns about the impracticability of the two supervisor requirement.

FTA is interested in determining if the proposed rule's training provisions provide enough training and if the provisions are consistent with current training efforts in the industry. For those employers who provide training, how much training do you provide? Is refresher training conducted periodically? Are drug and alcohol training activities combined, or are they separate? Are supervisors required to participate in substance abuse training beyond that provided to non-supervisory employees? Is any training provided on an optional basis? How much training is provided:

(1) To all personnel;

(2) To personnel making reasonable suspicion determinations.

C. Drug Testing (§ 653.29)

This section specifies the five drugs to be tested for, as required by the statute, in each employer's program and the different types of tests which must be conducted.

The five drugs are marijuana; cocaine; opiates; amphetamines; and phencyclidine. Required tests, which are the same as the agency required in its previous rule, are: Pre-employment (including transfer to a safety-sensitive position); post-accident; reasonable suspicion, random, and return to duty/followup. The statute specifically lists the first four types of testing, and indicates that the regulation may include "periodic recurring testing", which we have included in the proposed rule as return to duty testing. This type of testing includes the requirement for the employer to test randomly a returning covered employee who has failed to pass a drug test for up to sixty months, based on the recommendation of a substance abuse professional.

The agency is considering a minimum number of return to duty tests, administered randomly, for up to a 60 month period. This provision, if adopted, would require the employer to test the returning employee a minimum number of times—such as four or six—during the first 12 months, independent of any recommendation by the substance abuse professional. The agency seeks comment on this provision, including a minimum number of tests or length of time the covered employee would be mandated to be covered by follow-up testing.

D. Requirement for Specific Notice (§ 653.31)

This section has been added to the rule in response to a concern raised under existing drug programs, and provides that an employer must indicate, before a test is administered, that the urine specimen will be tested for the five prohibited drugs and under what authority the test is being administered, either this Federal regulation or some other basis.

E. Action When Employee Fails to Pass a Drug Test (§ 653.33)

This section states the specific requirement that any safety-sensitive employee who fails to pass or refuses to submit to a drug test must be removed from his or her safety-sensitive function as soon as the employer receives information from the MRO that the covered employee has failed to pass a drug test. In addition to being removed, the employer must ensure that the employee is assessed under the provisions of § 653.35.

This area is an example where there are additional responsibilities for FTA grantees that are marine employers. Consistent with current 46 CFR 16.201(c), an employer or prospective employer of an individual holding a license, certificate of registry or merchant mariner's document who fails to pass a drug test must report the test results in writing to the nearest Coast Guard Officer in Charge, Marine Inspection (OCMI). For further information see 46 CFR part 16

F. Information, Referral, Evaluation, and Treatment (§ 653.35)

Any safety-sensitive employee who fails to pass a drug test must be removed immediately from his or her safety-sensitive position. In addition, the covered employee must be notified of available educational material and organizations providing assistance on substance abuse, and must be assessed by a substance abuse professional. If the employer's policy so states, the covered employee may be required to undergo rehabilitation before returning to a safety-sensitive function.

The substance abuse professional determines when each covered employee who has failed to pass a drug test must be evaluated and which covered employees are ready to return to work.

Subpart C—Types of Drug Testing

A. Pre-Employment/Pre-Duty Testing (§ 653.41)

This section proposes that an employer may not hire an applicant for a safety-sensitive function, unless the applicant passes a drug test that has been administered consistent with the procedures of this regulation.

In addition, any employee who wishes to transfer to a safety-sensitive function from a non-safety-sensitive function is subject to this testing category. Such an employee would not have been subject previously to the drug testing procedures mandated by this part, and consequently must be tested before performing a safety-sensitive function.

For marine employers, 46 CFR 16.210(a) prohibits them from hiring or giving a commitment of employment to an individual unless the individual passes a drug test or meets a stated pre-employment exemption under 46 CFR 16.210(b). (Marine employers which are FTA grantees, however, may not take advantage of the Coast Guard exemption provision and still be in compliance with FTA program regulations in part 653.)

B. Reasonable Suspicion Testing (§ 653.43)

The second type of testing proposed by the NPRM is reasonable suspicion testing. This section proposes that an employer require a covered employee to be tested for prohibited drug use if the employer has a reasonable suspicion that the covered employee has used prohibited drugs. As the section states, the reasonable suspicion determination must be based on specific, contemporaneous, articulable observations concerning the appearance, behavior, or speech of the covered employee.

It is this determination for which the proposed rule would mandate 120 minutes of additional training for

supervisors who will be making reasonable suspicion referrals. Unlike the agency's previous anti-drug rule, however, the determination need be made by one supervisor, rather than two. The agency believes that additional training is the key to successful reasonable suspicion testing, not the number of supervisors involved.

The agency seeks information on the application of the reasonable suspicion determination. For example, how many persons are involved currently in making reasonable suspicion determinations? Do fellow workers participate in identifying someone who may be jeopardizing the safety of crew or passengers? If only one supervisor is allowed to make the determination, is corroboration of any kind required? What percentage of persons tested under the reasonable suspicion category fail to pass the drug test?

C. Post-Accident Testing (§ 653.45)

The NPRM proposes post-accident drug testing. An accident is defined as any transit accident involving a loss of human life or other serious bodily injury or significant property damage. (The agency has proposed a floor of $1,000 for property damage, in the context of the definition of accident. Please see the definitions section of the preamble for a more complete discussion of the proposed financial threshold.)

The FTA proposes drug testing of all safety-sensitive employees on duty in the vehicle at the time of the accident or involved in the vehicle's most recent maintenance or other safety-sensitive function preceding the vehicle being placed into revenue service. The Act specifically requires drug testing in the case of any accident involving the loss of human life. In other cases, the covered employee must be tested unless the employer determines that the employee's performance can be completely discounted as a contributing factor to the accident.

The proposed rule requires that the employer ensure that employees required to be tested are tested as soon as possible and within 32 hours of the accident. This is consistent with other DOT agency existing drug testing rules.

This section also requires that the employer consider departure from the scene of the accident as a refusal to submit to a test, unless the covered employee has a valid reason. The agency seeks comment on whether the rule should specify what a valid reason is. Clearly to seek medical attention is, and that is specifically cited in paragraph (d) of this section. However, the covered employee may not need medical attention, but he or she may need to leave the accident to call for help. There may be the risk of explosion or toxic fumes. Should the determination of validity be determined on a case-by-case basis, at the local level, or should the FTA regulation provide some definition of what would be appropriate?

The transit agency survey results, cited earlier in this preamble, indicate that there is a measurable safety problem associated with substance abuse. The survey requested information about major accidents and those with substance abuse as a contributing factor. However, only 50 percent of the transit agency survey respondents could provide such data. Eighteen percent of the respondents who were able to provide information on major accidents reported at least one accident where substance abuse was a contributing factor in 1990.

Almost all systems reporting a substance abuse-related accident conduct both pre-employment and reasonable suspicion testing, and have an above-average likelihood of testing under most other circumstances. However, almost 40 percent of responding transit agencies, are unable to determine whether an accident may be drug or alcohol related.

The FTA seeks the industry's experience with post-accident testing of employees where there has been a fatality, serious bodily injury or property damage.

The agency specifically solicits statistics or information about accidents, such as the average cost, those involving only vehicle damage, those involving damage to property other than the employer's, human injury, etc.

While not provided for in this FTA proposed rule, Coast Guard regulations for an accident resulting in the death of a covered employee trigger a requirement to test the corpse for chemical substances. The provision is found in Coast Guard regulations at 46 CFR 4.06–30.

D. Random Testing (§ 653.47)

The Act requires random drug testing. As in the past, the agency continues to believe that random testing constitutes a significant deterrent to prohibited drug use. A successful antidrug program is a combination of education, awareness and deterrence, which random testing provides.

As described at length in FTA's previous rulemaking on this subject, in random testing covered employees are placed in a pool and, by some identifying number or symbol other than name, are selected using a scientifically valid random selection method. The method used can be a computer model, or a random generation table could be used. Of critical importance, however, is the guarantee that covered employees are chosen in an unannounced and unpredictable manner. It is possible in random generation that one person is chosen two or three times over a period of time, while another person is not chosen at all. However, no covered employee should be removed from the pool merely because he or she has been selected for testing.

The rate at which random testing must be conducted is proposed at the 50 percent rate. A random rate means the percentage of the covered population which must be tested within a given time period (under this regulation, during each calendar year).

The FTA seeks comment on the rate of random drug testing to be conducted. The purpose of random testing is deterrence.

Today's proposed rule uses the 50 percent testing rate in use by the other DOT operating administrations, a rate which has resulted in lower positive rates of tested employees.

While this 50 percent rate has been successful and all operating administrations will continue to use it, the Department—in a separate advance notice of proposed rulemaking (ANPRM) published elsewhere in today's issue of the **Federal Register**—seeks data on other rates that may be appropriate to use, as well as other methodologies or techniques used in conjunction with random testing to enhance the deterrent effect of random testing.

The FTA is participating in and fully supports the Department-wide ANPRM, but we do not anticipate adequate data being available to us by the time we issue a final rule on which to base a decision to vary the random testing rate from the established rate in use by all other DOT operating administrations mandating testing. Persons with data are encouraged to submit comments to both this proposed rule docket and the DOT-wide ANPRM docket.

E. Return to Duty Testing and Follow-Up Testing (§ 653.49)

Once a covered employee fails to pass a drug test, he or she must be evaluated by a substance abuse professional (SAP) One role of the SAP is to evaluate the kind of treatment the covered employee should receive (which may be determined by the range of services made available by the employer), whether the covered employee has followed the recommendations for

action by the SAP, and when the employee is ready to come back to work. Before the covered employee may return to a safety-sensitive position, the covered employee must take and pass a return to duty drug test.

In addition, under the proposed rule, this covered employee would be subject to return to duty random testing for up to 60 months after his or her return to the safety-sensitive position. The amount of time that each employee is subject to follow-up testing may be different, depending on a determination made by the SAP, based on the individual's circumstances.

However, the regulation proposes that a minimum number of six follow-up tests in the first twelve months after returning to duty for any employee who has failed to pass a drug test under this part and who has since passed a return to duty test. This would limit the flexibility of the SAP, but would ensure that every covered employee who has returned to duty is subject to a minimum number of follow-up tests after returning to work. FTA seeks comment on this proposal.

This section is one of the few in which there is a substantive difference between Coast Guard and FTA regulations. FTA has determined that the Coast Guard provision, which requires evaluation by an MRO rather than a SAP, will satisfy the FTA requirement. For further information on the Coast Guard provision see 46 CFR 16.370(d) and part 5.

Subpart D—Drug Testing Procedures

This subpart contains drug testing procedures employers must use that will be detailed in full in a revised part 40. Once part 40 is amended to reflect the provisions of the Act, these sections will be removed from the FTA regulation.

A. Substance Abuse Professional (§ 653.61)

The substance abuse professional (SAP) discussed earlier in the context of return to duty testing, assesses the kinds of information materials, counseling or treatment the covered employee should receive and when the covered employee is capable of returning to his or her safety-sensitive function.

B. Split Sample Procedure (§ 653.63)

This section implements a provision of the Act requiring the employer to allow a covered employee to request a test of a subdivided portion (split) of his or her primary urine specimen, when the result of the test of the primary specimen is confirmed positive. Briefly, the urine specimen is divided at the time of collection, with a minimum specified amount of urine being used for the primary sample and the remainder being poured off to be saved as the split. In all cases, the chain of custody procedures are used for both the primary and the split samples.

Under the terms of this proposed rule, the split sample procedure would consist of three separate steps. First, the MRO would have to verify the test as positive. Second, the MRO would have to contact the employee and give the employee specific notice that the specimen was positive. And, finally, the covered employee would have to indicate in writing that he or she wishes the split sample to be tested.

This request for an analysis of the split would have to be submitted in writing within 72 hours of receiving actual notice from the MRO that the test was a verified positive. The split sample would then be transported to a different DHHS certified lab, which analyzes the split.

As proposed, the 72 hours would be computed as being 72 hours during scheduled work days. Thus, you would skip scheduled vacation time and weekends in the computation of the 72 hours.

The agency seeks comment on the 72-hour notice requirement. This time period is specified in the statute, but FTA is concerned that it does not allow adequate time for the employee to request a test of the split sample. For example, does this provide enough time for an employee to seek and get advice from someone qualified to provide advice? Does it give the employee adequate time to make an informed choice concerning the ramifications of such a test result? In commenting, please provide specific recommendations for a time period and provide reasons for the time period. Those grantees who already operate under other Department agency drug rules could provide comparisons with those drug rules' 60-day allowance for requesting a reanalysis (retest) of the specimen. For those entities providing such an option, what is the average amount of time taken for a request for reanalysis to be submitted? How many requests are submitted within 72 hours? How many take 60 days? Are the circumstances known which required the 60 days?

This section provides that a covered employee may be required to advance the cost of analyzing the split sample, including the cost of transporting the sample to the second lab. If the test result of the split sample is negative, the test is cancelled.

Who pays for the cost of the test if the split sample test result is negative is something that the agency assumes will be determined at the local level.

Subpart E—Administrative Requirements

A. Retention of Records (§ 653.71)

This section explains which records relating to the drug testing program must be retained and for how long.

There are three separate record retention periods—five, two, and one year, for different types of records. The proposed rule would require each employer to maintain for five years records of covered employees' positive drug test results, documentation of refusals to take a drug test, and covered employee referrals to the SAP.

Collection process and employee training documents would be retained for two years, while records of negative test results would be retained for one year. The section specifies these records in detail.

B. Reporting of Results in a Management Information System (§ 653.73)

The proposed reporting requirements are part of a Department-wide effort to standardize its reporting for drug and alcohol testing, by establishing a Management Information System (MIS). The data collected will cover drug testing information, including the types and numbers of employees covered, results and other data, to be used by FTA and DOT to identify trends and to assess the success or failure of the agency's regulatory program.

The data elements will provide a factual base for decisionmaking concerning modifications to our drug testing rule. Information about drug use prevalence, program implementation, and logistical impact will provide a basis for policy review, development, and change, in order to establish the most effective and efficient approach to drug use deterrence and detection. Issues such as scope of applicability, random test rates, rehabilitation, and testing protocols can be more effectively addressed when industry-wide data is available.

The data elements were selected as the minimum necessary to provide information on the scope of the program, drug use and prevalence, program implementation, employer policy and the deterrent effect of the rules over time.

The FTA seeks comment on a number of issues concerning the NPRM's basic data gathering approach. While the proposed rule would require information from all covered employers

the FTA seeks comment on the merits of seeking information only from a sample of covered employers. The DOT-wide preamble discusses this issue of sampling in greater detail. Or, is reporting an area in which special consideration could be given to very small or very rural operators?

FTA recognizes that any reporting requirement will impose burdens on employers. While these burdens have been analyzed in the regulatory evaluation, we specifically seek comment on ways to achieve the objectives of this requirement with a lesser burden.

Although there are no specific cost elements proposed for the MIS, an ongoing effort of the Department will be to analyze the cost of implementing these regulations. Many of the costs are easily identifiable, such as the charge a transit authority incurs for a laboratory test of a urine specimen. It may be difficult, however, to clearly identify some indirect costs, such as consequential costs of transportation delays caused by the collections. To the extent we might consider seeking cost information from covered transit authorities, are existing accounting systems set up to capture such costs in a manner that would be specific to anti-drug rule compliance? If they were, could we be assured that the different accounting standards that might be used would permit comparison of data from different employers?

Similar questions are raised with respect to benefits. For example, we can determine the specific number of covered employees who have tested positive and been removed from safety-sensitive positions. Although the removal of such covered employees would have safety benefits, will we be able to identify the direct consequences, such as a reduction in accidents? Will we be able to obtain data concerning the indirect benefits, such as improved productivity and decreased absenteeism?

Each report to be submitted would cover a calendar year. The closing date for data would be December 31 and the report would be due at FTA by February 15 of the following year. The transportation employer report would include each of the following data elements. The FTA seeks comments on whether any of these elements should be modified or deleted, or whether any other elements should be added.

1. Number of covered employees by employee category. These data are necessary to assess the scope of the rule's application and to provide a basis for determining if random testing meets the required level.

2. Number of covered employees subject to testing under the anti-drug rules of more than one DOT agency, identified by each agency.

3. Number of specimens collected by type of test (*e.g.*, pre-employment, periodic, random, etc.) and employee category. These data are needed to check the compliance with the rule by category and to review the collection, testing and MRO processes.

4. Number of positives verified by a Medical Review Officer (MRO) by type of test, by type of drug, and employee category. These data, along with the number of tests performed, permit the calculation of positive rates necessary to determine the extent of drug use and the specific drugs detected in the various categories of employees. Further, analysis of these data over time will provide a measure of the effectiveness of the drug testing rules in deterring drug use.

5. Number of negatives verified by an MRO by type of test, and employee category. These data are needed to check compliance with the rules by category and to review the application of the components of the program.

6. Number of persons denied a position as a covered employee following a verified drug test. These data provide an assessment of whether the testing program is being implemented as required, provide a measure of the impact of the drug testing rules on the transit industry, and yield information on the prevalence of drug use in the applicant pool.

7. Number of covered employees verified positive by an MRO, who were returned to duty in covered positions during the reporting period. These data provide information on employer policy implementation regarding return to duty requirements and rehabilitation of identified drug users.

8. Number of employees with tests verified positive by an MRO for multiple drugs. These data provide information on the extent of multiple drug use in the transit industry.

9. Number of covered employees who refused to submit to a drug test required under this part, and the action taken in response to the refusal(s). These data provide information on policy implementation regarding refusals, including subsequent ramifications.

10. Number of covered employees and supervisors who have received required training during the reporting period. These data provide information on training conducted during the current reporting period and a cumulative count of supervisory personnel on the payroll as of December 31 who have received the required drug training.

DOT has developed a standard form for use by employers to provide the data required by this regulation and the FTA-specific form is attached as appendix B to this proposed rule. In addition, FTA is considering authorizing electronic submission of the required report and specifically seeks comment on the desirability or feasibility of this.

We also seek comment on whether these information elements, or the form on which the data would be gathered, are sufficiently clear for use by employers, particularly small transit systems. If not, we encourage comments on ways to make the form and information elements easier to use.

Many small covered employers will participate in the drug testing program through consortia. We seek comment on the extent to which the use of consortia may mitigate any problems that smaller employers have in dealing with the reporting requirement.

FTA also seeks comment on an approach taken by other DOT agencies in their 1988 final rules regarding plan submissions. That is, all "large" employers (for other operating administrations this is based on a minimum number of employees of 15. For the FTA, a large employer would be one operating in an area with a population of 200,000 or more) would report additional data needed for program evaluation purposes during the first year. A staged or short-form type of reporting (including perhaps a sampling of smaller employers) would apply after the first year for "small" employers (for other operating administrations this is based on a maximum number of employees of 15. For the FTA, a small employer would be one operating in an area with a population less than 200,000). Again, comments are particularly invited on how such an approach could serve the Department program evaluation needs while providing data essential for enforcement purposes.

C. Availability and Disclosure of Information (§ 653.75)

This section would establish the boundaries for allowing information to be released about a covered employee's drug test results. As with the procedural aspects of the rule, we have made every effort to maximize the privacy of the individual employee. Accordingly, this section describes the circumstances under which an MRO could release information concerning an employee and the result of any test conducted under the auspices of this part.

D. Requirement to Certify Compliance (§ 653.77)

The proposed rule states that compliance is a condition of FTA funding and that each recipient must submit an annual certification affirming the establishment and implementation of a drug testing program consistent with the rule.

VI. Implementation Period

agency is considering different implementation periods for small and large entities, in recognition of the increased difficulties small operators may face in implementing their programs. In many cases, small operators will need to develop consortia or other sharing arrangements to implement the rule in a cost-effective manner.

Because of the time FTA recipients have had to prepare for this regulation, however, extended implementation periods should be unnecessary. Accordingly, we expect to require large operators to certify compliance with the final rule between three and six months from publication of the final rule and to require States and small operators to certify compliance within six months to one year of publication of the final rule. We seek comment on these proposed periods.

VII. Americans With Disabilities Act of 1990

Title I of the Americans With Disabilities Act of 1990 (ADA) prohibits discrimination on the basis of disability in employment. Employers may not discriminate against a "qualified individual with a disability" and must make "reasonable accommodation" to permit qualified individuals with disabilities to work. Under the ADA, a "qualified individual with a disability" does not include an employee or applicant who is "currently engaging in the illegal use of drugs." This exclusion from the protection of the ADA applies only to users of controlled substances, not to users of alcohol.

There are a number of things employers may do concerning drug and alcohol use without violating the ADA. They may prohibit the illegal use of drugs and the use of alcohol at the workplace (e.g., drinking on the job). They may require that employees not be under the influence of alcohol at the workplace. They may require employees to conform to the requirements of the Drug-Free Workplace Act. They may hold an employee who engages in the illegal use of drugs or who is an alcoholic to the same qualification standards as other employees, even if unsatisfactory performance relates to drug use or alcoholism (for example, if an employer has a policy of firing employees who are late five times in a month, the employer can fire such an employee even if the tardiness results from alcoholism). The employer may require employees to conform to the standards established in the FTA Alcohol Misuse Prevention Program Regulations.

The ADA specifically provides that entities subject to DOT jurisdiction are not prohibited from testing employees in, and applicants for, safety-sensitive positions "for the illegal use of drugs and for on-duty impairment by alcohol." These employers also do not violate the ADA if they remove persons from safety-sensitive positions whose alcohol test indicates a prohibited alcohol concentration.

Someone who currently is engaged in the illegal use of drugs (and an employee who fails a drug test falls into this category) is not a "qualified individual with a disability". This means that even if the individual is a drug addict (drug addiction being a disability), the employer has the discretion to fire him or her, and need not provide reasonable accommodation to the disability.

On the other hand, if the individual misuses alcohol, and the individual is an alcoholic (alcoholism being a disability), the individual remains a qualified individual with a disability, to whom the employer must provide reasonable accommodation. This may mean, for example, that the employer could be required to refrain from firing the individual pending the opportunity for rehabilitation. This situation exists only if the person has a disability (*i.e.*, is an alcoholic). Someone who tests at or above the prohibited level on the basis of some ill-timed casual drinking, but who is not an alcoholic, is not protected by the ADA, since such an individual does not have a disability.

VIII. Combined Rulemaking

The agency is considering combining the final FTA alcohol and drug testing regulations into one part in the Code of Federal Regulations. The advantage of having both requirements in one part is that the regulations could share common provisions. The disadvantage of having both requirements in one part is that the programs, in many essential ways, will be different, and combining them in one part may be confusing or difficult to understand. If the rules are not issued simultaneously, the integration would occur upon publication of the later-in-time final rule.

The agency seeks comments on the utility of combined provisions.

IX. Regulatory Process Matters

A. Executive Order 12291

The FTA has evaluated the industry costs and benefits of this drug testing rule, requiring that transit industry personnel performing safety-sensitive functions be covered by a program to prevent drug use in mass transit operations. The FTA has determined that this rulemaking is not a major rule under Executive order 12291 because the required anti-drug program is not likely to have costs of over $100 million in any one year.

The materials used in preparing the economic impact estimates for this preliminary regulatory evaluation are based on (1) Data on the mass transit industry included in the National Urban Mass Transportation Statistics Section 15 Annual Reports and other reports; (2) Data from the 1991 report entitled "Substance Abuse in the Transit Industry" prepared for the FTA by Booz, Allen & Hamilton, Inc.; (3) Data provided the National Institute on Drug Abuse (NIDA); and (4) Information gleaned from other agencies and individuals knowledgeable about drug testing in the United States. Many of the questions raised in today's preamble seek to verify and expand the information the agency currently has available to it. The preliminary regulatory impact analysis is available for public inspection in the public docket established for this rulemaking.

B. Departmental Significance

This rule is a "significant regulation" as defined by the Department's Regulatory Policies and Procedures, because it involves an important departmental policy and will probably generate a great deal of public interest. The purpose of this rule is to make mass transit systems safer by ensuring that safety-sensitive employees do not use prohibited substances.

C. Regulatory Flexibility Act

In accordance with 5 U.S.C. 603(a), the Federal Transit Administration has made a preliminary assessment of the possible effects of the rule on small business. To the extent possible, the agency recognized the differences between small and large entities, and made as many accommodations in the rule as possible. At this time, the agency cannot say whether there is a significant impact on a substantial number of small entities.

D. Paperwork Reduction Act

This rule includes information collection requirements subject to the Paperwork Reduction Act. A request for Paperwork Reduction Act approval will be submitted to the Office of Management and Budget in conjunction with this rule. Information collection requirements are not effective until Paperwork Reduction Act clearance has been received.

E. Executive Order 12612

This action has been reviewed under Executive Order 12612, on federalism, Although the Federal Transit Administration has determined that this action has significant federalism implications to warrant a federalism assessment, this rulemaking is mandated by Congress in the Omnibus Transportation Employee Testing Act of 1991.

Under the 1991 legislation, the Federal Transit Administration is to issue regulations requiring that recipients of funds under sections 3, 9, and 18 of the Federal Transit Act, as amended, and 103(e)(4) of title 23 of the United States Code, test their safety-sensitive employees for the use of certain prohibited substances in violation of law or Federal regulation.

Before passage of the Omnibus Transportation Employee Testing Act of 1991, safety issues were largely handled as a local matter. This Act clarifies the Federal role by including specific Federal pre-emption language. In the area of drug testing, Federal regulations take precedence over any local specification.

Although Congress has pre-empted inconsistent State or local law, the FTA has preserved the local role in mass transit safety. Testing programs created by virtue of a grantee's own authority are not disturbed by this regulation, so long as they do not impede compliance with the Federal program.

F. National Environmental Policy Act

The agency has determined that this regulation has no environmental implications. Its purpose is to regulate the behavior of those safety-sensitive employees who work in the transit industry and will have no appreciable effect on the quality of the environment.

G. Energy Impact Implications

This regulation does not affect the use of energy because it regulates the behavior of those safety-sensitive employees who work in the transit industry.

List of Subjects in Part 653

Drug testing, Grant programs—transportation, Mass transportation, Reporting and recordkeeping requirements, Safety, Transportation.

Accordingly, for the reasons cited above, the agency proposes to amend title 49 by deleting the suspended part 653 and adding a new part 653, as set forth below:

PART 653—PREVENTION OF PROHIBITED DRUG USE IN TRANSIT OPERATIONS

Subpart A—General

Sec.

653.1 Overview.
653.3 Purpose.
653.5 Applicability.
653.7 Definitions.
653.9 Determination of prohibited drugs.
653.11 Pre-emption of State and local laws.
653.13 Requirement to establish an anti-drug program.
653.15 Other requirements imposed by an employer.
653.17 Compliance with testing procedures requirements.
653.19 Compliance as a condition of FTA financial assistance.

Subpart B—General Program Requirements

653.21 Required elements of an anti-drug testing program.
653.23 Policy statement contents.
653.25 Requirement to disseminate policy and educational materials.
653.27 Education and training programs.
653.29 Drug testing.
653.31 Requirement for specific notice.
653.33 Action when employee fails to pass a drug test.
653.35 Information, referral, evaluation, and rehabilitation.

Subpart C—Types of Drug Testing

653.41 Pre-employment/pre-duty testing.
653.43 Reasonable suspicion testing.
653.45 Post-accident testing.
653.47 Random testing.
653.49 Return to duty testing and follow-up testing.

Subpart D— Drug Testing Procedures

653.61 Substance abuse professional.
653.63 Split sample procedure.

Subpart E—Administrative Requirements

653.71 Retention of records.
653.73 Reporting of results in a management information system.
653.75 Availability and disclosure of information.
653.77 Requirement to certify compliance.

Appendix A to Part 653—Certifications of compliance

Appendix B to Part 653—Drug and Alcohol Testing Management Information System Data Collection Form

Authority: Sec. 6, Public Law 102–143, 105 Stat. 917; 49 CFR 1.51.

Subpart A—General

§ 653.1 Overview.

(a) This part describes the drug testing requirements to be followed by recipients of funds under the Federal Transit Act, as amended. The part contains all substantive requirements concerning the types of drugs to be tested for, the types of tests to be conducted, and general legal and administrative ramifications of the program. The testing procedures for this program are contained in a Department-wide regulation in part 40 of this title.

(b) The part contains five subparts, with subpart A containing the general, overarching requirements for the FTA drug program. Subpart B specifies the basic requirements of each employer's drug program, including the types of tests to be conducted, the elements required to be in each employer's drug testing program, and options concerning rehabilitation. Subpart C discusses in detail the different types of drug tests which must be conducted. Subpart D discusses two new drug testing procedural requirements, mandated by the Act. Finally, subpart E contains administrative requirements, such as certification of compliance and the employer requirement to report to FTA, and the contents of these reports.

§ 653.3 Purpose.

This part requires a recipient of Federal Transit Administration financial assistance to have an anti-drug program that is designed to detect the use of prohibited drugs by safety-sensitive employees and to deter safety-sensitive employees from using prohibited drugs.

§ 653.5 Applicability.

(a) Except as specifically excluded in paragraph (b) of this section, this part applies to—

(1) Any recipient of Federal financial assistance under sections 3, 9, or 18 of the Federal Transit Act, as amended; and

(2) Any recipient of Federal financial assistance under section 103(e)(4) of title 23 of the United States Code.

(b) The specific commuter rail service operations of FTA recipients, if these services are subject to anti-drug regulations of the Federal Railroad Administration (FRA) (see § 219.3 of this title), are excluded from applicability of this part, except § 653.77. This section sets out the certification of compliance procedure. A recipient covered by paragraph (b) of this section will be deemed to meet the substantive requirements of this part if the certification states that specified operations comply with FRA

regulations. See appendix A to this part for specific certification language.

(c) An employer with safety-sensitive employees subject to the requirements of the Commercial Drivers License Program or other program administered by the Federal Highway Administration that could subject these employees to anti-drug regulations issued by the Federal Highway Administration shall cover these workers under the program specified in this part 653.

(d)(1) A grantee with marine vessel crew members is subject to chemical testing regulations issued by the U.S. Coast Guard and the drug testing program regulations specified in this part 653. Compliance with part 653 may generally be considered compliance with the comparable U.S. Coast Guard provisions in 46 CFR parts 4, 5, and 16.

(2) However, the Coast Guard regulations encompass sanctions and other ramifications for individual marine employees, whereas the FTA regulations apply to and have ramifications for grantees of Federal Transit Act funds. Accordingly, in the case of covered marine employees, there are additional provisions which apply to FTA recipients. The Coast Guard regulations are contained in 33 CFR part 95 and 46 CFR parts 4, 5, and 16.

(3) Nothing in this part prohibits the Coast Guard from directing chemical testing or obtaining test records, as provided for in Coast Guard regulations at 46 CFR parts 4 and 16 and 33 CFR part 95.

§ 653.7 Definitions.

As used in this part—

Accident means an occurrence associated with the operation of a revenue service vehicle, whether or not such vehicle is in revenue service, if—

(1) An individual dies or must be taken to a medical treatment facility;

(2) The occurrence results in total property damage at the accident site estimated at more than $1,000; or

(3) The occurrence must be reported to the Federal Highway Administration, the Federal Railroad Administration, or is a serious marine incident to the U.S. Coast Guard, under applicable regulations.

Administrator means the Administrator of the Federal Transit Administration or the Administrator's designee.

Anti-drug program means a program to prevent the use of prohibited drugs as required by this part.

Cancelled test means a test which has been declared invalid. It is neither a positive nor a negative test. This term includes a specimen which is rejected for testing by a laboratory.

Certification means the written affirmation by an FTA recipient, authorized by the organization's governing board or other authorizing official, that the recipient has complied with the provisions of this part. A valid certification is a condition of FTA funding and must meet the requirements of this part. (See § 653.77 for requirements on certification.)

Chain-of-custody procedures means the procedures in part 40 of this title concerning the handling of a urine sample.

Consortium means a group or association of transit operators, recipients, subrecipients, or contractors which provides drug testing as required by this part, and which acts on behalf of the employers.

Contractor means a person or organization who provides service to or works for the recipient or subrecipient, consistent with a specific understanding or arrangement. The understanding can be a written contract or an informal arrangement, which reflects an ongoing relationship between the parties.

Covered employee means a person who performs a safety-sensitive function and is (1) Directly employed by an employer or (2) Employed by or contracts with a person or organization that provides services to the employer under contract or other agreement. This definition includes applicants to perform these functions.

DOT means the United States Department of Transportation.

DOT agency means an agency (or "operating administration") of the United States Department of Transportation administering regulations requiring drug testing (see parts 199, 219, 382, and 653 of this title, 14 CFR part 121, appendix J, 33 CFR part 95, and 46 CFR parts 4 and 16).

Employer means an entity engaging one or more covered employees that is subject to DOT agency regulations specifying requirements for an anti-drug control program. As used in this part *employer* includes a large operator, a small operator, and any consortium or joint enterprise comprised of two or more employing entities requiring compliance with this part or part 40 of this title.

FTA means the Federal Transit Administration (formerly the Urban Mass Transportation Administration), an agency of the U.S. Department of Transportation.

Large operator means a recipient or subrecipient operating in an area of 200,000 or more in population.

Medical Review Officer (MRO) means a licensed physician responsible for receiving laboratory results generated by an employer's drug testing program who has knowledge of substance abuse disorders and has appropriate medical training to interpret and evaluate an individual's confirmed positive test result together with his or her medical history and any other relevant biomedical information.

Pass a drug test means that a medical review officer has determined, in accordance with part 40 of this title, that the results of a drug test administered under this part—

(1) Showed no evidence or insufficient evidence of a prohibited drug or drug metabolite; or

(2) Showed evidence of a prohibited drug or drug metabolite, but there was a legitimate explanation for the result;

Prohibited drug means a substance under section 102(6) of the Controlled Substances Act, 21 U.S.C. 802(6) and which the Administrator has listed in § 653.9 as being a risk to transportation safety.

Recipient means a grantee of Federal financial assistance of FT Act funds (including a State) under sections 3, 9, or 18, or under section 103(e)(4) of title 23 of the United States Code.

Refuse to submit means the nonproduction of a urine specimen as required by this part. Refusal can include an unsubstantiated inability to provide a specimen as well as a verbal declination or physical absence resulting in the inability to conduct the test.

Revenue service vehicle means a bus, van, car, rail car, locomotive, trolley car, trolley bus, vessel, or vehicle used on a fixed guideway or inclined plane used to transport passengers.

Safety-sensitive function means any duty related to the safe operation of mass transit service by an employer, including:

(1) Operating a revenue service vehicle, whether or not the vehicle is in revenue service;

(2) Controlling dispatch or movement of a revenue service vehicle;

(3) Maintaining a revenue service vehicle or equipment used in revenue service; or

(4) Directly supervising an employee who performs a function listed in paragraphs (1) through (3) of this definition.

Small operator means a recipient or subrecipient operating in an area of less than 200,000 in population.

Substance abuse professional (SAP) means a licensed physician, licensed or certified psychologist, social worker, or employee assistance professional with knowledge of and clinical experience in the diagnosis and treatment of drug-related disorders.

§ 653.9 Determination of prohibited drugs.

Consistent with the requirements of the Omnibus Transportation Employee Testing Act of 1991, the Administrator has determined that the following drugs are prohibited drugs, since they pose a risk to transportation safety: (a) Marijuana; (b) Cocaine; (c) Opiates; (d) Amphetamines; and (e) Phencyclidine.

§ 653.11 Pre-emption of State and local laws.

(a) Except as provided in paragraph (b) of this section, this part pre-empts any State or local law, rule, regulation, order, or standard to the extent that:

(1) Compliance with both the State or local requirement and any requirement in this part is not possible; or

(2) Compliance with the State or local requirement is an obstacle to the accomplishment and execution of any requirement in this part.

(b) This part shall not be construed to preempt provisions of State criminal law that impose sanctions for reckless conduct leading to actual loss of life, injury, or damage to property, whether the provisions apply specifically to transportation employees or employers or to the general public.

§ 653.13 Requirement to establish an anti-drug program.

Each employer shall establish an anti-drug program consistent with the requirements of this part. Consistent with § 653.77, each recipient shall certify to the FTA that it, its contractor, or subrecipient (whoever is providing mass transit services or portions of mass transit service with Federal Transit Act assistance) has established and implemented an anti-drug program as prescribed by this part.

§ 653.15 Other requirements imposed by an employer.

Except as expressly provided in this part, nothing in this part shall be construed to affect the authority of an employer, or the rights of employees, to negotiate or provide for additional or more stringent elements of an anti-drug program, so long as the program is not inconsistent with or frustrates the implementation of any provision of this part.

§ 653.17 Compliance with testing procedures requirements.

Each employer shall ensure that all drug testing conducted under this part complies with the procedures set forth in part 40 of this title. The drug testing provisions of part 40 of this title apply to employers covered by this part.

§ 653.19 Compliance a condition of FTA financial assistance.

(a) *General.* (1) Compliance with this part is a condition of Federal financial assistance under the Federal Transit Act, as amended, and section 103(e)(4) of title 23 of the United States Code. Failure to certify compliance with these requirements, as specified in § 653.77, will result in the suspension of a grantee's eligibility for Federal funding. In addition, if FTA knows, or receives knowledge of, a grantee's noncompliance with the provisions of this part (including a false certification), the grantee becomes ineligible for continued FTA assistance.

(2) As a general matter, in assessing whether or not a recipient is in compliance with this part, the Administrator may determine to act on an isolated instance of violation or on a pattern or practice of noncompliance, at the Administrator's discretion and based on the particular facts of the situation.

(b) *Criminal violation.* A recipient also is subject to criminal sanctions and fines for false statements or misrepresentations under § 1001 of title 18 of the United States Code (Crimes and Criminal Procedure).

(c) *State's role.* Each State shall certify compliance on behalf of its section 3, 9 or 18 subrecipients, as applicable, whose grant the State administers. In so certifying, the State shall use due diligence to ensure that each subrecipient is complying with the requirements of this part. A section 3, 9 or 18 subrecipient, through the administering State, is subject to suspension of funding from the State.

Subpart B—General Program Requirements

§ 653.21 Required elements of an anti-drug testing program.

At a minimum, an anti-drug program shall consist of the following:

(a) A policy statement describing the recipient's policy on prohibited drug use in the workplace, including the consequences associated with prohibited drug use. This policy statement shall include all of the elements specified in § 653.23. Each employer shall disseminate the policy consistent with the provisions of § 653.25.

(b) An education and training program which meets the requirements of § 653.27.

(c) A testing program, as generally described in § 653.29 and that meets the requirements of this part and part 40 of this title.

(d) Procedures for assessing the covered employee who fails to pass a drug test, providing information about services that are available to the covered employee and procedures for referral, dismissal and suspension, as described in § 653.35.

§ 653.23 Policy statement contents.

The policy statement made available to each covered employee shall include, at a minimum, detailed discussion of at least the following:

(a) The identity of the person designated by the employer to answer employee questions about the anti-drug program.

(b) The categories of employees who are subject to the provisions of this part.

(c) Specific information concerning covered employee behavior that is prohibited by this part.

(d) The specific circumstances under which a covered employee will be tested for prohibited drugs under the provisions of this part.

(e) The procedures that will be used to test for drugs, to protect the covered employee and the integrity of the process, to safeguard the validity of the test results, and to ensure that the results are attributed to the correct covered employee.

(f) The requirement that a covered employee submit to drug testing administered in accordance with this part.

(g) A description of the kind of behavior that constitutes a refusal to submit to a drug test and a statement that such a refusal constitutes a failure to pass a drug test.

(h) The consequences for a covered employee who fails to pass or refuses to submit to a drug test under this part, including the mandatory requirements that the covered employee be removed immediately from his or her safety-sensitive function and be evaluated by a substance abuse professional. Additional consequences may include termination of employment, suspension of employment, or other action deemed appropriate by the employer.

(i) If the employer implements elements of an anti-drug program that are in addition to this part (see § 653.15 and § 653.31), the employer shall give each covered employee specific information concerning which provisions are mandated by Federal regulation and which are not.

§ 653.25 Requirement to disseminate policy and educational materials.

Each employer shall provide to every covered employee educational materials that explain the requirements of this part and the employer's policies and procedures with respect to meeting these requirements. Each employer shall

provide written notice to every covered employee and to representatives of employee organizations of the availability of this information.

§ 653.27 Education and training programs.

Each employer shall establish an employee education and training program for all employees who perform safety-sensitive functions, which includes the following:

(a) *Education.* The education component shall include display and distribution of: informational material; a community service hot-line telephone number for employee assistance, if available; and the employer's policy regarding drug use in the workplace.

(b) *Training—(1) All safety-sensitive employees.* This component for safety-sensitive employees must include training on the effects and consequences of drug use on personal health, safety and the work environment, and the manifestations and behavioral cues that may indicate prohibited drug use.

(2) *Supervisors.* Supervisory employees shall receive at least 120 minutes of additional training in the physical, behavioral, and performance indicators of probable drug use if they will be determining when a covered employee is subject to drug testing based on reasonable suspicion under this part.

§ 653.29 Drug testing.

(a) Each employer shall establish a program which provides for drug testing in the following circumstances: Pre-employment, post-accident, reasonable suspicion, random, and return to duty/follow-up.

(b) When administering a drug test, each employer shall ensure that the following drugs are tested for: (1) Marijuana; (2) Cocaine; (3) Opiates; (4) Amphetamines; and (5) Phencyclidine.

(c) See subpart C of this part for details on these test types.

§ 653.31 Requirement for specific notice.

(a) Before performing a drug test, each employer shall provide specific notice to the covered employee:

(1) That the urine sample to be collected will be tested for evidence of the five prohibited drugs listed in § 653.29; and

(2) That the drug test is required by this part or is administered under the employer's own authority.

(b) No employer shall falsely represent that a test is administered under this part.

§ 653.33 Action when employee fails to pass a drug test.

(a) As soon as practicable after receiving notice from the MRO that an employee has failed to pass a drug test, or if an employee refuses to submit to a drug test, the employer shall require that a covered employee cease performing a safety-sensitive function.

(b) Before allowing the covered employee to resume performing a safety-sensitive function, the employer shall ensure that the covered employee meets the requirements of this part for returning to duty, including passing a return to duty drug test, as specified in § 653.49.

§ 653.35 Information, referral, evaluation, and rehabilitation.

(a) A covered employee who fails to pass a drug test under this part shall be advised by the employer of the resources available to the covered employee in evaluating and resolving problems associated with prohibited drug use, including the names, addresses, and telephone numbers of substance abuse professionals and counselling and treatment programs.

(b) The employer shall ensure that each covered employee who fails to pass a drug test or who refuses to take a drug test shall be evaluated by a substance abuse professional who shall determine whether the covered employee is in need of assistance in resolving problems associated with prohibited drug use.

(c) The employer, consistent with its adopted policy, may determine that, as the result of the failure to pass a drug test or refusal to take a drug test and an employee assessment by the SAP, to take action against the covered employee. Such action could be required rehabilitation, suspension or termination.

(d) The employer shall ensure that, before returning to duty to perform a safety-sensitive function, each covered employee has complied with the referral and evaluation provisions of this part and has passed a return to duty drug test under § 653.49.

(e) Evaluation and rehabilitation may be provided by the employer, by a health care provider under contract with the employer, or by a health care provider not affiliated with the employer.

Subpart C—Types of Drug Testing

§ 653.41 Pre-employment/pre-duty testing.

(a) An employer may not hire an individual to perform a safety-sensitive function unless the individual passes a drug test administered under this part.

(b) An employer may not transfer an employee who does not perform a safety-sensitive function to perform a safety-sensitive function until the employee passes a drug test administered under this part.

(c) If an applicant or employee drug test is cancelled, the employer shall require the employee or applicant to submit to and pass another drug test.

§ 653.43 Reasonable suspicion testing.

(a) An employer shall require a covered employee to submit to a drug test when the employer has reasonable suspicion to believe that the covered employee has used a prohibited drug.

(b) The employer's determination that reasonable suspicion exists to require the covered employee to undergo a drug test shall be based on specific, contemporaneous, articulable observations concerning the appearance, behavior, or speech of the covered employee. The required observations must be made by a supervisor who is trained in detecting the symptoms of drug use.

§ 653.45 Post-accident testing.

(a) If there is an accident which involves the loss of human life, each surviving covered employee present and on duty in the revenue service vehicle at the time of the accident and any covered employee involved in the most recent maintenance or other preparation of the vehicle before being placed into revenue service shall be tested for use of prohibited drugs.

(b) If there is no loss of human life, an employer shall test each surviving covered employee present and on duty in the vehicle at the time of the accident and any covered employee involved in the most recent maintenance or other preparation of the vehicle being placed into revenue service, unless the employer determines, using the best information available at the time of the decision, that the covered employee's performance can be discounted completely as a contributing factor to the accident.

(c) An employer shall ensure that a covered employee required to be tested under this section is tested as soon as practicable and within 32 hours of the accident. If a covered employee leaves the scene of the accident without a valid reason or cannot be located before submission to any test, the employer may treat this action as a refusal to submit to testing.

(d) Nothing in this section shall be construed to require the delay of necessary medical attention for injured people following an accident or to prohibit a covered employee from leaving the scene of an accident for the period necessary to obtain assistance in responding to the accident or to obtain necessary emergency medical care.

§ 653.47 Random testing.

(a) Each employer shall, at various times, randomly select covered employees for unannounced drug testing under procedures set forth in part 40 of this title. The selection of covered employees shall be made by a scientifically valid method, such as a random-number table or a computer-based random number generator that is matched with covered employees' Social Security numbers, payroll identification numbers, or other comparable identifying numbers.

(b) During each 12 months following the start of the antidrug program required by this part, the employer shall meet the following conditions:

(1) The dates for administering unannounced testing of randomly-selected covered employees shall be spread reasonably throughout the 12-month period; and

(2) The number of covered employees randomly selected for testing during the 12-month period shall be equal to an annual rate of at least 50 percent of the total number of covered employees subject to drug testing under this part.

(c) Each covered employee shall be in a pool from which random selection is made. Each covered employee in the pool shall have an equal chance of selection and shall remain in the pool, whether or not the covered employee is ever tested.

(d) (1) Each employer shall ensure that each covered employee who is not performing a safety-sensitive function at the time of notification of selection for random testing shall proceed to the collection site immediately.

(2) Each employer shall ensure that each covered employee, who is performing a safety-sensitive function at the time of notification of selection for random testing, shall cease performing the safety-sensitive function and proceed to the collection site as soon as practicable.

§ 653.49 Return to duty testing and follow-up testing.

(a) *General.* Each employer shall ensure that, before returning to duty to perform a safety-sensitive function, each covered employee who has refused to submit to a drug test or has failed to pass a drug test—

(1) Has been evaluated by a substance abuse professional to determine whether the covered employee has properly followed the recommendations for action by the substance abuse professional, including participation in any rehabilitation program, and is ready to return to duty to perform his or her safety-sensitive functions; and

(2) Has passed a return to duty drug test. If a covered employee drug test is cancelled, the employer shall require the employee to submit to and pass another drug test.

(b) *Marine employers.* Marine employers subject to U.S. Coast Guard chemical testing regulations shall ensure that each covered employee is evaluated by a Medical Review Officer.

(c) *Follow-up.* Each employer shall ensure that each covered employee who returns to duty after a required evaluation made under § 653.35 is subject to unannounced follow-up drug testing for up to 60 months. The substance abuse professional shall determine the frequency and duration for this testing, so long as a minimum of six tests are administered to the covered employee within the first twelve months of the employee's return to duty. Once the minimum number of follow-up tests have been administered, the substance abuse professional may determine that such testing is no longer needed. Such determination shall be in writing with a copy provided to the employer and the covered employee.

Subpart D—Drug Testing Procedures

§ 653.61 Substance abuse professional.

(a) Each employer's anti-drug program shall have available the services of a designated substance abuse professional.

(b) The substance abuse professional shall evaluate whether each covered employee who has refused to submit to a drug test or failed to pass a drug test is in need of assistance in resolving problems associated with prohibited drug use.

(c) The substance abuse professional shall evaluate whether each covered employee who has refused to submit to a drug test or failed to pass a drug test has properly followed the SAP's recommendations and whether the covered employee is ready to return to duty to perform his or her safety-sensitive functions.

(d) The substance abuse professional shall determine the number of months each covered employee will be subject to follow-up testing after returning to duty, consistent with § 653.49(b).

§ 653.63 Split sample procedure.

(a) The donor shall urinate into a collection container, which the collection site person, in the presence of the donor, after determining specimen temperature, pours into two specimen bottles. (In an emergency, such as a post-accident test in which a collection container and two specimen bottles are not available, the collection site person may direct the employee to provide the specimen in a primary container.) The amount exceeding 30 ml. is poured by the collection site person into a smaller split specimen container.

(b) The collection site person shall pour 30 ml. into a specimen bottle for the primary specimen.

(c) The collection site person shall pour the remaining amount of urine into another specimen bottle for the split specimen.

(d) Both bottles shall be shipped together to the laboratory, with copies one, two, and three of the chain of custody form.

(e) If the test result of the primary specimen is verified positive, the covered employee may request (in writing) that the MRO direct that the split specimen be tested in a different DHHS-certified laboratory for presence of the drug(s) for which a positive result was obtained in the test of the primary specimen. The MRO shall honor such a request if it is made within 72 hours of the employee having been notified of the verified positive test result.

(f) When the MRO informs the laboratory that the covered employee has requested such a test of the split sample, the laboratory shall forward the split specimen bottle, with seal intact, to a different DHHS-approved laboratory. Copy 3 of the chain of custody form shall be forwarded with an appropriate chain of custody entry.

(g) The result for the test of the split sample is transmitted by the second laboratory to the MRO without regard to the cutoff values of § 40.29 of this title.

(h) Removal from a safety-sensitive function mandated by this part is not stayed pending the result of the test of the split specimen.

(i) If the result of the test of the split specimen is negative the MRO shall cancel the test.

Subpart E—Administrative Requirements

§ 653.71 Retention of records.

(a) *General requirement.* Each employer shall maintain records of its anti-drug program as provided in this section. The records shall be maintained in a secure location with controlled access.

(b) *Period of retention.* In determining compliance with the retention period requirement, each record shall be maintained for the specified period of time, measured from the date of the document's or data's creation. Each employer shall maintain the records in accordance with the following schedule:

(1) *Five years:* Records of covered employee positive drug test results,

documentation of refusals to take required drug tests, and covered employee referrals to the SAP.

(2) *Two years:* Records related to the collection process and employee training.

(3) *One year:* Records of negative drug test results.

(c) *Types of records.* The following specific records must be maintained.

(1) Records related to the collection process:

(i) Collection logbooks, if used.

(ii) Documents relating to the random selection process.

(iii) Documents generated in connection with decisions to administer reasonable suspicion drug tests.

(iv) Documents generated in connection with decisions on post-accident testing.

(v) MRO documents verifying existence of a medical explanation of the inability of a covered employee to provide an adequate urine sample.

(2) Records related to test results:

(i) The employer's copy of the chain of custody form;

(ii) Documents related to the refusal of any covered employee to submit to a drug test required by this part.

(iii) Documents presented by a covered employee to dispute the result of a drug test administered under this part.

(3) Records related to other violations of this part.

(4) Records related to referral and return to duty and follow-up:

(i) Records pertaining to a determination by a substance abuse professional concerning a covered employee's need for referral or a determination concerning a covered employee's suitability to return to work as a covered employee.

(ii) Records concerning a covered employee's entry into and completion of the program of rehabilitation recommended by the substance abuse professional.

(5) Records related to employee training:

(i) Training materials on drug use awareness, including a copy of the employer's policy on prohibited drug use.

(ii) Documentation of compliance with the requirements of subpart B of this part.

(iii) Names of covered employees attending training on prohibited drug use and the dates and times of such training.

(iv) Documentation of training provided to supervisors for the purpose of qualifying the supervisors to make a determination concerning the need for drug testing based on reasonable suspicion.

(v) Certification that any training conducted under this part complies with the requirements for such training.

§ 653.73 Reporting of results in a management information system.

(a) Each employer shall submit to FTA's Office of Safety by February 15 a report covering the previous calendar year, which summarizes the results of its anti-drug program.

(b) Employers that are subject to more than one DOT agency drug regulation shall identify each covered employee covered by the regulations of more than one DOT agency. The identification shall be by the total number of such covered employees and categories of covered functions.

(c) The employer shall remain responsible for ensuring the accuracy and timeliness of each report submitted by the employer, consortium or joint enterprise, or by a third-party service provider acting on the employer's behalf.

(d) The report shall be submitted on the form specified by the FTA. Each report shall contain:

(1) Number of covered employees by employee category.

(2) Number of covered employees subject to testing under the anti-drug regulations of more than one DOT Agency, identified by each agency.

(3) Number of specimens collected by type of test (i.e., pre-employment, periodic, random, etc.) and employee category.

(4) Number of positives verified by a Medical Review Officer (MRO) by type of test, type of drug, and employee category.

(5) Number of negatives verified by a MRO by type of test and employee category.

(6) Number of persons denied a position as a covered employee following a verified drug test.

(7) Number of covered employees verified positive by a MRO who were returned to duty in covered positions during the reporting period.

(8) Number of employees with tests verified positive by a MRO for multiple drugs.

(9) Number of covered employees who refused to submit to a drug test required under this part, and the action taken in response to the refusal(s).

(10) Number of covered employees and supervisors who have received required training during the reporting period.

(e) The data shall be submitted on the form specified by the FTA.

§ 653.75 Availability and disclosure of information.

(a) Except as required by law, or expressly authorized or required in this section, no employer may release information pertaining to a covered employee that is contained in records required to be maintained by § 653.71.

(b) A covered employee is entitled, upon written request, to obtain copies of any records pertaining to the covered employee's use of prohibited drugs, including any records pertaining to his or her drug tests. The employer shall provide promptly the records requested by the employee. Access to a covered employee's records shall not be contingent upon payment for records other than those specifically requested.

(c) An employer shall permit access to all facilities utilized in complying with the requirements of this part to the Secretary of Transportation or any DOT agency with regulatory authority over the employer or any of its employees.

(d) An employer shall disclose data for its drug testing program and any other information pertaining to the employer's anti-drug program required to be maintained by this part, when requested by the Secretary of Transportation or any DOT agency with regulatory authority over the employer or covered employee.

(e) When requested by the National Transportation Safety Board as part of an accident investigation, employers shall disclose information related to the employer's administration of a drug test following the accident under investigation.

(f) Records shall be made available to a subsequent employer upon receipt of written request from the covered employee. Subsequent disclosure by the recipient is permitted only as expressly authorized by the terms of the covered employee's request.

(g) An employer may disclose information required to be maintained under this part pertaining to a covered employee to the employee or the decisionmaker in a lawsuit, grievance, or other proceeding initiated by or on behalf of the individual, and arising from the results of a drug test administered under this part (including, but not limited to, a worker's compensation, unemployment compensation, or other proceeding relating to a benefit sought by the covered employee.)

(h) An employer shall release information regarding a covered employee's record as directed by the specific, written consent of the employee authorizing release of the information to an identified person.

§ 653.77 Requirement to certify compliance.

(a) Each recipient of FTA financial assistance shall certify annually to the applicable FTA Regional Office compliance with the requirements of this part, including the training requirements. Large operators shall certify compliance initially by [3 months or 6 months from publication of the final rule]. Small operators and States shall certify compliance initially by [6 months or 12 months from publication of the final rule].

(b) Each certification must be authorized by the organization's governing board or other authorizing official. Each certification must be signed by a party specifically authorized to do so. Each certification must comply with the applicable sample certification provided in the appendix to this part.

Appendix A to Part 653—Certification of Compliance

This appendix contains two separate examples of certification language. The first example consists of the generally applicable certification language. Example II takes into account employers who are covered by the FRA's anti-drug regulation.

I.

(a) *For recipients who are large or small operators:*

I, (name), (title), certify that (name of recipient) and its contractors, as required, for (name of recipient), has established and implemented an anti-drug program in accordance with the terms of 49 CFR part 653. I further certify that the employee training conducted under this part meets the requirements of 49 CFR part 653.

(b) *For States certifying on behalf of its subrecipients and their contractors, as required, shall be as follows:*

I, (name, title) on behalf of (STATE) certify that, to the best of my knowledge and as the result of due diligence, the entities on the attached list of FT Act subrecipients operating in this State, have established and implemented anti-drug programs in accordance with the terms of 49 CFR part 653.

II.

The text of the certification of an employer that provides commuter rail transportation service regulated by the Federal Railroad Administration shall be as follows:

I, (name), (title), certify that (name of recipient) and its contractors, as required, for (name of recipient), has an anti-drug program that meets the requirements of the Federal Railroad Administration's regulations for employees regulated by the Federal Railroad Administration, and has established and implemented an anti-drug program in accordance with the terms of 49 CFR part 653 for all other covered employees who perform safety-sensitive functions.

BILLING CODE 4910-57-M

APPENDIX B TO PART 653 - DRUG AND ALCOHOL TESTING MIS DATA COLLECTION FORM

GENERAL INSTRUCTIONS

This reporting form includes three parts. Collectively, these parts address the data elements required in the Federal Transit Administration (FTA) and the U.S. Department of Transportation (DOT) drug and alcohol testing regulations. Each part of the form is preceded by instructions which outline and explain the information requested and indicate the probable sources for this information. The three parts of the form are:

Section	Instructions Pages	Reporting Form Pages
I. ORGANIZATIONAL INFORMATION	i-iii	1-2
II. DRUG TESTING INFORMATION	iii-vii	3-11
III. ALCOHOL TESTING INFORMATION	viii-xii	12-19

I. ORGANIZATIONAL INFORMATION

INSTRUCTIONS

This part of the reporting form includes two sections. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. EMPLOYER INFORMATION	i	1
B. COVERED EMPLOYEES	ii	2

Page 1 **EMPLOYER INFORMATION** (Section A) requires the name of the organization for which the report is done and a current address. Below this, information must be entered for the consortium used (if applicable). Finally, a signature and date are required certifying the correctness and completeness of the form. Note: A separate report must be completed by each FTA grantee for each of its contract

service and contract maintenance providers. States must report on behalf of each Section 18 grantee and their contractors.

Page 2

COVERED EMPLOYEES (Section B) requires a count for each employee category that must be tested under the FTA drug testing regulation. For the FTA this includes Revenue Vehicle Operation, Transportation Support, Revenue Vehicle Inspection and Maintenance, Vehicle Maintenance Support, Non-Vehicle Maintenance Support, and Supervisors. The most likely source for this information is the employer's personnel department. These counts should be based on the transit system's or contractor's records for the reported year. The **TOTAL** is a count of **all** covered employees for **all** categories combined, i.e., the sum of the columns.

Additional information must be completed if the employer has personnel who perform duties covered by the anti-drug rules of more than one DOT operating administration. **NUMBER OF EMPLOYEES COVERED BY MORE THAN ONE DOT OPERATING ADMINISTRATION**, requires that you identify the number of employees in each employee category under the appropriate additional DOT operating administration(s).

II. DRUG TESTING INFORMATION

INSTRUCTIONS

The following instructions are to be used as a guide for completing the drug testing information in the Federal Transit Administration (FTA) and the U.S. Department of Transportation (DOT) **Drug and Alcohol Testing Management Information System Data Collection Form**. These instructions outline and explain the information requested and indicate probable sources for this information. A sample testing results table with a narrative explanation is provided on pages iv-vi as an example to facilitate the process of completing the form correctly.

This part of the reporting form includes four sections. These sections address the data elements required in the regulations. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. JOB APPLICANT TESTING INFORMATION	iv	4
B. EMPLOYEE TESTING	vi	5-9
C. OTHER TESTING/PROGRAM INFORMATION	vii	10
D. TRAINING/EDUCATION	vii	11

Sections A and B are used to summarize the drug testing results for covered employees. There are six tables to be completed (one in Section A and five in Section B). The first table (Section A) is where you enter the data on pre-employment testing. The five tables in Section B are for entering drug testing data on periodic, random, post-accident, reasonable cause, and return to duty testing, respectively. Items necessary to complete these tables include:

1) the number of specimens collected in each employee category;
2) the number of specimens tested which were verified negative and verified positive for any drug(s); and
3) individual counts of those specimens which were verified positive for each of the five drugs.

Do not include results of quality control (QC) samples submitted to the testing laboratory in any of the tables.

A sample table with detailed instructions is provided for Section A, **JOB APPLICANT TESTING INFORMATION**. The format and explanations used for the sample table apply to all six of the tables in Sections A and B.

Information on actions taken with those persons testing positive is required at the end of both Sections A and B. Specific instructions for providing this latter information are given after the instructions for completing the tables in Sections A and B.

Page 4

JOB APPLICANT TESTING INFORMATION (Section A) requires information for pre-employment testing. All numbers entered into this table should be separated into the category of employment for which the applicant was applying. A sample table with example numbers is presented on page v.

Three types of information are necessary to complete the left side of this table. The first blank column with the heading "**NUMBER OF SPECIMENS COLLECTED**," requires a count for all collected specimens by employee category. It should not include refusals to test. The second blank column with the heading "**NUMBER OF SPECIMENS VERIFIED NEGATIVE**," requires a count for all completed tests by employee category that were verified negative by your Medical Review Officer (MRO).

The third blank column with the heading "**NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS**," refers to the number of specimens provided by job applicants that were verified positive. "Verified positive" means the results were verified by your MRO.

The right hand portion of this table, with the heading "**NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG**," requires counts of positive tests for each of the five drugs for which tests were done, i.e., marijuana (THC), cocaine, phencyclidine (PCP), opiates, and amphetamines. The number of specimens positive for each drug should be entered in the appropriate column for that drug type. Again, "verified positive" refers to test results verified by your MRO.

If an applicant tested positive for more than one drug; for example, both marijuana and cocaine, that person's positive results would be included once in each of the appropriate columns (marijuana and cocaine).

Each column in the table should be added and the answer entered in the row marked "**TOTAL**".

A sample table is provided on page v with example numbers.

Page 4

Below the table for pre-employment testing information is a box with the heading "**Number of persons denied a position as a covered employee following a verified positive drug test**". This is simply a count of those persons who were not placed in a covered position because they tested positive for one or more drugs.

SAMPLE APPLICANT TEST RESULTS TABLE

The following example is for Section A, **JOB APPLICANT TESTING INFORMATION**, which summarizes pre-employment testing results. The procedures detailed here also apply to the tables in Section B which require you to summarize testing results for employees. This example uses the categories "Revenue Vehicle Operation" and "Transportation Support" to illustrate the procedures for completing the form.

A — Urine specimens were collected for 157 job applicants for revenue vehicle operation positions during the reporting year. This information is entered in the first blank column of the table in the row marked "Revenue Vehicle Operation".

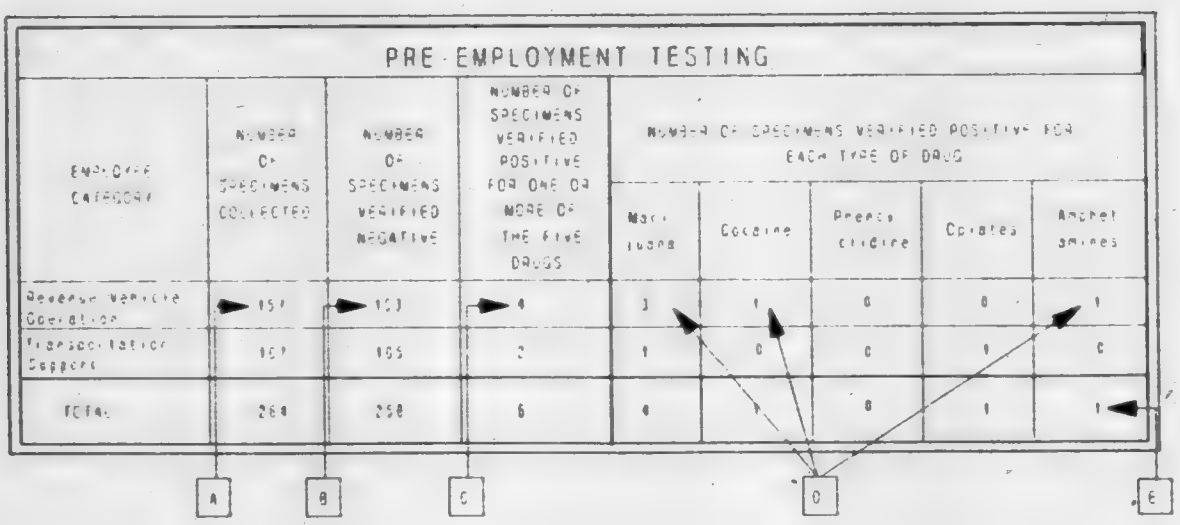
B — The Medical Review Officer (MRO) for the transit system or contractor reported that 153 of those 157 specimens from applicants for revenue vehicle operation positions were negative (i.e., no drugs were detected). Enter this information in the second blank column of the table in the row marked "Revenue Vehicle Operation".

C — The MRO for the transit system or contractor reported that 4 of those 157 specimens from applicants for revenue vehicle operation positions were positive (i.e., a drug or drugs were detected). Enter this information in the third blank column of the table in the row marked "Revenue Vehicle Operation".

D — With the 4 specimens that tested positive, the following drugs were detected:

Specimen	Drugs
#1	Marijuana
#2	Amphetamines
#3	Marijuana and Cocaine (Multi-drug specimen)
#4	Marijuana

Marijuana was detected in three (3) specimens, cocaine in one (1), and amphetamines in one (1). This information is entered in the columns on the right hand side of the table under each of these drugs. Two different drugs were detected in specimen #3 (multi-drug) so an entry is made in both the marijuana and the cocaine column for this specimen. Information on multi-drug specimens must also be entered in Section C, **OTHER TESTING/PROGRAM INFORMATION**, on page 10 of the reporting form.



Please note that the sample data collection form also has information for transportation support workers on line two. The same procedures outlined for revenue vehicle operators should be followed for entering the data on transportation support personnel. With applicants for transportation support positions, 107 specimens were collected resulting in 105 verified negatives and 2 verified positives -- 1 for marijuana and 1 for opiates. This information is entered in the row marked "Transportation Support".

E

The last row, marked "TOTAL", requires you to add the numbers in each of the columns. With this example, 157 specimens from applicants for revenue vehicle operation positions were collected and 107 for applicants for transportation support positions. The total for that column would be 264 (i.e., 157+107). The same procedure should be used for each column, i.e., add all the numbers in that column and place the answer in the last row.

Note that adding up the numbers for each type of drug in a row ("NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG") will not always match the number entered in the third column, "NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS". The total for the numbers on the right hand side of the table may differ from the number of specimens testing positive since some specimens may contain more than one drug.

Remember that the same procedures indicated above are to be used for completing all of the tables in Sections A and B.

Pages 5-9 **EMPLOYEE TESTING** (Section B), as indicated, requires information for company employees in **covered positions only**. A separate table must be completed for each category of test. These categories include: (1) periodic, (2) random, (3) post-accident, (4) reasonable cause, and (5) return to duty testing. These tables are to be filled out like the sample table above. Again, these numbers do not include refusals for testing.

Page 7 Following the table for post-accident test results, you must provide a count of accidents in which resulted in a positive drug test for any covered employee involved in the accident. This information should be available from the safety program manager or the drug program manager.

Page 9 Following these tables that summarize **EMPLOYEE TESTING**, you must provide counts for employees who have tested positive and are currently in, or have completed rehabilitation, and have returned to work in a covered position. Report this information only for employees who tested positive during this reporting period. This information should be available from the personnel office and/or drug program manager.

Page 10 **OTHER TESTING/PROGRAM INFORMATION** (Section C) requires that you complete a table dealing with specimens positive for more than one drug and a table dealing with employees who refused to submit to a drug test.

Page 10 **SPECIMENS VERIFIED POSITIVE FOR MORE THAN ONE DRUG** requires information on specimens that contained more than one drug. Indicate the **EMPLOYEE CATEGORY** and the **NUMBER OF VERIFIED POSITIVES**, then write the number of verified positives in the appropriate columns indicating the combination of drugs reported. For example, if marijuana and cocaine were detected in 3 revenue vehicle operator specimens, then you would write "Revenue Vehicle Operation" as the employee category, "3" as the number of verified positives, and "3" in the columns for "Marijuana" and "Cocaine". If marijuana and opiates were detected in 2 revenue vehicle operator specimens, then you would write "Revenue Vehicle Operation" as the employee category, "2" as the number of verified positives, and "2" in the columns for "Marijuana" and "Opiates".

Page 10 **EMPLOYEES WHO REFUSED TO SUBMIT TO A DRUG TEST** requires information on the **NUMBER OF COVERED EMPLOYEES** who refused to submit to a drug test required under this regulation, and a description of the **ACTION TAKEN** in response to the refusal. An example of an action taken would be "removed from covered duties pending termination".

Page 11 **TRAINING/EDUCATION** (Section D) requires information on the number of covered employees and supervisory personnel who have received the required drug training during the current reporting period.

READ BEFORE COMPLETING THE REMAINDER OF THIS FORM:

1. All items refer to the current reporting period only (for example, January 1, 1993 - December 31, 1993).

2. This report is only for testing REQUIRED BY THE FEDERAL TRANSIT ADMINISTRATION (FTA) AND THE U.S. DEPARTMENT OF TRANSPORTATION (DOT):

   - Results should be reported only for employees in COVERED POSITIONS as defined by the FTA drug testing regulation.

   - The information requested should only include testing for marijuana (THC), cocaine, phencyclidine (PCP), opiates, and amphetamines using the standard procedures required by DOT regulation 49 CFR Part 40.

3. Information on refusals for testing should only be reported in Section E ("OTHER TESTING INFORMATION"). Do not include refusals for testing in other sections of this report.

4. Do not include the results of any quality control (QC) samples submitted to the testing laboratory in any of the tables.

5. Complete all items; DO NOT LEAVE ANY ITEM BLANK. If the value for an item is zero (0), place a zero (0) on the form.

This part of the form requires information on VERIFIED POSITIVE and VERIFIED NEGATIVE drug tests. These are the results that are reported to you by your Medical Review Officer (MRO).

A. JOB APPLICANT TESTING INFORMATION

PRE-EMPLOYMENT TESTING									
EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
Revenue Vehicle Operation								
Transportation Support								
Revenue Vehicle Inspection and Maintenance								
Vehicle Maintenance Support								
Non-Vehicle Maintenance Support								
Supervisors

Supervisors								
TOTAL								

B. EMPLOYEE TESTING (continued)

RETURN TO DUTY TESTING								
EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
Revenue Vehicle Operation								
Transportation Support								
Revenue Vehicle Inspection and Maintenance								
Vehicle Maintenance Support								
Non-Vehicle Maintenance Support								
Supervisors								
TOTAL								

Number of employees, currently in or having completed rehabilitation or otherwise qualified to return to duty, who have returned to work in a covered position during this reporting period: [ ]

C. OTHER TESTING/PROGRAM INFORMATION

SPECIMENS VERIFIED POSITIVE FOR MORE THAN ONE DRUG						
EMPLOYEE CATEGORY	NUMBER OF VERIFIED POSITIVES	Mari-juana (THC)	Cocaine	Phency-clidine (PCP)	Opiates	Amphet-amines

EMPLOYEES WHO REFUSED TO SUBMIT TO A DRUG TEST	
NUMBER OF COVERED EMPLOYEES	ACTION TAKEN

D. TRAINING/EDUCATION

Training During Current Reporting Period

Number of covered employees who have received initial training on the consequences, manifestations, and behavioral cues of drug use as required by FTA drug testing regulations: [ ]

Number of supervisory personnel who have received initial training on the specific contemporaneous physical, behavioral, and performance indicators of probable drug use as required by FTA drug testing regulations: [ ]

Number of covered employees who have received recurrent or refresher training on the consequences, manifestations, and behavioral cues of drug use: [ ]

Number of supervisory personnel who have received recurrent or refresher training on the specific contemporaneous physical, behavioral, and performance indicators of probable drug use: [ ]

III. ALCOHOL TESTING INFORMATION

INSTRUCTIONS

The following instructions are to be used as a guide for completing the alcohol testing information for the Federal Transit Administration (FTA) and the U.S. Department of Transportation (DOT) **Drug and Alcohol Testing Management Information System Data Collection Form**. These instructions outline and explain the information requested and indicate probable sources for this information. A sample testing results table with a narrative explanation is provided on pages ix-xi as an example to facilitate the process of completing the form correctly.

This part of the reporting form includes four sections. These sections address the data elements required in the regulations. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. JOB APPLICANT TESTING INFORMATION	ix	13
B. EMPLOYEE TESTING	xi	14-18
C. OTHER TESTING/PROGRAM INFORMATION	xi	18-19
D. TRAINING/EDUCATION	xii	19

Sections A and B are used to summarize the alcohol testing results for covered employees. There are six tables to be completed (one in Section A and five in Section B). The first table (Section A) is where you enter the data on pre-employment/pre-duty testing. The five tables in Section B are for entering alcohol testing data for random, post-accident, reasonable suspicion, return to duty, and follow-up testing, respectively. Items necessary to complete these tables include:

1) the number of initial alcohol tests performed for each employee category;
2) the number of confirmatory alcohol tests performed for each employee category;
3) the number of confirmatory test results which were equal to or greater than 0.04; and
4) the number of confirmatory test results which were equal to or greater than 0.02, but less than 0.04.

A sample table with detailed instructions is provided for Section A, **JOB APPLICANT TESTING INFORMATION**. The format and explanations used for the sample table apply to all six of the tables in Sections A and B.

Information on actions taken with those persons whose alcohol test results were 0.04 or greater is required at the end of both Sections A and B. Specific instructions for providing this latter information are given after the instructions for completing the tables in Sections A and B.

Page 13 **JOB APPLICANT TESTING INFORMATION** (Section A) requires information for pre-employment/pre-duty testing. All numbers entered into this table should be separated into the category of employment for which the applicant was applying. A sample table with example numbers is presented on page x.

Four types of information are necessary to complete the left side of this table. The first blank column with the heading **"NUMBER OF INITIAL TESTS"** requires a count of all initial alcohol tests performed for each employee category. It should not include refusals to test. The second blank column with the heading **"NUMBER OF CONFIRMATORY TESTS"** requires a count of all confirmatory alcohol tests performed for each employee category.

The third blank column with the heading **"NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04"** requires a count for each employee category.

The fourth blank column with the heading **"NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02, BUT LESS THAN 0.04"** requires a count for each employee category.

Each column in the table should be added and the answer entered in the row marked **"TOTAL"**.

A sample table is provided on page x with example numbers.

Page 13 Below the table for pre-employment testing information is a box with the heading **"Number of persons denied a position as a covered employee following a pre-employment/pre-duty alcohol test indicating an alcohol concentration of 0.04 or greater"**. Enter the appropriate number in the box provided.

SAMPLE APPLICANT TEST RESULTS TABLE

The following example is for Section A, **JOB APPLICANT TESTING INFORMATION**, which summarizes pre-employment/pre-duty testing results. The procedures detailed here also apply to the tables in Section B which require you to summarize testing results for employees. This example uses the categories "Revenue Vehicle Operation" and "Transportation Support" to illustrate the procedures for completing the form.

A Initial tests were performed on 157 job applicants for revenue vehicle operator positions during the reporting year. This information is entered in the first blank column of the table in the row marked "Revenue Vehicle Operation".

B Confirmatory tests were necessary for 6 of the 157 applicants for revenue vehicle operator positions. Enter this information in the second blank column of the table in the row marked "Revenue Vehicle Operation". The confirmatory test results for these 6 applicants were the following:

Applicant	Confirmation Result
#1	0.06
#2	0.01
#3	0.11
#4	0.04
#5	0.03
#6	0.02

C The confirmatory test results for 3 of the applicants for revenue vehicle operator positions were equal to or greater than 0.04. Enter this information in the third blank column of the table in the row marked "Revenue Vehicle Operation".

D The confirmatory test results for 2 of the applicants for revenue vehicle operator positions were equal to or greater than 0.02, but less than 0.04. Enter this information in the fourth blank column of the table in the row marked "Revenue Vehicle Operation".

E The last row, marked "TOTAL", requires you to add the numbers in each of the columns. With this example, 157 applicants for revenue vehicle operator positions and 107 applicants for transportation support positions were subjected to initial tests. The total for that column would be 264 (i.e., 157+107). The same procedure should be used for each column. (i.e., add all the numbers in that column and place the answer in the last row).

Please note that the sample data collection form also has information for transportation support workers on line two. The same procedures outlined for revenue vehicle operators should be followed for entering the data on transportation support workers. With applicants for transportation support positions, 107 initial tests were conducted resulting in 3 confirmatory tests. The confirmatory test result for 1 of the transportation support applicants was equal to or greater than 0.04; no results were equal to or greater than 0.02, but less than 0.04. This information is entered in the row marked "Transportation Support".

PRE-EMPLOYMENT/PRE-DUTY TESTING

EMPLOYEE CATEGORY	NUMBER OF INITIAL TESTS	NUMBER OF CONFIRMATORY TESTS	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02 BUT LESS THAN 0.04
Revenue Vehicle Operation	157	5	3	2
Transportation Support	107	3	1	0
TOTAL	264	8	4	2

A B C D E

X

Note that adding up the numbers for confirmation results in columns three and four will not always match the number entered in the second column, "NUMBER OF CONFIRMATORY TESTS". These numbers may differ since some confirmatory test results may be less than 0.02.

Remember that the same procedures indicated above are to be used for completing all of the tables in Sections A and B.

Pages 14-18 **EMPLOYEE TESTING** (Section B), as indicated, requires information for company employees in **covered positions** only. A separate table must be completed for each category of test. These categories include: (1) random, (2) post-accident, (3) reasonable suspicion, (4) return to duty, and (5) follow-up testing. These tables are to be filled out like the sample table above. Again, these numbers **do not** include refusals for testing.

Page 15 Following the table for post-accident testing results, you must provide a count of accidents in which any covered employee who was involved had a confirmatory alcohol test result of 0.04 or greater. This information should be available from the safety program manager or the alcohol program manager.

Page 17 Following the table that summarizes results for return to duty testing, you must provide a count of the **"Number of employees with a confirmatory alcohol test indicating an alcohol concentration of 0.04 or greater who were returned to duty in a covered position (having complied with the recommendations of a substance abuse professional as described in FTA regulations)"**. Report this information only for employees who were tested during this reporting period. This information should be available from the personnel office and/or alcohol program manager.

Pages 18-19 **OTHER TESTING/PROGRAM INFORMATION** (Section C) requires that you provide information on employees who tested positive for drugs and alcohol (at the same time), information on violations of other alcohol provisions (not necessarily resulting in positive alcohol tests), and information on employees who refused to submit to an alcohol test.

Page 18 **Number of employees administered drug and alcohol tests at the same time resulting in a verified positive drug test and an alcohol test indicating an alcohol concentration of 0.04 or greater**, requires that a count of all such employees be entered in the indicated box.

Page 19 **VIOLATIONS OF OTHER ALCOHOL PROVISIONS/PROHIBITIONS OF THIS REGULATION**, requires information on the **NUMBER OF COVERED EMPLOYEES** committing such a violation, a description of the **VIOLATION** committed (e.g., pre-duty alcohol use, on duty alcohol use, on duty alcohol possession), and a description of the **ACTION TAKEN** in response to the violation.

Page 19 **EMPLOYEES WHO REFUSED TO SUBMIT TO AN ALCOHOL TEST** requires information on the **NUMBER OF COVERED EMPLOYEES** who refused to submit to an alcohol test as required under this regulation, and a description of the **ACTION TAKEN** in response to the refusal.

Page 19 **TRAINING/EDUCATION** (Section D) requires information on the number of supervisory personnel who have received the required alcohol training during the current reporting period.

READ BEFORE COMPLETING THE REMAINDER OF THIS FORM:

1. All items refer to the current reporting period only (for example, January 1, 1993 - December 31, 1993).

2. This report is only for testing REQUIRED BY THE FEDERAL TRANSIT ADMINISTRATION (FTA) AND THE U.S. DEPARTMENT OF TRANSPORTATION (DOT):

   - Results should be reported only for employees in COVERED POSITIONS as defined by FTA alcohol testing regulations.
   - The information requested should only include testing for alcohol using the standard procedures required by DOT regulation 49 CFR Part 40.

3. Information on refusals for testing should only be reported in Section C ("OTHER TESTING/PROGRAM INFORMATION"). Do not include refusals for testing in other sections of this part of the report.

4. Complete all items; DO NOT LEAVE ANY ITEM BLANK. If the value for an item is zero (0), place a zero (0) on the form.

A. JOB APPLICANT TESTING INFORMATION

PRE-EMPLOYMENT/PRE-DUTY TESTING				
EMPLOYEE CATEGORY	NUMBER OF INITIAL TESTS	NUMBER OF CONFIRMATORY TESTS	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02, BUT LESS THAN 0.04

Department of Transportation

Research and Special Programs Administration

49 CFR Part 199

Drug and Alcohol Testing Programs; Proposed Rules

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Part 199

[Docket No. PS–128; Notice No. 1]

RIN 2137–AC21

Alcohol Misuse Prevention Program

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule sets forth regulations to require operators of gas, hazardous liquid and carbon dioxide pipelines and liquefied natural gas (LNG) facilities who are subject to RSPA regulations to implement an alcohol misuse prevention program for employees who perform certain safety-sensitive functions covered by the pipeline safety regulations. The proposed rule is consistent with proposed DOT regulations and the other operating administration alcohol rules.

The proposed rule would require pre-employment/pre-duty, random, reasonable suspicion, post-accident, return-to-duty, and follow-up testing to detect and deter such conduct. As required by this rule, operators would have to remove employees who engaged in prohibited conduct from safety-sensitive functions until certain requirements had been met. Additionally, operators would be required to provide employees with written materials that specifically identify the employees covered by the rule, explain the requirements of this rule, and establish the consequences of engaging in prohibited conduct. Finally, employers would be required to maintain records concerning this program and to report data regarding employee alcohol misuse to RSPA in an annual report. When finalized this rule should increase the overall safety of pipeline operations.

DATES: Comments should be received by April 14, 1993. Late-filed comments will be considered to the extent practicable. Comments on the Secretary's notices appearing elsewhere in today's **Federal Register** should be submitted as directed by that notice. Parties commenting on the testing procedures are requested to file their comments with both the Department of Transportation's (DOT) Docket in that rulemaking and with RSPA's Docket in this rulemaking. RSPA requests that commenters highlight any pipeline industry-specific issues regarding the testing procedures. Commenters should be aware that it is DOT's intention that testing procedures apply to any alcohol testing conducted under regulations issued by the Department's Operating Administrations (OAs).

ADDRESSES: Send comments on this notice in duplicate to the Dockets Unit, room 8421, Research and Special Programs Administration, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590. Identify the docket and notice numbers stated in the heading of this notice. All comments and other docketed material will be available for inspection and copying in room 8421 between the hours of 8:30 a.m. and 5 p.m. each working day.

FOR FURTHER INFORMATION CONTACT: Mr. Richard L. Rippert, Office of Pipeline Safety Enforcement, RSPA, DOT, 400 Seventh Street, SW., Washington, DC 20590 (202 366–6223).

SUPPLEMENTARY INFORMATION:

Background

The misuse of drugs and alcohol by individuals performing safety-sensitive pipeline functions has long been of concern to RSPA and to DOT. RSPA has promulgated drug testing regulations addressing part of this concern. DOT, seeking to determine the extent of any alcohol problem in the transportation industries, issued an advance notice of proposed rulemaking (ANPRM) on November 2, 1989. The ANPRM asked for comment on a variety of issues related to preventing alcohol misuse by transportation workers. The comments to this ANPRM are discussed in detail in the general preamble published by the DOT Secretary's Office elsewhere in today's issue of the **Federal Register**.

The Omnibus Transportation Employee Testing Act of 1991 requires the Secretary of Transportation to issue regulations mandating alcohol testing for highway, aviation, mass transit and rail employees regulated by the Federal Highway Administration (FHWA), Federal Aviation Administration (FAA), Federal Transit Administration (FTA) (formerly Urban Mass Transportation Administration), and Federal Railroad Administration (FRA) respectively. RSPA is today proposing alcohol testing rules under its own existing statutory authority to ensure application of DOT's drug and alcohol testing regulations to all safety-sensitive employees in the transportation industry. This Notice of Proposed Rulemaking (NPRM) is consistent with the NPRMs of other OAs, with such alterations as necessary to meet the special circumstances of the pipeline industry.

On November 21, 1988 (53 FR 47084), RSPA published a final rule setting forth regulations requiring pipeline operators subject to part 192 (natural gas), 193 (liquefied natural gas), or 195 (hazardous liquids, including carbon dioxide) to implement an anti-drug program for employees who perform operation, maintenance, or emergency-response functions on a pipeline or at an LNG facility. However, the anti-drug rules do not apply to operators of "master meter systems" defined in § 191.3. On December 18, 1989 (54 FR 51842) RSPA published a final rule which addressed petitions submitted for reconsideration. Drug testing, under part 199, became effective on April 20, 1990, for large operators and August 21, 1990, for small operators. Many aspects of the proposed alcohol misuse prevention program would mirror those of the anti-drug program, including covered employers, covered employees, and the use of phased-in implementation.

Comments to the DOT ANPRM

As noted above, in late 1989, DOT issued an ANPRM in which it asked a number of questions about regulating alcohol use in the various transportation industries. Of the 23 commenters representing pipeline related interests, nine believed that limited alcohol testing should be instituted in the pipeline context. Several commenters indicated that while drugs are a societal problem, alcohol abuse is the most abused substance in the pipeline industry. Others indicated that alcoholism is usually found as a cohabitant in substance abuse whenever drug abuse is detected and treated. In many cases, they indicated that alcohol abuse leads to drug abuse. One commenter indicated that its employee assistance program reported that among substance abusers, there were approximately four times as many individuals counseled for alcohol abuse as there were for drug abuse. The other 14 commenters believed that RSPA's current regulatory scheme for drug testing was sufficient to address any problem that might exist, although most commenters also felt that there was no indication that such a problem did, in fact, exist. Several commenters noted their long-standing alcohol testing programs have been successful without governmental regulation. Those few commenters who believed that further action by RSPA would be appropriate favored a combination of alcohol education and training and enforcement of the drug regulations already in place.

Statutory Authority

The two primary statutes under which RSPA administers the pipeline safety program are the Natural Gas Pipeline

Safety Act of 1968, as amended (49 App. U.S.C. 1671 *et seq.*) and the Hazardous Liquid Pipeline Safety Act of 1979, as amended (49 App. U.S.C. 2001 *et seq.*). RSPA also regulates operators of offshore gas gathering lines under the Hazardous Materials Transportation Act (49 App. U.S.C. 1801 *et seq.*).

Authority to implement alcohol education, awareness, and testing programs is derived from the broad authority granted in the above-cited statutes. This authority is applicable to various aspects of pipeline facilities affecting pipeline safety, including design, installation, inspection, emergency plans and procedures, testing, construction, extension, operation, replacement, and maintenance of pipeline facilities. [49 App. U.S.C. 1672 and 2002.] Under this authority, RSPA can set qualifications, such as experience and training, for pipeline personnel. This authority extends to allow RSPA to mandate certification programs for such personnel. [49 App. U.S.C. 1672(a)(1) and 2002(c).]

In *International Brotherhood of Electrical Workers, Local 1245, et al. v. Skinner*, 913 F.2d 1454 (9th Cir. 1990), the Court upheld RSPA's drug testing rules even though there was no evidence of a particularized drug program in the pipeline industry. The Court also concluded, based upon an analysis of the statutory guidelines for issuance of regulations, that the rules were not arbitrary or capricious.

Alcohol Misuse Prevention Program

Section-by-Section Analysis

Applicability

The RSPA proposed rule contains a section specifically describing the applicability of the rule for various operators under the Pipeline Safety Regulations. This is necessary for clarity, since many RSPA operators have portions of their operations regulated by other operating administrations within the Department.

Definitions

The proposed definitions of accident, Administrator, covered employee, employer, safety-sensitive function and State agency are consistent with the definitions used in the anti-drug program.

Preemption of State and Local Laws

The proposed rule would include the test for preemption of State or local pipeline safety standards under the Natural Gas Pipeline Safety Act and the Hazardous Liquid Pipeline Safety Act. Clear expression of the preemptive effect intended by this Federal safety rule is important to preserve the careful balances (private versus public rights, benefits versus costs) which are achieved in the rule. Constitutional limitations on State and local inconsistent regulation preserve these balances. Therefore, the proposed rule also includes the two-pronged test derived from judicial decisions on preemption of inconsistent State and local regulation under the Constitution.

As proposed, State and local requirements are preempted when: (1) It is not possible to comply with both the Federal and the State or local requirements, (2) Compliance with the State or local government requirement would frustrate the Federal requirement, or (3) The State or local requirement is a pipeline safety standard applicable to interstate pipeline facilities.

Employers Who Would Be Required To Establish Programs

During the development and implementation of RSPA's industry anti-drug program, RSPA carefully considered the appropriate scope of the rule. This NPRM proposes to include essentially the same classes of employers and covered functions as are covered by the anti-drug rule. Operators of gas, hazardous liquid and carbon dioxide pipelines and liquefied natural gas facilities, who are subject to 49 CFR part 192, 193, or 195, are required to implement an alcohol misuse prevention program for covered employees who perform certain safety-sensitive functions covered by the pipeline safety regulations.

RSPA has been carefully evaluating the scope of covered functions since implementation of the anti-drug rule in 1990 and believes that the scope remains appropriate and should be proposed for this rule. At this point we are not persuaded that the increased benefit to safety that would accrue by including other functions warrants the imposition of an alcohol testing requirement on individuals performing those functions. However, RSPA is soliciting comment on this issue, with specific focus on the following questions:

1. Are there covered functions the performance of which appears to sufficiently implicate safety to warrant regulating alcohol-related conduct and imposition of a testing requirement?
2. Do pipeline operators have any data on the size of the population that would be affected and the incidence of alcohol misuse by this population?
3. What additional costs would be incurred by inclusion of other functions and what would be the offsetting benefits (*e.g.*, in terms of accident prevention, productivity, employee lost time, etc.)?
4. Does the industry or public have any information on alcohol-related accidents?
5. Are there other ways that RSPA could reduce the burden on small operators?

Regulating Employers Rather Than Employees

RSPA's authority to enforce pipeline safety regulations is directed at the employer and not to the employees. The proposed rules requires employers to develop a program and implement that program in compliance with these regulations. In each case, it is the employer's responsibility and in some cases this means having responsibility for the actions of its safety-sensitive employees and its contractors.

Reasonable Suspicion

RSPA is proposing that a supervisor who makes the determination that reasonable suspicion exists to test a covered employee shall not conduct the breath alcohol test on that employee, if another supervisor is readily available. The purpose of this provision is to protect a covered employee from being unfairly targeted by a supervisor. However, RSPA recognizes that in the pipeline industry situations may occur, particularly in remote areas, where another supervisor is not readily available. In such a situation the supervisor who made the determination, could conduct the alcohol test.

Alcohol Testing Programs

RSPA proposes to include a requirement that employers maintain and follow a written alcohol misuse prevention plan. This process proved beneficial in assisting the industry in establishing programs and educating the industry about the requirements of the drug rule. RSPA will not require employers to submit their alcohol misuse prevention plans for review and approval. However, RSPA is considering development of a drug and alcohol "model" plan. The model plan could be used by employers and contractors that provide services to employers subject to the regulations. RSPA seeks specific comments on whether a model drug and alcohol plan would be beneficial to employers to standardize the requirements of the rules and assist in compliance issues.

Recordkeeping, Reporting, and Confidentiality.

This rule would require employers to maintain detailed records related to

their alcohol misuse prevention programs, including records of alcohol tests performed under this rule. The records would have to be maintained in a secure location and could be released only as required under the rule or with the express written consent of the employee. As proposed in this NPRM, an employee would have the right to receive records pertaining to his or her use of alcohol. The employer would be required to provide the records promptly. In response to concerns raised in the context of drug testing, the rule would prohibit making access to the records contingent on paying for records other than those specifically requested by the employee. RSPA has not addressed payment for those records that are requested by the employee, and believes that this would be an issue that would be determined between the employer and its employees. The rule would also provide for release of all records (including individual alcohol test results) to RSPA or other DOT agency with regulatory authority over the employer or its covered employees, and to the decisionmaker in a lawsuit, grievance, or other proceeding in an action initiated by or on behalf of an individual and arising from the individual's alcohol test or other alcohol misuse.

RSPA is aware that some employers have hesitated to release information related to drug test results to subsequent employers. Under the anti-drug rule, such releases are based on the general permissive authority given to employers to release information upon the written consent of the covered employee. This rule would require the release of employee-specific information to a subsequent employer if the original employer receives a written request from the covered employee. RSPA believes that providing a regulatory mandate for such release and removal of employer discretion would relieve employers' concerns about possible litigation.

The rule would also require operators to provide RSPA access to their facilities to conduct on-site inspections of employer's alcohol programs, including the alcohol testing process. RSPA's experience with compliance monitoring under the anti-drug rule has indicated that the individuals managing employers' programs are frequently persons with human resources or administration backgrounds. These people often have had no experience with other RSPA inspections (*e.g.*, risk-based inspections) and are often unaware of RSPA's authority to conduct such inspections. While the Administrator or his designee has such authority even absent a regulatory provision, RSPA determined that inclusion of such a provision in this rule would be appropriate to ensure industry awareness of RSPA's authority to monitor compliance.

Finally, RSPA believes that reporting of statistical information by employers is an essential tool for monitoring compliance with the rule. RSPA's experience with reports indicates that annual reporting is sufficient to ensure that RSPA can adequately monitor the rule. This NPRM therefore proposes submission of annual statistical data on each operator's drug and alcohol testing program. The drug and alcohol report format is contained in RSPA's Management information system, Notice of proposed rulemaking published elsewhere in today's **Federal Register.**

Contractor Compliance

RSPA believes that contractor employees should be included in the group of employees that must undergo alcohol misuse testing. Although these persons may not be under the direct control of operators, their job performance is no less critical than the performance of employees who work directly for operators. RSPA has limited the employees covered by the alcohol misuse rule to those who perform regulated operation, maintenance, or emergency-response functions, on the pipeline or LNG facility and perform regulated functions under part 192, 193, or 195, which should minimize the effects of the rule on operators who contract for unskilled transient laborers.

Regulatory Analyses and Notices

E.O. 12291 and DOT Regulatory Policies and Procedures

The proposed rule is not major under Executive Order 12291 (46 FR 13193; February 19, 1981). It is significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) because the proposal involves issues of substantial interest to the public.

Paperwork Reduction Act

The reporting and recordkeeping requirements associated with this rule are being submitted to the Office of Management and Budget for approval in accordance with 44 U.S.C. Chapter 35 under DOT No. ; OMB No. ; Administration: Research and Special Programs Administration; *Title:* Alcohol Misuse Prevention Program; *Need for Information:* The information requested is necessary to properly monitor the effectiveness of the program and to ensure compliance with the rule. Statistical data collected will build a data base to determine the continuing need for the rule; *Frequency:* Annual report; *Burden Hours per Respondent:* RSPA has estimated that the recordkeeping and reporting burden hours per operator would be 17 hours (4 hours for annual reports and 13 hours for recordkeeping). For further information contact: The Information Requirements Division, M–34, Office of the Secretary of Transportation, 400 Seventh Street, SW., Washington, DC 20590, (202) 366–4735 or Edward Clarke, Office of Management and Budget, New Executive Office Building, room 3228, Washington, DC 20503, (202) 395–7340.

Regulatory Flexibility Act

The proposed rule affects all entities subject to part 192 (other than operators of master meter systems), 193, or 195. Operators of master meter systems constitute the bulk of small businesses or other small entities that operate gas pipeline systems subject to part 192. There are few, if any, small entities that operate hazardous liquid or carbon dioxide pipelines subject to part 195, or LNG facilities subject to part 193. Therefore, I certify under section 605 of the Regulatory Flexibility Act (5 U.S.C. 605) that this proposed rule would not, if adopted as final, have a significant economic impact on a substantial number of small entities.

E.O. 12612

The proposed rulemaking action would not have substantial direct effects on states, on the relationship between the Federal Government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612 (52 FR 41685; October 30, 1987), RSPA has determined that this notice does not have sufficient federalism implications to warrant preparation of a Federalism Assessment.

List of Subjects in 49 CFR Part 199

Alcohol testing, Drug testing, Pipeline safety, Reporting and recordkeeping requirements, Safety, and Transportation.

In consideration of the foregoing, RSPA proposes to amend 49 CFR part 199 as follows:

1. The heading of part 199 is proposed to be revised to read as follows:

PART 199—ANTI-DRUG AND ALCOHOL MISUSE PREVENTION PROGRAMS

2. The authority citation for part 199 is proposed to be revised to read as follows:

Authority: 49 App. U.S.C. 1672, 1674a, 1681, 1804, 1808, and 2002; 49 CFR 1.53.

§§ 199.1 through 199.23 [Redesignated as Subpart A]

3. Part 199 is proposed to be amended by redesignating §§ 199.1 through 199.23 as a new subpart A entitled Anti-Drug Program.

4. Part 199 is proposed to be amended by adding a new subpart B as set forth below:

Subpart B—Alcohol Misuse Prevention Program

Sec.

199.200 Purpose.
199.201 Applicability.
199.202 Alcohol misuse plan.
199.203 Alcohol testing procedures.
199.205 Definitions.
199.207 Preemption of State and local laws.
199.209 Other requirements imposed by operators.
199.211 Requirement for notice.
199.213 Starting date for alcohol testing programs.
199.215 Alcohol concentration.
199.217 Behavior and appearance.
199.219 On-duty use.
199.221 Pre-duty use.
199.223 Use following an accident.
199.225 Refusal to submit to a required alcohol test.
199.227 Alcohol tests required.
199.229 Retention of records.
199.231 Reporting of results in a management information system.
199.233 Access to facilities and records.
199.235 Removal from safety-sensitive function.
199.237 Required evaluation and testing.
199.239 Other alcohol-related conduct.
199.241 Operator obligation to promulgate a policy on the misuse of alcohol.
199.243 Training for supervisors.
199.245 Referral, evaluation, and treatment.
199.247 Contractor employees.

Subpart B—Alcohol Misuse Prevention Program

§ 199.200 Purpose.

The purpose of this subpart is to establish programs designed to help prevent accidents and injuries resulting from the misuse of alcohol by employees who perform safety-sensitive functions for operators of pipeline facilities subject to part 192, 193, or 195 of this chapter.

§ 199.201 Applicability.

This subpart applies to gas, hazardous liquid and carbon dioxide pipeline operators and liquefied natural gas operators subject to part 192, 193, or 195 of this chapter. However, this subpart does not apply to operators of master meter systems defined in § 191.3 of this chapter.

§ 199.202 Alcohol misuse plan.

Each operator shall maintain and follow a written alcohol misuse plan that conforms to the requirements of this subpart and the DOT procedures. The plan shall contain methods and procedures for compliance with all the requirements of this subpart, including required education and training elements.

§ 199.203 Alcohol testing procedures.

Each operator shall ensure that all alcohol testing conducted under this subpart complies with the procedures set forth in part 40 of this title. The provisions of part 40 of this title that address alcohol testing are made applicable to operators by this subpart.

§ 199.205 Definitions.

As used in this subpart:

Accident means an incident reportable under part 191 of this chapter involving gas pipeline facilities or LNG facilities, or an accident reportable under part 195 of this chapter involving hazardous liquid or carbon dioxide pipeline facilities.

Administrator means the Administrator of the Research and Special Programs Administration (RSPA), or any person who has been delegated authority in the matter concerned.

Alcohol means ethyl alcohol (ethanol).

Alcohol concentration (or content) means the alcohol in a volume of breath expressed in terms of grams of alcohol per 210 liters of breath as indicated by an evidential breath test under this subpart. When the indicated alcohol concentration of a covered employee on an initial alcohol test is different from an indicated alcohol concentration on a confirmatory test, the employee shall be considered to have the lower indicated concentration.

Alcohol use means the consumption of any beverage, mixture, or preparation, including any medication, containing alcohol.

Confirmatory test means a second analytical procedure, separate from the screening test, to determine the concentration of alcohol in a covered employee's system. The confirmatory test may or may not use a different chemical principle from that of the screening test, but shall employ a scientifically recognized method of testing capable of providing quantitative data regarding alcohol concentration. For specific requirements concerning evidential breath testing devices see part 40 of this title.

Consortium means an entity, including a group or association of employers, recipients, or contractors, that provides alcohol testing as required by this subpart or other DOT alcohol testing rules and that acts on behalf of the operators.

Covered employee means a person who performs on a pipeline or at an LNG facility an operating, maintenance, or emergency-response function regulated by part 192, 193, or 195 of this chapter. As used in this part, *employee* includes an applicant for employment. *Covered employee* and *individual* or *individual to be tested* have the same meaning for the purposes of this subpart. The term *covered employee* does not include clerical, truck driving, accounting, or other functions not subject to part 192, 193, or 195. The person may be employed by the operator, be a contractor engaged by the operator, or be employed by such a contractor. For the purposes of pre-employment/pre-duty testing only, the term covered employee includes a person applying to perform a safety-sensitive function.

DOT agency means an agency (or *operating administration*) of the United States Department of Transportation administering regulations requiring alcohol testing (14 CFR part 61, 49 CFR parts 199, 219, 382, and 654) in accordance with part 40 of this title.

Employer or operator means a person who owns or operates a pipeline or LNG facility subject to part 192, 193, or 195 of this chapter.

Initial alcohol test (or screening test) means an analytical procedure to determine whether a covered employee may have a prohibited concentration of alcohol in his or her system.

Performing (a safety-sensitive function): An employee is considered to be performing a safety-sensitive function during any period in which he or she is actually performing, ready to perform, or immediately available to perform such covered functions.

Refuse to submit (to an alcohol test) means that a covered employee fails to provide adequate breath for testing without a valid medical explanation after he or she has received notice of the requirement to be tested in accordance with the provisions of part 199 of this chapter and part 40 of this title or engages in conduct that clearly obstructs the collection process.

Safety-sensitive function means an operation, maintenance, or emergency-response function that is performed on

a pipeline or LNG facility and the function is regulated by part 192, 193, or 195.

State agency means an agency of any of the several states, the District of Columbia, or Puerto Rico that participates under section 5 of the Natural Gas Pipeline Safety Act of 1968 (49 App. U.S.C. 1674) or section 205 of the Hazardous Liquid Pipeline Safety Act of 1979 (49 App. U.S.C. 2009).

Substance abuse professional means a licensed physician (Medical Doctor or Doctor of Osteopathy), or a licensed or certified psychologist, social worker, or employee assistance professional with knowledge of and clinical experience in the diagnosis and treatment of alcohol-related disorders.

§ 199.207 Preemption of State and local laws.

(a) Except as provided in paragraph (b) of this section, this subpart preempts any State or local law, rule, regulation, or order to the extent that:

(1) Compliance with both the State or local requirement and this subpart is not possible;

(2) Compliance with the State or local requirement is an obstacle to the accomplishment and execution of any requirement in this subpart; or

(3) The State or local requirement is a pipeline safety standard applicable to interstate pipeline facilities.

(b) This subpart shall not be construed to pre-empt provisions of State criminal law that impose sanctions for reckless conduct leading to actual loss of life, injury, or damage to property, whether the provisions apply specifically to transportation employees or employers or to the general public.

§ 199.209 Other requirements imposed by operators.

Except as expressly provided in this subpart, nothing in this subpart shall be construed to affect the authority of operators, or the rights of employees, with respect to the use or possession of alcohol, including authority and rights with respect to alcohol testing and rehabilitation.

§ 199.211 Requirement for notice.

Before performing an alcohol test under this subpart, each operator shall notify a covered employee that the alcohol test is required by this subpart. No operator shall falsely represent that a test is administered under this subpart.

§ 199.213 Starting date for alcohol testing programs.

(a) *Large operators.* Each operator with more than fifty covered employees on [*the effective date of the final rule*] shall implement the requirements of this subpart on [*date one year after the effective date of the final rule*].

(b) *Small operators.* Each operator with fifty or fewer covered employees on [*effective date of the final rule*] shall implement the requirements of this subpart on [*date two years after the effective date of the final rule*].

(c) All operators shall have an alcohol misuse program that conforms to this subpart by [*date two years after the effective date of the final rule*], or by the date an operator begins operations, whichever is later.

§ 199.215 Alcohol concentration.

No operator shall allow a covered employee to report for duty or remain on duty requiring the performance of safety-sensitive functions while having an alcohol concentration of .04 or greater. No operator having actual knowledge that a covered employee has an alcohol concentration of .04 or greater shall permit the employee to perform or continue to perform safety-sensitive functions.

§ 199.217 Behavior and appearance.

Notwithstanding the absence of a reasonable suspicion test under § 199.227(d), no operator having actual knowledge that a covered employee's behavior or appearance is characteristic of alcohol misuse or that the covered employee's ability to perform his or her assigned functions is adversely affected by alcohol use shall permit the covered employee to report for duty or remain on duty requiring the performance of safety-sensitive functions. Each operator shall prohibit a covered employee whose behavior or appearance is characteristic of alcohol misuse or whose ability to perform his or her assigned functions is adversely affected by alcohol from reporting for duty or remaining on duty requiring the performance of safety-sensitive functions.

§ 199.219 On-duty use.

Each operator shall prohibit a covered employee from using alcohol while performing safety-sensitive functions. No operator having actual knowledge that a covered employee is using alcohol while performing safety-sensitive functions shall permit the employee to perform or continue to perform safety-sensitive functions.

§ 199.221 Pre-duty use.

Each operator shall prohibit a covered employee from using alcohol within four hours prior to performing safety-sensitive functions. No operator having actual knowledge that a covered employee has used alcohol within four hours prior to performing safety-sensitive functions shall permit a covered employee to perform or continue to perform safety-sensitive functions.

§ 199.223 Use following an accident.

No operator shall permit a covered employee who has actual knowledge of an accident in which his or her performance of safety-sensitive functions has not been discounted by the operator as a contributing factor to an accident shall use alcohol for eight hours following the accident, unless he or she has been given a post-accident test under § 199.227(b), or the operator has determined that the employee's performance could not have contributed to the accident.

§ 199.225 Refusal to submit to a required alcohol test.

Each operator shall require a covered employee to submit to a post-accident alcohol test required under § 199.227(b), a random alcohol test required under § 199.227(c), a reasonable suspicion alcohol test required under § 199.227(d), or a follow-up alcohol test required under § 199.227(e). No operator shall permit an employee who refuses to submit to such a test to perform or continue to perform safety-sensitive functions.

§ 199.227 Alcohol tests required.

Each operator shall conduct the following types of alcohol tests for the presence of alcohol:

(a) *Pre-employment/pre-duty testing.* (1) Prior to the first time a covered employee performs safety-sensitive functions for an operator, the operator shall ensure that the employee undergoes testing for alcohol. No operator shall allow a covered employee to perform safety-sensitive functions, unless the employee has been administered an alcohol test with a result indicating an alcohol concentration less than .04. If a pre-employment/pre-duty test result under this section indicates an alcohol content of .02 or greater but less than .04, the provisions of § 199.239 shall apply.

(2) An operator is not required to administer an alcohol test required by paragraph (1) of this section, if:

(i) The employee has undergone an alcohol test required by this section or the alcohol misuse regulations of another DOT agency under part 40 of this title within the previous six months, with a result indicating an alcohol concentration less than .04; and

(ii) The operator ensures that no prior operator of the covered employee of

whom the operator has knowledge has records of a violation of this subpart or the alcohol misuse regulations of another DOT agency within the previous six months.

(b) *Post-accident.* (1) As soon as practicable following an accident, each operator shall test each surviving covered employee for alcohol if that employee's performance of a safety-sensitive function either contributed to an accident or cannot be completely discounted as a contributing factor to the accident. The decision not to administer a test under this section shall be based on the operator's determination, using the best available information at the time of the determination, that the covered employee's performance could not have contributed to the accident.

(2) If a test required by this section is not administered within two hours following the accident, the operator shall submit a report to the appropriate Regional Office of Pipeline Safety stating the reasons the test was not promptly administered. If a test required by this paragraph (b) is not administered within eight hours following the accident, the operator shall cease attempts to administer an alcohol test and shall submit the same report.

(3) A covered employee who is subject to post-accident testing who leaves the scene of an accident without a valid reason prior to submission to such test may be deemed by the operator to have refused to submit to testing. Nothing in this section shall be construed to require the delay of necessary medical attention for injured people following an accident or to prohibit a covered employee from leaving the scene of an accident for the period necessary to obtain assistance in responding to the accident or to obtain necessary emergency medical care.

(c) *Random testing.* (1) Each operator shall, at various times, randomly select employees for unannounced alcohol testing. The selection of employees shall be made by use of a scientifically valid method, such as a random-number table or a computer-based random number generator that is matched with employees' Social Security numbers, payroll identification numbers, or other comparable identifying numbers. Each covered employee shall have an equal chance of being tested under the selection process used.

(2) During each 12-month period following the start of random alcohol testing by the operator, the operator shall meet the following conditions:

(i) The dates for administering unannounced testing of randomly-selected covered employees shall be spread reasonably throughout the 12-month period; and

(ii) The number of employees randomly selected for testing during the 12-month period shall equal an annual rate of not less than [10–50] percent of the total number of employees subject to alcohol testing under this subpart or the alcohol misuse regulations of another DOT agency. If the operator conducts random testing through a consortium, the annual rate may be calculated for each individual operator or for the total number of covered employees subject to random testing by the consortium.

(3) A covered employee shall only be tested while the employee is performing safety-sensitive functions; just before the employee is to perform safety-sensitive functions; or just after the employee has ceased performing such functions.

(4) Each operator shall require that each covered employee who is notified of selection for random testing proceeds to the testing site immediately. However, if the employee is performing a safety-sensitive function at the time of the notification, the operator shall instead ensure that the employee ceases to perform the safety-sensitive function and proceeds to the testing site as soon as possible.

(d) *Testing based on reasonable suspicion.* (1) Each operator shall require any covered employee to submit to an alcohol test when the operator has reasonable suspicion to believe that the employee has violated the prohibitions in this subpart.

(2) The operator's determination that reasonable suspicion exists to require the employee to undergo an alcohol test shall be based on specific, contemporaneous, articulable observations concerning the appearance, behavior, speech, or body odors of the employee. The required observations shall be made by a supervisor who is trained in detecting the symptoms of alcohol misuse. The supervisor who makes the determination that reasonable suspicion exists shall not conduct the breath alcohol test on that employee, if another supervisor is readily available.

(3) Alcohol testing is authorized by this section only if the observations required by paragraph (d)(2) of this section are made during or just preceding the period of the work day that the employee is required to be in compliance with this subpart. A covered employee may be required to undergo reasonable suspicion testing for alcohol while the employee is performing safety-sensitive functions; just before the employee is to perform safety-sensitive functions; or just after the employee has ceased performing such functions.

(e) *Return-to-duty testing.* Each operator shall ensure that before a covered employee returns to duty requiring the performance of a safety-sensitive function after engaging in conduct prohibited by §§ 199.215–199.225, the employee shall undergo a return-to-duty alcohol test with a result indicating an alcohol concentration of less than .02.

(f) *Follow-up testing.* Following a determination under § 199.245(b) that a covered employee is in need of assistance in resolving problems associated with alcohol misuse, each operator shall ensure that the employee is subject to unannounced follow-up alcohol testing as directed by a substance abuse professional in accordance with the provisions of § 199.245(c)(2)(ii).

(g) *Retesting of covered employees with an alcohol concentration of .02 or greater but less than .04.* Each operator shall retest a covered employee to ensure compliance with the provisions of § 199.239, if the operator chooses to permit the employee to perform a safety-sensitive function within eight hours following the administration of an alcohol test indicating an alcohol concentration of .02 or greater but less than .04.

§ 199.229 Retention of records.

(a) *General requirement.* Each operator shall maintain records of its alcohol misuse prevention program as provided in this section. The records shall be maintained in a secure location with controlled access.

(b) *Period of retention.* Each operator shall maintain the records in accordance with the following schedule:

(1) *Five years.* Records of employee alcohol test results with results indicating an alcohol concentration of .02 or greater, documentation of refusals to take required alcohol tests, calibration documentation, and employee evaluation and referrals shall be maintained for a minimum of five years.

(2) *Two years.* Records related to the collection process (except calibration of evidential breath testing devices) and training shall be maintained for a minimum of two years.

(3) *One year.* Records of negative test results (as defined in 49 CFR part 40) shall be maintained for a minimum of one year.

(c) *Types of records.* The following specific records shall be maintained.

(1) *Records related to the collection process:* (i) Collection logbooks, if used.

(ii) Documents relating to the random selection process.

(iii) Calibration documentation for evidential breath testing devices.

(iv) Verification of breath alcohol technician training.

(v) Documents generated in connection with decisions to administer reasonable suspicion alcohol tests.

(vi) Documents generated in connection with decisions on post-accident tests.

(vii) Documents verifying existence of a medical explanation of the inability of a covered employee to provide adequate breath for testing.

(2) *Records related to test results:* (i) The operator's copy of the alcohol test form, including the results of the test.

(ii) Documents related to the refusal of any covered employee to submit to an alcohol test required by this subpart.

(iii) Documents presented by a covered employee to dispute the result of an alcohol test administered under this subpart.

(3) *Records related to other violations of this subpart.*

(4) *Records related to evaluations:* (i) Records pertaining to a determination by a substance abuse professional concerning a covered employee's need for assistance.

(ii) Records concerning a covered employee's compliance with the recommendations of the substance abuse professional.

(5) *Records related to education and training:* (i) Materials on alcohol misuse awareness, including a copy of the operator's policy on alcohol misuse.

(ii) Documentation of compliance with the requirements of § 199.233.

(iii) Documentation of training provided to supervisors for the purpose of qualifying the supervisors to make a determination concerning the need for alcohol testing based on reasonable suspicion.

(iv) Certification that any training conducted under this subpart complies with the requirements for such training.

§ 199.231 Reporting of results in a management information system.

(a) Each operator shall submit to RSPA an annual report covering the calendar year, summarizing the results of its alcohol misuse prevention program.

(b) Each operator that is subject to more than one DOT agency alcohol regulation shall identify each employee covered by the regulations of more than one DOT agency. The identification will be by the total number and category of covered function. Prior to conducting any alcohol test on a covered employee subject to the regulations of more than one DOT agency, the employer shall determine which DOT agency rule or rules authorizes or requires the test. The test result information shall be directed to the appropriate DOT agency or agencies.

(c) Each operator shall ensure the accuracy and timeliness of each report submitted by the operator or a consortium.

(d) Each operator shall submit the required annual reports no later than February 15 of each year. The report shall be submitted on the form specified by RSPA. Each report shall contain:

(1) Number of covered employees by employee category.

(2) Number of covered employees in each category subject to testing under the alcohol misuse regulations of another DOT agency, identified by each agency.

(3) (i) Number of initial tests by type of test and employee category.

(ii) Number of confirmatory tests, by type of test and employee category.

(4) Number of confirmatory alcohol tests indicating an alcohol concentration of .04 or greater, by type of test and employee category.

(5) Number of confirmatory alcohol tests indicating an alcohol concentration of .02 or greater but less than .04, by type of test and employee category.

(6) Number of persons denied a position as a covered employee following a pre-employment/pre-duty alcohol test indicating an alcohol concentration of .04 or greater.

(7) Number of covered employees with a confirmatory alcohol test indicating an alcohol concentration of .04 or greater who were returned to duty in covered positions (having complied with the recommendations of a substance abuse professional as described in §§ 199.237 and 199.245).

(8) Number of covered employees who were administered alcohol and drug tests at the same time, with both a positive drug test and an alcohol test indicating an alcohol concentration of .04 or greater.

(9) Number of covered employees who were found to have violated other provisions of § § 199.215–199.225, and the action taken in response to the violation.

(10) Number of covered employees who refused to submit to an alcohol test required under this subpart, and the action taken in response to the refusal.

(11) Number of supervisors who have received training during the reporting period in determining the existence of reasonable suspicion of alcohol misuse.

§ 199.233 Access to facilities and records.

(a) Except as required by law or expressly authorized or required in this subpart, no employer shall release covered employee information that is contained in records required to be maintained in § 199.229.

(b) A covered employee is entitled, upon written request, to obtain copies of any records pertaining to the employee's use of alcohol, including any records pertaining to his or her alcohol tests. The operator shall promptly provide the records requested by the employee. Access to an employee's records shall not be contingent upon payment for records other than those specifically requested.

(c) Each operator shall permit access to all facilities utilized in complying with the requirements of this subpart to the Secretary of Transportation or any DOT agency with regulatory authority over the operator or any of its covered employees.

(d) Each operator shall make available copies of all results for operator alcohol testing conducted under this subpart and any other information pertaining to the operator's alcohol misuse prevention program, when requested by the Secretary of Transportation or any DOT agency with regulatory authority over the operator or covered employee.

(e) When requested by the National Transportation Safety Board as part of an accident investigation, operators shall disclose information related to the operator's administration of a post-accident alcohol test administered following the accident under investigation.

(f) Records shall be made available to a subsequent employer upon receipt of written request from the covered employee. Disclosure by the subsequent employer is permitted only as expressly authorized by the terms of the employee's request.

(g) An operator may disclose information required to be maintained under this subpart pertaining to a covered employee to the employee or the decisionmaker in a lawsuit, grievance, or other proceeding initiated by or on behalf of the individual, and arising from the results of an alcohol test administered under this subpart, or from the operator's determination that the covered employee engaged in conduct prohibited by §§ 199.215–199.225 (including, but not limited to, a worker's compensation, unemployment compensation, or other proceeding relating to a benefit sought by the employee.)

(h) An operator shall release information regarding a covered employee's records as directed by the specific, written consent of the employee authorizing release of the information to an identified person.

Release of such information by the person receiving the information is permitted only in accordance with the terms of the employee's consent.

§ 199.235 Removal from safety-sensitive function.

Except as provided in §§ 199.241–199.245, no operator shall permit any covered employee to perform safety-sensitive functions if the employee has engaged in conduct prohibited by §§ 199.215–199.225 or alcohol misuse regulations of another DOT agency.

§ 199.237 Required evaluation and testing.

No operator shall permit a covered employee who has engaged in conduct prohibited by §§ 199.215–199.225 to perform safety-sensitive functions unless the employee has met the requirements of § 199.245. Nothing in this section shall be construed to prohibit the continued performance of safety-sensitive functions necessary to respond to an emergency.

§ 199.239 Other alcohol-related conduct.

(a) No operator shall permit a covered employee tested under the provisions of § 199.227, who is found to have an alcohol concentration of .02 or greater but less than .04, to perform or continue to perform safety-sensitive functions, until:

(1) The employee's alcohol concentration measures less than .02; or

(2) The start of the employee's next regularly scheduled duty period, but not less than eight hours following administration of the test.

(b) Except as provided in paragraph (a)(1) of this section, no operator shall take any action under this subpart against an employee based solely on test results showing an alcohol concentration less than .04. This does not prohibit an operator with authority independent of this subpart from taking any action otherwise consistent with law.

(c) Nothing in this section shall be construed to prohibit the continued performance of safety-sensitive functions necessary to respond to an emergency.

§ 199.241 Operator obligation to promulgate a policy on the misuse of alcohol.

(a) *General requirements.* Each operator shall provide educational materials that explain the requirements of this subpart and the employer's policies and procedures with respect to meeting those requirements. Each employer shall provide written notice to every covered employee and to representatives of employee organizations of the availability of this information.

(b) *Required content.* The materials to be made available to covered employees shall include detailed discussion of at least the following:

(1) The identity of the person designated by the operator to answer covered employee questions about the materials.

(2) The categories of employees who are subject to the provisions of this subpart.

(3) Sufficient information about the safety-sensitive functions performed by those employees to make clear what period of the work day the covered employee is required to be in compliance with this subpart.

(4) Specific information concerning covered employee conduct that is prohibited by this subpart.

(5) The circumstances under which a covered employee will be tested for alcohol under this subpart.

(6) The procedures that will be used to test for the presence of alcohol, protect the covered employee and the integrity of the breath testing process, safeguard the validity of the test results, and ensure that those results are attributed to the correct employee.

(7) The requirement that a covered employee submit to alcohol tests administered in accordance with this subpart.

(8) An explanation of what constitutes a refusal to submit to an alcohol test and the attendant consequences.

(9) The consequences for covered employees found to have violated this subpart, including the requirement that the employee be removed immediately from safety-sensitive functions, and the procedures under § 199.245.

(10) The consequences for covered employees found to have an alcohol concentration of .02 or greater but less than .04.

(c) *Optional provisions.* The materials supplied to covered employees may also include information on additional operator policies with respect to the use or possession of alcohol, including any consequences for an employee found to have a specified alcohol level, that are based on the operator's authority independent of this subpart. Any such additional policies or consequences shall be clearly and obviously described as being based on independent authority.

§ 199.243 Training for supervisors.

Each operator shall ensure that persons designated to determine whether reasonable suspicion exists to require a covered employee to undergo alcohol testing under § 199.227(d) receive at least 60 minutes of training on the physical, behavioral, speech, and performance indicators of probable alcohol misuse.

§ 199.245 Referral, evaluation, and treatment.

(a) Each operator shall ensure that a covered employee who engages in conduct prohibited under §§ 199.215–199.225 shall be advised of the resources available to the covered employee in evaluating and resolving problems associated with the misuse of alcohol, including the names, addresses, and telephone numbers of substance abuse professionals and counseling and treatment programs.

(b) Each covered employee who engages in conduct prohibited by §§ 199.215–199.225 shall be evaluated by a substance abuse professional who shall determine what assistance, if any, the employee needs in resolving problems associated with alcohol misuse.

(c)(1) Before a covered employee returns to duty requiring the performance of a safety-sensitive function after engaging in conduct prohibited by §§ 199.215–199.225, the employee shall undergo a return-to-duty alcohol test with a result indicating an alcohol concentration of less than .02.

(2) In addition, each covered employee identified as needing assistance in resolving problems associated with alcohol misuse—

(i) Shall be evaluated by a substance abuse professional to determine that the employee has properly followed any rehabilitation program prescribed under paragraph (b) of this section, and

(ii) Shall be subject to unannounced follow-up alcohol tests administered by the operator following the employee's return to duty. The number and frequency of such follow-up testing shall be determined by a substance abuse professional, but shall consist of at least six tests in the first 12 months following the employee's return to duty. Follow-up testing shall not exceed 60 months from the date of the employee's return to duty. The substance abuse professional may terminate the requirement for follow-up testing at any time after the first six tests have been administered, if the substance abuse professional determines that such testing is no longer necessary.

(d) Evaluation and rehabilitation may be provided by the operator, by a substance abuse professional under contract with the operator, or by a substance abuse professional not affiliated with the operator. The choice of substance abuse professional and assignment of costs shall be made in

accordance with operator/employee agreements and employer policies.

(e)(1) The provisions of this paragraph (e) apply if the policy of the operator permits reinstatement of an employee who has violated the provisions of this subpart.

(2) The operator shall designate a substance abuse professional to evaluate—

(i) The needs of the employee with respect to rehabilitation services such as counseling or treatment; and

(ii) Where rehabilitation services are required, the progress of the employee in establishing control over any substance abuse disorder before return to a safety-sensitive function. In deciding whether and under what conditions the employee is able to return to a safety-sensitive function, the substance abuse professional acts as the agent of the operator.

(3) At the operator's discretion, the designated substance abuse professional may be a salaried employee (e.g., an employee assistance counselor), a contractor, or a member of the staff of an otherwise unaffiliated health care provider.

(4) Nothing in this subpart shall be construed to determine the responsibility of the operator, employee, health insurance carrier or other person to bear the costs of substances abuse evaluation or rehabilitation services. Nothing in this subpart shall be construed to abridge existing agreements or policies with respect to payment or reimbursement of such costs.

§ 199.247 Contractor employees.

(a) With respect to those covered employees who are contractors or employed by a contractor, an operator may provide by contract that the alcohol testing, training and education required by this subpart be carried out by the contractor provided:

(b) The operator remains responsible for ensuring that the requirements of this subpart and part 40 of this title are complied with; and

(c) The contractor allows access to property and records by the operator, the Administrator, DOT agency with regulatory authority over the operator or covered employee, and if the operator is subject to the jurisdiction of a state agency, a representative of the state agency for the purposes of monitoring the employer's compliance with the requirements of this subpart and part 40 of this title.

Issued in Washington, DC, on December 2, 1992.

Andrew H. Card, Jr.,

Secretary of Transportation.

Douglas B. Ham,

Acting Administrator, Research and Special Programs Administration.

[FR Doc. 92-29687 Filed 12-10-92; 10:00 am]

BILLING CODE 4910-60-M

Research and Special Programs Administration

49 CFR Part 199

[Docket No. PS-129; Notice No. 1]

RIN 2137-AB95

Drug Testing: MIS Standardized Data Collection and Reporting

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: Today's **Federal Register** contains a notice of proposed rulemaking issued by the Department of Transportation regarding the collection and reporting of drug and alcohol testing data. The Department's proposed rule concerns a DOT plan to measure the effectiveness of drug testing programs in all DOT-regulated modes of transportation, including pipeline. The present RSPA notice proposes a rule that is necessary to carry out the DOT plan with respect to pipeline operators. Together, the two proposed rules would require pipeline operators who are subject to drug and alcohol testing requirements to report annually to RSPA certain information about their drug and alcohol testing programs. RSPA would use the data to analyze its current approach to deterring and detecting illegal drug and alcohol misuse use in the pipeline industry, and, as appropriate, plan a more efficient and effective approach.

Elsewhere in today's **Federal Register** is the parallel "MIS" NPRM regarding 49 CFR part 40. The preamble to that NPRM contains many comments, discussions and questions that should be considered in reviewing this Operating Administration NPRM. Your comments on this NPRM should indicate that you are responding to questions or comments in the generic NPRM under 49 CFR part 40 or the specific NPRM under this Operating Administration rule.

DATES: Comments should be received by April 14, 1993. Late-filed comments will be considered to the extent practicable. Comments on the Secretary's notice appearing elsewhere in today's **Federal Register** should be submitted as directed by that notice.

ADDRESSES: Send comments on this notice in duplicate to the Dockets Unit, room 8421, Research and Special Programs Administration, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590-0001. Identify the docket and notice numbers stated in the heading of this notice. All comments and other docketed material will be available for inspection and copying in room 8421 between the hours of 8:30 a.m. and 5 p.m. each working day.

FOR FURTHER INFORMATION CONTACT: Mr. Richard L. Rippert, Office of Pipeline Safety Enforcement, RSPA, DOT, 400 7th Street, SW., Washington, DC 20590-0001 (202) 366-6223.

SUPPLEMENTARY INFORMATION:

Background

On November 21, 1988, RSPA published final drug testing rules (53 FR 47084). The rules are codified in 49 CFR part 199. These rules require each operator of pipelines or liquefied natural gas facilities used in the transportation of gas subject to 49 CFR part 192 or 193 (except master meter systems) or the transportation of hazardous liquids subject to 49 CFR part 195 to implement a drug testing program for specific categories of employees. The programs apply to employees that perform operation, maintenance, or emergency-response functions on pipelines or liquefied natural gas facilities.

DOT's Office of Drug Enforcement and Program Compliance oversees drug policies and programs for the Secretary of Transportation. That office created a working group with representatives from the operating administrations to develop a comprehensive plan for a Management Information System (MIS) to obtain and analyze employer drug and alcohol testing data. Two of the operating administrations currently have reporting requirements in their regulations. The MIS system is designed to measure the effectiveness of the drug and alcohol testing programs in each mode of transportation. The MIS plan identified standard data elements that are critical to the review and management of the RSPA drug and alcohol program. The data would be the basis for monitoring implementation and addressing compliance and enforcement issues and evaluating the overall effectiveness of the operators' drug and alcohol testing programs.

To begin the administrative process necessary to collect these data, the

Department of Transportation has issued a notice of proposed rulemaking. The notice is published in today's Federal Register as a proposed amendment to the regulations of the Office of the Secretary. The Department's notice proposes to add an information collection requirement to 49 CFR part 40, as § 40.41. Under the Department's proposed rule, pipeline operators subject to part 199 would have to submit certain drug and alcohol testing data to RSPA annually in accordance with a rule we are proposing in the present notice. Operators would maintain data on a calendar-year basis (closing date of December 31) and the report would be required to be submitted to RSPA by February 15 of the following year. The report would be required to contain certain data elements that are outlined under the proposed § 40.41 in the Department's notice.

Operators with employees who fall under two or more DOT agency regulations requiring drug testing must submit data to each agency for those employees covered by that agency rule. Employees who perform functions covered by more than one agency should be identified by the operator as to which covered function they will be reported under. Drug and alcohol testing data on dual covered employees should be reported to RSPA and any other appropriate agency.

As set forth below, we are proposing to revise § 199.23, concerning recordkeeping, and add a new § 199.25 to part 199 to implement the Department's proposed information collection requirements. Although the proposed § 40.41 allows RSPA to amend the reporting form to collect additional or modified data, RSPA is not proposing to deviate from DOT's format at this time. RSPA is proposing further instructions for two items on the form that would apply to pipeline operators when submitting their drug and alcohol testing data. RSPA has provided a sample report format as an appendix, which is RSPA specific, in the NPRM.

If the Department's proposed amendment to part 40 becomes final, it would require pipeline operators to submit data regarding the testing of certain contractors or contractor personnel. Many contractors conduct their own drug and alcohol testing programs or participate in drug testing consortia. RSPA is concerned about any potential difficulties in collecting information from contractors or consortia. Do pipeline operators foresee any difficulties in collecting the appropriate information on contractor employees or from consortia covering contractor employees, in order to comply with the proposed regulations? RSPA is considering whether to defer for the first year the requirement that pipeline operators report information on contractor employees regarding their drug and alcohol testing results. RSPA is concerned about multiple reports of identical information from contractors being submitted by the various pipeline operators for whom the contractor may perform services covered under the regulations. Would these difficulties, if any, create a hardship in meeting the proposed rule or the expected compliance deadline of February 15, 1994, with respect to contractors or consortia?

In accordance with § 199.1(a), part 199 does not apply to master meter systems. However, part 199 applies to operators of petroleum gas systems to which part 192 applies (See § 192.11). Many operators of petroleum gas systems operate more than one such system or the operators are small entities. Do operators of petroleum gas systems, subject to part 199, foresee any difficulties in their operations that may hinder compliance with the proposed rule? In accordance with Section 211 of the Pipeline Safety Reauthorization Act of 1988 (Pub. L. 100–561), RSPA has recently extended the part 195 regulations to cover certain high pressure pipelines used in the transportation of carbon dioxide (56 FR 26922; June 12, 1991). Those pipeline operators will have to implement a drug and alcohol testing program under part 199. Therefore, these operators are affected by the final rule to collect data about operator drug and alcohol testing programs. Do carbon dioxide pipeline operators foresee any difficulties in their operations that may hinder their compliance with this rule?

RSPA is proposing to revise some of the recordkeeping requirements contained in § 199.23(a)(2) to avoid duplicative information collection requirements. Section 199.23(a)(2) requires operators to keep certain records on employees who failed a drug test, including the type of test failed and records that demonstrate rehabilitation, if any. The required information includes (i) The functions performed by the employee, (ii) The prohibited drug(s) used, (iii) Disposition of the employee, and (iv) The age of the employee. The new MIS Annual Reporting System in 49 CFR 40.41 would require operators to maintain and report the information currently required in items (i)–(iii), as well as the type of test failed. RSPA is proposing to eliminate from recordkeeping or reporting requirements the fourth item, concerning the age of each employee who failed a drug test. RSPA does not believe this is an essential data element.

Regulatory Analyses and Notices

E.O. 12291 and DOT Regulatory Policies and Procedures

The proposed rule is not major under Executive Order 12291 (46 FR 13193; February 19, 1981). It is significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). The rule proposed by this notice merely implements an amendment the Department is proposing to part 40. The Department has concluded that the proposed amendment to part 40 would cause minimal change in the existing compliance burden and cost of the anti-drug programs affected by the amendment. Therefore, we have not further evaluated the costs and benefits of this proposed rule.

Paperwork Reduction Act

This notice proposes new information collection requirements. These requirements will be submitted to the Office of Management and Budget (OMB) for approval under the Paperwork Reduction Act of 1980 (44 U.S.C. Chap. 35) and 5 CFR part 1320. RSPA estimates the reporting burden for the collection requirement will average 5½ hours per operator for drug testing data and approximately 4 hours for alcohol testing data. This estimate includes time for reviewing instructions, searching existing records, and completing and reviewing the collection of information.

Comments regarding this burden estimate or any other aspect of this information collection requirement, including suggestions for reducing this burden, should be sent to Desk Officer, Research and Special Programs Administration, Office of Information and Regulatory Affairs, Office of Management and Budget, 728 Jackson Place, NW., Washington, DC 20503. Persons submitting comments to OMB are requested to submit a copy of their comments to RSPA as stated above under the ADDRESSES section of this preamble.

Regulatory Flexibility Act

The proposed rule affects all entities subject to part 192 (other than operators of master meter systems), 193, or 195, and operators of carbon dioxide pipelines covered by Docket PS–112. Operators of master meter systems constitute the bulk of small businesses or other small entities that operate gas pipeline systems subject to part 192. There are few, if any, small entities that

operate hazardous liquid or carbon dioxide pipelines subject to part 195, or LNG facilities subject to part 193. Therefore, I certify under Section 605 of the Regulatory Flexibility Act (5 U.S.C. 605) that this proposed rule would not, if adopted as final, have a significant economic impact on a substantial number of small entities.

Executive Order 12612

The proposed rulemaking action would not have substantial direct effects on states, on the relationship between the Federal Government and the states, or on the distribution of power and responsibilities among the various levels of Government. Therefore, in accordance with Executive Order 12612 (52 FR 41685; October 30, 1987), RSPA has determined that this notice does not have sufficient federalism implications to warrant preparation of a Federalism Assessment.

List of Subjects in 49 CFR Part 99

Pipeline safety, Drug testing, Recordkeeping and reporting.

In consideration of the foregoing, RSPA proposes to amend 49 CFR part 199 as follows:

PART 199—DRUG AND ALCOHOL TESTING—MANAGEMENT INFORMATION SYSTEM REPORTING

1. The authority citation for part 199 is revised to read as follows:

Authority: 49 App. U.S.C. 1672, 1674a, 1681, 1804, 1808, and 2002; 49 CFR 1.53.

2. § 199.23 would be amended by revising paragraph (a)(2) to read as follows:

§ 199.23 Recordkeeping.

(a) * * *

(2) Records of employee drug and alcohol test results that show employees failed a test and records that demonstrate rehabilitation, if any, must be kept for at least 5 years.

* * * * *

3. Section 199.25 would be added to read as follows:

§ 199.25 Annual drug and alcohol testing report.

(a) Each operator shall submit, not later than February 15, a report of its drug and alcohol testing program for the previous calendar year.

(b) Each report must be made to the Information Resources Manager for Pipeline Safety, Research and Special Programs Administration, Department of Transportation, room 8417, 400 Seventh Street, SW., Washington, DC 20590.

(c) *Instructions.* The following instructions for completion of the report form are in addition to those in § 40.41 of this chapter:

(1) In part A of the report form under "company name," each operator shall state the primary nature of its operations as either gas gathering, gas transmission, gas distribution, transportation of hazardous liquid, or transportation of carbon dioxide.

(2) In part B of the report form, each operator shall report only information on the following employee categories: Operation, maintenance, and emergency-response. If an employee can be assigned to more than one category (e.g., a maintenance worker also responds to emergencies), report the information according to the employee's primary duties.

4. Part 199 is amended by adding Appendix B to read as follows:

BILLING CODE 4910-60-M

APPENDIX B - DRUG AND ALCOHOL TESTING MIS DATA COLLECTION FORM

GENERAL INSTRUCTIONS

This reporting form includes three parts. Collectively, these parts address the data elements required in Research and Special Programs Administration (RSPA) and the U.S. Department of Transportation (DOT) drug and alcohol testing regulations. Each part of the form is preceded by instructions which outline and explain the information requested and indicate the probable sources for this information. The three parts of the form are:

Section	Instructions Pages	Reporting Form Pages
I. ORGANIZATIONAL INFORMATION	i-ii	1-2
II. DRUG TESTING INFORMATION	iii-vii	3-9
III. ALCOHOL TESTING INFORMATION	viii-xii	10-14

I. ORGANIZATIONAL INFORMATION

INSTRUCTIONS

This part of the reporting form includes two sections. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. EMPLOYER INFORMATION	i	1
B. COVERED EMPLOYEES	ii	2

Page 1 **EMPLOYER INFORMATION** (Section A) requires the company name for which the report is done, a current address, the name of the person responsible for completing the form, and a current telephone (including the area code). Be sure check which one of the five categories (gas gathering; gas transmission, gas distribution; transportation of hazardous liquids; and transportation of carbon dioxide) characterizes the **primary** nature of your operation. Finally, a signature and date are required certifying the correctness and completeness of the form.

Page 2

COVERED EMPLOYEES (Section B) requires a count for each employee category that must be tested under RSPA/DOT regulations. For RSPA this includes Operations Personnel ("Operations" in the tables), Maintenance Personnel ("Maintenance" in the tables), and Emergency Response Personnel ("Emergency Response" in the tables). The most likely source for this information is the employer's personnel department. These counts should be based on the company records for the reported year. The **TOTAL** is a count of **all** covered employees for **all** categories combined, i.e., the sum of the columns.

Additional information must be completed if your company employs personnel who perform duties covered by the drug and alcohol rules of more than one DOT operating administration. **NUMBER OF EMPLOYEES COVERED BY MORE THAN ONE DOT OPERATING ADMINISTRATION**, requires that you identify the number of employees in each employee category under the appropriate additional operating administration(s).

VOL 57 SS 241 DE 15 1992 UMI

II. DRUG TESTING INFORMATION

INSTRUCTIONS

The following instructions are to be used as a guide for completing the drug testing information in Research and Special Programs Administration (RSPA) and the U.S. Department of Transportation (DOT) **Drug and Alcohol Testing Management Information System Data Collection Form**. These instructions outline and explain the information requested and indicate probable sources for this information. A sample testing results table with a narrative explanation is provided on pages iv-vi as an example to facilitate the process of completing the form correctly.

This part of the reporting form includes four sections. These sections address the data elements required in the regulations. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. JOB APPLICANT TESTING INFORMATION	iv	4
B. EMPLOYEE TESTING	vi	5 7
C. OTHER TESTING/PROGRAM INFORMATION	vi	8
D. TRAINING/EDUCATION	vii	9

Sections A and B are used to summarize the drug testing results for covered employees. There are six tables to be completed (one in Section A and five in Section B). The first table (Section A) is where you enter the data on pre-employment testing. The five tables in Section B are for entering drug testing data on periodic, random, post-accident, reasonable cause, and return to duty testing, respectively Items necessary to complete these tables include:

1) the number of specimens collected in each employee category;
2) the number of specimens tested which were verified negative and verified positive for any drug(s); and
3) individual counts of those specimens which were verified positive for each of the five drugs.

Do not include results of quality control (QC) samples submitted to the testing laboratory in any of the tables.

A sample table with detailed instructions is provided for Section A, **JOB APPLICANT TESTING INFORMATION**. The format and explanations used for the sample table apply to all six of the tables in Sections A and B.

Information on actions taken with those persons testing positive is required at the end of both Sections A and B. Specific instructions for providing this latter information are given after the instructions for completing the tables in Sections A and B.

Page 4

JOB APPLICANT TESTING INFORMATION (Section A) requires information for pre-employment testing. All numbers entered into this table should be separated into the category of employment for which the applicant was applying. A sample table with example numbers is presented on page v.

Three types of information are necessary to complete the left side of this table. The first blank column with the heading "**NUMBER OF SPECIMENS COLLECTED,**" requires a count for all collected specimens by employee category. It should not include refusals to test. The second blank column with the heading "**NUMBER OF SPECIMENS VERIFIED NEGATIVE,**" requires a count for all completed tests by employee category that were verified negative by your Medical Review Officer (MRO).

The third blank column with the heading "**NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS,**" refers to the number of specimens provided by job applicants that were verified positive. "Verified positive" means the results were verified by your MRO.

The right hand portion of this table, with the heading "**NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG,**" requires counts of positive tests for each of the five drugs for which tests were done, i.e., marijuana (THC), cocaine, phencyclidine (PCP), opiates, and amphetamines. The number of specimens positive for each drug should be entered in the appropriate column for that drug type. Again, "verified positive" refers to test results verified by your MRO.

If an applicant tested positive for more than one drug; for example, both marijuana and cocaine, that person's positive results would be included once in each of the appropriate columns (marijuana and cocaine).

Each column in the table should be added and the answer entered in the row marked "**TOTAL**".

A sample table is provided on page v with example numbers.

Page 4

Below the table for pre-employment testing information is a box with the heading "**Number of persons denied a position as a covered employee following a verified positive drug test**". This is simply a count of those persons who were not placed in a covered position because they tested positive for one or more drugs.

SAMPLE APPLICANT TEST RESULTS TABLE

The following example is for Section A, **JOB APPLICANT TESTING INFORMATION**, which summarizes pre-employment testing results. The procedures detailed here also apply to the tables in Section B which require you to summarize testing results for employees. This example will use RSPA's three categories "Operations", "Maintenance", and "Emergency Response" to illustrate the procedures for completing the form.

A

Urine specimens were collected for 157 job applicants for operations positions during the reporting year. This information is entered in the first blank column of the table in the row marked "Operations".

B

The Medical Review Officer (MRO) for your company reported that 153 of those 157 specimens from applicants for operations positions were negative (i.e., no drugs were detected). Enter this information in the second blank column of the table in the row marked "Operations".

C

The MRO for your company reported that 4 of those 157 specimens from applicants for operations positions were positive (i.e., a drug or drugs were detected). Enter this information in the third blank column of the table in the row marked "Operations".

D

With the 4 specimens that tested positive, the following drugs were detected:

Specimen	Drugs
#1	Marijuana
#2	Amphetamines
#3	Marijuana and Cocaine (Multi-drug specimen)
#4	Marijuana

Marijuana was detected in three (3) specimens, cocaine in one (1), and amphetamines in one (1). This information is entered in the columns on the right hand side of the table under each of these drugs. Since two different drugs were detected in specimen #3 (multi-drug), entries are made in both the marijuana and the cocaine columns for this specimen. Information on multi-drug specimens must also be entered in Section C, **OTHER TESTING/PROGRAM INFORMATION**, on page 8 of the reporting form.

PRE-EMPLOYMENT TESTING

EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
Operations	157	153	4	3	1	0	0	1
Maintenance	107	105	2	1	0	0	1	0
Emergency Response	32	31	1	0	1	0	0	0
TOTAL	296	289	7	4	2	0	1	1

A B C D E

Please note that the sample data collection form also has information for maintenance workers on line two. The same procedures outlined for operators should be followed for entering the data on maintenance workers. With applicants for maintenance positions, 107 specimens were collected resulting in 105 verified negatives and 2 verified positives -- 1 for marijuana and 1 for opiates. This information is entered in the row marked "Maintenance". Thirty-two specimens were collected for emergency response positions resulting in thirty verified negatives and one verified positive for cocaine.

E

The last row, marked "TOTAL", requires you to add the numbers in each of the columns. With this example, 157 specimens from applicants for operator positions were collected, 107 for applicants for maintenance positions, and 32 for applicants for emergency response positions. The total for that column would be 296 (i.e., 157+107+32). The same procedure should be used for each column, i.e., add all the numbers in that column and place the answer in the last row.

Note that adding up the numbers for each type of drug in a row ("NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG") will not always match the number entered in the third column, "NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS". The total for the numbers on the right hand side of the table may differ from the number of specimens testing positive since some specimens may contain more than one drug.

Remember that the same procedures indicated above are to be used for completing all of the tables in Sections A and B.

Pages 5-7

EMPLOYEE TESTING (Section B), as indicated, requires information for company employees in covered positions only. A separate table must be completed for each category of test. These categories include: (1) periodic, (2) random, (3) post-accident, (4) reasonable cause, and (5) return to duty testing. These tables are to be filled out like the sample table above. Again, these numbers do not include refusals for testing.

Page 7

Following these tables that summarize **EMPLOYEE TESTING**, you must provide counts for employees who have tested positive and are currently in, or have completed rehabilitation, and have returned to work in a covered position. Report this information only for employees who tested positive during this reporting period. This information should be available from the personnel office and/or drug program manager.

Page 8

OTHER TESTING/PROGRAM INFORMATION (Section C) requires that you complete a table dealing with specimens positive for more than one drug and a table dealing with employees who refused to submit to a drug test.

Page 8

SPECIMENS VERIFIED POSITIVE FOR MORE THAN ONE DRUG requires information on specimens that contained more than one drug. Indicate the **EMPLOYEE CATEGORY** and the **NUMBER OF VERIFIED POSITIVES**, then check

the appropriate columns indicating the combination of drugs reported as positive. For example, if marijuana and cocaine were detected in 3 operations specimens, then you would write "Operations" as the employee category, "3" as the number of verified positives, and "3" in the columns for "Marijuana" and "Cocaine". If marijuana and opiates were detected in 2 operations specimens, then you would write "Operations" as the employee category, "2" as the number of verified positives, and "2" in the columns for "Marijuana" and "Opiates".

Page 8

EMPLOYEES WHO REFUSED TO SUBMIT TO A DRUG TEST requires information on the **NUMBER OF COVERED EMPLOYEES** who refused to submit to a drug test required under this regulation, and a description of the **ACTION TAKEN** in response to the refusal. An example of an action taken would be "removed from covered duties pending termination".

Page 9

TRAINING/EDUCATION (Section D) requires information on the number of covered employees and supervisory personnel who have received the required drug training during the current reporting period.

READ BEFORE COMPLETING THE REMAINDER OF THIS FORM:

1. All items refer to the **current** reporting period **only** (for example, January 1, 1993 - December 31, 1993).

2. This report is only for testing **REQUIRED BY RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION (RSPA) AND THE U.S. DEPARTMENT OF TRANSPORTATION (DOT)**:

   - Results should be reported only for employees in **COVERED POSITIONS** as defined by RSPA/DOT drug testing regulations.

   - The information requested should only include testing for marijuana (THC), cocaine, phencyclidine (PCP), opiates, and amphetamines using the standard procedures required by DOT regulation 49 CFR Part 40.

3. Information on refusals for testing should only be reported in Section C ("OTHER TESTING/PROGRAM INFORMATION"). Do not include refusals for testing in other sections of this report.

4. Do not include the results of any quality control (QC) samples submitted to the testing laboratory in any of the tables.

5. Complete all items; DO NOT LEAVE ANY ITEM BLANK. If the value for an item is zero (0), place a zero (0) on the form.

This part of the form requires information on VERIFIED POSITIVE and VERIFIED NEGATIVE drug tests. These are the results that are reported to you by your Medical Review Officer (MRO).

A. JOB APPLICANT TESTING INFORMATION

PRE-EMPLOYMENT TESTING								
EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG

D. TRAINING/EDUCATION

Training During Current Reporting Period

Number of covered employees who have received initial training on the consequences, manifestations, and behavioral cues of drug use as required by RSPA drug testing regulations: [ ]

Number of supervisory personnel who have received initial training on the specific contemporaneous physical, behavioral, and performance indicators of probable drug use as required by RSPA drug testing regulations: [ ]

Number of covered employees who have received recurrent or refresher training on the consequences, manifestations, and behavioral cues of drug use: [ ]

Number of supervisory personnel who have received recurrent or refresher training on the specific contemporaneous physical, behavioral, and performance indicators of probable drug use: [ ]

III. ALCOHOL TESTING INFORMATION

INSTRUCTIONS

The following instructions are to be used as a guide for completing the alcohol testing information for Research and Special Programs Administration (RSPA) and the U.S. Department of Transportation (DOT) **Drug and Alcohol Testing Management Information System Data Collection Form**. These instructions outline and explain the information requested and indicate probable sources for this information. A sample testing results table with a narrative explanation is provided on pages ix-xi as an example to facilitate the process of completing the form correctly.

This part of the reporting form includes four sections. These sections address the data elements required in the regulations. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. JOB APPLICANT TESTING INFORMATION	ix	10
B. EMPLOYEE TESTING	xi	11-13
C. OTHER TESTING/PROGRAM INFORMATION	xi	13-14
D. TRAINING/EDUCATION	xii	14

Sections A and B are used to summarize the alcohol testing results for covered employees. There are six tables to be completed (one in Section A and five in Section B). The first table (Section A) is where you enter the data on pre-employment/pre-duty testing. The five tables in Section B are for entering alcohol testing data for random, post-accident, reasonable suspicion, return to duty, and follow-up testing, respectively. Items necessary to complete these tables include:

1) the number of initial alcohol tests performed for each employee category;
2) the number of confirmatory alcohol tests performed for each employee category;
3) the number of confirmatory test results which were equal to or greater than 0.04; and
4) the number of confirmatory test results which were equal to or greater than 0.02, but less than 0.04.

A sample table with detailed instructions is provided for Section A, **JOB APPLICANT TESTING INFORMATION**. The format and explanations used for the sample table apply to all six of the tables in Sections A and B.

Information on actions taken with those persons whose alcohol test results were 0.04 or greater is required at the end of both Sections A and B. Specific instructions for providing this latter information are given after the instructions for completing the tables in Sections A and B.

Page 10 **JOB APPLICANT TESTING INFORMATION** (Section A) requires information for pre-employment/pre-duty testing. All numbers entered into this table should be separated into the category of employment for which the applicant was applying. A sample table with example numbers is presented on page x.

Four types of information are necessary to complete the left side of this table. The first blank column with the heading "**NUMBER OF INITIAL TESTS**" requires a count of all initial alcohol tests performed for each employee category. It should not include refusals to test. The second blank column with the heading "**NUMBER OF CONFIRMATORY TESTS**" requires a count of all confirmatory alcohol tests performed for each employee category.

The third blank column with the heading "**NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04**" requires a count for each employee category.

The fourth blank column with the heading "**NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02, BUT LESS THAN 0.04**" requires a count for each employee category.

Each column in the table should be added and the answer entered in the row marked "**TOTAL**".

A sample table is provided on page x with example numbers.

Page 10 Below the table for pre-employment testing information is a box with the heading "**Number of persons denied a position as a covered employee following a pre-employment/pre-duty alcohol test indicating an alcohol concentration of 0.04 or greater**". Enter the appropriate number in the box provided.

SAMPLE APPLICANT TEST RESULTS TABLE

The following example is for Section A, **JOB APPLICANT TESTING INFORMATION**, which summarizes pre-employment/pre-duty testing results. The procedures detailed here also apply to the tables in Section B which require you to summarize testing results for employees. This example will use RSPA's three categories "Operations", "Maintenance", and "Emergency Response" to illustrate the procedures for completing the form.

A Initial tests were performed on 157 job applicants for operations positions during the reporting year. This information is entered in the first blank column of the table in the row marked "Operations".

B Confirmatory tests were necessary for 6 of the 157 applicants for operations positions. Enter this information in the second blank column of the table in the row marked "Operations". The confirmatory test results for these 6 applicants were the following:

Applicant	Confirmation Result
#1	0.06
#2	0.01
#3	0.11
#4	0.04
#5	0.03
#6	0.02

C The confirmatory test results for 3 of the applicants for operations positions were equal to or greater than 0.04. Enter this information in the third blank column of the table in the row marked "Operations".

D The confirmatory test results for 2 of the applicants for operations positions were equal to or greater than 0.02, but less than 0.04. Enter this information in the fourth blank column of the table in the row marked "Operations".

E The last row, marked "TOTAL", requires you to add the numbers in each of the columns. With this example, 157 applicants for operations positions, 107 applicants for maintenance positions, and 32 applicants for emergency response positions were subjected to initial tests. The total for that column would be 296 (i.e., 157 + 107 + 32). The same procedure should be used for each column (i.e., add all the numbers in that column and place the answer in the last row).

PRE-EMPLOYMENT/PRE-DUTY TESTING

EMPLOYEE CATEGORY	NUMBER OF INITIAL TESTS	NUMBER OF CONFIRMATORY TESTS	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02, BUT LESS THAN 0.04
Operations	157	6	3	2
Maintenance	107	3	1	0
Emergency Response	32	0	0	0
TOTAL	296	9	4	2

A B C D E

Please note that the sample data collection form also has information for maintenance workers on line two. The same procedures outlined for operations should be followed for entering the data on maintenance workers. With applicants for maintenance positions, 107 initial tests were conducted resulting in 3 confirmatory tests. The confirmatory test result for 1 of the maintenance worker applicants was equal to or greater than 0.04; no results were equal to or greater than 0.02, but less than 0.04. This information is entered in the row marked "Maintenance". Thirty-two

specimens were collected for emergency response positions with no confirmatory tests performed.

Note that adding up the numbers for confirmation results in columns three and four will not always match the number entered in the second column, "NUMBER OF CONFIRMATORY TESTS". These numbers may differ since some confirmatory test results may be less than 0.02.

Remember that the same procedures indicated above are to be used for completing all of the tables in Sections A and B.

Pages 11-13 **EMPLOYEE TESTING** (Section B), as indicated, requires information for company employees in **covered positions** only. A separate table must be completed for each category of test. These categories include: (1) random, (2) post-accident, (3) reasonable suspicion, (4) return to duty, and (5) follow-up testing. These tables are to be filled out like the sample table above. Again, these numbers **do not** include refusals for testing.

Page 12 Following these tables that summarize **EMPLOYEE TESTING**, you must provide a count of the **"Number of employees with a confirmatory alcohol test indicating an alcohol concentration of 0.04 or greater who were returned to duty in a covered position (having complied with the recommendations of a substance abuse professional as described in DOT regulations)"**. Report this information only for employees who were tested during this reporting period. This information should be available from the personnel office and/or alcohol program manager.

Pages 13-14 **OTHER TESTING/PROGRAM INFORMATION** (Section C) requires that you provide information on employees who tested positive for drugs and alcohol (at the same time), information on violations of other alcohol provisions (not necessarily resulting in positive alcohol tests), and information on employees who refused to submit to an alcohol test.

Page 13 **Number of employees administered drug and alcohol tests at the same time resulting in a verified positive drug test and an alcohol test indicating an alcohol concentration of 0.04 or greater**, requires that a count of all such employees be entered in the indicated box.

Page 13 **VIOLATIONS OF OTHER ALCOHOL PROVISIONS/PROHIBITIONS OF THIS REGULATION**, requires information on the **NUMBER OF COVERED EMPLOYEES** committing such a violation, a description of the **VIOLATION** committed (e.g., pre-duty alcohol use, on duty alcohol use, on duty alcohol possession), and a description of the **ACTION TAKEN** in response to the violation.

Page 14 **EMPLOYEES WHO REFUSED TO SUBMIT TO AN ALCOHOL TEST** requires information on the **NUMBER OF COVERED EMPLOYEES** who refused to submit to an alcohol test as required under this regulation, and a description of the **ACTION TAKEN** in response to the refusal.

Page 14 **TRAINING/EDUCATION** (Section D) requires information on the number of supervisory personnel who have received the required alcohol training during the current reporting period.

READ BEFORE COMPLETING THE REMAINDER OF THIS FORM:

1. All items refer to the **current** reporting period **only** (for example, January 1, 1993 - December 31, 1993).

2. This report is only for testing **REQUIRED BY RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION (RSPA) AND THE U.S. DEPARTMENT OF TRANSPORTATION (DOT):**

   - Results should be reported only for employees in **COVERED POSITIONS** as defined by RSPA/DOT alcohol testing regulations.
   - The information requested should only include testing for alcohol using the standard procedures required by DOT regulation 49 CFR Part 40.

3. Information on refusals for testing should only be reported in Section C ("OTHER TESTING/PROGRAM INFORMATION"). Do not include refusals for testing in other sections of this part of the report.

4. Complete all items; DO NOT LEAVE ANY ITEM BLANK. If the value for an item is zero (0), place a zero (0) on the form.

A. JOB APPLICANT TESTING INFORMATION

PRE-EMPLOYMENT/PRE-DUTY TESTING				
EMPLOYEE CATEGORY	NUMBER OF INITIAL TESTS	NUMBER OF CONFIRMATORY TESTS	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.04	NUMBER OF CONFIRMATORY TEST RESULTS EQUAL TO OR GREATER THAN 0.02, BUT LESS THAN 0.04

Part VIII

Department of Transportation

Coast Guard

46 CFR Part 16
Drug and Alcohol Testing Programs; Proposed Rules

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Part 16

[CGD 91–019]

RIN 2115–AD84

Chemical Drug and Alcohol Testing of Commercial Vessel Personnel; Collection of Drug and Alcohol Testing Information

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to amend its regulations for chemical drug and alcohol testing of commercial vessel personnel to include information collection requirements regarding marine industry drug and alcohol testing programs. The Coast Guard proposes to collect this data in order to assess the effectiveness of the marine industry drug and alcohol tesing programs.

DATES: Comments must be received on or before April 14, 1993.

ADDRESSES: Comments may be mailed to the Executive Secretary, Marine Safety Council (G–LRA/3406) (CGD 91–019), U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593–0001, or may be delivered to room 3406 at the above address between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 267–1477. Comments on collection of information requirements must be mailed also to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street, NW., Washington, DC 20503, Attn: Desk Officer, U.S. Coast Guard.

The Executive Secretary maintains the public docket for this rulemaking. Comments will become part of this docket and will be available for inspection or copying at room 3406, U.S. Coast Guard Headquarters.

FOR FURTHER INFORMATION CONTACT: LCDR M. A. Grossetti, Marine Investigation Division, Office of Marine Safety, Security and Environmental Protection, (202) 267–1421.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Coast Guard encourages interested persons to participate in this rulemaking by submitting written arguments, views or data. Persons submitting comments should include their names and addresses, identify this rulemaking (CGD 91–019) and the specific section of this proposal to which each comment applies, and give a reason for each comment. The Coast Guard requests that all comments and attachments be submitted in an unbound format suitable for copying and electronic filing. If not practical, a second copy of any bound materials is requested. Persons wanting acknowledgment of receipt of comments should enclose a stamped, self-addressed post card or envelope.

The Coast Guard will consider all comments received during the comment period. Persons may request a public hearing by writing to the Marine Safety Council at the address under "ADDRESSES." The request should include reasons why a hearing would be beneficial. If the Coast Guard determines that the opportunity for oral presentations will aid this rulemaking, a public hearing will be held at a time and place announced by a later notice in the Federal Register.

Elsewhere in today's Federal Register is the parallel proposal for the management information system (MIS) in the NPRM regarding 49 CFR part 40. The preamble to that NPRM contains many comments, discussions and questions that should be considered in reviewing this Operating Administration NPRM. Your comments on this NPRM should indicate that you are responding to questions or comments found in the generic NPRM under 49 CFR part 40 or the specific NPRM under this Operating Administration rule.

Drafting Information

The principal persons involved in drafting this document are LCDR M. A. Grossetti, Project Manager, Office of Marine Safety, Security and Environmental Protection, and Helen G. Boutrous, Project Counsel, Office of Chief Counsel.

Background and Purpose

On December 14, 1987, the Coast Guard published regulations regarding operating a vessel while intoxicated. (52 FR 47526) Those regulations established standards of intoxication and authorized law enforcement officers and marine employers to direct individuals operating a vessel to undergo a chemical test for reasonable cause. On November 21, 1988, the Coast Guard issued a final rule (the "1988 Final Rule") requiring marine employers to establish chemical drug programs for their covered employees and job applicants that included pre-employment, periodic, random, post-accident and reasonable cause tests. Additionally, the rules require post-accident testing for alcohol. (53 FR 47063) On the same date, the Department of Transportation published an interim final rule establishing drug testing procedures. (53 FR 47002) The interim final rule followed closely the Department of Health and Human Services (DHHS) regulation entitled "Mandatory Guidelines for Federal Workplace Drug Testing Programs." (53 FR 11970) On December 1, 1989, DOT published a final rule (54 FR 49854) which responded to all comments to the interim rule and incorporated appropriate changes. (49 CFR part 40)

In October 1989, approximately one year after the Coast Guard published its 1988 final rule, the Secretary of Transportation appointed a Special Assistant for Drug Enforcement and Program Compliance. The Special Assistant is responsible for determining the effectiveness of the transportation industry drug and alcohol testing programs. A November 1989 General Accounting Office report entitled, "Drug Testing: Management Problems and Legal Challenges Facing DOT's Industry Programs", provided additional suggestions for monitoring the effectiveness of the drug testing programs.

DOT has determined that the most appropriate method to monitor the effectiveness of the transportation industry drug testing programs is to create a Management Information System (MIS). Representatives from each DOT operating administration (OA) participated in a working group to formulate a MIS proposal for the drug and alcohol testing programs. Numerous alternatives and information collection processes were considered. It was noted that whereas DHHS certified laboratories could provide only laboratory analysis data, medical review officers (MROs) could provide only drug test verification information, and collection facilities could provide only specimen collection data, employers receive drug testing information from labs, MROs and collection facilities, and therefore, could provide all the necessary data for an effective MIS. Thus, the regulated employers are the appropriate source of comprehensive drug testing data.

To implement and sustain an effective, multi-modal MIS, the Coast Guard proposes to develop data collection rules appropriate for the maritime industry. The maritime industry data may then be combined with the data from other transportation industries to provide an overall view of the effectiveness of the transportation industry drug testing programs.

Discussion of Proposed Amendments

Elsewhere in this **Federal Register**, DOT is proposing to amend 49 CFR part 40. The DOT proposal states that the 1988 drug testing rules were not intended to be static and remain unchanged. Because over-regulation is as unwanted as under-regulation, DOT seeks information about drug use prevalence, program implementation, and economic and logistical impacts of rules to provide a basis for policy review, development and change. The DOT proposal indicates that program evaluation requires transportation industry input because issues such as scope of applicability, random test rates, cost-benefit ratios, rehabilitation and testing protocols can be addressed effectively only with careful consideration of the information held by transportation industry employers. The DOT proposal describes the data elements that DOT expects each operating administration to require employers in their respective regulated industries to collect and submit.

The Coast Guard proposes to amend 46 CFR part 16 to comport with the 49 CFR part 40 data collection proposal by proposing a new § 16.500 containing a proposed list of the data that each marine employer or employer's representative (including a consortium) must collect and submit to the Coast Guard, and a proposal that marine employers that have operations regulated by other OAs submit appropriate data to each regulating OA for those employees covered by that OA rule.

The DOT proposal would require all transportation industry employers to collect data on a calendar year basis, from January 1 to December 31, and to submit at least one report per calendar year, but allows OAs to propose the data submittal frequency for their regulated industry employers.

The DOT proposal would require OAs to collect drug testing program data but would give OAs the authority to amend their drug and alcohol testing regulations as appropriate for their respective industries. Accordingly, with a view toward limiting the data collection to elements appropriate for the maritime industry, the Coast Guard proposes to require all marine employers to collect and submit annually the following drug and alcohol testing program data:

(1) Number of covered billets, either on a vessel unit basis or employee number basis by employee category. Marine employee categories will be limited to "licensed", "unlicensed (documented)", and "other" personnel, when this information is available.

DOT requires this data both to assess the scope of the drug testing rules' application in the maritime industry and to provide a basis for determining whether maritime industry random testing meets the required 50 percent level.

(2) Number of covered employees subject to testing under the anti-drug rules of more than one DOT Agency, identified by each agency. This data is necessary to review multi-modal implementation so that policy can be designed accordingly.

(3) Number of drug and alcohol tests by test type and covered billet. The drug test types are pre-employment, random, post-accident and reasonable cause. The alcohol test types are post-accident and reasonable cause. Covered billets are those described in (1) above. The Coast Guard intends to compile data submitted individually for periodic tests and not require a cumulative report from employers.

This data will be used both to evaluate the scope of maritime industry drug and alcohol testing program implementation and to determine the prevalence of maritime industry drug and alcohol use.

(4) Number of positive drug test results verified by a Medical Review Officer (MRO) by test type, type of drug(s) and covered billet. Number of alcohol tests resulting in a blood alcohol concentration of .04 percent by weight or more by test type and covered billet.

DOT requires this data to calculate positive drug test result rates and alcohol test result rates exceeding the standard of intoxication in the maritime industry. These rates are necessary to determine the extent of maritime industry drug and alcohol use and the specific drugs used in the various categories of covered billets. Further, analysis of this data over time would provide a measure of the effectiveness of maritime industry drug and alcohol testing rules in deterring drug and alcohol use.

(5) Number of negatives verified by a MRO by type of test, by type of drug, and employee category. This data is needed to check compliance with the rules by category and to review the application of the components of the programs.

(6) Number of applicants denied employment based on positive drug test results verified by an MRO.

DOT requires this data to determine whether the testing program is being implemented as required; to provide a measure of the impact of the drug testing rules on the industries; and to yield information on the prevalence of drug use in the applicant pool.

(7) Number of marine employees with positive drug test results verified by an MRO who were returned to duty in covered positions, having met the requirements of 46 CFR 16.370(d) and 46 CFR part 5.

DOT requires this data to assess the maritime industry's policy regarding rehabilitation of identified drug users.

(8) Number of marine employee drug test results that MROs verify positive for more than one drug.

DOT requires this data to provide information regarding maritime industry multiple drug use.

(9) Number of covered employees who refused to submit to a drug test required under this part, and the action taken in response to the refusal(s). This data provides information on employer policy implementation regarding refusals and subsequent employer actions.

(10) Number of marine employees receiving training and education information.

DOT requires this information to assess the maritime industry's training policies. The DOT proposal also indicates that it would provide a cumulative count of maritime industry covered billets and supervisory personnel on payroll during the covered year who have received the required drug abuse training.

The Coast Guard proposes to have marine employers submit these data elements on the proposed standard forms attached as an appendix to this NPRM. Marine employers would be permitted to photocopy the standard form. Data may be submitted by consortia or other employer representatives on behalf of a marine employer. Each marine employer must notify the Coast Guard in writing of the consortium or representative that will submit the employer's data, and remains responsible for ensuring that the data is submitted.

Regulatory Evaluation

This proposal is considered to be non-major under Executive Order 12291. However, this proposal is considered to be significant under the "Department of Transportation Regulatory Policies and Procedures" (44 FR 11304; February 26, 1979) because of the substantial public interest in, and concern for, a drug and alcohol abuse-free transportation environment. The Coast Guard expects the economic impact of this proposal to be so minimal that a full Regulatory Evaluation is unnecessary.

This action proposes to create standard reporting requirements for

marine employers to submit data on their drug and alcohol testing programs. The Coast Guard proposes to collect this data in order to assess the effectiveness of the maritime industry drug and alcohol testing programs.

The proposed DOT amendment anticipates that the reporting requirements, if adopted, will cause minimal changes in maritime industry compliance burdens and costs. The Coast Guard proposal requests data that marine employers already may be collecting. Instructional materials and guidance being developed by DOT also would reduce the burden of compliance with the proposed regulations.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this proposal, if adopted, will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632). The Coast Guard proposal requests data that marine employers already may be collecting. Instructional materials and guidance being developed by DOT also would reduce the burden of compliance with the proposed regulations. Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposal, if adopted, will not have a significant economic impact on a substantial number of small entities. If, however, you think that your business qualifies as a small entity and that this proposal will have a significant economic impact on your business, please submit a comment (see "ADDRESSES") explaining why you think your business qualifies and in what way and to what degree this proposal will economically affect your business.

Collection of Information

Under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), the Office of Management and Budget (OMB) reviews each proposed rule which contains an information collection requirement to determine whether the practical value of the information is worth the burden imposed by its collection. Collection of information requirements include reporting, recordkeeping, notification, and other, similar requirements.

This proposal contains collection of information requirements in § 16.500. The following particulars apply:

DOT No.: 2115.

OMB Control No.: 2115–XXXX.

Administration: U.S. Coast Guard.

Title: Chemical Drug and Alcohol Testing of Commercial Vessel Personnel; Collection of Drug and Alcohol Testing Information.

Need for Information: To enable DOT to monitor the effectiveness of the transportation industry drug and alcohol testing programs.

Proposed Use of Information: Marine industry data will be combined with the data from other transportation industries to provide an overall view of the effectiveness of the transportation industry drug and alcohol testing programs.

Frequency of Response: Annual.

Burden Estimate: 7262.

Respondents: 14,000.

Forms: United States Coast Guard Drug Testing Management Information System Data Collection Form.

Average Burden Hours Per Respondent: .2687.

The Coast Guard has submitted the requirements to OMB for review under section 3504(h) of the Paperwork Reduction Act. Persons submitting comments on the requirements should submit their comments both to OMB and to the Coast Guard where indicated under "ADDRESSES."

Federalism

The Coast Guard has analyzed this proposal in accordance with the principles and criteria contained in Executive Order 12612 and has determined that this proposal does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment. The authority to require programs for chemical drug and alcohol testing of commercial vessel personnel has been committed to the Coast Guard by Federal statutes. This proposed rule would, therefore, if adopted, preempt State and local regulations on the same subject matter.

Environment

The Coast Guard considered the environmental impact of this proposal and concluded that under section 2.B.2 of Commandant Instruction M16475.1B, this proposal is categorically excluded from further environmental documentation. This proposal merely requires the reporting of drug and alcohol testing information and clearly would have no impact on the environment. A Categorical Exclusion Determination is available in the docket for inspection or copying where indicated under "ADDRESSES."

List of Subjects in 46 CFR Part 16

Drug testing, Marine safety, Reporting and recordkeeping requirements, Safety, Transportation.

For the reasons set out in the preamble, the Coast Guard proposes to amend 46 CFR part 16 as follows:

PART 16—CHEMICAL TESTING

1. The authority citation for part 16 continues to read as follows:

Authority: 46 U.S.C. 2103, 3306, 7101, 7301 and 7701; 49 CFR 1.46.

2. Section 16.500 is added to read as follows:

§ 16.500 Management information System requirements.

(a) All marine employers shall collect the drug and alcohol testing program data identified in this section for each calendar year, January 1 to December 31. Marine employers shall submit this data to the Coast Guard by February 15 of the following year at Commandant (G–MMI), 2100 Second Street, SW., Washington, DC, 20593–0001.

(b) All marine employers shall collect the following drug and alcohol testing program data:

(1) Number of covered billets either on a vessel unit basis or on an employee number basis by employee category. The employee categories are licensed, unlicensed (documented), and other, when this information is available.

(2) Number of covered employees subject to testing under the anti-drug rules of more than one DOT agency, identified by each agency.

(3) Number of drug and alcohol tests by test type and covered billet. The drug test types are pre-employment, random, post-accident and reasonable cause. The alcohol test types are post-accident and reasonable cause. The covered billets are set forth in paragraph (b)(1) of this section.

(4) Number of positive drug test results verified by a Medical Review Officer (MRO) by test type, type of drug(s) and covered billet. Number of alcohol tests resulting in a blood alcohol concentration of .04 percent by weight or more by test type and covered billet.

(5) Number of negatives verified by an MRO by type of test, type of drug, and employee category.

(6) Number of applicants denied employment based on a positive drug test result verified by an MRO.

(7) Number of marine employees with a positive drug test result verified by an MRO, who were returned to duty in a covered position, having met the requirements of § 16.370(d) and part 5 of this chapter.

(8) Number of marine employee drug test results that MROs verify positive for more than one drug or combination of drugs.

(9) Number of covered employees who refused to submit to a drug test

required under this part, and the action taken in response to the refusal(s).

(10) Marine employee training and education information.

(c) The data listed in paragraph (b) of this section shall be submitted to the Coast Guard on the standard forms provided in the appendix to this part. All items on the form must be completed. Data may be submitted by consortia or other employer representatives on behalf of a marine employer. Each marine employer must notify the Coast Guard in writing of the consortium or representative that will submit the employer's data, and remains responsible for ensuring that the data is submitted.

(d) Marine employers that conduct operations regulated by another Department of Transportation Operating Administration must submit appropriate data to that Operating Administration for those employees covered by that Operating Administration's regulations.

3. Part 16 is amended by adding appendix B to read as follows:

BILLING CODE 4810-14-M

APPENDIX B - DRUG AND ALCOHOL TESTING MIS DATA COLLECTION FORM

GENERAL INSTRUCTIONS

This reporting form includes three parts. Collectively, these parts address the data elements required in the United States Coast Guard (USCG) and the U.S. Department of Transportation (DOT) drug and alcohol testing regulations. Each part of the form is preceded by instructions which outline and explain the information requested and indicate the probable sources for this information. The three parts of the form are:

Section	Instructions Pages	Reporting Form Pages
I. ORGANIZATIONAL INFORMATION	i-ii	1-2
II. DRUG TESTING INFORMATION	iii-vii	3-7
III. ALCOHOL TESTING INFORMATION	viii-x	8-9

I. ORGANIZATIONAL INFORMATION

INSTRUCTIONS

This part of the reporting form includes two sections. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. EMPLOYER INFORMATION	i	1
B. COVERED BILLETS	ii	2

Page 1 **EMPLOYER INFORMATION** (Section A) requires the company name for which the report is done and a current address. Below this, a signature, date and current telephone (including the area code) are required certifying the correctness and completeness of the form.

Page 2

COVERED BILLETS (Section B) requires a count for each employee category that must be tested under USCG/DOT regulations. The employee categories are "Licensed", "Unlicensed (Documented)" and "Other". The most likely source for this information is the employer's personnel department. These counts should be based on the company records for the reported year. The **TOTAL** is a count of **all** covered employees for **all** categories combined, i.e., the sum of the columns.

Additional information must be completed if your company employs personnel who perform duties covered by the drug and alcohol rules of more than one DOT operating administration. **NUMBER OF EMPLOYEES COVERED BY MORE THAN ONE DOT OPERATING ADMINISTRATION**, requires that you identify the number of employees in each employee category under the appropriate additional operating administration(s)

For Office Use Only

II. DRUG TESTING INFORMATION

INSTRUCTIONS

The following instructions are to be used as a guide for completing the drug testing information in the United States Coast Guard (USCG) and the U.S. Department of Transportation (DOT) **Drug and Alcohol Testing Management Information System Data Collection Form**. These instructions outline and explain the information requested and indicate probable sources for this information. A sample testing results table with a narrative explanation is provided on pages iv-vi as an example to facilitate the process of completing the form correctly.

This part of the reporting form includes three sections. These sections address the data elements required in the regulations. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. MARINE EMPLOYEE TESTING	iii	4-5
B. OTHER TESTING/PROGRAM INFORMATION	vi	6
C. TRAINING/EDUCATION	vii	7

Sections A is used to summarize the drug testing results for covered marine employees. There are four tables to be completed. In the appropriate table, enter the data on pre-employment testing, random, post-accident, and reasonable cause. Items necessary to complete these tables include:

1) the number of specimens collected in each employee category;
2) the number of specimens tested which were verified negative and verified positive for any drug(s); and
3) individual counts of those specimens which were verified positive for each of the five drugs.

Do not include results of quality control (QC) samples submitted to the testing laboratory in any of the tables.

A sample pre-employment table with detailed instructions is provided for Section A, **MARINE EMPLOYEE TESTING INFORMATION**. The format and explanations used for the sample table apply to all of the tables in Section A.

Information on actions taken with those persons testing positive is required at the end of Section A. Specific instructions for providing this latter information are given after the instructions for completing the tables in Section A.

Page 4 **MARINE EMPLOYEE TESTING INFORMATION** (Section A) requires information for pre-employment, random, post-accident, and reasonable cause testing. All numbers entered into this table should be separated into the category of

employment for which the applicant was applying. A sample table with example numbers is presented on page v.

Three types of information are necessary to complete the left side of this table. The first blank column with the heading "**NUMBER OF SPECIMENS COLLECTED,**" requires a count for all collected specimens by employee category. It should not include refusals to test. The second blank column with the heading "**NUMBER OF SPECIMENS VERIFIED NEGATIVE,**" requires a count for all completed tests by employee category that were verified negative by your Medical Review Officer (MRO).

The third blank column with the heading "**NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS,**" refers to the number of specimens provided by job applicants that were verified positive. "Verified positive" means the results were verified by your MRO.

The right hand portion of this table, with the heading "**NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG,**" requires counts of positive tests **for each** of the five drugs for which tests were done, i.e., marijuana (THC), cocaine, phencyclidine (PCP), opiates, and amphetamines. The number of specimens positive for each drug should be entered in the appropriate column for that drug type. Again, "verified positive" refers to test results verified by your MRO.

If an applicant tested positive for more than one drug; for example, both marijuana and cocaine, that person's positive results would be included once in each of the appropriate columns (marijuana and cocaine).

Each column in the table should be added and the answer entered in the row marked "**TOTAL**".

A sample table is provided on page v with example numbers.

Page 4

Below the table for pre-employment testing information is a box with the heading "**Number of persons denied a position as a covered employee following a verified positive drug test**". This is simply a count of those persons who were not placed in a covered position because they tested positive for one or more drugs.

SAMPLE MARINE EMPLOYEE TEST RESULTS TABLE

The following example is for Section A, pre-employment testing, which summarizes pre-employment testing results. The procedures detailed here also apply to the tables on random, post-accident, and reasonable cause testing. Marine industry categories are "Licensed", "Unlicensed (Documented), and "Other".

A

Urine specimens were collected for 157 job applicants for licensed positions during the reporting year. This information is entered in the first blank column of the table in the row marked "Licensed".

B — The Medical Review Officer (MRO) for your company reported that 153 of those 157 specimens from applicants for licensed positions were negative (i.e., no drugs were detected). Enter this information in the second blank column of the table in the row marked "Licensed".

C — The MRO for your company reported that 4 of those 157 specimens from applicants for licensed positions were positive (i.e., a drug or drugs were detected). Enter this information in the third blank column of the table in the row marked "Licensed".

D — With the 4 specimens that tested positive, the following drugs were detected:

Specimen	Drugs
#1	Marijuana
#2	Amphetamines
#3	Marijuana and Cocaine (Multi-drug specimen)
#4	Marijuana

Marijuana was detected in three (3) specimens, cocaine in one (1), and amphetamines in one (1). This information is entered in the columns on the right hand side of the table under each of these drugs. Since two different drugs were detected in specimen #3 (multi-drug), entries are made in both the marijuana and the cocaine columns for this specimen. Information on multi-drug specimens must also be entered in Section B, OTHER TESTING/PROGRAM INFORMATION, on page 6 of the reporting form.

Please note that the sample data collection form also has information for unlicensed (documented) workers on line two. The same procedures outlined for licensed positions should be followed for entering the data on unlicensed (documented) positions. With applicants for unlicensed (documented) positions, 107 specimens were collected resulting in 105 verified negatives and 2 verified positives – 1 for marijuana and 1 for opiates. This information is entered in the row marked "Unlicensed (Documented)". No testing was done with the "Other" employee category so zeros (0's) were entered in those spaces.

PRE-EMPLOYMENT TESTING

EMPLOYEE CATEGORY	NUMBER OF SPECIMENS COLLECTED	NUMBER OF SPECIMENS VERIFIED NEGATIVE	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS	NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG				
				Marijuana (THC)	Cocaine	Phencyclidine (PCP)	Opiates	Amphetamines
Licensed	157	153	4	3	1	0	0	1
Unlicensed (Documented)	103	105	2	1	0	0	1	0
Other	0	0	0	0	0	0	0	0
TOTAL	264	258	6	4	1	0	1	1

A B C D E

V

E. The last row, marked "TOTAL", requires you to add the numbers in each of the columns. With this example, 157 specimens from applicants for licensed positions were collected and 107 for applicants for unlicensed (documented) positions. The total for that column would be 264 (i.e., 157+107). The same procedure should be used for each column, i.e., add all the numbers in that column and place the answer in the last row.

Note that adding up the numbers for each type of drug in a row ("NUMBER OF SPECIMENS VERIFIED POSITIVE FOR EACH TYPE OF DRUG") will not always match the number entered in the third column, "NUMBER OF SPECIMENS VERIFIED POSITIVE FOR ONE OR MORE OF THE FIVE DRUGS". The total for the numbers on the right hand side of the table may differ from the number of specimens testing positive since some specimens may contain more than one drug.

Remember that the same procedures indicated above are to be used for completing all of the tables in Sections A.

Page 5 — Following these tables that summarize **MARINE EMPLOYEE TESTING**, you must provide counts for employees who have tested positive and were returned to duty in a covered position, after meeting the requirements of 46 CFR Part 16.370 (d) and 46 CFR Part 5. Report this information only for employees who tested positive during this reporting period. This information should be available from the personnel office and/or drug program manager.

Page 6 — **OTHER TESTING/PROGRAM INFORMATION** (Section B) requires that you complete a table dealing with specimens positive for more than one drug and a table dealing with employees who refused to submit to a drug test.

Page 6 — **SPECIMENS VERIFIED POSITIVE FOR MORE THAN ONE DRUG** requires information on specimens that contained more than one drug. Indicate the **EMPLOYEE CATEGORY** and the **NUMBER OF VERIFIED POSITIVES**, then check the appropriate columns indicating the combination of drugs reported as positive. For example, if marijuana and cocaine were detected in 3 licensed specimens, then you would write "Licensed" as the employee category, "3" as the number of verified positives, and "3" in the columns for "Marijuana" and "Cocaine". If marijuana and opiates were detected in 2 licensed specimens, then you would write "Licensed" as the employee category, "2" as the number of verified positives, and "2" in the columns for "Marijuana" and "Opiates".

Page 6 — **EMPLOYEES WHO REFUSED TO SUBMIT TO A DRUG TEST** requires information on the **NUMBER OF COVERED EMPLOYEES** who refused to submit to a drug test required under this regulation, and a description of the **ACTION TAKEN** in response to the refusal. An example of an action taken would be "removed from covered duties pending termination".

Page 7 **TRAINING/EDUCATION** (Section C) requires information on the number of covered employees and supervisory personnel who have received the required drug training during the current reporting period.

VOL 57 SS 241 DE 15 992 UMI

READ BEFORE COMPLETING THE REMAINDER OF THIS FORM:

1. All items refer to the **current** reporting period **only** (for example, January 1, 1993 - December 31, 1993).

2. This report is only for testing **REQUIRED BY THE UNITED STATES COAST GUARD (USCG)**:

   - Results should be reported only for employees in **COVERED POSITIONS** as defined by USCG drug testing regulations.

   - The information requested should only include testing for marijuana (THC), cocaine, phencyclidine (PCP), opiates, and amphetamines using the standard procedures required by DOT regulation 49 CFR Part 40.

3. Information on refusals for testing should only be reported in Section B ("OTHER TESTING/PROGRAM INFORMATION"). Do not include refusals for testing in other sections of this report.

4. Do not include the results of any quality control (QC) samples submitted to the testing laboratory in any of the tables.

5. Complete all items; DO NOT LEAVE ANY ITEM BLANK. If the value for an item is zero (0), place a zero (0) on the form.

This part of the form requires information on VERIFIED POSITIVE and VERIFIED NEGATIVE drug tests. These are the results that are reported to you by your Medical Review Officer (MRO).

A. MARINE EMPLOYEE TESTING INFORMATION

PRE-EMPLOYMENT TESTING

C. TRAINING/EDUCATION

Training During Current Reporting Period

Number of covered employees who have received initial training on the consequences, manifestations, and behavioral cues of drug use as required by USCG drug testing regulations: ☐

Number of supervisory personnel who have received initial training on the specific contemporaneous physical, behavioral, and performance indicators of probable drug use as required by USCG drug testing regulations: ☐

Number of covered employees who have received recurrent or refresher training on the consequences, manifestations, and behavioral cues of drug use: ☐

Number of supervisory personnel who have received recurrent or refresher training on the specific contemporaneous physical, behavioral, and performance indicators of probable drug use: ☐

III. ALCOHOL TESTING INFORMATION

INSTRUCTIONS

The following instructions are to be used as a guide for completing the alcohol testing information for the United States Coast Guard (USCG) and the U.S. Department of Transportation (DOT) **Drug and Alcohol Testing Management Information System Data Collection Form**. These instructions outline and explain the information requested and indicate probable sources for this information. A sample testing results table with a narrative explanation is provided on pages ix-x as an example to facilitate the process of completing the form correctly.

This part of the reporting form includes three sections. These sections address the data elements required in the regulations. These sections, the page number for the instructions, and the page location on the reporting form are:

Section	Instructions Page	Reporting Form Page
A. MARINE EMPLOYEE TESTING INFORMATION	viii	8
B. TRAINING/EDUCATION	x	9

Section A is used to summarize the alcohol testing results for covered employees. There are two tables to be completed. The first table is where you enter the data on post-accident testing and the reasonable cause testing data is entered in the second table. Items necessary to complete these tables include:

1) the number of alcohol tests conducted for each employee category; and
2) the number of test results which were equal to or greater than 0.04.

A sample post-accident table with detailed instructions is provided for Section A MARINE **EMPLOYEE TESTING INFORMATION**. The format and explanations used for the sample table also apply to the reasonable cause table in Section A.

Page 8

MARINE EMPLOYEE TESTING INFORMATION (Section A) requires information for post-accident and reasonable cause testing. All numbers entered into this table should be separated into the appropriate category of employment. A sample table with example numbers is presented on page ix.

Two types of information are necessary to complete this table. The first blank column with the heading "**NUMBER OF TESTS**" requires a count of all alcohol tests conducted for each employee category. It should not include refusals to test.

The second blank column with the heading "NUMBER OF TEST RESULTS EQUAL TO OR GREATER THAN 0.04" requires a count for each employee category.

Each column in the table should be added and the answer entered in the row marked "TOTAL".

A sample table is provided on page ix with example numbers.

SAMPLE MARINE EMPLOYEE TEST RESULTS TABLE

The following example is for Section A, post-accident testing results. The procedures detailed here also apply to the table on reasonable cause testing. Marine industry categories are "Licensed", "Unlicensed (Documented)", and "Other".

A

Tests were conducted on 6 employees in licensed positions during the reporting year. This information is entered in the first blank column of the table in the row marked "Licensed". The test results for these 6 employees were the following:

Employee	Result
#1	0.06
#2	0.01
#3	0.01
#4	0.04
#5	0.03
#6	0.02

B

The test results for 2 of the employees in licensed positions were equal to or greater than 0.04. Enter this information in the second blank column of the table in the row marked "Licensed".

C

The last row, marked "TOTAL", requires you to add the numbers in each of the columns. With this example, 6 employees for licensed positions and 10 employees for unlicensed (documented) positions were subjected to tests. The total for that column would be 16 (i.e., 6 + 10). The same procedure should be used for each column. (i.e., add all the numbers in that column and place the answer in the last row).

POST-ACCIDENT TESTING

EMPLOYEE CATEGORY	NUMBER OF TESTS	NUMBER OF TEST RESULTS EQUAL TO OR GREATER THAN 0.04
Licensed	6	2
Unlicensed (Documented)	10	1
Other	0	0
TOTAL	16	3

A B C

Please note that the sample data collection form also has information for unlicensed (documented) employees on line two. The same procedures outlined for licensed employees should be followed for entering the data on unlicensed (documented) employees. With employees in unlicensed (documented) positions, 10 tests were conducted. The test result for 1 of the unlicensed (documented) employees was equal to or greater than 0.04. This information is entered in the row marked "Unlicensed (Documented)". No testing was done with the "Other" employee category so zeros (0's) were entered in those spaces.

Remember that the same procedures indicated above are to be used for completing all of the tables in Sections A and B.

Page 9 **TRAINING/EDUCATION** (Section C) requires information on the number of crewmembers and supervisory personnel who have received the required alcohol training during the current reporting period.

READ BEFORE COMPLETING THE REMAINDER OF THIS FORM:

1. All items refer to the **current** reporting period **only** (for example, January 1, 1993 - December 31, 1993).

2. This report is only for testing **REQUIRED BY THE UNITED STATES COAST GUARD (USCG)**:

   - Results should be reported only for employees in **COVERED POSITIONS** as defined by USCG alcohol testing regulations.
   - The information requested should only include testing for alcohol using the standard procedures required by USCG regulation 33 CFR Part 95 and 46 CFR Parts 4 and 16.

3. Include information on completed tests only. Do not include refusals for testing.

4. Complete all items; DO NOT LEAVE ANY ITEM BLANK. If the value for an item is zero (0), place a zero (0) on the form.

RIN 2105-AB94

Random Drug Testing Program

AGENCY: Office of the Secretary, Federal Aviation Administration, Federal Highway Administration, Federal Railroad Administration, Federal Transit Administration, Research and Special Programs Administration, and the United States Coast Guard, DOT.

ACTION: Advance notice of proposed rulemaking (ANPRM).

SUMMARY: In response to public comments received during the President's regulatory moratorium, petitions submitted by industry, and on their own initiative, the five operating administrations that currently require random drug testing—the Federal Aviation Administration (FAA), the Federal Highway Administration (FHWA), the Federal Railroad Administration (FRA), the Research and Special Programs Administration (RSPA) and the United States Coast Guard (USCG) (collectively referred to as "DOT" or "the agencies")— are considering modifying the random drug testing program. [The Federal Transit Administration (FTA) —also a part of DOT—published elsewhere in today's **Federal Register** a drug testing NPRM that proposes to adopt, among other things, the 50 percent random testing rate that is currently used by the other operating administrations. This ANPRM is not intended to affect the random drug testing program to be established by that rulemaking. Rather, this ANPRM will review the general issue. FTA joins the other operating administrations in issuing this random drug testing program notice requesting public comment and data concerning whether there are less costly alternatives to the current random testing program that can maintain an adequate level of deterrence and detection of illegal drug use.

DATES: Comments are due February 16, 1993. A public meeting on technical and scientific issues will be held on February 1, 1992, from 8:30 a.m. to 5 p.m. and on February 2, 1992, from 8:30 a.m. to 12:30 p.m. Seating is limited to 150, which will be offered on a first-come, first-served basis.

ADDRESSES: Comments should be sent to Docket 48498, Office of Documentary Services (C-55), U.S. Department of Transportation, room 4107, 400 Seventh Street, SW., Washington, DC 20590-0001. To provide a copy for each operating administration's docket and to facilitate the Department's review, we request that an original and seven additional copies of each comment be submitted.

The technical meeting will be held at the Holiday Inn—Capitol, 550 C St., SW., Washington, DC 20024. (202) 479-4000. The hotel is offering participants a special rate, if they mention the meeting when they reserve their room.

FOR FURTHER INFORMATION CONTACT: Dr. Donna Smith, Acting Director, Office of Drug Enforcement and Program Compliance, (202) 366-3784.

SUPPLEMENTARY INFORMATION: The Department of Transportation seeks comment on the effectiveness of the current random drug testing program for transportation industry employees. In the April 1992 "Report to the President: Review of Regulations," DOT Secretary Card committed to review this issue and determine whether adequate deterrence and detection of illegal drug use could be achieved at a lower rate of random testing and at a lower cost. In addition, several petitions have been filed with various operating administrations seeking to simply lower the rate of random drug testing.

The purpose of this notice is to seek data and ideas on additional strategies that would ensure the continued effectiveness of the Department's anti-drug program while reducing its cost. The Department is reluctant to propose a specific change in random testing requirements at this time because of the lack of data for transportation industry workers and because most of the operating administration programs have only been in place for a short time. Other than the experience of the military services that was relied on when the operating administrations originally set their random testing rates at 50 percent, we are unaware of any long-term reliable data indicating the relative deterrent effectiveness of different random testing rates. However, as described later in this document, DOT is gathering data that may help on this issue. Although the anti-drug regulations have been promulgated by various DOT agencies, we are issuing a Departmental ANPRM because of the commonality of the issues. We invite comment and supporting data on whether different programs for different industries would be appropriate. We have numbered specific questions within brackets throughout the ANPRM, and would appreciate it if commenters would reference those numbers in their responses.

Regulatory Background

DOT agencies have been involved in drug testing since the mid-1980s. The USCG has tested its uniformed personnel for drug use since 1982. DOT began testing certain of its civilian employees in September 1987.

The Department's civilian employee program is tightly controlled, centrally administered by headquarters staff, and monitored daily. Employee awareness and the visibility of the program are maintained through training programs conducted by regional drug program coordinators. Specimens are collected by a single contractor service, which operates under a uniform standard of procedures that provides for consistent and reliable collections.

The random testing program was phased-in and, by September 1988, DOT was testing a population of nearly 33,000 employees (primarily air traffic controllers, safety inspectors and individuals with high security clearances) at a testing rate of at least 50 percent each year for illegal drug use. The annual rate of positive random tests has declined from about 0.83 percent to as low as 0.21 percent over the last five years. Over the past three years, the rate consistently stayed well below 0.5 percent. The reports indicated that in this homogeneous, skilled, and stable population, there was no distinction in the percentage of positive testing results based on geography, age, etc. As a result of the apparent deterrent effect of the testing program as demonstrated by carefully-maintained recordkeeping, long experience, and the decreasing number of positive results, the Department lowered its federal employee random testing rate this year. Effective March 1, 1992, the Department has been conducting random testing at a rate of at least 25 percent annually. The positive rate continues to remain at a similarly low level. The Department

will continue to evaluate the data and may adjust the random testing rate, if necessary, back to 50 percent. The Department estimates that the reduction in the testing rate will save approximately 20 percent of the annual collection and laboratory testing costs.

The Federal Railroad Administration (FRA) has the longest experience with drug testing programs applicable to transportation industry workers. In 1986, railroads began pre-employment, post accident, and reasonable cause/suspicion testing, as required by the FRA.

In 1988, the Department of Transportation issued six final rules mandating anti-drug programs for certain transportation workers in the aviation, interstate motor carrier, pipeline, maritime, rail and transit industries. The rules included requirements for education, training, testing and sanctions. The testing component of each program included pre-employment, post-accident, reasonable cause, periodic (for those subject to periodic medical examinations) and random drug testing for approximately four million workers in safety-sensitive positions. Based on extensive experience and success in testing military and other populations, the Department imposed widescale random testing requirements because unannounced random drug testing is generally regarded as the best method of deterring illegal drug use.

The operating administrations' rules imposed a random testing rate of at least 50 percent per year. This means that if an employer has 400 covered employees, the employer must conduct at least 200 tests per year. Selection for testing must be random, with every employee in the random pool having an equal chance of being chosen each time a selection is made. Because of the randomness, some employees could be tested more than once in a given year, while others might not be tested for years. However, every covered employee would know that he or she had one chance in two of being tested each year. Employers were allowed to phase-in random testing at a rate of 25 percent for the first year, but had to increase to at least a 50 percent rate after one year.

After the final rules were issued, lawsuits delayed implementation of the rules for three of the six DOT agencies. As of today, only transit workers are not covered by the testing regulations. The 1988 final rule adopted by the Federal Transit Administration (formerly called the Urban Mass Transportation Administration) was vacated by the United States Court of Appeals for the District of Columbia Circuit because of a lack of statutory authority. Legislation (the FTA provisions of the Omnibus Transportation Employee Testing Act of 1991, Pub. L. 102–143, Title V, October 28, 1991) was subsequently enacted to remedy this problem as well as address other significant concerns with alcohol abuse and illegal drug use by individuals in various transportation industries who perform safety-sensitive duties. An NPRM proposing to cover transit employees is published elsewhere in today's **Federal Register**. As proposed, transit employees would be subject to a random testing rate of at least 50 percent. As noted above, this ANPRM involves a longer-term review of random testing program issues and is not intended to affect the random rate decision that must be made as part of FTA's proposed rulemaking. Several other DOT agency-regulated industries or industry sectors only recently began random testing at a 50 percent rate per year.

The Federal Railroad Administration phased-in random testing in three groups: Large railroads, medium-size railroads, and short line railroads. In January 1990, large railroads began testing at 25 percent, medium-size railroads began testing at 25 percent in July 1990 and short line railroads began testing at 25 percent in November 1990. Random testing at a 50 percent rate began one year after these dates for each of the three categories.

In the aviation industry, the 25 percent rate was instituted for large air carriers in December 1989, for medium-size carriers in April 1990, and for the smallest carriers in August of 1990. Testing at 50 percent began one year after the initial phase-in. Testing of contractor employees (such as repair station personnel or security screeners) began one year after the carriers that they worked for or supported.

Testing of pipeline personnel began next. Phase-in (25 percent testing) began in April 1990 for large operators and in August 1990 for small operators, with the 50 percent rate implemented one year later by each group.

Random and non-suspicion-based post-accident drug testing in the motor carrier industry were enjoined by court order, although the other types of testing were implemented on December 21, 1989. After the injunction was lifted, random testing by large motor carriers began in November 1991 at a 25 percent rate and testing by small motor carriers began in January 1992 at a 25 percent rate. One year after these dates, the rate increases to 50 percent. (The current rule covers just interstate motor carriers, but a proposed rule in today's **Federal Register** would extend coverage to all holders of commercial driver's licenses, including employees of intrastate motor carriers and school bus drivers.)

The USCG rule regarding random testing of merchant seamen was enjoined by court order in December 1989. Other types of testing were phased-in commencing in June 1989. In July 1991, the USCG issued a revised rule addressing the court's concerns and justifying the categories of employees subject to random testing. In October of 1991, the maritime industry began testing at a 25 percent random rate with a requirement to increase to a 50 percent rate one year after implementation. There was no distinction between large and small maritime employers for this implementation of random testing.

Only the Federal Aviation Administration and the Federal Railroad Administration require their regulated employers to report testing statistics to them. The Federal Highway Administration, the U.S. Coast Guard and the Research and Special Programs Administration review records maintained by covered employers, but do not have composite data for all positive test results in their industries. Separate NPRMs published in today's **Federal Register** would require that the employers (or industries) regulated by all six operating administrations submit uniform data concerning drug testing on an annual basis to those administrations. (Data from the motor carrier industry would be gathered on a survey basis.)

Purpose of Random Testing

The primary purpose of the Department's anti-drug rules is to ensure safety by deterring drug use, with detection an important collateral benefit. The integrity of the random selection process, the timing of the collection, the use of correct collection procedures, and the credibility of the MRO (medical review officer) verification actions must be considered when assessing the effectiveness of any random testing program in deterring drug use and detecting drug users. When drug users go undetected because of errors in the selection, collection, or review processes, the deterrent value for that employee and others is strongly diminished.

Random testing to achieve deterrence is a form of drug use prevention. Prevention generally is carried out using one or more of four strategies: Education, persuasion, motivation, or facilitation. Many companies have an existing drug education program. Employer policies, supervisor training, and peer-identification programs are

examples of a persuasion strategy. Drug testing is usually considered a tool for a motivational strategy in drug use prevention. Comprehensive Employee Assistance Programs are a major component of a facilitation model. In our view, workplace drug use prevention programs should consist of a mix of the four prevention strategies. These strategies must maintain or increase the visibility of the program and, therefore, the employees' awareness of it. Different employers and different industries may find different mixes of education, persuasion, motivation, and facilitation more effective and efficient in deterring drug use.

As the Department noted during the drug testing rulemakings and as FRA found when it added random testing to an existing testing program, random testing does deter use. FRA and the military services noted reductions in the positive rates for other types of drug testing after starting random testing. The Department seeks comment and data on the minimum effective random testing rate.

[1] Does increasing or decreasing the testing rate affect an individual's perception of the chances of being "caught" and increase or decrease deterrence? Why?

[2] Is there a mathematical relationship between the testing rate and deterrence, e.g., does doubling the rate double the deterrence?

[3] How does the increase or decrease in the rate affect the costs of testing, considering constant costs that exist regardless of the testing rate?

[4] To the extent the rate of positive tests is not expected to increase with a random testing rate reduction, please explain why.

[5] What is the lowest testing rate at which the rate of positive tests will not increase over the current positive test rate and how is it determined?

Random testing also helps to identify and remove drug users from safety-sensitive positions. Sanctions against detected drug users serve as effective deterrents for others. With any given prevalence of drug use, the higher the random testing rate, the higher the number of drug users who will be detected. At present, DOT's regulations call for each covered employee to be subject to random testing at the same rate as all other covered employees of that employer. Testing must be based on random selection, and employers are not permitted to target individuals or employee groups for selection for ostensibly "random" testing.

To the extent that detection is an important goal, lowering the random testing rate reduces the percentage of the workers tested over a given period and, therefore, reduces the number of drug users that would be identified. For example, if one assumes four testing periods per year and testing takes place over three years, then the following fractions of a workforce would be tested at least once during the three years at the following different annual testing rates.

Annual testing rate (percent)	Percent of workforce tested in 3 years
100	96.8
75	91.7
50	79.9
25	53.9
10	26.2

Available Data

The Department would appreciate public comment in identifying data concerning the effectiveness of random testing rates. The following summarizes the data currently available to the Department concerning the results of random testing in the regulated industries, the Department's civilian workforce, and the U.S. Coast Guard uniformed service.

AVIATION

	1990	1991
Total number of random tests	84,481	169,240
Number of positives	448	1,232
Percent positive	0.53	0.73

Data on 1991 reflects the inclusion of contractors and some testing at a 50 percent rate.

RAILROADS

	1990	1991
Total number of random tests	35,228	50,436
Number of positives	365	447
Percent positive	1.04	0.88

FRA's random testing regulations were issued in November 1988, with the first testing, as noted earlier, starting in January 1990. FRA has kept records of post-accident drug testing for the last five years. For purposes of analyzing any effect from the issuance of the requirement or the implementation of the testing, the positive rates for post-accident testing are provided; they are as follows:

Percent				
1987	1988	1989	1990	1991
5.1	5.6	3.0	3.0	1.1

For similar purposes, the positive rates for reasonable cause testing are provided; they are as follows:

Percent				
1987	1988	1989	1990	1991
5.4	4.7	3.6	1.8	1.9

FRA is currently conducting an experimental study of eight railroads, comparing testing results at the 25 percent and 50 percent random testing rates. The study began in July 1991 and is expected to be completed in July 1993. Data from the first year of the study are now being analyzed and will be released to the public shortly. Initial indications are that the FRA data do not show an increase in positive rates for the railroads conducting random testing at the 25 percent rate. However, all of these railroads had implemented testing at a 50 percent rate for some period and then lowered it for the experimental program.

Motor Carriers

In audits of 8,384 motor carrier drug testing programs by FHWA in FY 1992, records indicated that 13,612 random tests were conducted. There were 289 verified positive results (2.12 percent). The audits represent less than 5 percent of motor carriers subject to the FHWA rule. The FHWA selects motor carriers for these general compliance investigations by determining factors such as a safety rating or prior compliance problem. These compliance investigations do not offer scientific, statistically unbiased sampling methods.

U.S. DOT Employees

In the Department's Federal employee testing program, the random testing rate of at least 50 percent was phased-in over the first year of the program and achieved at the end of FY 1988. A testing rate of at least 50 percent was maintained in FY 1989–1991. In FY 1992, the figures reflect testing over the first five months with a rate of at least 50 percent, followed by seven months of testing with a rate of at least 25 percent. (As noted earlier, DOT decided to lower its testing rate in 1992.) The following table summarizes DOT Federal employee random testing data.

	FY88	FY89	FY90	FY91	FY92
Total number of random tests	5,047	17,926	19,103	18,671	12,454
Number of positives	42	92	43	40	39
Percent positive	0.83	0.51	0.23	0.21	0.31

As noted earlier, the USCG has been conducting random drug tests on its active duty and reserve uniformed personnel. Rather than setting a specific testing rate as a requirement at the beginning of the fiscal year, the USCG conducts the maximum number of tests possible from the funds that are appropriated. The percentage of positive results for random tests in each fiscal year and the approximate testing rate was as follows:

Percent	1987	1988	1989	1990	1991	1992
Percent positive	1.57	1.31	0.66	0.41	0.41	0.78
Testing rate	120	95	95	95	85	85

Testing Rates in Various Federal Agencies

Executive Order 12564, "Drug-Free Federal Workplace", signed by President Reagan in September 1986, required random drug testing of safety- and security-related Federal employees in 135 Federal executive branch agencies. According to a 1991 report of the General Accounting Office ("Employee Drug Testing: Status of Federal Agencies' Programs: Report to the Chairman, Committee on Governmental Affairs," U.S. Senate, (May 1991), GAO/FFD–91–70, 14–19,) there is a wide variation in the random drug testing rates at the 18 agencies that GAO reviewed.

Alternatives

There are a number of alternatives to the current 50 percent random testing rate that DOT could consider. They include:

(1) Making an across-the-board modification of the rate for all DOT anti-drug programs;

(2) Modifying how the random testing rate is implemented (e.g., frequency of testing, etc.)

(3) Making a selective modification of the rate by

(a) Operating administration (e.g., FAA or FRA could modify its rate);

(b) Job category (e.g., pilots, train engineers);

(c) Any other category that warranted a different rate based on drug use prevalence or other factors (e.g., age or geographic region);

(4) Establishing a performance standard program (as discussed later);

(5) Permitting employers who take specified additional steps to deter drug use to reduce their random testing rate;

(6) Modifying the random testing rate for all operating administration rules for a specific time period, subject to reconsideration after the results are analyzed;

(7) Conducting demonstration programs in each operating administration before further action is taken; or

(8) Combining some of the alternatives.

[6] DOT requests comment on these alternatives and information on any other possible alternatives.

Modifying the random testing rate across-the-board in each operating administration would result in the simplest rule and program changes and would be the easiest to enforce. Lowering the rate could reduce costs significantly with an undetermined impact on deterrence, but it would unavoidably result in less detection of drug users. Some argue that what data DOT has show very low positive rates and, therefore, the random testing rate can be reduced.

[7] Is the rate of positive test results low because the 50 percent testing rate is the minimum effective deterrent?

[8] Does a low rate of positives alone warrant a change? Does this make the rate "acceptable" for safety purposes?

[9] Is detecting fewer users acceptable even though the positive rate is the same?

Changes in how random testing is implemented in the workplace may be another approach to maintaining deterrence at a lower testing rate. For example, increasing the number of times random testing is conducted during the year may serve to increase awareness and visibility of the testing program, thus maintaining effective deterrence even though the actual number of employees tested is decreased. Procedures that ensure each person randomly selected is actually tested (*e.g.*, if a selected employee is not available, the name would be kept confidential until the employee is available for testing), as opposed to random testing procedures that allow selected individuals to "be excused" because of temporary unavailability, may also serve to maintain effective deterrence by making it more difficult for drug users to avoid detection. A policy that requires a re-collection of a specimen from a selected individual when a random test has been cancelled or the results invalidated would help deter individuals from adulterating their specimens or otherwise obstructing the testing process.

Authorizing variable random rates among operating administrations or within a workplace is another option to consider in improving deterrence and detection while reducing the overall random rate. Employers could test certain categories of employees at higher rates based on prevalence or incidence differences in the population. For example, if prevalence of drug use is greater among mechanics than among flight attendants, the employer could test mechanics at a 50 percent rate and flight attendants at a 20 percent rate. Variable rates enable deterrence and detection efforts to be targeted where drug use is most likely. A variable rate strategy, however, should be based on prevalence and incidence data, not individualized suspicion or personal characteristics. Such an approach would require employers to maintain several random pools and systematically determine drug use prevalence and incidence data, something especially difficult for small firms. This approach may present compliance and enforcement difficulties.

Another of the options DOT is exploring is use of a "performance standard" for establishing random testing rates for a specified group such as an industry, a job category, or an individual employer. The group's overall rate of testing would be determined by the success of the group in deterring drug use as measured by its rate of positive random tests. For example, if a group's positive rate is less than one percent over a given period of time, the group could be permitted to

reduce the random testing rate (*e.g.*, to 25 percent or 10 percent.) If the positive rate increased under a reduced random testing rate, the group would be required to return to a higher random testing rate. The advantage of this approach is that it could lower costs to large segments of the transportation industry, if groups could maintain low positive rates. It would also provide an incentive to achieve low positive rates, the ultimate objective of DOT's program, and would reward those groups with effective programs. Such an approach would also encourage such groups to use whatever additional steps other than testing that are appropriate in their situation, perhaps resulting in more effective programs. For example, some groups may find increased education helpful in increasing the effectiveness of their anti-drug programs.

There are many potential obstacles to implementing such an approach. It would require collection of additional testing data from each group that might offset savings in testing costs. Although this may not be a difficulty for some operating administrations, it may be more problematic in others. In the motor carrier industry, for example, even if the reports could be submitted, it is not clear that FHWA could effectively review and respond to reports from hundreds of thousands of motor carriers on millions of employees. From the Department's point of view, a performance standard program would be harder to administer because the operating administrations would have to monitor both positive rates and random testing rates for every affected group to ensure proper compliance. In addition, it may be difficult to effectively apply a low random testing rate in small companies. (For example, if a company with one or two employees had to test at only 10 percent, employees might not be deterred if they knew the next test might not be for five or six years—and DOT would not get any reports to determine whether the rate of positive test results was being kept low.) Finally, there would be less detection of drug users at a lower rate. The Department is also concerned with whether this type of performance standard would be an incentive to cheating. Employers might be tempted to falsify test results that were positive in order to maintain a reduced random testing rate.

As another approach, the Department could consider reducing the random testing rate but requiring additional steps such as increased education. Or, it could offer a lower rate to those employers that took extra steps to increase deterrence.

Another approach would be to conduct a demonstration program in each operating administration. FRA is currently in the middle of such a program. These studies could include pilot projects that explore positive rates in relationship to different random testing rates. Demonstration programs that include other deterrent or prevention initiatives in addition to random testing could explore the relationship among education, training and awareness strategies and the random testing rate. Pilot studies have the advantage of examining specific variables in relationship to deterrence and detection outcomes in a controlled study environment.

As discussed earlier, there are many alternative methods in addition to testing to deter illegal drug use, including education.

[10] Which methods do commenters believe to be the most effective? What is the basis for your belief?

[11] Should the Department mandate use of one or more of these methods in addition to current requirements in the anti-drug rules, or should it leave it up to the discretion of employers as a supplement to a testing program? Why?

In an attempt to explore the relevant research, random testing implementation strategies, and drug deterrence methodologies, to help it in this rulemaking, the Department will convene a conference on workplace random testing and drug deterrence. The conference will be open to the public. Details on the conference agenda, date and location will be offered in a subsequent announcement. Information gathered from the conference will be considered along with comments received on this ANPRM in determining the next appropriate action.

Additional Questions

The Department would appreciate commenters responding to the following additional questions and providing whatever data or studies might support their position.

[12] Should other factors apply to any decision to adjust the random testing rate besides deterrence, detection, and costs? What are they and why are they relevant?

[13] What data would justify a change? Are low positive rates alone sufficient? How do we determine if positive rates are low because the 50 percent testing rate is acting as a deterrent?

[14] What is the effect of the quality of the selection and collection process on the positive rates that are currently being produced? As the selection and collection processes improve with experience or enforcement, will the positive rates be higher? How should any potential for increased detection with improved collection affect any decision concerning the random testing rate?

[15] Can performance-based programs be developed, operated, and audited within the currently operating consortia programs? If so, how? Does participation in a consortium exacerbate the problems associated with implementation and enforcement of a performance standard for random rates?

[16] If analysis of positive rates is necessary before a decision can be made to reduce the random testing rate, for how long a period must DOT have data? What should DOT do about those industries for which it currently has little or no data? Should operating administrations that have reliable, accurate data consider taking action now? Elsewhere in today's **Federal Register** we are proposing extensive data collection for all six operating administrations. This data would not, however, be available for some time.

[17] What if positive rates were to increase after DOT lowered the random testing rate? Is some increase in the rate of positive tests acceptable? How much and why? Are there other reasons the rate could rise beside the lower random test rate?

[18] What cost reductions could be expected if the random testing rate is reduced to 25 percent? 10 percent? What is the basis for these estimates? Even if some increase in positive rates is expected with a lower random testing rate, is a reduction in the random testing rate nevertheless justified based on reduced costs? Please explain.

[19] Are there offsetting cost increases that could occur at a reduced random testing rate (*e.g.*, consortium cost per test, more accidents)?

[20] If a change is made, should it apply equally to all of the DOT operating administrations' programs, or only as justified by operating administration specific data? If particular industries, segments of industries or particular employers achieve very low positive rates, should they be allowed to have different testing rates? Could this be effectively implemented? Should random testing rates be linked to drug use in particular groups based on prevalence or incidence data available for such groups (*i.e.*, age groups, occupational categories, specific types of worksites?)

[21] What additional means of increasing deterrence are available to the government and industry to supplement random drug testing? How

would these strategies work? What would they cost? What is the evidence they work?

[22] How might DOT restructure its requirements for drug use prevention programs to maximize the efficiency and effectiveness of prevention within the transportation industry?

[23] Could a "performance standard" work? Would there be too much incentive for some groups to cheat? How could DOT effectively implement or enforce such a standard, especially for motor carriers? Is the data collection that would be required more trouble and expense than conducting a higher rate of random tests? Would the trouble and expense vary by operating administration? Please comment on the difficulties in administering such a program and the increase in enforcement oversight that would be required. How could it effectively be implemented for small companies? Would it work if implemented industry-by-industry or among segments of a given industry? Could it be effectively implemented and enforced employer-by-employer?

[24] Any reduction in the random testing rate will result in less detection. The lower the rate, the less the detection. Are there alternative approaches apart from random testing that could offset potential reductions in detection? What is their projected efficiency and effectiveness, compared with current programs? What would they cost? What is the basis of the numbers? Are there safety implications?

[25] Are there any additional data or studies concerning rates of drug testing and deterrence that may be relevant to the Department's consideration?

[26] Should each operating administration conduct a demonstration program to gather data on the relative effectiveness of different rates specific to its regulated industry? What outcome measures would be appropriate in such pilot programs?

[27] Should one or more operating administrations reduce the random testing rate for a specific time period and then analyze the results? What period of time is adequate for determining the impact on deterrence?

Regulatory Analyses and Notice

DOT Regulatory Policies and Procedures

The ANPRM is considered to be a significant rulemaking under DOT Regulatory Policies and Procedures, 44 FR 11034, because of the substantial public and Congressional interest in this subject. It is difficult to estimate potential costs or benefits at this time because the Department is not proposing specific options.

Executive Order 12612

This ANPRM has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that it does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Executive Order 12630

This ANPRM has been analyzed in accordance with the principles and criteria contained in Executive Order 12630, and it has been determined that any potential modification in the random drug testing program does not pose the risk of a taking of constitutionally protected private property.

Regulatory Flexibility Act

Depending on what, if any, action is ultimately proposed and adopted, a potential modification in the random drug testing program could have a significant economic impact on a substantial number of small entities. The Department specifically seeks public comment on the effect, if any, of potential changes in the program on small entities as well as any suggested alternative approaches. Further review will be conducted based on comments received on this notice and when, and if, a notice of proposed rulemaking is issued.

Paperwork Reduction Act

There are a number of reporting or recordkeeping requirements associated with DOT-mandated drug testing. Because the purpose of this notice is to solicit information, no specific changes are being proposed at this time. The Department notes that effective implementation of possible alternatives and the gathering of data necessary to justify any changes, compare alternatives, or permit the implementation of some approaches may require recordkeeping and reporting by the affected industries. We are proposing substantial data collection concerning drug testing elsewhere in today's **Federal Register**.

National Environmental Policy Act

The Department has determined that this rulemaking is not a major Federal action significantly affecting the quality of the human environment and that an environmental impact statement is not required.

Part X

Department of Housing and Urban Development

Office of the Assistant Secretary for Administration

48 CFR Parts 2401, et al.
HUD Acquisition Regulation (HUDAR); Final Rule

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Administration

48 CFR Parts 2401, 2402, 2403, 2405, 2406, 2409, 2413, 2414, 2415, 2416, 2419, 2425, 2426, 2428, 2432, 2433, 2436, 2437, 2446, 2452

[Docket No. R–92–1600; FR–2473–F–02]

RIN 2535–AA16

HUD Acquisition Regulation (HUDAR)

AGENCY: Office of the Assistant Secretary for Administration, HUD.

ACTION: Final rule.

SUMMARY: This rule makes final a proposed rule published for comment on June 8, 1992 (57 FR 24334) amending the HUD Acquisition Regulation (HUDAR). The final rule also contains amendments not proposed on June 8, 1992 regarding the procurement activities of the Government National Mortgage Association (GNMA).

EFFECTIVE DATE: January 14, 1993.

FOR FURTHER INFORMATION CONTACT: Edward L. Girovasi, Jr., Director, Policy and Evaluation Division, Office of Procurement and Contracts, room 5262, 451 Seventh Street, SW., Washington, DC 20410–3000 (voice (202) 708–0294. TDD (202) 708–1112). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: The information collection requirements contained in this rule have been approved under the Paperwork Reduction Act of 1980 by the Office of Management and Budget (OMB), and have been assigned OMB control number 2535–0091.

Background

The uniform regulation for the procurement of supplies and services by Federal departments and agencies, the Federal Acquisition Regulation (FAR), was promulgated on September 19, 1983 (48 FR 42102). The FAR is codified in title 48, chapter 1, of the Code of Federal Regulations. The HUD Acquisition Regulation (HUDAR), which implements the FAR, is codified in title 48, chapter 24 of the Code of Federal Regulations.

On June 8, 1992 (57 FR 24334), HUD proposed amendments to the HUDAR to update existing coverage and to include additional necessary procedures to reflect recent changes to the Federal Acquisition Regulation (FAR). No comments were received during the public comment period, which ended August 7, 1992. This rule makes final the amendments, as revised, proposed on June 8.

Amendments Not Contained in Proposed Rule

The final rule also contains amendments to the HUDAR necessary to implement a policy by the Department that all procurement activities by the Government National Mortgage Association (GNMA), with the exception discussed later in this preamble, must be awarded in conformance with the FAR, the HUDAR, and the Federal Information Resources Management Regulations (FIRMR).

The HUDAR currently provides that the procurement authority of the President of GNMA, with respect to requirements related to GNMA's programmatic functions, is exempt from the HUDAR. The Department has determined that all GNMA acquisitions must be conducted in accordance with the FAR, the HUDAR, and the FIRMR, with the exception of (1) transactions with issuers of mortgage-backed securities, including subissuers (or subservicers) acting in place of defaulted or otherwise terminated issuers, in furtherance of GNMA's guaranty of those securities under section 306(g) of the National Housing Act, and (2) transactions involving the sale or guaranty of financial instruments. Changes to §§ 2401.601–70, 2401.601–72, and 2402.101 are being made to implement this policy.

In addition to the amendments with respect to GNMA, technical corrections are being made in the final rule to §§ 2401.601–71, 2401.603–2, 2402.101, 2403.670, 2406.304–71(c), 2415.604(b), 2415.608(a), 2415.612–70, and 2452.203–71. These corrections are necessary to correspond to the changes contained in the June 8, 1992 proposed rule.

The Department's regulations on rulemaking at 24 CFR part 10 provide that a rule will be published for public comment before issuing the rule for effect. However, part 10 provides for exceptions from that general rule when the Department finds good cause to omit advance notice and public participation. The good cause requirement is satisfied when prior public participation is "impracticable, unnecessary, or contrary to the public interest." (24 CFR 10.1) The Department finds that good cause exists to publish the amendments for effect without first soliciting public comment because the prior public participation is unnecessary. The amendments are for the purpose of implementing changes in the internal organization of the Department with regard to GNMA's procurement authority, and technical changes necessary to conform certain sections to the amendments proposed on June 8, 1992.

Other Matters

Paperwork Reduction Act

The information collection requirements contained in this rule were approved under the Paperwork Reduction Act of 1980 by OMB, and were assigned control number 2535–0091.

National Environmental Policy Act

A Finding of No Significant Impact with respect to the environment as required by the National Environmental Policy Act (42 U.S.C. 4321–4374) (NEPA) is unnecessary, since the activities described in this rule are categorically excluded from the Department's NEPA procedures under 24 CFR 50.20(k).

Executive Order 12291, Federal Regulation

This rule does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291, Federal Regulation, issued by the President on February 17, 1981. An analysis of the rule indicates that it will not (1) have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

The Secretary, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this rule before publication and by approving it certifies that this rule will not have a significant economic impact on a substantial number of small entities because the changes relate to the internal organization of HUD and conform the HUDAR to the FAR.

Executive Order 12612, Federalism

The General Counsel, as the Designated Official under Section 6(a) of Executive Order 12612, Federalism, has determined that the policies contained in this rule will not have substantial direct effects on States or their political subdivisions, or the relationship between the Federal government and the States, or on the distribution of

power and responsibilities among the various levels of government. The rule updates the HUD Acquisition Regulation (HUDAR) to reflect recent changes to the Federal Acquisition Regulation (FAR) and makes technical corrections to the agency's regulation. As a result, the rule is not subject to review under the Order.

Executive Order 12606, The Family

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this rule will not have potential for significant impact on family formation, maintenance, and general well-being, and, thus, is not subject to review under the Order. The rule involves Departmental procurement procedures.

Semiannual Agenda of Regulations

This rule was listed as Item No. 1488 in the Department's Semiannual Agenda of Regulations published on November 3, 1992 (57 FR 51392, 51432) pursuant to Executive Order 12291 and the Regulatory Flexibility Act.

List of Subjects in 48 CFR Parts 2401, 2402, 2403, 2405, 2406, 2409, 2413, 2414, 2415, 2416, 2419, 2425, 2426, 2428, 2432, 2433, 2436, 2437, 2446, 2452

Government procurement, HUD acquisition regulations.

Accordingly, title 48, chapter 24 of the Code of Federal Regulations, is amended as follows:

SUBCHAPTER A—GENERAL

PART 2401—FEDERAL ACQUISITION REGULATION SYSTEM

1. The authority citation for 48 CFR part 2401 is revised to read as follows:

Authority: 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

2401.601–70 [Amended]

2. Section 2401.601–70 is revised to read as follows:

2401.601–70 Senior Procurement Executive.

The Assistant Secretary for Administration is the Department's Senior Procurement Executive and is responsible for all Departmental procurement policy, regulations, and procedures, except for internal procedures related to procurement transactions conducted by the Government National Mortgage Association. The Senior Procurement Executive is also responsible for the development of HUD's procurement system standards, evaluation of the system in accordance with approved criteria, enhancement of career management of the procurement work force, and certification to the Secretary that the Department's procurement system meets approved criteria.

2401.601–71 [Amended]

3. Section 2401.601–71 is revised to read as follows:

2401.601–71 Office of Procurement and Contracts.

Except as provided otherwise is this chapter, the Office of Procurement and Contracts, in the Office of the Assistant Secretary for Administration, is responsible for all Departmental procurement.

2401.601–72 [Removed]

4. Section 2401.601–72 is removed.

2401.601–73 [Redesignated as 2401.601–72 and amended]

5. Section 2401.601–73 is redesignated as 2401.601–72 and revised to read as follows:

2401.601–72 Government National Mortgage Association.

(a) The President, GNMA, may exercise authority under section 306(g) of the National Housing Act and 24 CFR part 390 to enter into agreements with the issuers of mortgage-backed securities. The FAR and the HUDAR do not apply to these transactions, including the assignation of servicing requirements to a substitute servicer or issuer in the event of a default by, or other termination of, an issuer.

(b) Sales or guarantees of securities by GNMA are outside the scope of this part.

(c) All contracts that are not within the scope of paragraphs (a) and (b) of this section, and that are for the acquisition of supplies and services, shall be awarded in conformance with the FAR and HUDAR and, as appropriate, the FIRMR.

2401.601–74 [Redesignation as 2401.601–73 and amended]

6. Section 2401.601–74 is redesignated as 2401.601–73 and revised to read as follows:

2401.601–73 Regional Offices.

(a) Procurement of supplies and services for HUD Regional requirements is accomplished at each Regional Office by the Regional Contracting Division, which may redelegate contracting authority to qualified employees in Regional and Field Offices.

(b)(1) The Regional Administrator shall redelegate to Field Office Directors of Housing Management the following procurement authority related to the management or disposition of properties owned or held by HUD as mortgagee-in-possession under the National Housing Act (12 U.S.C. 1701–1749):

(i) Emergency procurement authority (pursuant to FAR 6.302–2); and

(ii) In those Field Offices without full-time contracting personnel, small purchase authority (pursuant to FAR part 13).

(2) The Regional Administrator may also redelegate small purchase authority to Office of Housing employees designated by the Field Office Director of Housing Management in those Field Offices without full-time contracting personnel.

(c) Any redelegation of procurement authority in paragraphs (a) and (b) of this section shall be accomplished on a Standard Form 1402, Certificate of Appointment, which may be revoked upon a showing that the individual has consistently failed to adhere to sound procurement practices. Any revocation of authority in (b) above shall only occur after consultation with the Assistant Secretary for Housing-Federal Housing Commissioner.

2401.603–2 [Amended]

7. Section 2401.603–2, paragraph (c) is revised to read as follows:

2401.603–2 Selection.

* * * * *

(c) Training courses as prescribed by the Senior Procurement Executive.

* * * * *

2401.603–3 [Amended]

8. Section 2401.603–3, paragraph (b) is amended by removing the words "Field Office Managers or Supervisors" and adding, in their place, the words "Appointing officials."

PART 2402—DEFINITIONS OF WORDS AND TERMS

9. The authority citation for 48 CFR part 2402 is revised to read as follows:

Authority: 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

2402.101 [Amended]

10. In section 2402.101, under the definition "Head of Contracting Activity," paragraph (2) is revised, paragraphs (3), (4), and (5) are removed, paragraph (6) is redesignated as paragraph (3) and revised, and a new definition is added in alphabetical order, to read as follows:

2402.101 Definitions.

* * * * *

Head of Contracting Activity is defined in accordance with the FAR.

The following HUD officials are designated HCAs:

* * * * *

(2) The Regional Directors, Offices of Administration, for Regional Office procurements, which authority may be redelegated to the Director, Regional Contracting Division;

(3) The President, Government National Mortgage Association (GNMA), for procurement transactions that are conducted by GNMA in accordance with 2401.601–72(c).

* * * * *

Source Selection Official (SSO)—means the head of the funding office, or designee.

PART 2403—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST

11. The authority citation for 48 CFR part 2403 is revised to read as follows:

Authority: 42 U.S.C. 3535(d).

Subpart 2403.3—[Amended]

12. The heading for subpart 2403.3 is amended by removing the words "Identical Bids and".

13. A new section 2403.670 is added to subpart 2403.6, to read as follows:

2403.670 Solicitation Provision and Contract Clause.[1]

Insert the clause at 2452.203–70 in all solicitations and contracts, and the provision at 2452.203–71 in all solicitations.

SUBCHAPTER B—COMPETITION AND ACQUISITION PLANNING

PART 2405—PUBLICIZING CONTRACT ACTIONS

14. The authority citation for 48 CFR part 2405 is revised to read as follows:

Authority: 42 U.S.C. 253; 40 U.S.C. 486(c); 42 U.S.C. 3535(d); and FAR class deviation approved November 15, 1990.

15. Subpart 2405.3, consisting of section 2405.301, is added, to read as follows:

Subpart 2405.3—Synopses of Contract Awards

2405.301 General

(b) All contract awards exceeding the small purchase limitation shall be synopsized in the Commerce Business Daily, without exception.

[1] This HUDAR provision/clause has been submitted to the FAR Secretariat for consideration as FAR coverage with Governmentwide application. In the event that similar FAR coverage is issued, HUD will rescind the corresponding HUDAR text.

PART 2406—COMPETITION REQUIREMENTS

16. The authority citation for 48 CFR part 2406 is revised to read as follows:

Authority: 42 U.S.C. 253; 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

2406.304–70 [Removed]

17. Section 2406.304–70 is removed.

2406.304–71 [Redesignated as 2406.304–70]

18. Section 2406.304–71 is redesignated as 2406.304–70.

19. Section 2406.304–72 is redesignated as 2406.304–71, and paragraph (c) is revised to read as follows:

2406.304–71 Approval of the justification—Procurement Review Board.

* * * *

(c) Regional Administrators-Regional Housing Commissioners may provide for the operation of Regional Procurement Review Boards.

PART 2409—CONTRACTOR QUALIFICATIONS

20. The authority citation for 48 CFR part 2409 is revised to read as follows:

Authority: 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

2409.501 [Removed]

21. Section 2409.501 is removed.

2409.502 [Amended]

22. Section 2409.502 is amended by removing the words "consulting services" and adding, in their place, the words "advisory and assistance services".

23. A new section 2409.503 is added, to read as follows:

2409.503 Waiver.

The Senior Procurement Executive is authorized to waive any general rule or procedure in FAR Subpart 9.5 by determining that its application to a particular situation would not be in the Government's interest.

2409.504 [Amended]

24. Section 2409.504 is amended by revising the introductory text to read as follows:

2409.504 Contracting officer responsibilities.

The following actions are required for all contract actions covered by 2409.502:

* * * * *

SUBCHAPTER C—CONTRACTING METHODS AND CONTRACTING TYPES

PART 2413—SMALL PURCHASE AND OTHER SIMPLIFIED PURCHASE PROCEDURES

25. The authority citation for 48 CFR part 2413 is revised to read as follows:

Authority: 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

26. In section 2413.505–2, paragraph (b) is revised to read as follows:

2413.505–2 Agency order forms in lieu of Optional Forms 347 and 348.

* * * * *

(b) For small purchase under the Acquired Property Program, Contracting Officers may use HUD Form 2542, Purchase Order and Payment Authorization. This form may also be used for the following:

(1) Construction work under the small purchase limitation; however, if over $2,000, the Davis-Bacon Act and related requirements/clauses are applicable; or

(2) Services, including indefinite delivery purchase orders; however, if over $2,500, the Service Contract Act and related requirements/clauses are applicable.

PART 2414—SEALED BIDDING

27. The authority citation for 48 CFR part 2414 is revised to read as follows:

Authority: 41 U.S.C. 253; 42 U.S.C. 486(c); 42 U.S.C. 3535(d).

28. Section 2414.406–3 is revised to read as follows:

2414.406–3 Other mistakes disclosed before award.

(e) The determination to allow a bidder to: Correct a mistake in bid discovered before award (other than obvious clerical errors); withdraw a bid; or, neither correct nor withdraw a bid shall be submitted to the Head of the Contracting Activity for approval.

PART 2415—CONTRACTING BY NEGOTIATION

29. The authority citation for 48 CFR part 2415 is revised to read as follows:

Authority: 41 U.S.C. 253; 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

30. In section 2415.407, paragraph (a) is revised to read as follows:

2415.407 Solicitation provisions.

(a) The Contracting Officer shall insert a provision substantially the same as the provision at 2452.215–70, Proposal Content and Outline, in all negotiated solicitations above the small purchase limitation. Include Section 6 in paragraph (b) of the provision if the

solicitation requires work on or access to sensitive automated systems and HUDAR clause 2452.237–76 is included.

* * * * *

31. Section 2415.604 is revised to read as follows:

2415.604 Responsibilities.

(b) For procurements of $500,000 or more, the technical requirements related to source selection shall be performed by a Source Evaluation Board (SEB), as described in 2415.612. For procurements under $500,000, the technical requirements related to source selection shall be performed by a Technical Evaluation Panel (TEB); except that an SEB may be used for procurements under $500,000 at the request of the head of the funding office.

32. In section 2415.608, paragraph (a) is revised to read as follows:

2415.608 Proposal evaluation.

(a)(2) *Technical evaluation.* The technical evaluation shall assign each proposal a score on the basis of the factors specified in the solicitation. The technical evaluation shall identify each proposal as being either acceptable or unacceptable. A proposal shall be considered unacceptable if it is so clearly deficient that it cannot be corrected through written or oral discussions. Predetermined cut-off scores designed to determine a threshold level of acceptability of proposals shall not be employed.

(3) A technical evaluation report shall be prepared and signed by the technical evaluator or evaluators, furnished to the Contracting Officer, and maintained as a permanent record in the official procurement file. In addition to the documentation listed in FAR 15.608(a)(2) (i)–(iv), the report shall include:

(i) The score of each proposal;

(ii) A narrative evaluation specifying the strengths and weaknesses of each proposal;

(iii) Any reservations or qualifications that may bear upon the selection of a source or sources for negotiation and/or award;

(iv) Specific technical reasons supporting a determination of unacceptability with respect to any proposal; and

(v) Score sheets of all evaluators.

* * * * *

2415.611 [Removed]

33. Section 2415.611 is removed.

2415.611–70 [Removed]

34. Section 2415.611–70 is removed.

35. Section 2415.613 is redesignated as section 2415.612 and revised to read as follows:

2415.612 Formal source selection.

(b) *Responsibilities.* (1) Selection of the source(s) for award shall be made by the Source Selection Official (SSO), who is the head of the funding office, or by his or her designee.

(2) To assist the SSO in evaluating proposals and making the selection, the SSO shall designate a Source Evaluation Board (SEB) composed of a chairperson, voting members, and advisors.

36. Section 2415.613–70 is redesignated as 2415.612–70 and revised to read as follows:

2415.612–10 Procedures.[2]

(a) *Evaluation.* (1) After the date for receipt of proposals, the Contracting Officer will forward copies of the technical portion of each proposal to the SEB Chairperson or his or her designee, who shall be responsible for custody of the proposals throughout the evaluation process. The cost portion of each proposal shall be retained by the Contracting Officer pending initial technical evaluation by the SEB.

(2) The SEB shall conduct a technical evaluation of each proposal in accordance with the requirements in 2415.608(a)(2).

(3) After the initial technical evaluation, the Contracting Officer and the SEB shall evaluate the cost portion of each proposal.

(b) *Competitive range.* Unless the SEB is prepared to recommend, in accordance with FAR 15.610(a)(3), that the award be made on the basis of the most favorable initial proposal, the Contracting Officer shall, with the advice of the SEB, establish a competitive range based on evaluation of all the factors for award, including cost or price.

(c) *Written or oral discussions.* The Contracting Officer, with the assistance of the SEB, shall conduct written or oral discussions with all offerors within the competitive range, as required by FAR 15.610.

(d) *Source selection decision.* The SEB shall document its selection recommendation or recommendations in a final report addressed to the SSO. The report shall contain the documentation specified in 2415.608(a)(3).

2415.613–71 [Removed]

37. Section 2415.613–17 is removed.

38. A new section 2415.613 is added to read as follows:

2415.613 Alternative source selection procedures.

(a) The Department of Housing and Urban Development uses procedures authorized by FAR 15.613 for all research and development contracts and other contracts where the contractor's proposed methodology of carrying out the work is a significant selection factor.

(b) These procedures allow for limited oral or written discussions to avoid technical leveling, a request for best and final offers, and selection of source(s) for negotiation of a final contract.

39. A new section 2415.613–70 is added to read as follows:

2415.613–70 Technical evaluation.

Depending on the anticipated dollar value of the procurement (see 2415.604 and 2415.612(a)), either a TEP or SEB shall perform the required technical evaluation of proposals received in accordance with 2415.608 and 2415.612, respectively.

40. A new section 2415.613–71 is added to read as follows:

2415.613–71 Limited written or oral discussions.

Limited written or oral discussions shall be conducted with each offeror considered to be within the competitive range. These discussions should address technical weaknesses of the particular offer, as well as cost issues, to the fullest extent practicable while avoiding technical leveling.

41. A new section 2415.613–72 is added to read as follows:

2415.613–72 Selection and final negotiation.

(a) *Selection.* After the close of discussions and receipt of best and final offers, the TEP or SEB shall perform a final evaluation and prepare its selection recommendation for the contracting officer or SSO, respectively. Based on this evaluation, the contracting officer or SSO shall select for final contract negotiation the offeror(s) whose proposal is most advantageous to the Government in terms of price/cost, technical and other relevant factors included in the solicitation.

(b) *Final negotiation.* This includes reaching agreement with the selected source on any remaining cost/price, technical, socioeconomic, or other issues that will condition performance of the contract and setting forth those terms and conditions in a mutually acceptable contract document. No factor or condition that could have had any effect on the selection process may be

[2] This HUDAR provision/clause has been submitted to the FAR Secretariat for consideration as FAR coverage with Governmentwide application. In the event that similar FAR coverage is issued, HUD will rescind the corresponding HUDAR text.

changed at this point. These negotiations are led by the contracting officer and may include any technical, audit, or support personnel he/she deems necessary.

PART 2416—TYPES OF CONTRACTS

42. The authority citation for 48 CFR part 2416 is revised to read as follows:

Authority: 42 U.S.C. 3535(d).

43. Section 2416.504 is revised to read as follows:

2416.504 Indefinite-quantity contracts.

(e) The contracting officer shall insert the clause at 2452.216–75, Unpriced Task Orders, in contracts for which task orders are individually negotiated and there may be a need to issue unpriced task orders; provided, however, that the contracting officer shall ensure that the cost of the work authorized by the task order is not in excess of the funds obligated under the contract.

SUBCHAPTER D—SOCIOECONOMIC PROGRAMS

PART 2419—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

44. The authority citation for 48 CFR part 2419 is revised to read as follows:

Authority: 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

45. Subpart 2419.7, consisting of section 2419.708, is added to read as follows:

Subpart 2419.7—Subcontracting with Small Businesses and Small Disadvantaged Business Concerns

2419.708 Solicitation Provisions and Contract Clauses.[3]

(d) The Contracting Officer shall insert the provision at 2452.219–70 in negotiated solicitations exceeding $500,000 that are not set aside for small business or 8(a) concerns.

(e) The Contracting Officer shall insert the provision at 2452.219–70 with Alternate I in sealed bid solicitations exceeding $500,000 that are not set aside for small business or 8(a) concerns.

46. A new part 2425, consisting of section 2425.402, is added to read as follows:

[3] The coverage provided in paragraphs (d) and (e) have been submitted to the FAR Secretariat for consideration as FAR coverage with Governmentwide application. In the event that similar FAR coverage is issued, HUD will rescind the corresponding HUDAR text.

PART 2425—TRADE AGREEMENTS ACT

Authority: 42 U.S.C. 3535(d).

2425.402 Policy.

It is the Department's policy to determine whether the Trade Agreements Act applies based on the total estimated dollar value of the proposed acquisition before the solicitation is issued, including all line items and options.

PART 2426—OTHER SOCIOECONOMIC PROGRAMS

47. That authority citation for 48 CFR part 2426 is added to read as follows:

Authority: 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

2426.201 [Amended]

48. Section 2426.201 is amended by removing the term "OSDBU", wherever it appears, and inserting in its place the words "Deputy Assistant Secretary for Intergovernmental Relations, in coordination with OSDBU".

SUBCHAPTER E—GENERAL CONTRACTING REQUIREMENTS

PART 2428—BONDS AND INSURANCE

49. The authority citation for 48 CFR part 2428 is revised to read as follows:

Authority: 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

2428.203 and 2428.203–70 [Redesignated as 2428.204 and 2428.204–70]

50. Sections 2428.203 and 2428.203–70 are redesignated as sections 2428.204 and 2428.204–70, respectively.

PART 2432—CONTRACT FINANCING

51. The authority citation for 48 CFR part 2432 is revised to read as follows:

Authority: 31 U.S.C. 3901–3906; 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

52. Section 2432.402 is revised to read as follows:

2432.402 General.

(e)(1) The Determination and Findings required by FAR 32.402(c)(1)(iii) shall be made by the Director, Office of Procurement and Contracts for Headquarters contracts, or the Director of Administration, for Regional/Field contracts.

(2) Each advance payment situation shall be coordinated with the Office of Finance and Accounting, for Headquarters, or the Regional Accounting Division, for Regional/Field contracts, before authorization may be given, to ensure that there are controls in place to assure proper administration of advance payments.

53. A new section 2432.906 is added to subpart 2432.9, to read as follows:

2432.906 Contract financing payments.

Periods for payment shorter than 30 days shall not be specified in contracts without the prior approval of the Office of Finance and Accounting, for Headquarters contracts, and shall be coordinated with the Regional Accounting Division, for Regional/Field Office contracts, to ensure that procedures are in place to allow timely payment.

PART 2433—PROTESTS, DISPUTES, AND APPEALS

54. The authority citation for 48 CFR part 2433 is revised to read as follows:

Authority: 31 U.S.C. 3551–3556; 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

55. Section 2433.103 is revised to read as follows:

2433.103 Protests to the agency.

(a)(2) When the Contracting Officer makes a determination to award a contract notwithstanding a protest, as authorized by FAR 33.103(a)(2), that determination shall be approved by the HCA before award, after consultation with the Office of General Counsel.

(a)(4) Protests received after award that are filed only with the Department shall be decided promptly by the Contracting Officer after consultation with appropriate officials, including the program office and the Office of General Counsel.

2433.103–70. [Removed]

56. Section 2433.103–70 is removed.

2433.103–71 [Redesignated as 2433.103–70]

57. Section 2433.103–71 is redesignated as section 2433.103–70.

2433.104 [Amended]

58. Section 2433.104 is amended by redesignating paragraph (f) as paragraph (g).

2433.104–70 [Removed]

59. Section 2433.104–70 is removed.

SUBCHAPTER F—SPECIAL CATEGORIES OF CONTRACTING

PART 2436—CONSTRUCTION AND ARCHITECT-ENGINEER CONTRACTS

60. The authority citation for 48 CFR part 2436 is revised to read as follows:

Authority: 40 U.S.C. 286(c); 42 U.S.C. 3535(d).

2436.602–2 [Amended]

61. Section 2436.602–2(a) is amended by adding the words "(which may

include preselection boards)" after the words "permanent or ad hoc" in the first sentence, and by adding paragraph (a)(3) to read as follows:

2436.602–2 Evaluation boards.

(a) * * *

(3) *Regional Program Office Director* for boards appointed at the Regional Office level.

* * * * *

2436.602–4 [Amended]

62. Section 2436.602–4 is revised to read as follows:

2436.602–4 Selection authority.

(a) The final selection decision shall be made by the appropriate Primary Organization Head (Headquarters), the appropriate Field Office Manager (Field), or the appropriate Regional Program Office Direction (Region).

2436.602–5 [Amended]

63. Section 2436.602–5 is amended by replacing the number "$10,000" with the words "the small purchase limitation".

PART 2437—SERVICE CONTRACTING

64. The authority citation for 48 CFR part 2437 is revised to read as follows:

Authority: 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

Subpart 2437.2—Advisory and Assistance Services

65. Subpart 2437.2 is retitled to read as set forth above.

2437.110 [Amended]

66. In section 2437.110, new paragraphs (g) and (h) are added to read as follows:

2437.110 Solicitation provisions and contract clauses.[4]

* * * * *

(g) The contracting officer shall insert the clause at 2452.237–76 in solicitations and contracts that involve work on or access to sensitive automated systems.

(h) The Contracting Officer shall insert the clause at 2452.237–77, Observance of Legal Holidays and Administrative Leave, in all solicitations and contracts where contractor personnel will be working on-site in any HUD office.

[4] The HUDAR provisions in paragraphs (g) and (h) of this section have been submitted to the FAR Secretariat for consideration as FAR coverage with Governmentwide application. In the event that similar FAR coverage is issued, HUD will rescind the corresponding HUDAR text.

2437.205 [Amended]

67. In section 2437.205, paragraph (b)(6) is amended by removing the words "consulting services" wherever they appear, and adding in their place the words "advisory and assistance services".

SUBCHAPTER G—CONTRACT MANAGEMENT

PART 2446—QUALITY ASSURANCE

68. The authority citation for 48 CFR part 2446 is revised to read as follows:

Authority: 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

69. A new subpart 2446.7 consisting of section 2446.710 is added to read as follows:

Subpart 2446.7—Warranties

2446.710 Contract clauses.

(c)(1) The contracting officer may include a clause substantially the same as FAR 52.246–19, Warranty of Systems and Equipment under Performance Specifications or Design Criteria, whenever it is in the Government's interest.

SUBCHAPTER H—CLAUSES AND FORMS

PART 2452—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

70. The authority citation for 48 CFR part 2452 is revised to read as follows:

Authority: 40 U.S.C. 486(c); 42 U.S.C. 3535(d).

71. A new section 2452.203–70 is added to read as follows:

2452.203–70 Prohibition against the use of Federal employees.[5]

As prescribed in 2403.670, insert the following clause in solicitations and contracts:

PROHIBITION AGAINST THE USE OF FEDERAL EMPLOYEES

December 1992

In accordance with Federal Acquisition Regulation 3.601, contracts are not to be awarded to Federal employees or a business concern or other organization owned or substantially owned or controlled by one or more Federal employees. For the purposes of this contract, this prohibition against the use of Federal employees includes any work performed by the Contractor or any of its employees, subcontractors, or consultants.

[End of clause]

72. A new section 2452.203–71 is added to read as follows:

[5] This HUDAR clause has been submitted to the FAR Secretariat for consideration as FAR coverage with Governmentwide application. In the event that similar FAR coverage is issued, HUD will rescind the corresponding HUDAR text.

2452.203–71 Certification regarding Federal employment.[6]

As prescribed in 2403.670, insert the following provision in solicitations:

CERTIFICATION REGARDING FEDERAL EMPLOYMENT

December 1992

By submitting an offer, the offeror hereby certifies that it is not owned or substantially owned or controlled by one or more Federal employees.

[End of provision]

(Approved by the Office of Management and Budget under control number 2535–0091).

2452.215–70 [Amended]

73. In 2452.215–70, paragraph (b) of the provision is amended by adding a new Section 6 to the end of the paragraph, and by revising paragraphs (c) and (d), to read as follows:

2452.215–70 Proposal content and outline.

* * * * *

(b) Part I—Technical and Management.

* * * * *

Section 6: *Security Investigation.* The offered shall address in its technical proposal how it intends to manage the security of automated systems as required by HUDAR clause 2452.237–76. This includes developing security procedures, requesting background investigations for employees and subcontractors as required, and requesting investigations for replacements of such individuals as necessary due to turnover, rotation, or other reasons.[7]

(c) *Part II—Cost and Pricing Data.*

(1) Furnish cost or pricing data using the SF–1411, Contract Pricing Proposal, provided in Section L of this solicitation, and the instructions attached to it, which are also printed at FAR 15.804–6. Round all amounts to the nearest dollar. Your data will be subject to review and evaluation by various Government personnel, and thus the estimates furnished on the SF–1411 should be supported by the required supplemental data so that the review and evaluation can be conducted with a minimum amount of delay and effort. In particular, ensure that the following essential elements are provided:

(i) A summary of total cost by cost element cross-reference to each proposed contract line item (instruction number 1).

(ii) Identification of the basis for the kinds, quantities, and cost of all material elements proposed; and a consolidated priced summary of individual material quantities, or a consolidated price bill of material (BOM), for the entire proposal. A well prepared BOM includes: part number/description, unit cost,

[6] This HUDAR provision has been submitted to the FAR Secretariat for consideration as FAR coverage with Governmentwide application. In the event that similar FAR coverage is issued, HUD will rescind the corresponding HUDAR text.

[7] This provision (Section 6) has been submitted to the FAR Secretariat for consideration as FAR coverage with Governmentwide application. In the event that similar FAR coverage is issued, HUD will rescind the corresponding HUDAR text.

quantity required, any nonrecurring costs, extended costs, and basis for the proposed price (quotation, prior buy, similar item, etc.) (instruction number 1, Materials).

(iii) For each subcontract over $100,000 show: source, deliverable, quantity, price, type of subcontract, degree of competition, basis for selecting vendor and establishing reasonableness of price. When required, the subcontractor's cost or pricing data must be submitted with the offeror's initial proposal. If available and if required by FAR 15.806, the contractor should provide the results of review and evaluation of subcontract proposals. Though not required, the offeror should provide reasons for omitted data/reviews with dates when data/reviews will be available (instruction number 1, Materials).

(iv) A justification, submitted on an SF–1412, Claim for Exemption from Submission of Certified Cost or Pricing Data, when claiming an exemption from submitting cost or pricing data (instruction number 1, Materials).

(v) A time phased, e.g., quarterly, annual, breakdown of labor rates and hours by category or skill level, and the basis for the estimates of rates and hours, e.g., historical experiences, engineering estimates, learning curves, etc. If labor is the allocation base for indirect costs, summarize for each overhead pool and year (instruction number 1, Director Labor).

(vi) In the absence of a forward pricing rate agreement or indirect rate proposal, the contractor should show how indirect rates were estimated and applied as a basis for evaluating the reasonableness of the proposed rates. Support for the indirect rates could consist of cost breakdowns, trends, and budgetary data (instruction number 1, Indirect Costs).

(vii) Identification of all other costs by category and basis for pricing (instruction number 1, Other Costs).

(viii) When claiming costs of money, the contractor must submit Form CASB CMF and show the calculation of the proposed amount (instruction number 1, Facilities Capital Cost of Money).

(ix) Identification of cost or pricing data, i.e., data that are verifiable and factual, and an explanation of the estimating process. When applicable, the following items should be specifically identified:

(A) Judgmental factors and the methods used in the estimate, including those used in projecting from known data; and

(B) The nature and amount of any contingencies (instruction number 2).

(x) An index referencing all cost or pricing data and information accompanying or identified in the proposal (instruction number 4).

(xi) For change order proposals: an estimate of the cost to complete deleted work not yet performed; identification of the actual or estimated cost of deleted work already performed; and an estimate of the cost of work added (instruction number 7B).

(2) The Offeror Representations and Certifications provided in Section K of this solicitation shall be included in this Part II—Cost and Pricing Data of your proposal.

(d) Proposals shall be submitted in _____copies of Part I and ____copies of Part II.

(End of provision)

(Approved by the Office of Management and Budget under control number 2535–0091.)

2452.215–71 [Removed]

74. Section 2452.215–71, DUNS contractor establishment number, is removed.

2452.216–75 [Amended]

75. In section 2452.216–75, the introductory text is revised to read as follows:

2452.216–75 Unpriced task orders.

As prescribed in 2416.504(e), insert the following clause:

* * * * *

76. Section 2452.219–70 is added to read as follows:

2452.219–70 Small Business and Small Disadvantaged Business* Subcontracting Plan

As prescribed in 2419.708, insert the following provision:

SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS SUBCONTRACTING PLAN DECEMBER 1992

(a) This provision is not applicable to small business concerns.

(b) Consistent with the national interest, it is HUD policy that small business and small business concerns that are owned and controlled by socially and economically disadvantaged individuals shall have the maximum practicable opportunity to participate in the performance of HUD work at the prime and subcontract level. Therefore, any contract awarded as a result of this solicitation shall fully comply with the intent of this policy, and the successful offeror shall agree to pursue an effective and comprehensive small business and small disadvantaged business subcontracting program in compliance with the clause entitled "Utilization of Small Business Concerns and Small Disadvantaged Business Concerns."

(c) Prior compliance with subcontracting plans shall be considered in determining the responsibility of an offeror (see FAR 9.104–3). Therefore, offerors have previous contracts with subcontracting plans shall provide the following information: agency name; agency point of contract; contract number; total contract value; a synopsis of the work required under the contract; the role(s) of the subcontractor(s) involved; and, the applicable goals and actual performance (dollars and percentages) for subcontracting with small and small disadvantaged business concerns. This information shall be provided for the three most recently (within the last three years) completed contracts with such subcontracting plans.

(d) The contract expected to result from this solicitation will contain the clause at FAR 52.219–9, "Small Business and Small Disadvantage Business Subcontracting Plan (Alternate I)." The apparent low bidder, upon request by the Contracting Officer, shall submit a subcontracting plan, where applicable, which addresses separately subcontracting with small business concerns and small disadvantaged business concerns, and which shall be included in and made a part of the resultant contract. The Contracting Officer will review the adequacy of the subcontracting plan as part of the responsibility determination. Failure to submit an adequate subcontracting plan where applicable shall make the bidded ineligible for the contract award.

(End of provision)

Alternate I December 1992

(a) This provision is not applicable to small business concerns.

(b) Consistent with the national interest, it is HUD policy that small business and small business concerns that are owned and controlled by socially and economically disadvantage individuals shall have the maximum practicable opportunity to participate in the performance of HUD work at the prime and subcontract level. Therefore, any contract awarded as a result of this solicitation shall fully comply with the intent of this policy, and the successful bidder shall agree to pursue an effective and comprehensive small business and small disadvantaged business subcontracting program in compliance with the clause entitled "Utilization of Small Business Concerns and Small Disadvantaged Business Concerns."

(c) Prior compliance with subcontracting plans shall be considered in determining the responsibility of a bidder (see FAR 9.104–3). Therefore, bidders having previous contracts with subcontracting plans shall provide the following information: agency name; agency point of contract; contract number; total contract value; a synopsis of the work required under the contract; the role(s) of the subcontractor(s) involved; and, the applicable goals and actual performance (dollars and percentages) for subcontracting with small and small disadvantaged business concerns. This information shall be provided for the three most recently (within the last three years) completed contracts with such subcontracting plans.

(d) The contract expected to result from this solicitation will contain the clause at FAR 52.219–9, "Small Business and Small Disadvantage Business Subcontracting Plan (Alternate I)." The apparent low bidder, upon request by the Contracting Officer, shall submit a subcontracting plan, where applicable, which addresses separately subcontracting with small business concerns and small disadvantaged business concerns, and which shall be included in and made a part of the resultant contract. The Contracting Officer will review the adequacy of the subcontracting plan as part of the responsibility determination. Failure to submit an adequate subcontracting plan where applicable shall make the bidded ineligible for the contract award.

(Approved by the Office of Management and Budget under control number 2535-0091).

*This HUDAR provision has been submitted to the FAR Secretariat for consideration as FAR coverage with Governmentwide application. In the event that similar FAR coverage is issued, HUD will rescind the corresponding text.

77. Section 2452.237-76 is added to read as follows:

2452.237-76 Background investigations for sensitive automated systems/ applications.

As prescribed in 2437.110(g), insert the following clause:

BACKGROUND INVESTIGATIONS FOR SENSITIVE AUTOMATED SYSTEMS/ APPLICATIONS DECEMBER 1992

(A) *General.* This contract involves work on or access to an automated system [name] that has a sensitivity rating of [3 or 4], as defined in Appendix A of HUD Handbook 2400.23, "ADP Security." All contractor employees working on this contract are required to have a background investigation commensurate with the rating of the automated system (position designation of: 6, High Risk; 5, Moderate Risk; or 1, Low Risk) in accordance with Federal Personnel Manual (FPM) Chapters 731, 732, and 736. Any employee who is required to have a background investigation shall not be permitted to work on this contract without the required investigation; however, contractor employees in Low Risk positions are eligible for immediate (interim) approval if the contractor submits the required security package described in paragraph (c) of this section within 14 days of contract award. The contractor shall establish personnel security procedures that meet, as a minimum, the requirements of Handbook 2400.23 and shall provide a copy to the GTR.

(b) *Citizenship-related requirements.* Every contractor employee working on the sensitive applications of this contract shall satisfy at least one of the following requirements: (1) be a citizen living in the U.S.; or (2) owe allegiance to the U.S.

(c) *Approval process.* To obtain a background investigation, the contractor shall submit the following completed forms to the GTR for screening and transmittal to the Office of the Inspector General's (OIG) Security Staff for initiation of the required investigation: SF 85–P, Questionnaire for Public Trust Positions; SF 86A, Continuation Sheet (if needed); SF–171, Application for Federal Employment: FD–258, Fingerprint Chart; and other forms or information as may be necessary. An original and two copies of SF–171 and SF 85–P are necessary. The investigation process shall consist of: a range of personal background inquiries and contacts (written and personal) pertaining to verification of the information provided on the security forms. The background investigation may be waived by HUD upon presentation of acceptable evidence that an employee has received a timely appropriate background investigation.

Upon completion of the investigation process, the Contracting Officer, after conferring with the appropriate HUD offices, shall notify the contractor in writing of the individual's eligibility or ineligibility to work on this contract. The contractor is responsible for ensuring that such investigations are requested as necessary for the performance of this contract. If contractor personnel will be working on-site in any HUD office, the contractor shall comply with the requirements of HUDAR clause 2452.237–75—Clearance of Personnel and obtain building passes for those personnel.

(d) *Signed pledges.* The contractor shall require that any employees who may have access to the automated systems identified in Section C of this contract sign a pledge of nondisclosure of information. These pledges shall be signed by the employees before they are assigned to this contract and shall be maintained by the contractor for a period of three years after final payment under the contract.

(e) *Nondisclosure of information.* Neither the contractor nor any of its employees shall divulge or release data or information developed or obtained during performance of this contract, except to authorized Government personnel with an established need to know or upon written approval of the Contracting Officer. Information contained in all source documents and other media provided by HUD are the sole property of HUD.

(f) *Contract performance.* If HUD receives disqualifying information on a contractor employee, the contractor, upon written notice, will immediately remove the employee from work on this contract. Contractor employees may be barred from working on this contract for failing to meet or maintain the suitability standards prescribed in FPM Chapter 731, as applicable. Failure to comply with the terms of this clause may result in termination for default.

(g) *Notification.* The contractor shall notify the Government Technical Representative (GTR) in writing (with a copy to the contracting officer) whenever a cleared employee terminates employment or is no longer working on this contract, and the GTR shall notify the HUD ADP Security Staff, who will notify the OIG Security Staff. The contractor shall immediately notify the Contracting Officer of any breach or suspected breach of security or any unauthorized disclosure of the information contained in the automated system specified in this contract.

(h) *Subcontracts.* The contractor shall incorporate this clause in all subcontracts where the requirements specified in paragraph (a) of this section are applicable to performance of the subcontract.

[End of clause]

[Approved by the Office of Management and Budget under control number 2535–0091].

78. Section 2452.237–77 is added to read as follows:

2452.237–77 Observance of Legal Holidays and administrative leave.[*]

As prescribed in 2437.110(h), insert the following clause:

Observance of Legal Holidays and Administrative Leave

December 1992

(a) The Department of Housing and Urban Development observes the following days as holidays:

New Year's Day
Martin Luther King's Birthday
Washington's Birthday
Memorial Day
Independence Day
Labor Day
Columbus Day
Veterans Day
Thanksgiving Day
Christmas Day

Any other day designated by Federal law, Executive Order, or Presidential Proclamation.

(b) When any such day falls on a Saturday, the preceding Friday is observed; when any such day falls on a Sunday, the following Monday is observed. Observances of such days by Government personnel shall not be cause for additional period of performance or entitlement to compensation except as set forth in the contract. If the contractor's personnel work on a holiday, no form of holiday or other premium compensation will be reimbursed either as a direct or indirect cost, unless authorized pursuant to an overtime clause elsewhere in this contract.

(c) When HUD grants administrative leave to its Government employees, assigned contractor personnel in Government facilities shall also be dismissed. However, the contractor agrees to continue to provide sufficient personnel to perform round-the-clock requirements of critical tasks already in operation or scheduled, and shall be guided by the instructions issued by the Contracting Officer or his/her duly authorized representative.

(d) For fixed-price contracts, if services are not required or provided because the building is closed due to inclement weather, unanticipated holidays declared by the President, failure of the Congress to appropriate funds, or similar reasons, deductions will be computed as follows:

(1) The deduction rate in dollars per day will be equal to the per month contract price divided by 21 days per month.

(2) The deduction rate in dollars per day will be multiplied by the number of days services are not required or provided.

If services are provided for portions of days, appropriate adjustment will be made by the Contracting Officer to ensure that the contractor is compensated for services provided.

(e) If administrative leave is granted to contractor personnel as a result of conditions stipulated in any "Excusable Delays" clause of this contract, it will be without loss to the contractor. The cost of salaries and wages to the contractor for the period of any such excused absence shall be a reimbursable item of direct cost hereunder for employees whose regular time is normally charged, and a reimbursable item of indirect cost for employees whose time is normally charged indirectly in accordance with the contractor's accounting policy.

[*] This HUDAR clause has been submitted to the FAR Secretariat for consideration as FAR coverage with Governmentwide application. In the event that similar FAR coverage is issued, HUD will rescind the corresponding HUDAR text.

Dated: December 9, 1992.

Jim E. Tarro,

Assistant Secretary for Administration.

Department of Education

Office of Special Education and Rehabilitative Services

Invitation To Comment on the Feasibility and Desirability of Establishing a Nationwide Assistive Technology Information and Program Referral Network; Notice

DEPARTMENT OF EDUCATION

Office of Special Education and Rehabilitative Services

Invitation To Comment on the Final Report, the Feasibility and Desirability of Establishing a Nationwide Assistive Technology Information and Program Referral Network

AGENCY: Department of Education.

ACTION: Notice inviting comments.

SUMMARY: The Secretary of Education invites comments concerning the final report prepared by the University of South Carolina on a study dealing with the feasibility and desirability of establishing a national assistive technology information and program referral network. The comments will be used by the Department to help determine the appropriate action to be taken based on the report.

The Technology-Related Assistance for Individuals with Disabilities Act of 1988 required the Secretary to conduct a study to determine the feasibility and desirability of creating a national information and program referral network and to determine the appropriate structure for the organization and operation of such a network, if it is determined to be feasible and desirable. The statute requires that a contractor-prepared report of the study be submitted to the Secretary and to the appropriate committees of the Congress. In addition, the statute requires the Secretary to solicit public comment on the report and "to take appropriate action based on the report before the end of the 6-month period following the date on which the Secretary receives the report." The report reflects only the views of the contractor and not the views of the Secretary. Comments on the report will help the Secretary determine what actions should be taken based on the report.

DATES: All comments must be received on or before January 14, 1993.

ADDRESSES: Written comments should be addressed to Carol G. Cohen, U.S. Department of Education, 400 Maryland Avenue, SW., room 3420, Switzer Building, Washington, DC 20202–2705.

FOR FURTHER INFORMATION CONTACT: Carol G. Cohen. Telephone (202) 205–5666. Deaf and hearing impaired individuals may call (202) 205–5516 for TDD services.

SUPPLEMENTARY INFORMATION: The following is a synopsis of the final report, "The Feasibility and Desirability of Establishing a Nationwide Assistive Technology Information and Program Referral Network."

Assistive technology (AT) can provide the tools that allow individuals with disabilities to participate more fully in daily activities, gain more control over their own lives, and have greater access to education, employment, and leisure opportunities. This report explores the feasibility and desirability of establishing a national assistive technology information and program referral (ATI&R) network from two perspectives: (1) The current processes used to disseminate information about assistive technology, and (2) the needs of individuals who want access to assistive technology information. It identifies the mechanisms essential to linking information on assistive technology with the individuals who need it.

The report's major conclusion is that a national ATI&R network is feasible and desirable. The proposed network would address disparities found in the current state of ATI&R practices in the following areas—

- The delivery of information services;
- Individual access to information;
- The quality of information provided;
- Information management methods; and
- An understanding of the benefits of assistive technology.

This report synthesizes the results of the full study funded by the National Institute on Disability and Rehabilitation Research, U.S. Department of Education. The study's five key findings are:

1. Assistive technology information services are not uniformly defined;
2. Organizational structure of assistive technology and program referral services are not uniform from program to program;
3. Training for assistive technology and program referral staff is flawed by the lack of standards and/or requirements for ATI&R for staff;
4. Information management is flawed by the lack of consistent methods to maintain, verify, and update information; and
5. Outreach efforts to target populations are ineffective and/or non-existent.

On the basis of these findings, the study made a number of recommendations to the National Institute on Disability and Rehabilitation Research, including:

1. Develop a national classification "taxonomy" for the delivery of ATI&R services;
2. Provide leadership to develop a Nationwide Assistive Technology Information and Program Referral Coordinating Institute;
3. Establish annual priorities for field-initiated research on the "best practices" in the delivery of ATI&R services;
4. Develop mechanisms for sharing training materials, innovative approaches, strategies, and technical applications;
5. Establish a mechanism to provide technical support and training on outreach strategies with formal and informal brokers; and
6. Initiate local community promotional campaigns that parallel a national assistive technology awareness campaign. Local community promotional campaigns can include public service announcements, video productions, and printed media.

This synopsis provides an overview of the results of the study. The complete findings and recommendations are summarized in the Executive Summary and Final Report of the study. Interested parties should examine the report for a more complete understanding of the issues affecting the feasibility and desirability of establishing a nationwide assistive technology information and program referral network.

The final report, "The Feasibility and Desirability of Establishing a Nationwide Assistive Technology Information and Program Referral Network," is available for review at the National Institute on Disability and Rehabilitation Research, Department of Education, 330 C Street, SW., room 3420, Switzer Building, Washington, DC 20202–2705, Telephone: (202) 205–5666. Deaf and hearing impaired individuals may call (202) 205–5516 for TDD services.

Copies of the final report can be obtained upon request from the National Institute on Disability and Rehabilitation Research.

Robert Davila,

Assistant Secretary, Office of Special Education and Rehabilitative Services.

Part XII

Department of Labor

Employment and Training Administration

20 CFR Part 614
Unemployment Compensation for Ex-servicemembers; Interim Final Rule

DEPARTMENT OF LABOR

Employment and Training Administration

20 CFR Part 614

RIN 1205–AA26

Unemployment Compensation for Ex-servicemembers

AGENCY: Employment and Training Administration, Labor.

ACTION: Interim final rule; request for comments.

SUMMARY: The Employment and Training Administration of the Department of Labor is issuing this interim final rule incorporating the statutory amendments contained in the Emergency Unemployment Compensation Act of 1991 affecting the Unemployment Compensation for Ex-servicemembers (UCX) Program. These statutory amendments change the criteria for determining Federal service for UCX qualifying purposes as well as affect the waiting period and maximum amount of UCX benefits payable. Essential amendments to the regulations are issued as an interim final rule because the statutory changes in the program became effective for weeks of unemployment beginning on or after November 15, 1991, the date of enactment of the public law.

Finally, in a prior amendment to the regulations on October 17, 1988, a section relating to the Veterans Administration was inadvertently not deleted from the regulations and is now deleted in this rulemaking.

To provide an opportunity for public participation in this rulemaking, a comment period is provided, and a final rule will be published after taking into account comments received.

DATES: *Effective date:* The effective date of this interim final rule is January 14, 1993.

Comment date: Written comments on this interim final rule must be received in the Department of Labor on or before January 14, 1993.

ADDRESSES: Written comments on this interim final rule may be mailed or delivered to Mary Ann Wyrsch, Director, Unemployment Insurance Service, U.S. Department of Labor, room S–4231, Frances Perkins Building, 200 Constitution Ave., NW., Washington, DC 20210.

All comments received will be available for public inspection during normal business hours in room S–4231 at the above address.

FOR FURTHER INFORMATION CONTACT: Sandra T. King, Chief, Division of Program Development and Implementation, or Robert J. Gillham, Chief, Federal Programs Group, Office of Program Management, Unemployment Insurance Service, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Ave. NW., Washington, DC 20210, telephone (202) 219–5309 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: The UCX program is financed with Federal funds to furnish unemployment benefits to eligible individuals who are separated from the Armed Forces and are unable to obtain work. The program, created by Public Law 85–848, approved on August 28, 1958, has been codified at 5 U.S.C. 8521–8525.

The UCX amendments contained in section 301 of the Emergency Unemployment Compensation Act of 1991 (Pub. L. 102–164) took effect for weeks of unemployment beginning on or after November 15, 1991, the date of enactment of Public Law 102–164. The Department has determined, pursuant to 5 U.S.C. 553(b)(3)(B), that good cause exists for publishing the amendments to 20 CFR part 614 as an interim final rule, with a post publication comment period, because prompt action is necessary to assure that the Department has regulations in place to carry out its responsibilities for the UCX program. The changes in this document are essential to the proper administration of the UCX program by the States. Therefore, a pre-publication comment period is impracticable and contrary to the public interest.

This document amends 20 CFR part 614 to incorporate statutory amendments to the UCX Program. Operating instructions for implementing these statutory amendments were issued by the Department on November 22, 1991, in General Administration Letter (GAL) No. 3–92, published at 56 FR 67333 (December 30, 1991). The operating instructions in GAL 3–92 supplement these amendments to 20 CFR part 614.

Sections 301(a) and 301(b) of the Emergency Unemployment Compensation Act of 1991 (Pub. L. 102–164) amended 5 U.S.C. 8521, which affect entitlement to UCX. Section 301(a) repealed 5 U.S.C. 8521(c) which required a 4-week waiting period and a 13-week maximum for payment of UCX benefits. Section 301(b) amended 5 U.S.C. 8521(a) by reducing the amount of active duty in a reserve status from 180 continuous days to 90 continuous days necessary to be considered "Federal service" for UCX qualifying purposes.

Section 301(c) of Public Law 102–164 provides that the UCX amendments contained in section 301 are effective for weeks of unemployment beginning on or after November 15, 1991, the date of enactment of Public Law 102–164. This means that the UCX amendments contained in section 301 shall be effective for all UCX initial claims filed for weeks of unemployment beginning on or after November 15, 1991, as well as for weeks of unemployment beginning on or after November 15, 1991, for unexpired UCX claims.

Furthermore, the Department interprets the amendment in section 301(b) of Public Law 102–164 to apply to previously denied UCX claims of reservists who had less than 180 but at least 90 days of continuous active duty in a reserve status, for weeks of unemployment beginning on or after November 15, 1991. Thus, the application of the UCX amendments in sections 301(a) and 301(b) to unexpired UCX claims requires redetermination of those claims, and such redeterminations have already been completed pursuant to operating instructions issued to the States soon after the enactment of the amendments. It was emphasized, however, that in making those redeterminations, the UCX amendments are applicable only for weeks of unemployment beginning on or after November 15, 1991 as provided by section 301(c).

Further, many reservists may have had 90 days or more of continuous active duty in a reserve status, but did not file UCX claims because they had less than 180 days of such service.

Accordingly, in order to effectuate these statutory amendments, the Department has determined that the application of the State time limitations on claims filing will be limited, as explained below. The general rule is that State law is followed on procedural matters (i.e., claims filing, determinations and redeterminations) unless inconsistent with Federal law. Here, applying State time limitations on claims filing would thwart the purpose of these statutory amendments. It is Congress' intent to cover Desert Shield and Desert Storm veterans under the UCX amendments made by section 301 of Public Law 102–164.

The effective date of the UCX amendments as provided in the language of section 301(c) carries out this Congressional intent. Section 301(c) clearly provides that UCX amendments apply to weeks of unemployment, rather than to new claims filed, on and after the date of enactment. Furthermore, the Congressional record regarding these amendments expresses Congress' intent

to include Desert Shield and Desert Storm veterans in the amendment's coverage. The only way to extend the UCX amendments to Desert Shield and Desert Storm veterans is to require States and cooperating State agencies to redetermine all UCX claims for claimants whose benefit year expired after November 15, 1991. Thus, this Federal law authority will ensure a uniform application of the UCX amendments as intended by Congress.

Also, States and cooperating State agencies will not apply State law claims filing time limitations to reservists who did not previously file UCX claims because they had less than 180 days of continuous active duty in a reserve status, where the claimant's benefit year would have expired on or after November 15, 1991, if he/she had filed a UCX claim. However, State law provisions regarding back-dating of claims apply to UCX first claims.

Once a UCX claimant meets the qualifying requirements of 5 U.S.C. 8521, as amended by section 301 of Public Law 102–164, it is the Congressional intent to treat UCX claimants for weeks of unemployment beginning on or after November 15, 1991 under the same terms and conditions as apply to claimants covered under the applicable State UI law.

In a prior amendment to these regulations, published at 53 FR 40550 (October 17, 1988), § 614.27 was amended to delete the reference to Veterans Administration and was redesignated § 614.25. However, § 614.27 was inadvertently not deleted from the regulations. Consequently, § 614.27 is removed.

The following amendments are made to the regulations pursuant to the Emergency Unemployment Compensation Act of 1991:

1. Section 614.2, paragraph (g), is amended by reducing the amount of active duty in a reserve status necessary to be considered Federal service for UCX qualifying purpose from 180 continuous days to 90 continuous days. Also, paragraph (g)(2) is deleted as outdated and unnecessary. Paragraph (g)(1) then becomes paragraph (g).

2. Section 614.3, paragraph (e), is removed so as to reflect the repeal of 5 U.S.C. 8521(c) which required a 4-week waiting period. For weeks of unemployment beginning on or after November 15, 1991, States must follow the waiting period provisions of applicable State law.

3. Section 614.4, paragraphs (c) and (d), are amended to reflect that the 13-week maximum amount of UCX benefits payable in a benefit year to an individual has been eliminated by the repeal of 5 U.S.C. 8521(c). Therefore, the UCX maximum amount of benefits payable in a benefit year will be the same as provided under the applicable State law as if the claimant's Federal military service and Federal military wages had been included as employment and wages under the State law.

4. Other technical and conforming changes are made in part 614.

Classification—Executive Order 12291

The rule in this document is not classified as a "major rule" under Executive Order 12291 on Federal Regulations, because it is not likely to result in (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Accordingly, no regulatory impact analysis is required.

Paperwork Reduction

The rule in this document will not increase the Federal paperwork burden on the private or public sectors under the Paperwork Reduction Act. The reason for such certification is that this rule only incorporates statutory amendments to an individual entitlement program and which only affect individuals applying for benefits under the UCX Program.

Regulatory Flexibility Act

The proposed rule will have no "significant economic impact on a substantial number of small entities" within the meaning of section 3(a) of the Regulatory Flexibility Act, Public Law 96–354, 91 Stat. 1164 (5 U.S.C. 605(b)). The Secretary has certified to the Chief Counsel for Advocacy of the Small Business Administration to this effect. The definition of the term "small entity" under 5 U.S.C. 601(6) does not include States or individuals. Since these regulations involve an entitlement program for individuals administered by the States, and are directed to the States, no regulatory flexibility analysis is required. Accordingly, no regulatory flexibility analysis is required.

List of Subjects in 20 CFR Part 614

Labor, Unemployment Compensation for Ex-servicemembers (UCX), Unemployment Compensation.

Words of Issuance

For the reasons set out in the preamble, part 614 of chapter V of title 20 of the Code of Federal Regulations is amended as follows:

PART 614—[AMENDED]

1. The authority citation for part 614 continues to read as follows:

Authority: 5 U.S.C. 8506; Secretary's Order No. 4–75 (40 FR 18515).

§ 614.1 [Amended]

2. Section 614.1 is amended by removing from paragraph (a) the following phrase "as amended by sec. 201 of Public Law 97–362, 96 Stat. 1732,".

3. Paragraph (g) of § 614.2 is revised to read as follows:

§ 614.2 Definitions of terms.

* * * * *

(g) *Federal military service* means active service (not including active duty in a reserve status unless for a continuous period of 90 days or more) in the Armed Forces or the Commissioned Corps of the National Oceanic and Atmospheric Administration if with respect to that service—

(1) The individual was discharged or released under honorable conditions (and, if an officer, did not resign for the good of the service); and

(2)(i) The individual was discharged or released after completing his/her first full term of active service which the individual initially agreed to serve, or

(ii) The individual was discharged or released before completing such term of active service—

(A) For the convenience of the Government under an early release program,

(B) Because of medical disqualification, pregnancy, parenthood, or any service-incurred injury or disability,

(C) Because of hardship, or

(D) Because of personality disorders or inaptitude but only if the service was continuous for 365 days or more.

* * * * *

§ 614.2 [Amended]

4. In addition to the amendment to § 614.2 set forth above, paragraph (p)(1) of § 614.2 is amended by removing, in two places, the words "Internal Revenue Code of 1954" and adding, in their place, the words "Internal Revenue Code of 1986".

5. Section 614.3 is amended by removing paragraph (e), and revising paragraphs (c) and (d) to read as follows:

§ 614.3 Eligibility requirements for UCX.

* * * * *

(c) The individual has filed an initial claim for UCX and, as appropriate, has filed a timely claim for waiting period credit or payment of UCX with respect to that week of unemployment; and

(d) The individual is totally, part-totally, or partially unemployed, and is able to work, available for work, and seeking work within the meaning of or as required by the applicable State law, and is not subject to disqualification under this Part or the applicable State law, with respect to that week of unemployment.

6. Paragraphs (c) and (d) of § 614.4 are revised to read as follows:

§ 614.4 Weekly and maximum benefit amounts.

* * * * *

(c) *Maximum amount.* The maximum amount of UCX which shall be payable to an eligible individual during and subsequent to the individual's benefit year shall be the maximum amount of all unemployment compensation that would be payable to the individual as determined under the applicable State law.

(d) *Computation rules.* The weekly and maximum amounts of UCX payable to an individual under the UCX Program shall be determined under the applicable State law to be in the same amount, on the same terms, and subject to the same conditions as the State unemployment compensation which would be payable to the individual under the applicable State law if the individual's Federal military service and Federal military wages assigned or transferred under this Part to the State had been included as employment and wages covered by that State law, subject to the use of the applicable Schedule of Remuneration.

§ 614.27 [Removed]

7. Section 614.27 is removed.

Signed at Washington, DC on December 10, 1992.

Roberts T. Jones,

Assistant Secretary of Labor.

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$21.00 per year

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$19.00 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers:
FR Indexes and the LSA (List of CFR Sections Affected) are mailed automatically to regular FR subscribers.

FEDERAL REGISTER SUBSCRIBERS: IMPORTANT INFORMATION ABOUT YOUR SUBSCRIPTION

After 6 years without an adjustment, it has become necessary to increase the price of the **Federal Register** in order to begin recovering the actual costs of providing this subscription service. Effective October 1, 1992, the price for the **Federal Register** will increase and be offered as follows:

(1) **FEDERAL REGISTER COMPLETE SERVICE**—Each business day you can continue to receive the daily **Federal Register**, plus the monthly **Federal Register Index** and **Code of Federal Regulations List of Sections Affected (LSA)**, all for **$415.00** per year.

(2) **FEDERAL REGISTER DAILY ONLY SERVICE**—With this subscription service, you will receive the **Federal Register** every business day for **$375.00** per year.

HOW WILL THIS AFFECT YOUR CURRENT SUBSCRIPTION?

You will receive your current complete **Federal Register** service for the length of time remaining in your subscription.

AT RENEWAL TIME

At renewal time, to keep this important subscription coming—you can continue to receive the complete **Federal Register** service by simply renewing for the entire package, or you can select and order only the parts that suit your needs:

- renew your entire **Federal Register Service** (complete service)

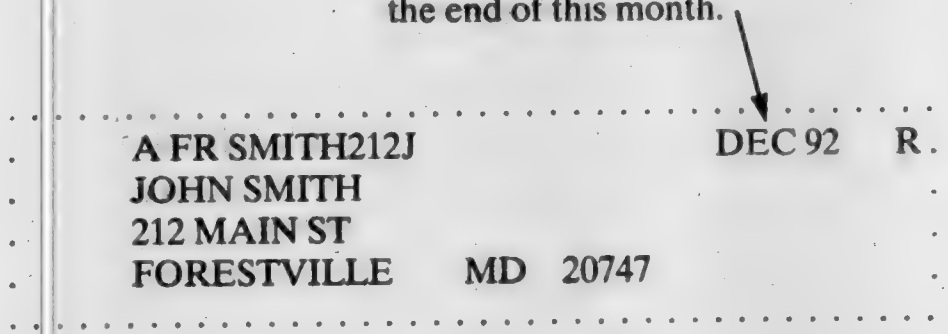
or select. . .

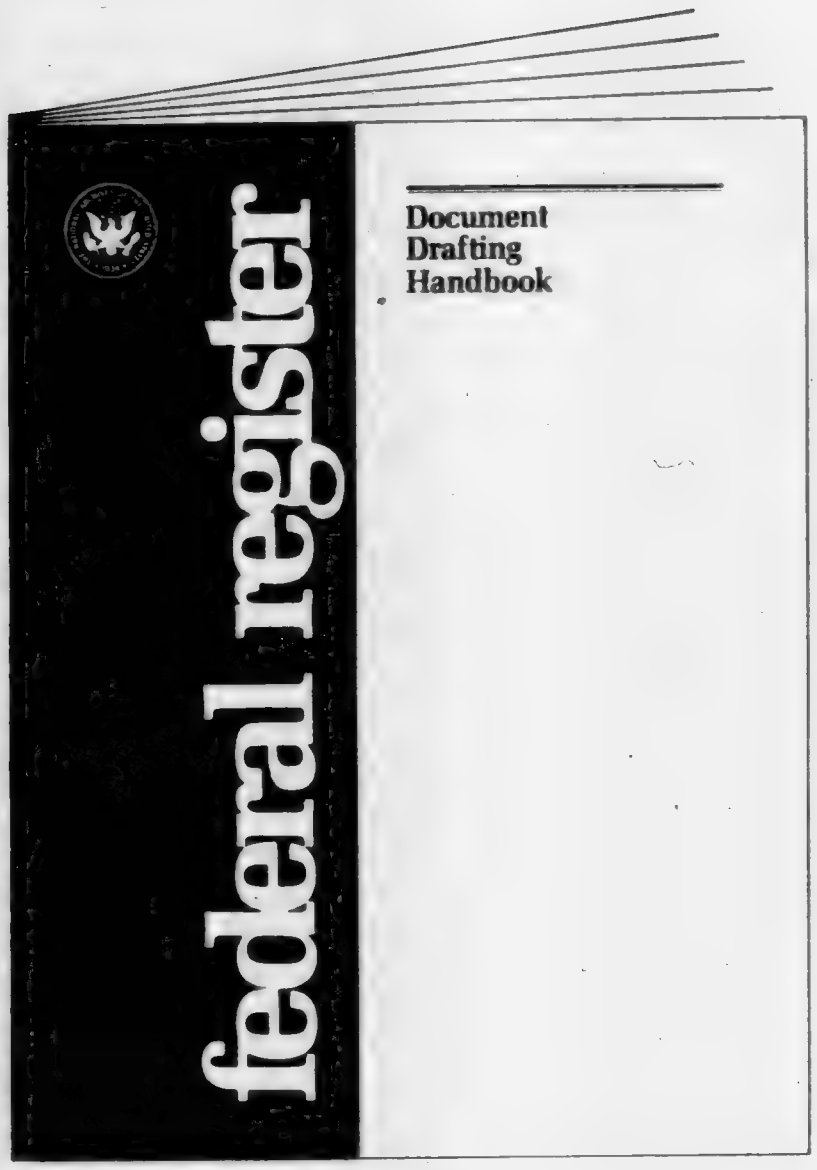
- the daily only **Federal Register** (basic service)
- and complement the basic service with either of the following supplements: the monthly **Federal Register Index** or the monthly **LSA**

When your current subscription expires, you will receive a renewal notice to continue the complete **Federal Register** service. At that time, you will also receive an order form for the daily **Federal Register** basic service, the **Federal Register Index**, and the **LSA**.

To know when to expect the renewal notice, check the top line of your subscription mailing label for the month and year of expiration as shown in this sample:

A renewal notice will be sent approximately 90 days before the end of this month.





Federal Register Document Drafting Handbook

A Handbook for Regulation Drafters

This handbook is designed to help Federal agencies prepare documents for publication in the Federal Register. The updated requirements in the handbook reflect recent changes in regulatory development procedures, document format, and printing technology.

Price $5.50

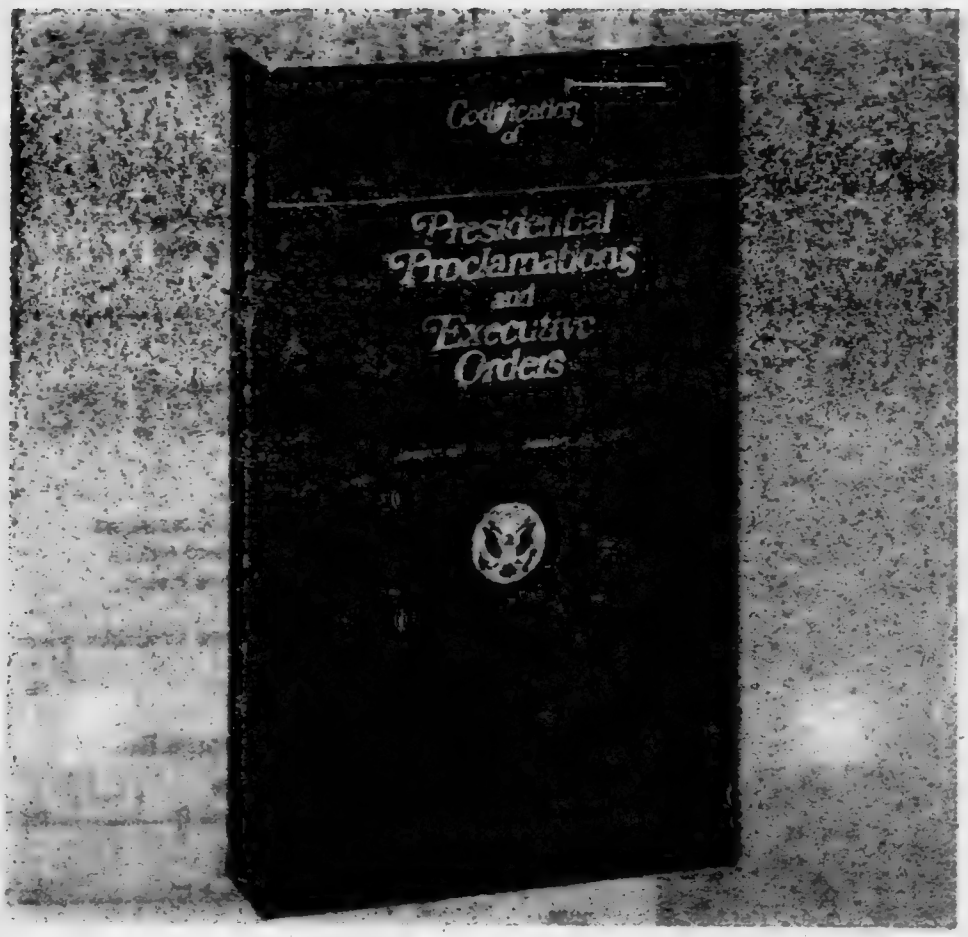
Mail order to:
New Orders, Superintendent of Documents
P.O. Box 371954, Pittsburgh, PA 15250–7954

(Rev. 5/92)



For those of you who must keep informed about **Presidential Proclamations and Executive Orders**, there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period April 13, 1945, through January 20, 1989, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1945–1989 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

GUIDE: Revised January 1, 1992

The GUIDE to record retention is a useful reference tool, compiled from agency regulations, designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche format and magnetic tape. The annual subscription price for the **Federal Register** paper edition is $375, or $415 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $353; and magnetic tape is $37,500. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $4.50 for each issue, or $4.50 for each group of pages as actually bound; or $1.50 for each issue in microfiche form; or $175.00 per magnetic tape. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

Rules and Regulations

Federal Register
Vol. 57, No. 242
Wednesday, December 16, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92–NM–89–AD; Amendment 39–8437; AD 92–27–04]

Airworthiness Directives; Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Boeing Model 747 series airplanes, that requires structural inspections of older airplanes. This amendment is prompted by reports of recent incidents involving fatigue cracking and corrosion in transport category airplanes that are approaching or have exceeded their design life goal. The actions specified by this AD are intended to prevent degradation in the structural capabilities of the affected airplanes. This proposal also relates to the recommendations of the Airworthiness Assurance Task Force assigned to review Model 747 series airplanes, which indicate that, to assure long term continued operational safety, various structural inspections should be accomplished.

DATES: Effective January 20, 1993.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 20, 1993.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Steven C. Fox, Aerospace Engineer, Seattle Aircraft Certification Office, Airframe Branch, ANM–120S, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington, 98055–4056; telephone (206) 227–2777; fax (206) 227–1181.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain Boeing Model 747 series airplanes was published in the **Federal Register** on May 28, 1992 (57 FR 22445). That action proposed to require structural inspections of older airplanes.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

Several commenters support the proposed rule.

One commenter requests that service bulletins that are referenced in Section 4 of Boeing Document No. D6–35999, Revision C, dated January 21, 1992, and that are the subject of other existing AD's, be exempt from the requirements of this AD in order to avoid dual compliance requirements. The FAA concurs. A new paragraph (e) has been added to the final rule to specify that service bulletins listed in the Boeing Document, which are addressed by other separate AD's, are excluded from this rulemaking action.

The same commenter further requests that Appendices B–2 and B–4 of the Boeing Document be excluded as source of service information for the proposed rule because the data is misleading. The FAA concurs. Although both paragraphs (a) and (b) of the final rule clearly state that Section 4 of the Boeing Document is the appropriate source of service information, a note has been added to the final rule to indicate that only Section 4, excluding the appendices, is to be used as the appropriate source of service information.

Another commenter requests that each of the service bulletins referenced in the Boeing Document be addressed in separate rulemaking actions to ease scheduling of, compliance with, and control over each requirement. The FAA does not concur. To issue twenty separate rulemaking actions, one for each service bulletin, would significantly prolong the effective date by which the requirements of this AD must be accomplished; therefore, safety of the fleet would be adversely affected. Further, the FAA proposed this one single rulemaking action based upon the recommendations of the Airworthiness Assurance Task Force, and with input from representatives of aircraft operators, manufacturers, regulatory authorities, and other aviation representatives.

Another commenter requests that the proposed repetitive inspection interval of 600 flight cycles be extended to 1,200 flight cycles for those airplanes that have been modified in accordance with Boeing Service Bulletin 747–57–2218, Revision 2. That modification entails replacing the fitting with 7/16-inch bolts in oversized bolt holes with wet sealant. The FAA does not concur. Those operators who choose to perform the modification may request an adjustment to the compliance time under the provisions of paragraph (e) of this AD, provided that sufficient data are presented to the FAA to justify such an extension.

The same commenter further requests that the threshold for the inspections commence at 10,000 flight cycles for those airplanes that had been modified in accordance with Boeing Service Bulletin 747–57–2218, Revision 2. To substantiate this request, the commenter notes that, thus far, no defective bolts have been found on modified airplanes in its fleet at 10,000 flight cycles. The FAA does not concur. Since all operators have not modified their fleet in accordance with the referenced service bulletin, those operators who have modified their airplanes may apply for an alternative method of compliance under the provisions of paragraph (e) of this AD.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 680 Model 747 series airplanes of the affected

design in the worldwide fleet. The FAA estimates that 170 airplanes of U.S. registry will be affected by this AD, that it will take approximately 480 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $4,488,000, or $26,400 per airplane. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034), February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-27-04. Boeing: Amendment 39-8437. Docket 92-NM-89-AD.

Applicability: Model 747 series airplanes; as listed in Section 4 of Boeing Document Number D6-35999, "Aging Airplane Service Bulletin Structural Modification and Inspection Program," Revision C, dated January 21, 1992; certificated in any category.

Compliance: Required as indicated, unless accomplished previously. To prevent degradation of the structural capability of the airplane, accomplish the following:

Note: Refer only to Section 4 of Boeing Document D6-35999; the appendices are not the subject of this AD.

(a) Except as provided in paragraph (e) of this AD, accomplish the inspections specified in Section 4 of Boeing Document No. D6-35999, Revision C, dated January 21, 1992, within the times specified in paragraph (b) of this AD, and thereafter at intervals not to exceed those specified in the corresponding service bulletin for the inspection.

(b) The maximum initial inspection times for the inspections contained in Section 4 of Boeing Document No. D6-35999, Revision C, dated January 21, 1992, shall be the later of the time specified in either paragraph (b)(1) or (b)(2) of this AD:

(1) The threshold for inspection time for the inspection specified in the corresponding service bulletin, measured as a total (flight cycles, time-in-service, as appropriate) accumulated on the airplane; or

(2) The phase-in period for the inspection specified in the corresponding service bulletin, measured from the effective date of this AD.

(c) If any of the discrepant conditions identified in the service bulletins are found as a result of the inspections required by this AD, the corresponding corrective action specified in the service bulletins must be accomplished prior to further flight.

(d) The terminating action for each inspection required by paragraph (a) of this AD consists of the accomplishment of the modification specified in the corresponding service bulletin.

(e) Notwithstanding the references in Section 4 of Boeing Document No. D6-35999, Revision C, dated January 21, 1992, to the following list service bulletins, this AD does not require inspections in accordance with those service bulletins:

Service bulletin No.	Revision level	Service bulletin date
747-27A2253	4	Jan. 25, 1990.
747-32-2190	4	Oct. 26, 1989.
747-53-2253	2	Mar. 29, 1990.
747-53-2265	7	Jan. 25, 1990.
737-53-2283	3	Nov. 1, 1989.
747-53-2289	1	Jan. 26, 1989.
747-52-2186	4	Oct. 24, 1991.

(f) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

(g) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(h) The inspections and corrective actions shall be done in accordance with Section 4 of Boeing Document No. D6-35999, Revision C, dated January 21, 1992, which contains the following list of effective pages:

Note: Except for the title page of the document, no other pages of the document are dated.

Page No.	Revision level shown on page
a, c, d, d.1, e, f, 2.0.1, 3.1.1, 3.2.1, 3.2.2, 3.2.3, 3.3.1, 3.4.1, 4.0.1, 4.1.1, 4.2.1, 4.2.2, 4.3.1, 4.3.2, 4.3.3, 5.1.1, 5.1.2, A.3.1, B.1.1, B.2.1, B.3.1, B.4.1.	C

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(i) This amendment becomes effective on January 20, 1993.

Issued in Renton, Washington, on December 8, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

TENNESSEE VALLEY AUTHORITY

18 CFR Part 1301

Privacy Act; Implementation

AGENCY: Tennessee Valley Authority (TVA).

ACTION: Final rule.

SUMMARY: The Tennessee Valley Authority is amending its Privacy Act regulations to reflect the establishment of a new Privacy Act system of records.

EFFECTIVE DATE: December 16, 1992.

FOR FURTHER INFORMATION CONTACT: Mark R. Winter, TVA, 1101 Market Street (MR 2F), Chattanooga, TN 37402-2801, telephone number: (615) 751-2523.

SUPPLEMENTARY INFORMATION: On October 7, 1992, (57 FR 46231–46232) TVA published a notice of a new Privacy Act system of records entitled "Section 26a Permit Application Records—TVA." TVA is therefore updating its regulations at 18 CFR Part 1301 to reflect that new system of records.

This rule was not published in proposed form since it relates to agency practice. Since this rule is nonsubstantive, it is being made effective immediately, December 16, 1992.

List of Subjects in 18 CFR Part 1301

Administrative practice and procedure, Freedom of Information, Privacy Act, Sunshine Act.

For the reasons set forth in the preamble, title 18, chapter XIII of the Code of Federal Regulations is amended as follows:

PART 1301—PROCEDURES

1. The authority citation for part 1301, subpart B, continues to read as follows:

Authority: 16 U.S.C. 831–831dd, 5 U.S.C. 552a.

2. Section 1301.12 is amended by revising paragraph (d) to add the title of the new system of records to read as follows:

§ 1301.12 Definitions.

* * * * *

(d) The term *TVA system notice* means a notice of a TVA system published in the **Federal Register** pursuant to the Act. TVA has published TVA system notices about the following TVA systems:

Apprentice Training Record System—TVA.
Personnel Files—TVA.
Upgrade Craft Training Program—TVA.
Demonstration Farm Records—TVA.
Discrimination Complaint Files—TVA.
Employee Accident Information System—TVA.
Employee Accounts Receivable—TVA.
Employee Alleged Misconduct Investigatory Files—TVA.
Medical Record System—TVA.
Employee Statement of Employment and Financial Interests—TVA.
Payroll Records—TVA.
Travel History Records—TVA.
Employment Applicant Files—TVA.
Grievance Records—TVA.
LAND BETWEEN THE LAKES® Hunter Records—TVA.
LAND BETWEEN THE LAKES® Register of Law Violations—TVA.
Employee Supplementary Vacancy Announcement Records—TVA.
Consultant and Personal Service Contractor Records—TVA.
Nuclear Quality Assurance Personnel Records—TVA.
Questionnaire—Farms in Vicinity of Proposed or Licensed Nuclear Power Plant—TVA.
Radiation Dosimetry Personnel Monitoring Records—TVA.
Retirement System Records—TVA.
Test Demonstration Farm Records—TVA.
Woodland Resource Analysis Program Input Data—TVA.
Electricity Use, Rate, and Service Study Records—TVA.
LAND BETWEEN LAKES® Mailing Lists—TVA.
OIG Investigative Records—TVA.
Call Detail Records—TVA.
Office of Nuclear Power Call Detail Records—TVA.
Project/Tract Files—TVA.
Building Access Security Records—TVA.
Section 26a Permit Applications—TVA.

BILLING CODE 8120–08M

OFFICE OF NATIONAL DRUG CONTROL POLICY

21 CFR Part 1401

Public Availability of Information

AGENCY: Office of National Drug Control Policy.

ACTION: Final rule.

SUMMARY: The Freedom of Information Act (FOIA) requires every Federal agency to make available to the public official documents and other records upon request, unless the material requested falls under one of several limited exceptions. FOIA also requires agencies to publish rules stating the time, place, fees, and procedures to apply in making records available to any person upon request. Further, section 1803 of the Freedom of Information Reform Act of 1986 requires each agency to establish a system for recovering costs associated with responding to requests for information under FOIA. The Office of Management and Budget (OMB) has issued guidelines that set standard governmentwide definitions for assessing and collecting FOIA fees (OMB Fee Guidelines).

This final rule describes the procedures to be followed in submitting a FOIA request to the Office of National Drug Control Policy (ONDCP) and the procedures that ONDCP will use in responding to such requests. Included are provisions for assessing and collecting fees from FOIA requesters in accordance with the OMB Fee Guidelines.

EFFECTIVE DATE: This regulation is effective on February 16, 1993.

FOR FURTHER INFORMATION CONTACT: Matthew C. Ames, Office of the General Counsel, Office of National Drug Control Policy, Washington, DC 20500, (202) 467–9840.

SUPPLEMENTARY INFORMATION: The Office of National Drug Control Policy was created by the Anti-Drug Abuse Act of 1988, Public Law 100–690, 21 U.S.C. 1501 *et seq.*, and was charged with the development and coordination of national policy toward illegal drugs.

ONDCP published proposed regulations on October 1, 1992 (57 FR 45353). No comments were received, and the final rule is identical to the proposed rule.

List of Subjects in 21 CFR Part 1401

Archives and records, Freedom of information, Records.

For the reasons set out in the preamble, title 21, chapter III of the Code of Federal Regulations is amended by adding a new part 1401 to read as follows:

PART 1401—PUBLIC AVAILABILITY OF INFORMATION

Sec.
1401.1 Purpose.
1401.2 The Office of National Drug Control Policy—Organization and functions.
1401.3 Definitions.
1401.4 Records of other agencies.
1401.5 How to request records—form and content.
1401.6 Initial determination.
1401.7 Prompt response.
1401.8 Response—form and content.
1401.9 Appeal procedures.
1401.10 Fee Schedule.
1401.11 Payment of fees.
1401.12 Waiver of fees.
1401.13 Aggregation of requests.
1401.14 Records that are exempt from disclosure.
1401.15 Deletion of exempted information.

Authority: 5 U.S.C. 552, as amended.

§ 1401.1 Purpose.

The purpose of this part is to prescribe rules, guidelines and procedures to implement the Freedom of Information Act (FOIA), 5 U.S.C. 552, as amended.

§ 1401.2 The Office of National Drug Control Policy—Organization and Functions.

(a) The Office of National Drug Control Policy (ONDCP) was created by the Anti-Drug Abuse Act of 1988, 21 U.S.C. 1501 *et seq.* The mission of ONDCP is to coordinate the anti-drug efforts of the various agencies and departments of the Federal government, to consult with States and localities and assist their anti-drug efforts, and to annually promulgate the National Drug

Control Strategy. ONDCP is headed by the Director of National Drug Control Policy. The Director is assisted by a Deputy Director for Supply Reduction, a Deputy Director for Demand Reduction, and an Associate Director for State and Local Affairs.

(b) ONDCP has an Office of Public Affairs that is responsible for providing information to the press and to the general public. If members of the public have general questions about ONDCP that can be answered by telephone, they may call the Office of Public Affairs at (202) 467–9890. This number should not be used to make FOIA requests. All oral requests for information under FOIA will be rejected.

§ 1401.3 Definitions.

As used in this part, the following definitions shall apply:

(a) *Commercial-use request* means a request from or on behalf of one who seeks information for a cause or purpose that furthers the commercial, trade or profit interests of the requester or the person or institution on whose behalf the request is made. In determining whether a requester properly belongs in this category, ONDCP will consider how the requester intends to use the documents.

(b) *Direct costs* means those expenditures that ONDCP actually incurs in searching for and duplicating (and in the case of commercial requesters, reviewing) documents to respond to a FOIA request. Direct costs include, for example, the salary of the employee performing work (the basic rate of pay for the employee plus 16 percent of that rate to cover benefits) and the cost of operating duplicating machinery. Not included in direct costs are overhead expenses such as costs of space, and heating or lighting the facility in which the records are stored.

(c) *Duplication* means the process of making a copy of a document in response to a FOIA request. Such copies can take the form of paper copy, microform, audio-visual materials, or machine readable documentation. ONDCP will provide a copy of the material in a form that is usable by the requester unless it is administratively burdensome to do so.

(d) *Educational institution* means preschool, a public or private elementary or secondary school, an institution of graduate higher education, an institution of undergraduate higher education, an institution of professional education, or an institution of vocational education, which operates a program or programs of scholarly research.

(e) *Noncommercial scientific institution* means an institution that is not operated on a "commercial" basis as that term is referenced above, and that is operated solely for the purpose of conducting scientific research the results of which are not intended to promote any particular product or industry.

(f) *Records* and/or *information* means all books, papers, manuals, maps, photographs, or other documentary materials, regardless of physical form or characteristics, made or received by ONDCP and preserved or appropriate for preservation by ONDCP as evidence of the organization, functions, policies, decisions, procedures, operations, or other activities of the Government or because of the information value of the data in them, but does not include books, magazines or other material acquired solely for library purposes and through other sources, and does not include analyses, computations, or compilations of information not extant at the time of the request. The term "records" does not include objects or articles such as structures, furniture, paintings, sculptures, three-dimensional models, vehicles, and equipment.

(g) *Representative of the news media* means any person actively gathering news for an entity that is organized and operated to publish or broadcast news to the public. The term "news" means information that is about current events or that would be of current interest to the public. Examples of news media include television or radio stations broadcasting to the public at large, and publishers of periodicals (but only in those instances when they can qualify as disseminators of "news") that make their products available for purchase or subscription by the general public. Freelance journalists may be regarded as working for a news organization if they can demonstrate a reasonable basis for expecting publication through that organization, even though not actually employed by it.

(h) *Request* means a letter or other written communication seeking records or information under FOIA.

(i) *Review* means the process of examining documents located in response to a commercial-use request to determine if that document or any portion of that document is permitted to be withheld. It also includes processing any document for disclosure (i.e., doing all that is necessary to excise those portions of the document not subject to disclosure under FOIA and otherwise preparing them for release). Review does not include time spent resolving general legal or policy issues regarding the application of exemptions.

(j) *Search* means all time spent looking for material that is responsive to a request, including page-by-page or line-by-line identification of material within documents. Searches should be performed in the most efficient and least expensive manner so as to minimize costs for both ONDCP and the requester; for example, line-by-line searches should not be undertaken when it would be more efficient to duplicate the entire document. Searches should be distinguished from "review" of material in order to determine whether the material is exempt from disclosure. Searches may be done manually or by computer using existing programming.

§ 1401.4 Records of other agencies.

Requests for records that originated in another agency and are in the custody of ONDCP shall be referred to the originating agency for processing, and the person submitting the request shall be so notified. Any decision made by the originating agency with respect to such records will be honored by ONDCP.

§ 1401.5 How to request records—form and content.

(a) Requests for records under FOIA must be submitted in writing, addressed to: Office of the General Counsel, Office of National Drug Control Policy, Executive Office of the President, Washington, DC 20500. The words "FOIA REQUEST" or "REQUEST FOR RECORDS" must be clearly marked on both the letter and the envelope. If the request is not so marked and addressed, the 10-day time limit imposed by § 1401.7 of this part shall not begin to run until the request has been received by the Office of the General Counsel and identified as a FOIA request. Due to security requirements, FOIA requests may not be delivered in person.

(b) Any ONDCP employee who receives a request shall promptly forward it to the Office of the General Counsel. Any ONDCP employee who receives an oral request made under the FOIA shall inform the person making the request of the provisions of this part requiring a written request.

(c) Each request must reasonably describe the record(s) sought, including when known: The specific event or action to which the request refers, if any; the name of the agency, office, organization or person that originated the record; the date or time period to which the request refers; the subject matter of the records requested; the type of document requested; the location of the record(s) requested; and any other pertinent information that would assist in promptly locating the record(s).

(d) When a request is not considered reasonably descriptive, or requires the production of voluminous records, or places an extraordinary burden on ONDCP, seriously interfering with its normal functioning to the detriment of the business of the Government, ONDCP may require the person or agent making the FOIA request to confer with an ONDCP representative in order to attempt to verify, and, if possible, narrow the scope of the request.

(e) Upon initial receipt of a request, the Office of the General Counsel shall determine which official or officials within ONDCP shall have the primary responsibility for collecting and reviewing the requested information and drafting a proposed response.

§ 1401.6 Initial determination.

The General Counsel or his or her designee shall have the authority to approve or deny requests received pursuant to these regulations. The decision of the General Counsel shall be final, subject only to administrative review as provided in § 1401.9.

§ 1401.7 Prompt response.

(a) The General Counsel or his or her designee shall either approve or deny a request for records within 10 working days (excluding Saturday, Sunday and Federal holidays) after receipt of the request unless additional time is required for one of the following reasons:

(1) It is necessary to search for, collect, and appropriately examine a voluminous amount of separate and distinct records that are demanded in a single request; or

(2) It is necessary to consult with another agency having a substantial interest in the determination of the request or among two or more components of ONDCP that have a substantial interest in the subject matter of the request.

(b) When additional time is required for one of the reasons stated in paragraph (a) of this section, the General Counsel or his or her designee shall acknowledge receipt of the request within the 10 working day period and include a brief explanation of the reason for delay, indicating the date by which a determination will be forthcoming. An extended deadline adopted for one of the reasons set forth above may not exceed 10 additional working days.

§ 1401.8 Responses—form and content.

(a) When a requested record has been identified and is available, the General Counsel or his or her designee shall notify the person making the request as to where and when the record will be available for inspection or the copies will be available. The notification shall also advise the person making the request of any fees assessed under § 1401.10 of this part.

(b) A denial or partial denial of a request for a record shall be in writing signed by the General Counsel or his or her designee and shall include:

(1) The name and title of the person making the determination;

(2) Either a reference to the specific exemption under FOIA authorizing the withholding of the record and a brief explanation of how the exemption applies to the record withheld, or a statement that, after diligent effort, the requested records have not been found or have not been adequately examined during the time allowed by § 1401.7, and that the denial will be reconsidered as soon as the search or examination is complete; and

(3) A statement that the denial may be appealed to the Director within 30 days of its receipt by the requester.

(c) If a requested record cannot be located from the information supplied, or is known to have been destroyed or otherwise disposed of, the person making the request shall be so notified and the legal authority for disposition shall be cited.

§ 1401.9 Appeal procedures.

(a) When the General Counsel or his or her designee denies a request for records in whole or in part, the person making the request may, within 30 days of receipt of the notice of denial, appeal the denial to the Director of ONDCP. The appeal must be in writing, addressed to the Director, Office of National Drug Control Policy, Executive Office of the President, Washington, DC 20500. The envelope should be clearly labeled as a "Freedom of Information Act Appeal."

(b) The Director will act upon the appeal within 20 working days of its receipt. The Director may extend the 20-day period of time by any number of working days which could have been used by the General Counsel or his or her designee under § 1401.7 but which were not used in making the initial determination. The Director's action on an appeal shall be in writing and signed.

(c) If the decision is in favor of the requester, the Director shall order records promptly made available to the requester.

(d) A denial in whole or in part of a request on appeal shall set forth a brief explanation of the reasons for the decision, and shall inform the requester of his or her right to seek judicial review of the denial and ruling on appeal as provided in 5 U.S.C. 552(a)(4).

(e) No personal appearance, oral argument or hearing will ordinarily be permitted in connection with an appeal to the Director.

§ 1401.10 Fee schedule.

(a) There are four categories of requesters: Commercial use requesters; educational and non-commercial scientific institutions; representatives of the news media; and all other requesters. FOIA prescribes different levels of fees for each of these categories.

(1) *Commercial use requesters.* When a request for records is made for commercial use, charges will be assessed to cover all the costs of searching for, reviewing for release, and duplicating the records sought.

(2) *Educational and non-commercial scientific institutions.* When a request for records is made by an educational or a non-commercial scientific institution in furtherance of scholarly or scientific research, charges will be assessed to cover the cost of duplication alone, excluding charges for duplication of the first 100 pages.

(3) *Requests by representatives of the news media.* When a request for records is made by a representative of the news media for the purpose of news dissemination, charges will be assessed to cover the cost of duplication alone, excluding charges for duplication of the first 100 pages.

(4) *All other requests.* When a request for records is made by a requester who does not fit into any of the preceding categories, charges will be assessed to cover the costs of searching for and duplicating the records sought, excluding charges for the first two hours of search time and the duplication of the first 100 pages. Moreover, requests from individuals for records about themselves will be treated under the Privacy Act of 1974, 5 U.S.C. 552a, which permits the assessment of fees for duplication costs only, regardless of the requester's characterization of the search.

(b) Fees for searches, review of records and duplication of records are charged as follows:

(1) *Search for records.* The charge for a manual search is calculated by determining the search time to the nearest quarter hour and multiplying that figure by the sum of the basic rate of pay per hour of the employee conducting the search plus 16 percent of that rate. The charge for a computer search is calculated by determining the search time to the nearest quarter hour and multiplying that figure by the sum of the basic rate of pay per hour of the employee conducting the search, plus

16 percent of that rate, plus the direct cost of the operation of the computer for that portion of time attributable to the search.

(2) *Review of records.* Only requesters who are seeking documents for commercial use will be charged for time spent reviewing records to determine whether they are exempt from mandatory disclosure. Charges will be assessed only for the initial review; i.e., the review undertaken the first time ONDCP analyzes the applicability of a specific exemption to a particular record or portion of a record. Charges will not be assessed for review at the administrative appeal level of the exemption(s) already applied. The cost for review will be calculated based on the salary of the category of the employee who actually performed the review plus 16 percent of that rate.

(3) *Duplication of records.* Copies made by routine photostatic copying shall be charged at the rate of $0.15 per page. If copies need to be made by other methods, the direct costs of such copies will be charged to the requester, as determined by the General Counsel.

(4) *Unsuccessful searches.* Requesters may be charged for unsuccessful or unproductive searches or for searches when records located are determined to be exempt from disclosure.

(5) *Other charges.* ONDCP will recover the direct costs of providing special services such as certifying that records are true copies, and sending records by special methods such as express mail.

(c) No fee will be charged by ONDCP when the routine costs of collecting and processing the fee equal to or exceed the amount of the fee. For purposes of this section, the routine costs of collecting and processing a fee chargeable under FOIA are estimated to be $15.00 for each FOIA request.

§ 1401.11 Payment of Fees.

(a) The requester must agree to pay all fees that are chargeable under this section prior to issuance of the requested copies.

(b) Payment of fees shall be in the form either of a personal check or bank draft drawn on a bank in the United States, or a postal money order. Remittances shall be made payable to the order of the Treasurer of the United States and mailed to the General Counsel, Office of National Drug Control Policy, Executive Office of the President, Washington, DC 20500.

(c) If it is anticipated that the fees chargeable under this section will amount to more than $25.00, and the requester has not indicated in advance his willingness to pay such fees, the requester shall be promptly notified of the amount of the anticipated fee or such portion thereof as can readily be estimated. In instances where the estimated fees will exceed $250.00, an advance deposit may be required. The notice or request for an advance deposit shall extend to the requester an offer to consult with ONDCP personnel in order to reformulate the request in a manner which will reduce the fees. A reformulated request shall be considered a new request, thus beginning a new 10 workday period for responding to the request.

(d) When a requester has previously failed to pay a fee in a timely fashion (i.e., within 30 days of the date of the billing), ONDCP may require the requester to demonstrate that he or she has, in fact, paid any outstanding fees from past requests, and to make an advance payment of the full amount of the estimated fee for the present request before ONDCP responds to that request.

(e) Interest charges on an unpaid bill may be assessed starting on the 31st day following the day on which the billing was sent. Interest shall be assessed at the rate prescribed in 31 U.S.C. 3717, and shall accrue from the date of the billing. The fact that a fee has been received by ONDCP, even if not processed, will suffice to stay the accrual of interest.

(f) To encourage the repayment of delinquent fees, ONDCP shall use the procedures described in the Debt Collection Act of 1982, 31 U.S.C. 3716–3719, including the use of collection agencies and disclosure to consumer reporting agencies.

§ 1401.12 Waiver of fees.

(a) Records shall be furnished without charge, or at a reduced charge, upon a determination by the General Counsel of ONDCP that:

(1) Waiver or reduction of the fees is in the public interest because release of the requested information is likely to contribute significantly to public understanding of the operations or activities of ONDCP and is not primarily in the commercial interest of the requester; or

(2) Assessment of fees is not feasible.

(b) Upon written request, a written explanation will be provided as to why a request for waiver or reduction of FOIA fees was not granted.

(c) There is no right to an administrative appeal from a decision not to waive or reduce fees.

§ 1401.13 Aggregation of requests.

(a) When the General Counsel reasonably believes that a requester, or a group of requesters acting in concert, is attempting to break down a request into a series of requests for the purpose of evading the assessment of fees, such requests may be aggregated and fees may be charged accordingly.

(b) In determining whether a series of requests shall be aggregated, the General Counsel will consider two factors: whether the requests concern a single subject or two or more closely related subjects; and whether the requests were all made within a 30-day period. If a series of requests is made by multiple requesters, the General Counsel will also consider whether there is substantial evidence to support the conclusion that the requesters are acting in concert.

§ 1401.14 Records that are exempt from disclosure.

(a) Records described in 5 U.S.C. 552(b) are exempt from disclosure under FOIA. These include the following categories of records:

(1) Records that are specifically authorized under criteria established by an Executive order to be kept secret in the interest of national defense or foreign policy and are in fact properly classified pursuant to such Executive order;

(2) Records related solely to the internal personnel rules and practices of an agency;

(3) Records specifically exempted from disclosure by statute (other than 5 U.S.C. 552b), provided that such statute:

(i) requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or

(ii) establishes particular criteria for withholding or refers to particular types of matters to be withheld;

(4) Records of trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(5) Inter-agency or intra-agency memoranda or letters which would not be available by law to a party other than in litigation with the agency;

(6) Personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; and

(7) Records or information compiled for law enforcement purposes, but only to the extent that the production of such law enforcement records or information:

(i) Could reasonably be expected to interfere with enforcement proceedings,

(ii) Would deprive a person of a right to a fair trial or an impartial adjudication,

(iii) Could reasonably be expected to constitute an unwarranted invasion of personal privacy,

(iv) Could reasonably be expected to disclose the identity of a confidential source including a state, local, or foreign agency or authority or any private institution which furnished information on a confidential basis, and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, information furnished by a confidential source,

(v) Would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law, or

(vi) Could reasonably be expected to endanger the life or physical safety of any individual.

§ 1401.15 Deletion of exempted information.

When requested records contain matters that are exempted under 5 U.S.C. 552(b), but such exempted matters are reasonably segregable from the remainder of the records, the records shall be disclosed by ONDCP with the necessary deletions. ONDCP shall attach to each such record a written justification for making the deletion or deletions. A single such justification shall suffice for deletions made in a group of similar or related records.

Bob Martinez,

Director.

[FR Doc. 92-30317 Filed 12-15-92; 8:45 am]

BILLING CODE 3180-02-M

DEPARTMENT OF STATE

22 CFR Part 51

[Public Notice 1735]

Bureau of Consular Affairs; Passports

AGENCY: Bureau of Consular Affairs, Department of State.

ACTION: Final rule.

SUMMARY: This rule amends the regulations at 22 CFR part 51, subpart B in two different respects. First, it generally narrows the categories of persons who are eligible to apply for passports without personal appearance by raising the generally applicable age limit to 18. The amendment is necessary because we have found that the generally applicable age limit of 16 introduced in 1986 has caused some inefficiencies and confusion in service to the public. Second, however, the rule will in certain circumstances permit use of mail-in procedures for persons under the age of 18 residing abroad.

EFFECTIVE DATE: December 16, 1992.

FOR FURTHER INFORMATION CONTACT: William B. Wharton, Director, Office of Citizenship Appeals and Legal Assistance, Passport Office, 1425 K Street, NW., room 300, Washington, DC 20522-1705; telephone (202) 326-6172.

SUPPLEMENTARY INFORMATION: Until 1986, subsections (c) and (d) of 22 CFR 51.21 specified that personal appearance was not required when applying for a renewal of a U.S. passport if:

(i) The most recently issued passport was issued when the citizen was 18 years of age or older;

(ii) The renewal application was made within 8 years from the date on which the previous passport was issued; and,

(iii) The citizen presented that passport with his or her application for a new passport.

Present regulations allow a U.S. citizen to apply for a renewal of a U.S. passport without appearing in person before a person authorized to accept such applications if: (i) The most recent passport was issued when the citizen was 16 years of age or older; (ii) the application is made within 12 years from the date on which the previous passport was issued; and, (iii) the citizen presents that passport with his or her application for a new passport. The revised regulations partially reinstate the pre-1986 rules, allowing a person who has previously been issued a passport to use the mail-in procedure within 12 years of the date on which the passport was issued if the expired passport was issued when the applicant was 18 years of age or older.

This change is being made because: (i) The Department did not experience significant use of the mail-in procedures by individuals whose previous passports were issued when they were between 16 and 18 years of age; (ii) the Department did experience an increase in inefficiency and administrative costs when processing the forms, in that use of the form by those between the ages of 16 and 18 introduced additional decisions about fees and the passport validity period (which is longer for persons over 18 than for persons 16-18) resulting in increased use of personnel resources; and, (iii) because age 18 is the age of majority, the Department believes that use of 18 is more sensible. Under limited conditions, an exception to the requirement of personal appearance by minors is provided for an application made abroad by a person under 18 years of age. The regulation codifies the Secretary's authority to select certain foreign service posts to waive entirely the requirement for personal appearance of minors on a carefully controlled individual basis. This waiver is deemed necessary to enhance consular efficiency at those posts.

This rule was published as a Notice of Proposed Rulemaking in the **Federal Register** on August 28, 1992 (57 FR 39159). No comments were received during the 30-day comment period.

List of Subjects in 22 CFR Part 51

Administrative practice and procedure, Drug traffic control, Passports and visas, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 22 CFR part 51 is amended as follows:

1. The authority citation for part 51 continues to read as follows:

Authority: 22 U.S.C. 211a, as amended, 22 U.S.C. 2658, 3926; sec. 122(d)(3), Public Law 98-164, 97 Stat. 1017; E.O. 12295, 36 FR 10603; 3 CFR 1966-70 Comp. p. 507; Public Law 100-690; sec. 129, Public Law 102-136, 105 Stat. 661; sec. 503, Public Law 102-140, 105 Stat. 820, unless otherwise noted.

2. Section 51.21 is amended by revising paragraphs (c) introductory text, (c)(1), (d)(1) and paragraphs (d)(4) is added to read as follows:

§ 51.21 Execution of passport application.

* * * * *

(c) Persons in the United States who have previously been issued a full validity passport. A person in the United States who has been issued a passport in his or her own name may obtain a new passport by filling out and mailing a specially prescribed application together with his or her previous passport, two recent photographs, and the established fee to the nearest U.S. passport agency, provided:

(1) The most recently issued previous passport was issued when the applicant was 18 years of age or older.

* * * * *

(d) * * *

(1) The most recently issued passport was issued when the applicant was 18 years of age or older.

* * * * *

(4) In a Consular district specifically authorized by the Secretary to waive personal appearance of minors in accordance with this subsection, a U.S. consular officer may waive the age requirement established for use of the mail application, where the consular officer determines that:

(i) The minor and, if applicable, the U.S. citizen parent(s) or legal guardian are registered in that consular district;

(ii) The minor is not subject to the provisions of subsection 51.27 (c) or (d);

(iii) The waiver of the age requirement is otherwise in the interest of consular efficiency; and,

(iv) The waiver will not otherwise compromise the integrity of the passport application process.

Dated: November 20, 1992.

James L. Ward,

Acting Assistant Secretary, Bureau of Consular Affairs.

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Parts 2640 and 2642

RIN 1212-AA30

Allocating Unfunded Vested Benefits Following the Merger of Multiemployer Plans

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This is an amendment to the Pension Benefit Guaranty Corporation's regulation on Allocating Unfunded Vested Benefits (29 CFR part 2642). (The amendment also makes changes to 29 CFR § 2640.4, which sets forth definitions for purposes of part 2642.) The amendment adds to the regulation a new subpart D containing rules for determining the unfunded vested benefits allocable to an employer that withdraws from a multiemployer pension plan after the plan has merged with another multiemployer pension plan. The Employee Retirement Income Security Act of 1974 provides for the PBGC to prescribe rules governing this allocation. This amendment will provide guidance to multiemployer plans on how to allocate unfunded vested benefits following the merger of multiemployer plans.

EFFECTIVE DATE: January 15, 1993.

FOR FURTHER INFORMATION CONTACT: Deborah C. Murphy, Attorney, Office of the General Counsel (22500), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington DC 20006; 202-778-8820 (202-778-8859 for TTY and TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: An employer that withdraws from a multiemployer pension plan is generally liable for a portion of the plan's unfunded vested benefits. The first step in calculating this liability is to determine the employer's allocable share of the plan's unfunded vested benefits in accordance with section 4211 of the Employee Retirement Income Security Act of 1974 ("ERISA"). Section 4211 provides four alternative allocation methods for computing this share: the presumptive method, the modified presumptive method, the rolling-5 method, and the direct attribution method. Because these methods may be difficult to apply to employer withdrawals following a merger of multiemployer plans, ERISA section 4211(f) provides that—

> [I]n the case of a withdrawal following a merger of multiemployer plans, [the allocation rules of section 4211] shall be applied in accordance with regulations prescribed by the [Pension Benefit Guaranty Corporation ["PBGC"]], except that, if a withdrawal occurs in the first plan year beginning after a merger of multiemployer plans, the determination [of the amount of unfunded vested benefits allocable to the employer] shall be made as if each of the multiemployer plans had remained [a] separate plan[ ].

Thus, the PBGC is to prescribe rules for the allocation of unfunded vested benefits to employers that withdraw after a merger of multiemployer plans.

This final regulation, which was published in proposed form on November 9, 1987 (52 FR 43082), prescribes adjustments to the section 4211 allocation rules that the PBGC believes will give a merged plan adequate flexibility to adopt an allocation method that is well-suited to the plan's particular circumstances, while also ensuring that the method adopted will be consistent with the underlying purposes of and the aggregate results achieved by the statutory allocation methods.

Two public comments were received on the proposed regulation.

One commenter was concerned that the lack of an effective date in the proposed regulation indicated that the regulation could be construed to apply retroactively, and contended that such retroactive application could create serious problems for multiemployer plans that had previously merged and could conflict with section 405 of the Multiemployer Pension Plan Amendments Act of 1980 ("MPPAA"), which provides as follows:

> (a) Except as otherwise provided in the amendments made by [MPPAA] [including section 4211(f) of ERISA] and in subsection (b), if the way in which any such amendment will apply to a particular action during the period before such regulations take effect shall be treated as complying with such regulations for such period.
>
> (b) Subsection (a) shall not apply to any action which violates any instruction issued, or temporary rule prescribed, by the agency having jurisdiction but only if such instruction or rule was published, or furnished to the party taking the action, before such action was taken.

The commenter argued that "to comply with section 405, and to avoid any challenges by employers contributing to previously merged multiemployer plans, the final regulations should clearly state that reasonable actions taken by multiemployer plans in allocating unfunded vested benefits to employers that withdraw after a multiemployer plan merger that occurred prior to the final effective date of the regulations shall be treated as complying with the regulations, and that any requirement regarding plan amendments does not apply prior to that effective date."

The PBGC agrees that section 405 of MPPAA applies to actions taken before the effective date of the regulation, and intended that the regulation be consistent with section 405. The proposed regulation contained no effective date because it was published as a proposal for public comment; it was not an "instruction * * * or temporary rule" within the scope of section 405(b). The effective date of the final regulation is stated above, and reasonable actions based on plan rules allocating unfunded vested benefits to employee that withdraw from a merged plan before that effective date are to be treated as complying with the regulation. Since the provisions of section 405 are clear in this regard, the PBGC considers, it unnecessary to restate them in the regulation.

The PBGC does not agree, however, that MPPAA section 405(a) applies to any "withdraw[al] after a * * * merger that occurred prior to the final effective date of the regulations." Were that true, a plan resulting from a merger that antedated the effective date of the regulation would be forever exempt from compliance with the regulation. Rather, the PBGC considers the regulation applicable to withdrawals occurring on or after its effective date, regardless of when the plan in question was involved in a merger.

The other commenter urged the PBGC not to apply to merged plans a Notice of Interpretation that the PBGC published in the Federal Register on December 31, 1986 (51 FR 47342), dealing with the assessment of withdrawal liability by plans with no unfunded vested benefits. That notice of interpretation was withdrawn by the PBGC in a later notice, published in the Federal Register on March 22, 1991 (56 FR 12298), rendering this second comment moot.

The only difference (other than the correction of some non-substantive errors) between the proposed regulation and the final regulation hereby promulgated is that subparagraphs (i) and (ii) of § 2642.22(d)(1) have been made consistent with each other by changing the words "an employer against which withdrawal liability has been assessed after the initial plan year," which appeared in § 2642.22(d)(1)(ii) of the proposed regulation, to read "an employer that withdrew after the close of the initial plan year."

Compliance With Rulemaking Guidelines

The PBGC has determined that this amendment is not a "major rule" for purposes of Executive Order 12291 because it will not have an annual effect on the economy of $100 million or more; or create a major increase in costs or prices for consumers, individual industries, or geographic regions; or have significant adverse effects on competition, employment, investment, or innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. This determination is based on the fact that this regulation merely provides optional rules for allocating liabilities under merged multiemployer plans; plans are not prevented from adopting allocation methods that were permitted by Part 2642 before this amendment. The regulation neither creates nor imposes new liabilities.

Under section 605(b) of the Regulatory Flexibility Act, the PBGC certifies that this regulation will not have a significant economic impact on a substantial number of small entities. Small multiemployer plans (traditionally viewed as plans with fewer than 100 participants) represent only 6 percent of all multiemployer plans covered by the PBGC (118 out of 2,000) and less than 0.25 percent of all small plans (118 out of 47,650). Further, the number of mergers is not substantial (approximately 25 per year). For these reasons, compliance with sections 603 and 604 of the Regulatory Flexibility Act is waived.

List of Subjects in 29 CFR Parts 2640 and 2642

Employee benefit plans, Pensions, and Pension insurance.

In consideration of the foregoing, subchapter F of chapter XXVI of title 29, Code of Federal Regulations, is amended as follows:

PART 2640—[AMENDED]

1. The authority citation for part 2640 is revised to read as follows:

Authority: 29 U.S.C. 1302(b)(3) (1988).

2. Section 2640.4 is revised to read as follows:

§ 2640.4 Allocating unfunded vested benefits.

For purposes of part 2642—

Initial plan year means a merged plan's first complete plan year that begins after the establishment of the merged plan.

Initial plan year unfunded vested benefits means the unfunded vested benefits as of the close of the initial plan year, less the value as of the end of the initial plan year of all outstanding claims for withdrawal liability that can reasonably be expected to be collected from employers that had withdrawn as of the end of the initial plan year.

Merged plan means a plan that is the result of the merger of two or more multiemployer plans.

Merger means the combining of two or more multiemployer plans into one multiemployer plan.

Post-1980 fraction means the fraction described in section 4211(c)(2)(C)(ii) or (c)(3)(B) of the Act.

Pre-1980 fraction means the fraction described in section 4211(b)(3)(B) or (c)(2)(B)(ii) of the Act.

Prior plan means the plan in which an employer participated immediately before that plan became a part of the merged plan.

Unfunded vested benefits means an amount by which the value of nonforfeitable benefits under the plan exceeds the value of the assets of the plan.

Withdrawing employer means the employer for whom withdrawal liability is being calculated under section 4201 of the Act.

Withdrawn employer means an employer who, prior to the withdrawing employer, has discontinued contributions to the plan or covered operations under the plan and whose obligation to contribute has not been assumed by a successor employer within the meaning of section 4204 of the Act. A temporary suspension of contributions, including a suspension described in section 4218(2) of the Act, is not considered a discontinuance of contributions.

PART 2642—[AMENDED]

3. The authority citation for part 2642 is revised to read as follows:

Authority: 29 U.S.C. 1302(b)(3) and 1391(c)(1), (c)(2)(D), (c)(5)(A), (c)(5)(B), (c)(5)(D), and (f) (1988).

4. Section 2642.1 is amended by revising paragraph (a) to read as follows:

§ 2642.1 Purpose and scope.

(a) *Purpose.* Section 4211 of the Act provides four methods for allocating unfunded vested benefits to employers that withdraw from a multiemployer plan: The presumptive method (section 4211(b)); the modified presumptive method (section 4211(c)(2)); the rolling-5 method (section 4211(c)(3)); and the direct attribution method (section 4211(c)(4)). With the minor exceptions covered in § 2642.2, a plan determines the amount of unfunded vested benefits allocable to a withdrawing employer in accordance with the presumptive method, unless the plan is amended to adopt an alternative allocative method. Generally, the PBGC must approve the adoption of an alternative allocation method. On September 25, 1984, 49 FR 37686, the PBGC granted a class approval of all plan amendments adopting one of the statutory alternative allocation methods. Subpart C of this regulation sets forth the criteria and procedures for PBGC approval of nonstatutory alternative allocation methods. Section 4211(c)(5) of the Act also permits certain modifications to the statutory allocation methods. The PBGC is to prescribe these modifications in a regulation, and plans may adopt them without PBGC approval. Subpart B of this regulation contains the permissible modifications to the statutory methods. Plans may adopt other modifications subject to PBGC approval under subpart C. Finally, under section 4211(f) of the Act, the PBGC is required to prescribe rules governing the application of the statutory allocation methods or modified methods by plans following merger of multiemployer plans. Subpart D sets forth alternative allocative methods to be used by merged plans. In addition, such plans may adopt any of the allocation methods or modifications described under subparts B and C in accordance with the rules under subparts B and C.

* * * * *

5. Part 2642 is amended by adding a new subpart D to read as follows:

Subpart D—Allocation Methods for Merged Multiemployer Plans

2642.21 Allocation of unfunded vested benefits following the merger of plans.
2642.22 Presumptive method for withdrawals after the initial plan year.
2642.23 Modified presumptive method for withdrawals after the initial plan year.
2642.24 Rolling-5 method for withdrawals after the initial plan year.
2642.25 Direct attribution method for withdrawals after the initial plan year.

2642.26 Modifications to the determination of initial liabilities, the amortization of initial liabilities, and the allocation fraction.
2642.27 Allocating unfunded vested benefits for withdrawals before the end of the initial plan year.

Subpart D—Allocation Methods for Merged Multiemployer Plans

§ 2642.21 Allocation of unfunded vested benefits following the merger of plans.

(a) *General Rule.* Except as provided in paragraphs (b) through (d) of this section, when two or more multiemployer plans merge, the merged plan shall adopt one of the statutory allocation methods, in accordance with subpart B of this part, or one of the allocation methods prescribed in §§ 2642.22 through 2642.25, and the method adopted shall apply to all employer withdrawals occurring after the initial plan year. Alternatively, a merged plan may adopt its own allocation method in accordance with Subpart C of this part. If a merged plan fails to adopt an allocation method pursuant to this subpart or subpart B or C, it shall use the presumptive allocation method prescribed in § 2642.22. In addition, a merged plan may adopt any of the modifications prescribed in § 2642.26 or in subpart B of this part.

(b) *Construction plans.* Except as provided in the next sentence, a merged plan that primarily covers employees in the building and construction industry shall use the presumptive allocation method prescribed in § 2642.22. However, the plan may, with respect to employers that are not construction industry employers within the meaning of section 4203(b)(1)(A) of the Act, adopt, by amendment, one of the alternative methods prescribed in §§ 2642.23 through 2642.25 or any other allocation method. Any such amendment shall be adopted in accordance with subpart C of this part. A construction plan may, without the PBGC's approval, adopt by amendment any of the modifications set forth in § 2642.26 or any of the modifications to the statutory presumptive method set forth in § 2642.6.

(c) *Section 404(c) plans.* A merged plan that is a continuation of a plan described in section 404(c) of the Internal Revenue Code (a plan established before January 1, 1954, as a result of an agreement between employee representatives and the United States during a period of government operation, under seizure powers, of a major part of the productive facilities of an industry) shall use the rolling-5 allocation method prescribed in § 2642.24, unless the plan, by amendment, adopts an alternative method. The plan may adopt one of the statutory allocation methods or one of the allocation methods set forth in §§ 2642.22 through 2642.25 without PBGC approval; adoption of any other allocation method is subject to PBGC approval under subpart B of this plan. The plan may, without the PBGC's approval, adopt by amendment any of the modifications set forth in § 2642.26 or in subpart B of this part.

(d) *Withdrawals before the end of the initial plan year.* For employer withdrawals after the effective date of a merger and prior to the end of the initial plan year, the amount of unfunded vested benefits allocable to a withdrawing employer shall be determined in accordance with § 2642.27.

§ 2642.22 Presumptive method for withdrawals after the initial plan year.

(a) *General rule.* Under this section, the amount of unfunded vested benefits allocable to an employer that withdraws from a merged plan after the initial plan year is the sum (but not less than zero) of—

(1) The employer's proportional share, if any, of the unamortized amount of the plan's initial plan year unfunded vested benefits, as determined under paragraph (b) of this section;

(2) The employer's proportional share of the unamortized amount of the change in the plan's unfunded vested benefits for plan years ending after the initial plan year, as determined under paragraph (c) of this section; and

(3) The employer's proportional share of the unamortized amounts of the reallocated unfunded vested benefits (if any) as determined under paragraph (d) of this section.

(b) *Share of initial plan year unfunded vested benefits.* An employer's proportional share, if any, of the unamortized amount of the plan's initial plan year unfunded vested benefits is the sum of the employer's share of its prior plan's liabilities (determined under paragraph (b)(1) of this section) and the employer's share of the adjusted initial plan year unfunded vested benefits (determined under paragraph (b)(2) of this section), with such sum reduced by five percent of the original amount for each plan year subsequent to the initial year.

(1) *Share of prior plan liabilities.* An employer's share of its prior plan's liabilities is the amount of unfunded vested benefits that would have been allocable to the employer if it had withdrawn on the first day of the initial plan year, determined as if each plan had remained a separate plan.

(2) *Share of adjusted initial plan year unfunded vested benefits.* An employer's share of the adjusted initial plan year unfunded vested benefits equals the plan's initial plan year unfunded vested benefits, less the amount that would be determined under paragraph (b)(1) of this section for each employer that had not withdrawn as of the end of the initial plan year, multiplied by a fraction—

(i) The numerator of which is the amount determined under paragraph (b)(1) of this section; and

(ii) The denominator of which is the sum of the amounts that would be determined under paragraph (b)(1) of this section for each employer that had not withdrawn as of the end of the initial plan year.

(c) *Share of annual changes.* An employer's proportional share of the unamortized amount of the change in the plan's unfunded vested for the plan years ending after the end of the initial plan year is the sum of the employer's proportional shares (determined under paragraph (c)(2) of this section) of the unamortized amount of the change in unfunded vested benefits (determined under paragraph (c)(1) of this section) for each plan year in which the employer has an obligation to contribute under the plan ending after the initial plan year and before the plan year in which the employer withdraws.

(1) *Change in plan's unfunded vested benefits.* The change in a plan's unfunded vested benefits for a plan year is the amount by which the unfunded vested benefits at the end of a plan year, less the value as of the end of such year of all outstanding claims for withdrawal liability that can reasonably be expected to be collected from employers that had withdrawn as of the end of the initial plan year, exceed the sum of the unamortized amount of the initial plan year unfunded vested benefits (determined under paragraph (c)(1)(i) of this section) and the unamortized amounts of the change in unfunded vested benefits for each plan year ending after the initial plan year and preceding the plan year for which the change is determined (determined under paragraph (c)(1)(ii) of this section).

(i) *Unamortized amount of initial plan year unfunded vested benefits.* The unamortized amount of the initial plan year unfunded vested benefits is the amount of those benefits reduced by five percent of the original amount for each succeeding plan year.

(ii) *Unamortized amount of the change.* The unamortized amount of the

change in a plan's unfunded vested benefits with respect to a plan year is the change in unfunded vested benefits for the plan year, reduced by five percent of such change for each succeeding plan year.

(2) *Employer's proportional share.* An employer's proportional share of the amount determined under paragraph (c)(1) of this section is computed by multiplying that amount by a fraction—

(i) The numerator of which is the total amount required to be contributed under the plan (or under the employer's prior plan) by the employer for the plan year in which the change arose and the four preceding full plan years; and

(ii) The denominator of which is the total amount contributed under the plan (or under employer's prior plan) for the plan year in which the change arose and the four preceding full plan years by all employers that had an obligation to contribute under the plan for the plan year in which such change arose, reduced by any amount contributed by an employer that withdrew from the plan in the year in which the change arose.

(d) *Share of reallocated amounts.* An employer's proportional share of the unamortized amounts of the reallocated unfunded vested benefits, if any, is the sum of the employer's proportional shares (determined under paragraph (d)(2) of this section) of the unamortized amount of the reallocated unfunded vested benefits (determined under paragraph (d)(1) of this section) for each plan year ending before the plan year in which the employer withdrew from the plan.

(1) *Unamortized amount of reallocated unfunded vested benefits.* The unamortized amount of the reallocated unfunded vested benefits with respect to a plan year is the sum of the amounts described in paragraphs (d)(1)(i), (d)(1)(ii), and (d)(1)(iii) of this section for the plan year, reduced by five percent of such sum for each succeeding plan year.

(i) *Uncollectible amounts.* Amounts included as reallocable under this paragraph are those that the plan sponsor determines in that plan year to be uncollectible for reasons arising out of cases or proceedings under Title 11, United States Code, or similar proceedings, with respect to an employer that withdrew after the close of the initial plan year.

(ii) *Relief amounts.* Amounts included as reallocable under this paragraph are those that the plan sponsor determines in that plan year will not be assessed as a result of the operation of sections 4209, 4219(c)(1)(B), or 4225 of the Act with respect to an employer that withdrew after the close of the initial plan year.

(iii) *Other amounts.* Amounts included as reallocable under this paragraph are those that the plan sponsor determines in that plan year to be uncollectible or unassessble for other reasons under standards not inconsistent with regulations prescribed by the PBGC.

(2) *Employer's proportional share.* An employer's proportional share of the amount of the reallocated unfunded vested benefits with respect to a plan year is computed by multiplying the unamortized amount of the reallocated unfunded vested benefits (as of the end of the year preceding the plan year in which the employer withdraws) by the allocation fraction described in paragraph (c)(2) of this section for the same plan year.

§ 2642.23 Modified presumptive method for withdrawals after the initial plan year.

(a) *General rule.* Under this section, the amount of unfunded vested benefits allocable to an employer that withdraws from a merged plan after the initial plan year is the sum of the employer's proportional share, if any, of the unamortized amount of the plan's initial plan year unfunded vested benefits (determined under paragraph (b) of this section) and the employer's proportional share of the unamortized amount of the unfunded vested benefits arising after the initial plan year (determined under paragraph (c) of this section).

(b) *Share of initial plan year unfunded vested benefits.* An employer's proportional share, if any, of the unamortized amount of the plan's initial plan year unfunded vested benefits is the sum of the employer's share of its prior plan's liabilities, as determined under § 2642.22(b)(1), and the employer's share of the adjusted initial plan year unfunded vested benefits, as determined under § 2642.22(b)(2) with such sum reduced as if it were being fully amortized in level annual installments over fifteen years beginning with the first plan year after the initial plan year.

(c) *Share of unfunded vested benefits arising after the initial plan year.* An employer's proportional share of the amount of the plan's unfunded vested benefits arising after the initial plan year is the employer's proportional share (determined under paragraph (c)(2) of this section) of the plan's unfunded vested benefits as of the end of the plan year preceding the plan year in which the employer withdraws, reduced by the amount of the plan's unfunded vested benefits as of the close of the initial plan year (determined under paragraph (c)(1) of this section).

(1) *Amount of unfunded vested benefits.* The plan's unfunded vested benefits as of the end of the plan year preceding the plan year in which the employer withdraws shall be reduced by the sum of—

(i) The value as of that date of all outstanding claims for withdrawal liability that can reasonably be expected to be collected, with respect to employers that withdrew before that plan year; and

(ii) The sum of the amounts that would be allocable under paragraph (b) of this section to all employers that have an obligation to contribute in the plan year preceding the plan year in which the employer withdraws and that also had an obligation to contribute in the first plan year ending after the initial plan year.

(2) *Employer's proportional share.* An employer's proportional share of the amount determined under paragraph (c)(1) of this section is computed by multiplying that amount by a fraction—

(i) The numerator of which is the total amount required to be contributed under the plan (or under the employer's prior plan) by the employer for the last five full plan years ending before the date on which the employer withdraws; and

(ii) The denominator of which is the total amount contributed under the plan (or under each employer's prior plan) by all employers for the last five full plan years ending before the date on which the employer withdraws, increased by the amount of any employer contributions owed with respect to earlier periods that were collected in those plan years, and decreased by any amount contributed by an employer that withdrew from the plan (or prior plan) during those plan years.

§ 2642.24 Rolling-5 method for withdrawals after the initial plan year.

(a) *General rule.* Under this section, the amount of unfunded vested benefits allocable to an employer that withdraws from a merged plan after the initial plan year is the sum of the employer's proportional share, if any, of the unamortized amount of the plan's initial plan year unfunded vested benefits (determined under paragraph (b) of this section) and the employer's proportional share of the unamortized amount of the unfunded vested benefits arising after the initial plan year (determined under paragraph (c) of this section).

(b) *Share of initial plan year unfunded vested benefits.* An employer's proportional share, if any, of

the unamortized amount of the plan's initial plan year unfunded vested benefits is the sum of the employer's share of its prior plan's liabilities, as determined under § 2642.22(b)(1), and the employer's share of the adjusted initial plan year unfunded vested benefits, as determined under § 2642.22(b)(2), with such sum reduced as if it were being fully amortized in level annual installments over five years beginning with the first plan year after the initial plan year.

(c) *Share of unfunded vested benefits arising after the initial plan year.* An employer's proportional share of the amount of the plan's unfunded vested benefits arising after the initial plan year is the employer's proportional share determined under § 2642.23(c).

§ 2642.25 Direct attribution method for withdrawals after the initial plan year.

The allocation method under this section is the allocation method described in section 4211(c)(4) of the Act.

§ 2642.26 Modifications to the determination of initial liabilities, the amortization of initial liabilities, and the allocation fraction.

(a) *General rule.* A plan using any of the allocation methods described in §§ 2642.22 through 2642.24 may, by plan amendment and without PBGC approval, adopt any of the modifications described in this section.

(b) *Restarting initial liabilities.* A plan may be amended to allocate the initial plan year unfunded vested benefits under § 2642.22(b), § 2642.23(b), or § 2642.24(b) without separately allocating to employers the liabilities attributable to their participation under their prior plans. An amendment under this paragraph must include an allocation fraction under paragraph (d) of this section for determining the employer's proportional share of the total unfunded benefits as of the close of the initial plan year.

(c) *Amortizing initial liabilities.* A plan may by amendment modify the amortization of initial liabilities in either of the following ways:

(1) If two or more plans that use the presumptive allocation method of section 4211(b) of the Act merge, the merged plan may adjust the amortization of initial liabilities under § 2642.22(b) to amortize those unfunded vested benefits over the remaining length of the prior plans' amortization schedules.

(2) A plan that has adopted the allocation method under § 2642.23 or § 2642.24 may adjust the amortization of initial liabilities under § 2642.23(b) or § 2642.24(b) to amortize those unfunded vested benefits in level annual installments over any period of at least five and not more than fifteen years.

(d) *Changing the allocation fraction.* A plan may by amendment replace the allocation fraction under § 2642.22(b), § 2642.23(b), or § 2642.24(b) with any of the following contribution-based fractions—

(1) A fraction, the numerator of which is the total amount required to be contributed under the merged and prior plans by the withdrawing employer in the 60-month period ending on the last day of the initial plan year, and the denominator of which is the sum for that period of the contributions made by all employers that had not withdrawn as of the end of the initial plan year;

(2) A fraction, the numerator of which is the total amount required to be contributed by the withdrawing employer for the initial plan year and the four preceding full plan years of its prior plan, and the denominator of which is the sum of all contributions made over that period by employers that had not withdrawn as of the end of the initial plan year; or

(3) A fraction, the numerator of which is the total amount required to be contributed to the plan by the withdrawing employer since the effective date of the merger, and the denominator of which is the sum of all contributions made over that period by employers that had not withdrawn as of the end of the initial plan year.

§ 2642.27 Allocating unfunded vested benefits for withdrawals before the end of the initial plan year.

If an employer withdraws after the effective date of a merger and before the end of the initial plan year, the amount of unfunded vested benefits allocable to the employer shall be determined as if each plan had remained a separate plan. In making this determination, the plan sponsor shall use the allocation method of the withdrawing employer's prior plan and shall compute the employer's allocable share of the plan's unfunded vested benefits as if the day before the effective date of the merger were the end of the last plan year prior to the withdrawal.

Issued at Washington, D.C., on this 9th day of December, 1992.

Lynn Martin,

Chairman, Board of Directors, Pension Benefit Guaranty Corporation.

Issued pursuant to a resolution of the Board of Directors approving, and authorizing its chairman to issue, this regulation.

Carol Connor Flowe,

Secretary, Board of Directors, Pension Benefit Guaranty Corporation.

RIN 1212-AA22

Reduction or Waiver of Partial Withdrawal Liability

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This regulation establishes rules for reducing or waiving the liability of an employer that has partially withdrawn from a multiemployer pension plan and subsequently increases its contributions base units or reenters the plan under the bargaining agreement or for the facility that gave rise to the partial withdrawal liability. The Employee Retirement Income Security Act of 1974, as amended, directs the PBGC to issue some of these rules and authorizes it to issue the others. The regulation is needed to provide relief to employers that incur partial withdrawal liability and subsequently resume on a covered basis some or all of the work that gave rise to the partial withdrawal. The regulation requires plans to waive or reduce the employer's obligation to make withdrawal liability payments under certain circumstances and provides guidance for implementing reductions in payments required by ERISA. It also provides procedures under which plans may adopt additional rules for the reduction or waiver of partial withdrawal liability, subject to PBGC approval.

EFFECTIVE DATE: January 15, 1993.

FOR FURTHER INFORMATION CONTACT: Deborah J Bisco, Attorney, Office of the General Counsel (22500), Pension Benefit Guaranty Corporation, 2020 K Street, NW.,Washington, DC 20006; (202) 778-8824 (202-778-8859 for TTY and TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this regulation has been reviewed and approved by the Office of Management and Budget under the Paperwork Reduction Act of 1980 under control number 1212-0039. The collection of information, which is set

forth in § 2646.8, applies only to multiemployer plans that wish to adopt their own rules for the waiver or reduction of partial withdrawal liability. Plans are not required to adopt such rules. The estimated annual burden associated with this collection of information is five hours per respondent, with an estimated number of respondents of ten per year. This results in an estimated annual burden of 50 hours. Comments concerning the accuracy of this burden estimate and any suggestions for reducing this burden should be directed to the Pension Benefit Guaranty Corporation, Office of the General Counsel (Code 22500), 2020 K Street, NW., Washington, DC 20006; and to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for the Pension Benefit Guaranty Corporation, room 3208 New Executive Office Building, Washington, DC 20503.

Background

Section 4205(a) of the Employee Retirement Income Security Act of 1974, as amended ("ERISA" or "the Act"), sets forth the circumstances under which an employer is deemed to have partially withdrawn from a multiemployer pension plan. A partial withdrawal occurs on the last day of a plan year in which: (1) There is a 70-percent contribution decline, or (2) there is a partial cessation of the employer's contribution obligation. Section 4205(b)(1) sets forth the statutory formula defining a 70-percent contribution decline. Section 4205(b)(2) defines a partial cessation of the contribution obligation as: (1) The permanent cessation of the employer's contribution obligation to the plan under one or more but fewer than all of the collective bargaining agreements pursuant to which the employer contributes to the plan, with the employer either continuing to perform work in the jurisdiction of the collective bargaining agreement of the type for which contributions were previously required or transferring such work to another location; or (2) the permanent cessation of the employer's contribution obligation with respect to work performed at one or more but fewer than all of the employer's facilities, with the employer continuing to perform work at the facility of the type for which the contribution obligation ceased.

The amount of an employer's liability for a partial withdrawal is calculated under section 4206(a). Section 4206(b) provides that the liability for a withdrawal subsequent to a partial withdrawal shall be reduced to reflect the liability assessed for the prior withdrawal. Section 4208 sets forth the general requirements for the reduction or waiver of partial withdrawal liability and establishes abatement rules for partial withdrawals resulting from 70% contribution declines. Section 4208(e) authorizes the Pension Benefit Guaranty Corporation ("PBGC") to prescribe regulations providing for the reduction or elimination of partial withdrawal liability under other conditions. Section 4208(e)(3) also requires that the PBGC establish a procedure under which plans may adopt their own rules for abatement of partial withdrawal liability under other conditions, subject to PBGC approval of such rules.

On June 5, 1987, the PBGC published a proposed regulation on Reduction or Waiver of Partial Withdrawal Liability (52 FR 21319). Among other things, the regulation proposed mandatory rules for the reduction or elimination of an employer's liability arising from a bargaining unit or facility "takeout" partial withdrawal. The regulation also proposed procedures under which plans could request PBGC approval of plan rules providing for the reduction or elimination of partial withdrawal liability and standards for the PBGC's decision on such requests. Three written comments were received on the proposal. These comments have been reviewed by the PBGC and changes have been made in the regulation based on some of the comments. The PBGC has also corrected an error in the proposed regulation and has made several conforming changes necessitated by these revisions in the final regulation. Finally, the PBGC has also made a number of editorial changes for clarification or to eliminate redundancy.

Comments on the Proposed Regulation

One commenter expressed concern that the 60-day time limit contained in § 2646.2(b) may be too short. This provision requires that a plan sponsor determine within 60 days after receipt of an application from an eligible employer whether the employer qualifies for abatement. According to the commenter, "many plans reserve these types of determinations for their Boards of Trustees* * *[and] the next board meeting after the plan receives an application for abatement may not be within the sixty-day limit." The commenter also noted that the plan may need more time to collect data necessary to make the determination, to "communicate with its actuaries and process the required data," and to obtain additional data from the employer if the application was incomplete. For those reasons, the commenter recommended that the PBGC revise the regulation to provide the same requirement as in the regulation on reduction or waiver of complete withdrawal liability (29 CFR part 2647), *i.e.*, that the plan sponsor's determination be made "as soon as practicable" after an eligible employer applies for abatement (See § 2647.2(b)).

It is the PBGC's view that the 60-day period should provide plans with sufficient time to make the determination. The 60-day period begins when the employer submits a complete application to the plan. Under § 2646.2(a), this includes "the basis for reduction or waiver" of liability. Thus, if the plan has to request additional information from the employer in order to determine the basis for the abatement, the 60-day period would not commence until the additional information is received. It is likely that in most instances employers will not apply until after the close of the plan year in which they satisfy the conditions for abatement. Thus, the data necessary for the determination should be readily available. With respect to the problems cited by the commenter as to the feasibility of a plan's board of trustees making the abatement determination within the 60-day period, the PBGC does not find these problems insurmountable. The abatement determination is the type of decision that could normally be delegated by the board of trustees to, for example, a sub-group of the board that meets more frequently than the full board.

One commenter urged that the regulation provide that a plan may offset against any refund for overpayments required by § 2646.2(c)(4) any amounts owed by the employer, for whatever reason, to the plan. The PBGC believes that it is important not to create disincentives for employers to pay partial withdrawal liability during the period in which they may satisfy the criteria for abatement of that liability. Applying overpayments that result from an employer's qualifying for abatement to amounts owed by the employer to the plan for other purposes could be such a disincentive, because the employer would know that if it did qualify, it would not receive a refund of any resultant overpayments of its partial withdrawal liability. Moreover, plans have effective statutory tools to enforce payment by employers of other obligations. Title I of ERISA gives plans the authority to sue for delinquent contributions, and Title IV gives plans the authority to sue to enforce the obligation to pay withdrawal liability. Therefore, the PBGC does not believe that the refund rule in § 2646.2(c)(4) will create hardships for plans.

One commenter objected to the requirements of § 2646.3(b) of the proposed rule (redesignated § 2646.3(b)(1) in the final rule), regarding the facility/bargaining unit take-out rule, as being inconsistent with the statute and so stringent as to operate as a deterrent to reentry. Proposed § 2646.3(b) provided for the waiver of partial withdrawal liability for a facility or collective bargaining agreement partial withdrawal if the employer, in each of two consecutive years, satisfies the following three conditions:

(1) The employer resumes contributions for the same facility or agreement that gave rise to the partial withdrawal;

(2) The contribution base units for the reentered facility or agreement exceed 30 percent of the contribution base units with respect to the facility or agreement for the high base year; and

(3) The total contribution base units of the employer equal or exceed 90 percent of the total contribution base units of the employer in its high base year.

The commenter asserted that conditioning abatement on the employer's total contribution base units is inconsistent with section 4208(e)(2), which provides that:

> reduction of withdrawal liability shall be provided only with respect to subsequent changes in the employer's contributions for the same operations, or under the same collective bargaining agreement, that gave rise to the partial withdrawal, and changes in the employer's contribution base units with respect to other facilities or other collective bargaining agreements shall not be taken into account.

In the view of the commenter, this provision requires that the abatement test focus exclusively on the reentered operations and not on the employer's overall units. As to the potential deterrent effect, the commenter noted that if an employer has experienced large declines in contribution base units prior to the partial withdrawal, the 90 percent requirement could disqualify the employer for abatement even if the employer were to restore fully the operations that gave rise to the partial withdrawal.

The PBGC disagrees with the commenter's interpretation of section 4208(e)(2). It is the PBGC's view that section 4208(e)(2) mandates that an employer not receive the benefit of abatement solely as a result of increases in other operations; it does not prohibit an abatement rule that includes an employer's contribution base units at other operations as one of the criteria. Nevertheless, the PBGC does agree with the commenter that the 90 percent test in proposed § 2646.3(b) may discourage reentry in some cases and may be unduly stringent in situations in which the employer is restoring work at the full pre-withdrawal level at the facility or under the agreement that gave rise to the partial withdrawal.

In order to address these concerns, the PBGC has decided to promulgate an alternative rule under § 2646.3(b). This abatement test requires restoration of a greater amount of work at the facility, or under the bargaining agreement that gave rise to the partial withdrawal, but also permits restored work in excess of the threshold amount to offset a diminution of covered work at the employer's other facilities or under its other bargaining agreements. In addition, the pre-withdrawal period against which the employer's contribution base units at or under its other facilities or bargaining agreements are measured is the year preceding the partial withdrawal year. Thus, this new rule enables an employer to qualify for abatement if it restores to the plan substantially all of the work that gave rise to its partial withdrawal, even if the employer had been experiencing a general decline in its covered work during the several years prior to the withdrawal.

One comment was received on the request in the preamble to the proposed regulation for comments on adding an exception to § 2646.3(c)(1) "that would allow plans to adopt more stringent standards [for the reduction of the annual payment amount], when the proposed requirement would necessitate administrative costs that exceed the reduction in the employer's annual withdrawal liability payment." The sole comment on this issue endorsed the need for such an exception, without providing any criteria or suggestions as to how such an exception might be framed. Because the PBGC has no basis for setting objective standards to implement such an exception, none is included in the final rule.

As stated in the proposed regulation (§ 2646.3(d)), the description of the base period used for abatement determinations with respect to withdrawal liability resulting from 70-percent contribution declines was incorrect. The correct base period is the five plans years immediately preceding the beginning of the 3-year testing period under section 4205(b)(1)(B)(i) of the Act, not preceding the year of the withdrawal. Section 2646.3(d) has been revised accordingly.

One commenter objected to the rule in § 2646.4(a) that a bond/escrow may only be provided for withdrawal liability payments falling due after the first year in which an employer meets the abatement requirements. According to the commenter, section 4208(a)(2) of ERISA does not "require a one-year restoration [of the withdrawn work], but permits bonding in lieu of payments 'for any plan year' in which the requirements" for abatement are met.

ERISA section 4208(a)(2)(A) provides that:

> For any plan year for which the number of contribution base units with respect to which an employer who has partially withdrawn under section 4205(a)(1) has an obligation to contribute under the plan equals or exceeds the number of units for the highest year determined under [section 4208(a)(1)] without regard to "90 per cent of", the employer may furnish (in lieu of the payment of the partial withdrawal liability determined under section 4206) a bond to the plan in the amount determined by the plan sponsor (not exceeding 50 percent of the annual payment otherwise required).

While a literal reading of this provision supports the commenter's contention, as a practical matter, one cannot determine whether this standard has, in fact, been met until the end of a plan year. Therefore, the one-year restoration period required under § 2646.4(a) is a practical necessity.

The final comment related to proposed § 2646.8, which authorized plans to adopt by plan amendment, subject to PBGC approval, rules waiving or reducing partial withdrawal liability under other conditions. The PBGC's approval of such an amendment is based on its determination that adoption of the amendment is consistent with the purposes of the Act (ERISA section 4208(e)(3)). Proposed § 2646.8(f) provided that plan rules are consistent with the purposes of the Act only if, *inter alia*, "[t]he rules base waiver or reduction of the employer's partial withdrawal liability, in whole or in part, on increases in the employer's contribution base units or in the plan's overall contribution base units in years after the years following the partial withdrawal year * * *." The commenter objected to these standards as being overly restrictive in defining what is consistent with the purposes of the Act. The commenter recommended that the standards be broadened to allow a plan to base reduction or waiver of partial withdrawal liability on such factors as the financial viability of the plan in the partial withdrawal year and declines in the plan's unfunded vested benefits.

The PBGC agrees that the proposed standards may be overly restrictive; that there may be other factors on which to condition abatement that would be consistent with the purposes of the Act. However, the PBGC believes that the

commenter's proposed standards are inappropriate because they ignore an essential element of an abatement rule, *i.e.*, that abatement of withdrawal liability be predicated on events occurring or conditions existing after the withdrawal. A rule that would permit a plan to waive partial withdrawal liability if the plan is well funded as of the partial withdrawal year is really a rule amending the rules for calculating partial withdrawal liability under ERISA section 4206. As such, the rule is beyond the authority of a plan sponsor to adopt or the PBGC to approve. The commenter's recommended revision of the regulation suggests that this basic issue was not adequately addressed in the proposed regulation or its preamble. In order to clarify the prerequisites of an abatement rule, a sentence has been added to § 2646.8(a) specifying that rules adopted under § 2646.8 shall be based on events or factors existing subsequent to the partial withdrawal year.

Proposed § 2646.8(f) set forth very limited criteria for determining whether abatement rules adopted by a plan are acceptable. Therefore, § 2646.8(f) has been revised to provide less restrictive standards for determining whether plan abatement rules are consistent with the purposes of the Act. In its revised form, § 2646.8(f) provides that a plan amendment adopting abatement rules is not consistent with the purposes of the Act unless the PBGC determines that the amendment is not adverse to the interests of plan participants and beneficiaries in the aggregate and would not increase significantly the PBGC's risk of loss with respect to the plan.

Finally, the PBGC received a request for clarification of the following statement relating to the calculation of partial withdrawal liability in the preamble to the proposed regulation:

> The allocable unfunded vested benefits are determined as of the date of the partial withdrawal, or, in the case of a 70-percent decline, as of the last day of the first plan year in the 3-year testing period. (52 FR 21320)

This statement can be interpreted as requiring that the computation of partial withdrawal liability be based on the employer's allocable share of the plan's unfunded vested benefits on the date of the partial withdrawal (or, in the case of a 70-percent decline partial withdrawal, on the last day of the first plan year in the 3-year testing period). This is contrary to the statute and is not what was intended. The intent was to paraphrase ERISA section 4206(a), which provides that the unfunded vested benefits allocable to a withdrawn employer are determined as if the employer had completely withdrawn on the date of the partial withdrawal, or, in the case of a 70-percent contribution decline, on the last day of the first year in the 3-year testing period. Thus, the starting point for the calculation of partial withdrawal liability is the plan's unfunded vested benefits as of the last day of the plan year preceding either the date of the partial withdrawal, or the first year of the 3-year testing period, as applicable.

Compliance with Rulemaking Guidelines

The PBGC has determined that this regulation is not a "major rule" for the purposes of Executive Order 12291, because it will not have an annual effect on the economy of $100 million or more; create a major increase in costs or prices for consumers, individual industries, or geographic regions; or have significant adverse effects on competition, employment, investment, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Under section 605(b) of the Regulatory Flexibility Act, the PBGC certifies that this rule will not have a significant economic impact on a substantial number of small entities. Pension plans with fewer than 100 participants have traditionally been treated as small plans. The regulation affects only multiemployer plans covered by the PBGC. Defining "small plans" as those with under 100 participants, they represent less than 14 percent of all multiemployer plans covered by the PBGC (346 out of 2500). Approximately 500,000 employers contribute to multiemployer plans, most of them small employers (under 100 employees). The PBGC estimates that fewer than 10,000 (2 percent) of these employers will be required to pay partial withdrawal liability in any year, and an even smaller percentage will subsequently increase their participation under a plan and thereby become subject to these rules. Therefore, the PBGC waives compliance with sections 603 and 604 of the Regulatory Flexibility Act.

List of Subjects in 29 CFR Parts 2640 and 2646

Employee benefit plans, Pensions, and Reporting requirements.

In consideration of the foregoing, the PBGC hereby amends subchapter F of chapter XXVI, title 29, Code of Federal Regulations as follows:

PART 2640—DEFINITIONS

1. The authority for part 2640 continues to read as follows:

Authority: 29 U.S.C. 1302(b)(3).

2. Part 2640 is amended by revising § 2640.6 to read as follows:

§ 2640.6 Reduction or waiver of partial and complete withdrawal liability.

For purposes of parts 2646 and 2647—

Complete withdrawal means a complete withdrawal as described in section 4203 of the Act.

Eligible employer means the employer, as defined in section 4001(b) of the Act, as it existed on the date of its initial partial or complete withdrawal, as applicable. An eligible employer shall continue to be an eligible employer notwithstanding the occurrence of any of the following events:

(1) A restoration involving a mere change in identity, form or place of organization, however effected;

(2) A reorganization involving a liquidation into a parent corporation;

(3) A merger, consolidation or division solely between (or among) trades or businesses (whether or not incorporated) of the employer; or

(4) An acquisition by or of, or a merger or combination with another trade or business.

Multiemployer Act means the Multiemployer Pension Plan Amendments Act of 1980, Public Law 96–364, 94 Stat. 1208 (1980).

Partial withdrawal means a partial withdrawal as described in section 4205 of the Act.

Partial withdrawal year means the third year of the 3-year testing period in the case of a partial withdrawal caused by a 70-percent contribution decline, or the year of the partial cessation in the case of a partial withdrawal caused by a partial cessation of the employer's contribution obligation.

Period of withdrawal means the plan year in which the employer completely withdrew from the plan, the plan year in which the employer reentered the plan and all intervening plan years.

3. A new part 2646 is added to read as follows:

PART 2646—REDUCTION OR WAIVER OF PARTIAL WITHDRAWAL LIABILITY

Sec.

2646.1 Purpose and scope.
2646.2 Abatement.
2646.3 Conditions for abatement.
2646.4 Withdrawal liability payments during pendency of abatement determination.
2646.5 Computation of reduced annual partial withdrawal liability payment.

Sec.
2646.6 Adjustment of withdrawal liability for subsequent withdrawals.
2646.7 Multiple partial withdrawals in one plan year.
2646.8 Plan adoption of additional abatement conditions.

Authority: 29 U.S.C. 1302(b)(3) and 1388 (c) and (e).

§ 2646.1 Purpose and scope.

(a) *Purpose.* The purpose of this regulation is to establish rules for reducing or waiving the liability of certain employers that have partially withdrawn from a multiemployer pension plan. Section 4208 of the Act establishes certain conditions under which an employer's partial withdrawal liability will be waived or reduced and authorizes the PBGC to prescribe rules setting forth additional conditions under which partial withdrawal liability will be waived or reduced. That section also directs the PBGC to establish a procedure by which a plan may, subject to PBGC approval, adopt rules for the reduction or elimination of partial withdrawal liability under other conditions. This regulation establishes procedures for eliminating the partial withdrawal liability of an employer that satisfies the conditions of section 4208 (a) or (b) and rules and procedures for reducing or eliminating partial withdrawal liability under other specified conditions. It also provides procedures for plans to apply to the PBGC for approval of plan amendments that reduce or waive partial withdrawal liability under conditions other than those specified in section 4208 and this part.

(b) *Scope.* This part applies to multiemployer pension plans covered under section 4021(a) of the Act and not excluded by section 4021(b) and to employers that have partially withdrawn from such plans after September 25, 1980, and that have not, as of the date on which they satisfy the conditions for reducing or eliminating their partial withdrawal liability, fully satisfied their obligation to pay that partial withdrawal liability. This rule shall not negate reasonable actions taken by plans prior to the effective date of this part under plan rules implementing section 4208 that were validly adopted pursuant to section 405 of the Multiemployer Act.

§ 2646.2 Abatement.

(a) *General.* Whenever an eligible employer that has partially withdrawn from a multiemployer plan satisfies the requirements in § 2646.3 for the reduction or waiver of its partial withdrawal liability, it may apply to the plan for abatement of its partial withdrawal liability. Applications shall identify the eligible employer, the withdrawn employer (if different), the date of withdrawal, and the basis for reduction or waiver of its withdrawal liability. Upon receiving a complete application for abatement, the plan sponsor shall determine, in accordance with paragraph (b) of this section, whether the employer satisfies the requirements for abatement of its partial withdrawal liability under § 2646.3. If the plan sponsor determines that the employer satisfies the requirements for abatement of its partial withdrawal liability, the provisions of paragraph (c) of this section shall apply. If the plan sponsor determines that the employer does not satisfy the requirements for abatement of its partial withdrawal liability, the provisions of paragraphs (d) and (e) of this section shall apply.

(b) *Determination of abatement.* Within 60 days after an eligible employer that partially withdrew from a multiemployer plan applies for abatement in accordance with paragraph (a) of this section, the plan sponsor shall determine whether the employer satisfies the requirements for abatement of its partial withdrawal liability under § 2646.3 and shall notify the employer in writing of its determination and of the consequences of its determination, as described in paragraphs (c) or (d) and (e) of this section, as appropriate. If a bond or escrow has been provided to the plan under § 2646.4 of this part, the plan sponsor shall send a copy of the notice to the bonding or escrow agent.

(c) *Effects of abatement.* If the plan sponsor determines that the employer satisfies the requirements for abatement of its partial withdrawal liability under § 2646.3, then—

(1) The employer's partial withdrawal liability shall be eliminated or its annual partial withdrawal liability payments shall be reduced in accordance with § 2646.5, as applicable;

(2) The employer's liability for a subsequent withdrawal shall be determined in accordance with § 2646.6;

(3) Any bonds furnished under § 2646.4 shall be cancelled and any amounts held in escrow under § 2646.4 shall be refunded to the employer; and

(4) Any withdrawal liability payments originally due and paid after the end of the plan year in which the conditions for abatement were satisfied, in excess of the amount due under this part after that date shall be credited to the remaining withdrawal liability payments, if any, owed by the employer, beginning with the first payment due after the revised payment schedule is issued pursuant to this paragraph. If the credited amount is greater than the outstanding amount of the employer's partial withdrawal liability, the amount remaining after satisfaction of the liability shall be refunded to the employer. Interest on the credited amount at the rate prescribed in Part 2644 of this subchapter (relating to notice and collection of withdrawal liability) shall be added if the plan sponsor does not issue a revised payment schedule reflecting the credit or make the required refund within 60 days after receipt by the plan sponsor of a complete abatement application. Interest shall accrue from the 61st day.

(d) *Effects of non-abatement.* If the plan sponsor determines that the employer does not satisfy the requirements for abatement of its partial withdrawal liability under § 2646.3, then the employer shall take or cause to be taken the actions set forth in paragraphs (d)(1)–(d)(3). The rules in part 2644 shall apply with respect to all payments required to be made under paragraphs (d)(2) and (d)(3). For this purpose, a payment required under paragraph (d)(2) shall be treated as a withdrawal liability payment due on the 30th day after the date of the plan sponsor's notice under paragraph (b) of this section.

(1) Any bond or escrow furnished under § 2646.4 shall be paid to the plan within 30 days after the date of the plan sponsor's notice under paragraph (b) of this section.

(2) The employer shall pay to the plan within 30 days after the date of the plan sponsor's notice under paragraph (b) of this section, the amount of its withdrawal liability payment or payments, with respect to which the bond or escrow was furnished, in excess of the bond or escrow.

(3) The employer shall resume or continue making its partial withdrawal liability payments as they are due to the plan.

(e) *Review of non-abatement determination.* A plan sponsor's determinations that the employer does not satisfy the requirements for abatement under § 2646.3 and of the amount of reduction determined under § 2646.5 shall be subject to plan review under section 4219(b)(2) of the Act and to arbitration under section 4221 of the Act and part 2641 of this subchapter, within the times prescribed by those provisions. For this purpose, the plan sponsor's notice under paragraph (b) of this section shall be treated as a demand under section 4219(b)(1) of the Act. If the plan sponsor upon review or an arbitrator determines that the employer satisfies the requirements for abatement of its partial withdrawal liability under § 2646.3, the plan sponsor shall

immediately refund the amounts described in paragraph (e)(1) if the liability is waived, or credit and refund the amounts described in paragraph (e)(2) if the annual payment is reduced.

(1) *Refund for waived liability.* If the employer's partial withdrawal liability is waived, the plan sponsor shall refund to the employer the payments made pursuant to paragraphs (d)(1)–(d)(3) of this section (plus interest determined in accordance with § 2644.2(d) of this subchapter as if the payments were overpayments of withdrawal liability).

(2) *Credit for reduced annual payment.* If the employer's annual partial withdrawal liability payment is reduced, the plan sponsor shall credit the payments made pursuant to paragraphs (d)(1)–(d)(3) of this section (plus interest determined in accordance with § 2644.2(d) of this subchapter as if the payments were overpayments of withdrawal liability) to future withdrawal liability payments owed by the employer, beginning with the first payment that is due after the determination, and refund any credit (including interest) remaining after satisfaction of the outstanding amount of the employer's partial withdrawal liability.

§ 2646.3 Conditions for abatement.

(a) *Waiver of liability for a 70-percent contribution decline.* An employer that has incurred a partial withdrawal under section 4205(a)(1) shall have no obligation to make payments with respect to that partial withdrawal (other than delinquent payments) for plan years beginning after the second consecutive plan year in which the conditions of either paragraph (a)(1) or (a)(2) are satisfied for each of the two years:

(1) The number of contribution base units with respect to which the employer has an obligation to contribute under the plan for each year is not less than 90 percent of the total number of contribution base units with respect to which the employer had an obligation to contribute to the plan for the high base year (as defined in paragraph (d) of this section).

(2) The conditions of this paragraph are satisfied if—

(i) The number of contribution base units with respect to which the employer has an obligation to contribute for each year exceeds 30 percent of the total number of contribution base units with respect to which the employer had an obligation to contribute to the plan for the high base year (as defined in paragraph (d) of this section); and

(ii) The total number of contribution base units with respect to which all employers under the plan have obligations to contribute in each of the two years is not less than 90 percent of the total number of contribution base units for which all employers had obligations to contribute in the partial withdrawal year.

(b) *Waiver of liability for a partial cessation of the employer's contribution obligation.* Except as provided in § 2646.7, an employer that has incurred partial withdrawal liability under section 4205(a)(2) shall have no obligation to make payments with respect to that partial withdrawal (other than delinquent payments) for plan years beginning after the second consecutive plan year in which the employer satisfies the conditions under either paragraph (b)(1) or (b)(2) of this section.

(1) *Partial restoration of withdrawn work.* The employer satisfies the conditions under this paragraph if, for each of two consecutive plan years—

(i) The employer makes contributions for the same facility or under the same collective bargaining agreement that gave rise to the partial withdrawal;

(ii) The employer's contribution base units for that facility or under that agreement exceed 30 percent of the contribution base units with respect to which the employer had an obligation to contribute for that facility or under that agreement for the high base year (as defined in paragraph (d) of this section); and

(iii) The total number of contribution base units with respect to which the employer has an obligation to contribute to the plan equals at least 90 percent of the total number of contribution base units with respect to which the employer had an obligation to contribute under the plan for the high base year (as defined in paragraph (d) of this section).

(2) *Substantial restoration of withdrawn work.* The employer satisfies the conditions under this paragraph if, for each of two consecutive plan years—

(i) The employer makes contributions for the same facility or under the same collective bargaining agreement that gave rise to the partial withdrawal;

(ii) The employer's contribution base units for that facility or under that agreement are not less than 90 percent of the contribution base units with respect to which the employer had an obligation to contribute for that facility or under that agreement for the high base year (as defined in paragraph (d) of this section); and

(iii) The total number of contribution base units with respect to which the employer has an obligation to contribute to the plan equals or exceeds the sum of—

(A) The number of contribution base units with respect to which the employer had an obligation to contribute in the year prior to the partial withdrawal year, determined without regard to the contribution base units for the facility or under the agreement that gave rise to the partial withdrawal; and

(B) 90 percent of the contribution base units with respect to which the employer had an obligation to contribute for that facility or under that agreement in either the year prior to the partial withdrawal year or the high base year (as defined in paragraph (d) of this section), whichever is less.

(c) *Reduction in annual partial withdrawal liability payment*—(1) *Partial withdrawals under section 4205(a)(1).* An employer shall be entitled to a reduction of its annual partial withdrawal liability payment for a plan year if the number of contribution base units with respect to which the employer had an obligation to contribute during the plan year exceeds the greater of—

(i) 110 percent (or such lower number as the plan may, by amendment, adopt) of the number of contribution base units with respect to which the employer had an obligation to contribute in the partial withdrawal year; or

(ii) The total number of contribution base units with respect to which the employer had an obligation to contribute to the plan for the plan year following the partial withdrawal year.

(2) *Partial withdrawals under section 4205(a)(2).* An employer that resumes the obligation to contribute with respect to a facility or collective bargaining agreement that gave rise to a partial withdrawal, but does not qualify to have that liability waived under paragraph (b) of this section, shall have its annual partial withdrawal liability payment reduced for any plan year in which the total number of contribution base units with respect to which the employer has an obligation to contribute equals or exceeds the sum of—

(i) The number of contribution base units for the reentered facility or agreement during that year; and

(ii) The total number of contribution base units with respect to which the employer had an obligation to contribute to the plan for the year following the partial withdrawal year.

(d) *High base year.* For purposes of paragraphs (a) and (b)(1)(iii) of this section, the high base year contributions are the average of the total contribution base units for the two plan years for which the employer's total contribution base units were highest within the five

plan years immediately preceding the beginning of the 3-year testing period defined in section 4205(b)(1)(B)(i), with respect to paragraph (a) of this section, or the partial withdrawal year, with respect to paragraph (b)(1)(iii) of this section. For purposes of paragraphs (b)(1)(ii) and (b)(2) of this section, the high base year contributions are the average number of contribution base units for the facility or under the agreement for the two plan years for which the employer's contribution base units for that facility or under that agreement were highest within the five plan years immediately preceding the partial withdrawal.

§ 2646.4 Withdrawal liability payments during pendency of abatement determination.

(a) *Bond/Escrow.* An employer that has satisfied the requirements of § 2646.3(a)(1) without regard to "90 percent of" or § 2646.3(b) for one year with respect to all partial withdrawals it incurred in a plan year may, in lieu of making scheduled withdrawal liability payments in the second year for those withdrawals, provide a bond to, or establish an escrow account for, the plan that satisfies the requirements of paragraph (b) of this section or any plan rules adopted under paragraph (d) of this section, pending a determination by the plan sponsor of whether the employer satisfies the requirements of § 2646.3(a)(1) or (b) for the second consecutive plan year. An employer that applies for abatement and neither provides a bond/escrow nor makes its withdrawal liability payments remains eligible for abatement.

(b) *Amount of bond/escrow.* The bond or escrow allowed by this section shall be in an amount equal to 50 percent of the withdrawal liability payments that would otherwise be due. The bond or escrow relating to each payment shall be furnished before the due date of that payment. A single bond or escrow may be provided for more than one payment due during the pendency of the plan sponsor's determination. The bond or escrow agreement shall provide that if the plan sponsor determines that the employer does not satisfy the requirements for abatement of its partial withdrawal liability under § 2646.3(a)(1) or (b), the bond or escrow shall be paid to the plan upon notice from the plan sponsor to the bonding or escrow agent. A bond provided under this paragraph shall be issued by a corporate surety company that is an acceptable surety for purposes of section 412 of the Act.

(c) *Notice of bond/escrow.* Concurrently with posting a bond or establishing an escrow account under this section, the employer shall notify the plan sponsor. The notice shall include a statement of the amount of the bond or escrow, the scheduled payment or payments with respect to which the bond or escrow is being furnished, and the name and address of the bonding or escrow agent.

(d) *Plan amendments concerning bond/escrow.* A plan may, by amendment, adopt rules decreasing the amount of the bond or escrow specified in paragraph (b) of this section. A plan amendment adopted under this paragraph may be applied only to the extent that it is consistent with the purposes of the Act. An amendment satisfies this requirement only if it does not create an unreasonable risk of loss to the plan.

(e) *Plan sponsor determination.* Within 60 days after the end of the plan year in which the bond/escrow is furnished, the plan sponsor shall determine whether the employer satisfied the requirements of § 2646.3(a)(1) or (b) for the second consecutive plan year. The plan sponsor shall notify the employer and the bonding or escrow agent in writing of its determination and of the consequences of its determination, as described in § 2646.2(c) or (d) and (e), as appropriate.

§ 2646.5 Computation of reduced annual partial withdrawal liability payment.

(a) *Amount of reduced payment.* An employer that satisfies the requirements of § 2646.3(c)(1) or (c)(2) shall have its annual partial withdrawal liability payment for that plan year reduced in accordance with paragraph (a)(1) or (a)(2) of this section, respectively.

(1) The reduced annual payment amount for an employer that satisfies § 2646.3(c)(1) shall be determined by substituting the number of contribution base units in the plan year in which the requirements are satisfied for the number of contribution base units in the year following the partial withdrawal year in the numerator of the fraction described in section 4206(a)(2)(A).

(2) The reduced annual payment for an employer that satisfies § 2646.3(c)(2) shall be determined by adding the contribution base units for which the employer is obligated to contribute with respect to the reentered facility or agreement in the year in which the requirements are satisfied to the numerator of the fraction described in section 4206(a)(2)(A).

(b) *Credit for reduction.* The plan sponsor shall credit the account of an employer that satisfies the requirements of § 2646.3(c)(1) or (c)(2) with the amount of annual withdrawal liability that it paid in excess of the amount described in paragraph (a)(1) or (a)(2) of this section, as appropriate. The credit shall be applied, a revised payment schedule issued, refund made and interest added, all in accordance with § 2646.2(c)(4).

§ 2646.6 Adjustment of withdrawal liability for subsequent withdrawals.

The liability of an employer for a partial or complete withdrawal from a plan subsequent to a partial withdrawal from that plan in a prior plan year shall be reduced in accordance with part 2649 of this chapter.

§ 2646.7 Multiple partial withdrawals in one plan year.

(a) *General rule.* If an employer partially withdraws from the same multiemployer plan on two or more occasions during the same plan year, the rules of § 2646.3 shall be applied as modified by this section.

(b) *Partial withdrawals under section 4205(a)(1) and (a)(2) in the same plan year.* If an employer partially withdraws from the same multiemployer plan as a result of a 70-percent contribution decline and a partial cessation of the employer's contribution obligation in the same plan year, the employer shall not be eligible for abatement under § 2646.3(b) or (c)(2) or under paragraph (c) of this section. The employer may qualify for abatement under § 2646.3(a) and (c)(1) and under any rules adopted by the plan pursuant to § 2646.8.

(c) *Multiple partial cessations of the employer's contribution obligation.* If an employer permanently ceases to have an obligation to contribute for more than one facility, under more than one collective bargaining agreement, or for one or more facilities and under one or more collective bargaining agreements, resulting in multiple partial withdrawals under section 4205(b)(2)(A) in the same plan year, the abatement rules in § 2646.3(b) shall be applied as modified by this paragraph. If an employer resumes work at all such facilities and under all such collective bargaining agreements, the determination of whether the employer qualifies for elimination of its liability under § 2643.3(b) shall be made by substituting the test set forth in paragraph (c)(1) of this section for that prescribed by § 2646.3(b)(1)(ii) or (b)(2)(ii), as applicable. If the employer resumes work at or under fewer than all the facilities or collective bargaining agreements described in this paragraph, the employer cannot qualify for elimination of its liability under § 2646.3(b). However, the employer may qualify for a reduction in its partial

withdrawal liability pursuant to paragraph (c)(2) of this section.

(1) *Resumption of work at all facilities and under all bargaining agreements.* The test under this paragraph is satisfied if for each of the two consecutive plan years referred to in § 2646.3(b), the employer's total contribution base units for the facilities and under the collective bargaining agreements with respect to which the employer incurred the multiple partial withdrawals exceed 30 percent of the total number of contribution base units with respect to which the employer had an obligation to contribute for those facilities and under those agreements for the base year (as defined in paragraph (d) of this section).

(2) *Resumption at fewer than all facilities or under fewer than all bargaining agreements.* If the employer satisfies the conditions in § 2646.3(b)(1) (i) and (iii) and paragraph (c)(2)(i) of this section, or the conditions in § 2646.3(b)(2) (i) and (iii) and paragraph (c)(2)(ii) of this section, as applicable, the employer's withdrawal liability shall be partially waived as set forth in paragraph (c)(2)(iii) of this section.

(i) With respect to a resumption of work under § 2646.3(b)(1), the condition under this paragraph is satisfied if, for the two consecutive plan years referred to in § 2646.3(b)(1), the employer's contribution base units for any reentered facility or agreement exceed 30 percent of the number of contribution base units with respect to which the employer had an obligation to contribute for that facility or under that agreement for the base year (as defined in paragraph (d) of this section).

(ii) With respect to a resumption of work under § 2646.3(b)(2), the condition under this paragraph is satisfied if, for the two consecutive plan years referred to in § 2646.3(b)(2), the employer's contribution base units for any reentered facility or agreement exceed 90 percent of the number of contribution base units with respect to which the employer had an obligation to contribute for that facility or under that agreement for the base year (as defined in paragraph (d) of this section).

(iii) The employer's reduced withdrawal liability and, if any, the reduced annual payments of the liability shall be determined by adding the average number of contribution base units that the employer is required to contribute for those two consecutive years for that facility(ies) or agreement(s) to the numerator of the fraction described in section 4206(a)(2)(A). The amount of any remaining partial withdrawal liability shall be paid over the schedule originally established starting with the first payment due after the revised payment schedule is issued under § 2646.2(c)(4).

(d) *Base Year.* For purposes of this section, the base year contribution base units for a reentered facility(ies) or under a reentered agreement(s) are the average number of contribution base units for the facility(ies) or under the agreement(s) for the two plan years for which the employer's contribution base units for that facility(ies) or under that agreement(s) were highest within the five plan years immediately preceding the partial withdrawal.

§ 2646.8 Plan adoption of additional abatement conditions.

(a) *General rule.* A plan may by amendment, subject to the approval of the PBGC, adopt rules for the reduction or waiver of partial withdrawal liability under conditions other than those specified in § 2646.3, provided that such conditions relate to events occurring or factors existing subsequent to a partial withdrawal year. The request for PBGC approval shall be filed after the amendment is adopted. PBGC approval shall also be required for any subsequent modification of the amendment, other than repeal of the amendment. A plan amendment under this section may not be put into effect until it is approved by the PBGC. An amendment that is approved by the PBGC may apply retroactively.

(b) *Who may request.* The plan sponsor, or a duly authorized representative acting on behalf of the plan sponsor, shall sign and submit the request.

(c) *Where to file.* The request shall be addressed to the Case Operations and Compliance Department (45200), Pension Benefit Guaranty Corporation, 2020 K Street, N.W., Washington, DC 20006.

(d) *Information.* Each request shall contain the following information:

(1) The name and address of the plan for which the plan amendment is being submitted and the telephone number of the plan sponsor or its duly authorized representative.

(2) The nine-digit Employer Identification Number (EIN) assigned to the plan sponsor by the Internal Revenue Service and the three-digit Plan Identification Number (PIN) assigned to the plan by the plan sponsor, and, if different, also the EIN–PIN last filed with the PBGC. If an EIN–PIN has not been assigned, that should be indicated.

(3) A copy of the executed amendment, including—

(i) the date on which the amendment was adopted;

(ii) the proposed effective date;

(iii) the full text of the rules on the reduction or waiver of partial withdrawal liability; and

(iv) the full text of the rules adjusting the reduction in the employer's liability for a subsequent partial or complete withdrawal, as required by section 4206(b)(1) of the Act.

(4) A copy of the most recent actuarial valuation report of the plan.

(5) A statement certifying that notice of the adoption of the amendment and of the request for approval filed under this section has been given to all employers that have an obligation to contribute under the plan and to all employee organizations representing employees covered under the plan.

(e) *Supplemental information.* In addition to the information described in paragraph (d) of this section, a plan may submit any other information that it believes is pertinent to its request. The PBGC may require the plan sponsor to submit any other information that the PBGC determines that it needs to review a request under this section.

(f) *Criteria for PBGC approval.* The PBGC shall approve a plan amendment authorized by paragraph (a) of this section if it determines that the rules therein are consistent with the purposes of the Act. An abatement amendment is not consistent with the purposes of the Act unless the PBGC determines that—

(1) The amendment is not adverse to the interests of plan participants and beneficiaries in the aggregate; and

(2) The amendment would not significantly increase the PBGC's risk of loss with respect to the plan.

(Approved by the Office of Management and Budget under control no. 1212–0039)

Issued at Washington, DC on this 9th day of December 1992.

Lynn Martin,

Chairman, Board of Directors, Pension Benefit Guaranty Corporation.

Issued pursuant to a resolution of the Board of Directors approving this final regulation and authorizing its chairperson to issue same.

Adjustment of Liability for a Withdrawal Subsequent to a Partial Withdrawal

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This regulation establishes rules for adjusting the statutory credit against the partial or complete withdrawal liability of an employer that had previously partially withdrawn from the same multiemployer pension plan. This regulation is required by the Employee Retirement Income Security Act, as amended. The purpose of the statutory credit is to avoid double-charging an employer for the same unfunded vested benefits upon which its liability for the prior partial withdrawal was based. However, in certain cases, this credit must be reduced to ensure that the employer does not avoid its fair share of liability based on plan experience and its participation in the plan subsequent to the prior partial withdrawal. This regulation establishes rules for reducing the credit in appropriate cases.

EFFECTIVE DATE: January 15, 1993.

FOR FURTHER INFORMATION CONTACT: Deborah J. Bisco, Attorney, Office of the General Counsel (22500), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006; (202) 778-8824 (202–778–8859 for TTY and TDD). (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

Background

Section 4205(a) of Employee Retirement Income Security Act of 1974, as amended ("ERISA or "the Act"), sets forth the circumstances under which an employer is deemed to have partially withdrawn from a multiemployer pension plan. The basic amount of an employer's liability for a partial withdrawal is calculated under section 4206(a). Section 4206(b) provides special rules for adjusting an employer's liability for a complete or partial withdrawal subsequent to a partial withdrawal from the same plan. Section 4206(b)(1) states that the liability for the subsequent withdrawal shall be reduced by the amount of the previous partial withdrawal liability, less any waiver or reduction of the previous liability. Section 4206(b)(2) requires the Pension Benefit Guaranty Corporation ("PBGC") to prescribe regulations providing for adjustments to this credit in order to ensure that the total liability of the employer accurately reflects that employer's proper share of plan liabilities.

On October 6, 1987, the PBGC published a proposed regulation on Adjustment of Liability for a Withdrawal Subsequent to a Partial Withdrawal (52 FR 37329). The regulation proposed mandatory rules for the reduction of the statutory credit for an employer who has partially withdrawn from a multiemployer plan and thereafter incurs another partial or complete withdrawal from the same plan. No written comments were received on the proposal, and the PBGC is, therefore, adopting the regulation as proposed, except for one correction, an editorial revision and a minor change.

ERISA section 4206(b)(1) provides that:

> In the case of an employer that has withdrawal liability for a partial withdrawal from a plan, any withdrawal liability of that employer for a partial or complete withdrawal from that plan in a subsequent plan year shall be reduced by the amount of any partial withdrawal liability (*reduced by an abatement or reduction of such liability*) of the employer with respect to the plan for a previous plan year. (emphasis added)

Proposed § 2649.3 (relating to the presumptive method) and proposed § 2649.4 (relating to the modified presumptive method) contained identical provisions for reducing the credit for a prior partial withdrawal by the amount of any abatement of liability for that withdrawal. Proposed § 2649.5 (relating to the rolling-5 method) erroneously omitted any mention of a reduction in the credit, and proposed § 2649.6 (relating to the direct attribution method) merely repeated the statutory language.

The PBGC has determined that the reduction in the credit should be identical for each of the statutory allocation methods, because the reduction merely represents the amount of the liability for the prior partial withdrawal that was waived or otherwise eliminated. Accordingly, the regulation has been revised to add a new § 2649.7 setting forth the rule for reducing the credit to reflect an abatement or other reduction of the prior partial withdrawal liability. (Proposed §§ 2649.7 and 2649.8 have been renumbered § 2649.8 and § 2649.9.) The rule in new § 2649.7 applies to the credits computed for each of the statutory allocation methods under §§ 2649.3–2649.6.

The new § 2649.7 does not include the reference contained in proposed §§ 2649.3(d) and 2649.4(d) to "abate[ment] pursuant to section 4208 of the Act". The specific reference to section 4208 has been deleted to prevent any inference that a credit reduction for reasons other than section 4208 should be treated differently. The reduction of the credit described in § 2649.7 applies to any employer whose withdrawal liability for a prior partial withdrawal has been "reduced by any abatement or reduction of such liability". Thus, the reduction would apply with respect to any abatement under ERISA section 4208, as well as to any adjustment of liability pursuant to, for example, an arbitrator's award.

The parenthetical phrase "determined without regard to any adjustments" has been deleted from § 2649.4(c)(2). This editorial change was made to avoid creating any negative inference concerning § 2649.4(c)(1), which does not contain this phrase. The meaning of § 2649.4(c)(2) is not changed by this revision.

The PBGC received a question concerning the language in § 2649.5, which requires that the amount of the liability for a prior partial withdrawal be treated as if it was "fully amortized in level annual installments" over a number of years. The questioner was uncertain whether the amount constituting principal should be considered level over the years, or if the total amount of both principal and interest must be in "level annual installments". The latter is the correct interpretation of § 2649.5, *i.e.*, that the total installment amount remains level over the years, and interest is a larger portion of the amount in earlier years of the payment term. This is the same interpretation as has been consistently given the identical language in section 4211(c)(2) of ERISA.

Compliance With Rulemaking Guidelines

The PBGC has determined that this regulation is not a "major rule" for the purposes of Executive Order 12291, because it will not have an annual effect on the economy of $100 million or more; create a major increase in costs or prices for consumers, individual industries, or geographic regions; or have significant adverse effects on competition, employment, investment, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. This regulation will result in some shifting of costs among employers that contribute to multiemployer plans, but will not, in the aggregate, increase costs.

Under section 605(b) of the Regulatory Flexibility Act, the PBGC certifies that this rule will not have a

significant economic impact on a substantial number of small entities. Pension plans with fewer than 100 participants have traditionally been treated as small plans. The regulation affects only multiemployer plans covered by the PBGC. Defining "small plans" as those with under 100 participants, they represent less than 14% of all multiemployer plans covered by the PBGC (346 out of 2,500). Approximately 500,000 employers contribute to multiemployer plans, most of them small employers (under 100 employees). The PBGC estimates that fewer than 10,000 (2 percent) of those employers will be required to pay partial withdrawal liability in any year, and an even smaller percentage will subsequently completely or partially withdraw from the same plan and thereby become subject to these rules. Therefore, the PBGC waives compliance with sections 603 and 604 of the Regulatory Flexibility Act.

List of Subjects in 29 CFR Parts 2640 and 2649

Employee Benefit Plans, Pensions.

In consideration of the foregoing, the PBGC amends subchapter F of chapter XXVI, title 29, Code of Federal Regulations as follows:

PART 2640—DEFINITIONS

1. The authority for part 2640 is revised to read as follows:

Authority: 29 U.S.C. 1302(b)(3).

2. Part 2640 is amended by adding a new § 2640.8 to read as follows:

§ 2640.8 Adjustment of Liability for a Withdrawal Subsequent to a Partial Withdrawal.

For purposes of part 2649—

Complete withdrawal means a complete withdrawal as described in section 4203 of the Act.

Partial Withdrawal means a partial withdrawal as described in section 4205 of the Act.

3. A new part 2649 is added to read as follows:

PART 2649—ADJUSTMENT OF LIABILITY FOR A WITHDRAWAL SUBSEQUENT TO A PARTIAL WITHDRAWAL

Sec.

2649.1 Purpose and scope.
2649.2 Credit against liability for a subsequent withdrawal.
2649.3 Amount of credit in plans using the presumptive method.
2649.4 Amount of credit in plans using the modified presumptive method.
2649.5 Amount of credit in plans using the rolling-5 method.
2649.6 Amount of credit in plans using the direct attribution method.
2649.7 Reduction of credit for abatement or other reduction of prior partial withdrawal liability.
2649.8 Amount of credit in plans using alternative allocation methods.
2649.9 Special rule for 70-percent decline partial withdrawals.

Authority: 29 U.S.C. 1302(b)(3) and 1386(b).

§ 2649.1 Purpose and scope.

(a) *Purpose.* The purpose of this part is to prescribe rules, pursuant to section 4206(b) of the Act, for adjusting the partial or complete withdrawal liability of an employer that previously partially withdrew from the same multiemployer plan. Section 4206(b)(1) provides that when an employer that has partially withdrawn from a plan subsequently incurs liability for another partial or a complete withdrawal from that plan, the employer's liability for the subsequent withdrawal is to be reduced by the amount of its liability for the prior partial withdrawal (less any waiver or reduction of that prior liability). Section 4206(b)(2) requires the PBGC to prescribe regulations adjusting the amount of this credit to ensure that the liability for the subsequent withdrawal properly reflects the employer's share of liability with respect to the plan. The purpose of the credit is to protect a withdrawing employer from being charged twice for the same unfunded vested benefits of the plan. The reduction in the credit protects the other employers in the plan from becoming responsible for unfunded vested benefits properly allocable to the withdrawing employer. In the interests of simplicity, the rules in this part provide for, generally, a one-step calculation of the adjusted credit under section 4206(b)(2) against the subsequent liability, rather than for separate calculations first of the credit under section 4206(b)(1) and then of the reduction in the credit under paragraph (b)(2) of that section. In cases where the withdrawal liability for the prior partial withdrawal was reduced by an abatement or other reduction of that liability, the adjusted credit is further reduced in accordance with § 2649.7 of this part.

(b) *Scope.* This part applies to multiemployer plans covered under section 4021(a) of the Act and not excluded by section 4021(b), and to employers that have partially withdrawn from such plans after September 25, 1980 and subsequently completely or partially withdraw from the same plan after January 15, 1993.

§ 2649.2 Credit against liability for a subsequent withdrawal.

Whenever an employer that was assessed withdrawal liability for a partial withdrawal from a plan partially or completely withdraws from that plan in a subsequent plan year, it shall receive a credit against the new withdrawal liability in an amount greater than or equal to zero, determined in accordance with this part. If the credit determined under §§ 2649.3–2649.8 is less than zero, the amount of the credit shall equal zero.

§ 2649.3 Amount of credit in plans using the presumptive method.

(a) *General.* In a plan that uses the presumptive allocation method described in section 4211(b) of the Act, the credit shall equal the sum of the unamortized old liabilities determined under paragraph (b) of this section, multiplied by the fractions described or determined under paragraph (c) of this section. When an employer's prior partial withdrawal liability has been reduced or waived, this credit shall be adjusted in accordance with § 2649.7.

(b) *Unamortized old liabilities.* The amounts determined under this paragraph are the employer's proportional shares, if any, of the unamortized amounts as of the end of the plan year preceding the withdrawal for which the credit is being calculated, of—

(1) The plan's unfunded vested benefits as of the end of the last plan year ending before September 26, 1980;

(2) The annual changes in the plan's unfunded vested benefits for plan years ending after September 25, 1980, and before the year of the prior partial withdrawal; and

(3) The reallocated unfunded vested benefits (if any), as determined under section 4211(b)(4), for plan years ending before the year of the prior partial withdrawal.

(c) *Employer's allocable share of old liabilities.* The sum of the amounts determined under paragraph (b) are multiplied by the two fractions described in this paragraph in order to determine the amount of the old liabilities that was previously assessed against the employer.

(1) The first fraction is the fraction determined under section 4206(a)(2) of the Act for the prior partial withdrawal.

(2) The second fraction is a fraction, the numerator of which is the amount of the liability assessed against the employer for the prior partial withdrawal, and the denominator of which is the product of—

(i) The amount of unfunded vested benefits allocable to the employer as if

it had completely withdrawn as of the date of the prior partial withdrawal (determined without regard to any adjustments), multiplied by—

(ii) The fraction determined under section 4206(a)(2) for the prior partial withdrawal.

§ 2649.4 Amount of credit in plans using the modified presumptive method.

(a) *General.* In a plan that uses the modified presumptive method described in section 4211(c)(2) of the Act, the credit shall equal the sum of the unamortized old liabilities determined under paragraph (b) of this section, multiplied by the fractions described or determined under paragraph (c) of this section. When an employer's prior partial withdrawal liability has been reduced or waived, this credit shall be adjusted in accordance with § 2649.7.

(b) *Unamortized old liabilities.* The amounts described in this paragraph shall be determined as of the end of the plan year preceding the withdrawal for which the credit is being calculated, and are the employer's proportional shares, if any, of—

(1) The plan's unfunded vested benefits as of the end of the last plan year ending before September 26, 1980, reduced as if those obligations were being fully amortized in level annual installments over 15 years beginning with the first plan year ending on or after such date; and

(2) The aggregate post-1980 change amount determined under section 4211(c)(2)(C) as if the employer had completely withdrawn in the year of the prior partial withdrawal, reduced as if those obligations were being fully amortized in level annual installments over the 5-year period beginning with the plan year in which the prior partial withdrawal occurred.

(c) *Employer's allocable share of old liabilities.* The sum of the amounts determined under paragraph (b) are multiplied by the two fractions described in this paragraph in order to determine the amount of old liabilities that was previously assessed against the employer.

(1) The first fraction is the fraction determined under section 4206(a)(2) of the Act for the prior partial withdrawal.

(2) The second fraction is a fraction, the numerator of which is the amount of the liability assessed against the employer for the prior partial withdrawal, and the denominator of which is the product of—

(i) The amount of unfunded vested benefits allocable to the employer as if it had completely withdrawn as of the date of the prior partial withdrawal (determined without regard to any adjustments), multiplied by—

(ii) The fraction determined under section 4206(a)(2) for the prior partial withdrawal.

§ 2649.5 Amount of credit in plans using the rolling-5 method.

In a plan that uses the rolling-5 allocation method described in section 4211(c)(3) of the Act, the credit shall equal the amount of the liability assessed for the prior partial withdrawal, reduced as if that amount was being fully amortized in level annual installments over the 5-year period beginning with the plan year in which the prior partial withdrawal occurred. When an employer's prior partial withdrawal liability has been reduced or waived, this credit shall be adjusted in accordance with § 2649.7.

§ 2649.6 Amount of credit in plans using the direct attribution method.

In a plan that uses the direct attribution allocation method described in section 4211(c)(4) of the Act, the credit shall equal the amount of the liability assessed for the prior partial withdrawal, reduced as if that amount was being fully amortized in level annual installments beginning with the plan year in which the prior partial withdrawal occurred, over the greater of 10 years or the amortization period for the resulting base when the combined charge base and the combined credit base are offset under section 412(b)(4) of the Internal Revenue Code. When an employer's prior partial withdrawal liability has been reduced or waived, this credit shall be adjusted in accordance with § 2649.7.

§ 2649.7 Reduction of credit for abatement or other reduction of prior partial withdrawal liability.

(a) *General.* If an employer's withdrawal liability for a prior partial withdrawal has been reduced or waived, the credit determined pursuant to §§ 2649.3–2649.6 shall be adjusted in accordance with this section.

(b) *Computation.* The adjusted credit is calculated by multiplying the credit determined under the preceding sections of this part by a fraction—

(1) the numerator of which is the excess of the total partial withdrawal liability of the employer for all partial withdrawals in prior years (excluding those partial withdrawals for which the credit is zero) over the present value of each abatement or other reduction of that prior withdrawal liability calculated as of the date on which that prior partial withdrawal liability was determined; and

(2) the denominator of which is the total partial withdrawal liability of the employer for all partial withdrawals in prior years (excluding those partial withdrawals for which the credit is zero).

§ 2649.8 Amount of credit in plans using alternative allocation methods.

A plan that has adopted an alternative method of allocating unfunded vested benefits pursuant to section 4211(c)(5) of the Act and part 2642 of this subchapter shall adopt, by plan amendment, a method of calculating the credit provided by § 2649.2 that is consistent with the rules in §§ 2649.3–2649.7 for plans using the statutory allocation method most similar to the plan's alternative allocation method.

§ 2649.9 Special rule for 70-percent decline partial withdrawals.

For the purposes of applying the rules in §§ 2649.3–2649.8 in any case in which either the prior or subsequent partial withdrawal resulted from a 70-percent contribution decline (or a 35-percent decline in the case of certain retail food industry plans), the first year of the 3-year testing period shall be deemed to be the plan year in which the partial withdrawal occurred.

Issued at Washington, D.C. on this 9th day of December 1992.

Lynn Martin,

Chairman, Board of Directors, Pension Benefit Guaranty Corporation.

Issued pursuant to a resolution of the Board of Directors approving this final regulation and authorizing its chairman to issue same.

Carol Connor Flowe,

Secretary, Board of Directors, Pension Benefit Guaranty Corporation.

[PP 9E3768 and 0E3947/R1172; FRL–4173–4]

RIN 2070–AB78

Pesticide Tolerances for Oryzalin

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This document establishes tolerances for residues of the herbicide oryzalin in or on the raw agricultural commodities guava and papaya. This regulation to establish maximum

permissible levels for residues of the herbicide in or on the commodities was requested in petitions submitted by the Interregional Research Project No. 4 (IR-4).

EFFECTIVE DATE: This regulation becomes effective December 16, 1992.

ADDRESSES: Written objections, identified by the document control number, [PP 9E3768 and 0E3947/R1172], may be submitted to: Hearing Clerk (A-110), Environmental Protection Agency, Rm. M3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: By mail: Hoyt L. Jamerson, Emergency Response and Minor Use Section, Registration Division (H7505C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 718C, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)-305-5310.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of September 30, 1992 (57 FR 45018), EPA issued a proposed rule that gave notice that the Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, had submitted pesticide petitions (PP) 9E3768 and 0E3947 to EPA on behalf of the Agricultural Experiment Station of Hawaii. These petitions requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(e)), propose the establishment of tolerances for residues of the herbicide oryzalin (3,5-dinitro-N^4,N^4-dipropylsulfanilamide) in or on the raw agricultural commodities banana and guava (PP 0E3947) and papaya (PP 9E3768) at 0.05 part per million (ppm). The petition proposing tolerances for banana and guava (PP 0E3947) was subsequently amended by IR-4, withdrawing without prejudice to subsequent filing the proposal for establishment of a tolerance for residues of oryzalin in or on banana.

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and other relevant material have been evaluated and discussed in the proposed rule. Based on the data and information considered, the Agency concludes that the tolerances will protect the public health. Therefore, the tolerances are established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above (40 CFR 178.20). The objections submitted must specify the provisions of the regulation deemed objectionable and the grounds for the objections (40 CFR 178.25). Each objection must be accompanied by the fee prescribed by 40 CFR 180.33(i). If a hearing is requested, the objections must include a statement of the factual issue(s) on which a hearing is requested, the requestor's contentions on such issues, and a summary of any evidence relied upon by the objector (40 CFR 178.27). A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: There is a genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established, resolve one or more of such issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; and resolution of the factual issue(s) in the manner sought by the requestor would be adequate to justify the action requested (40 CFR 178.32).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: November 27, 1992.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Therefore, 40 CFR part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. By revising § 180.304, to read as follows:

§ 180.304 Oryzalin; tolerances for residues.

(a) Tolerances are established for the combined residues of the herbicide oryzalin (3,5-dinitro-N^4,N^4-dipropylsulfanilamide) in or on the following raw agricultural commodities:

Commodity	Parts per million
Almond, hulls	0.05
Avocados	0.05
Citrus fruits	0.05
Cottonseed	0.05
Figs	0.05
Grain, barley	0.05
Grain, wheat	0.05
Kiwifruits	0.05
Nuts	0.05
Olives	0.05
Peas (succulent)	0.05
Pistachios	0.05
Pome fruits	0.05
Pomegranates	0.05
Potatoes	0.05
Small fruits	0.05
Soybeans	0.1
Stone fruits	0.05

(b) Tolerances with regional registration, as defined in § 180.1(n), are established for residues of oryzalin (3,5-dinitro-N^4,N^4-dipropylsulfanilamide) in or on the following raw agricultural commodities:

Commodity	Parts per million
Guava	0.05
Papayas	0.05

RIN 2070-AB78

Pesticide Tolerances for 2-(2-Chlorophenyl)Methyl-4,4-Dimethyl-3-Isoxazolidinone

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This document establishes a tolerance for residues of the herbicide 2-(2-chlorophenyl)methyl-4,4-dimethyl-3-isoxazolidinone (also referred to as clomazone) in or on the raw agricultural commodity sweet potato. This regulation to establish a maximum permissible level for residues of the herbicide in or on the commodity was requested in a petition submitted by the Interregional Research Project No. 4 (IR-4).

EFFECTIVE DATE: This regulation becomes effective on December 16, 1992.

ADDRESSES: Written objections, identified by the document control

number, [PP 8E3628/R1171], may be submitted to: Hearing Clerk (A-110), Environmental Protection Agency, Rm. M3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: By mail: Hoyt L. Jamerson, Emergency Response and Minor Use Section (H7505C), Registration Division, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 716C, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)-557-5310.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of September 16, 1992 (57 FR 42730), EPA issued a proposed rule that gave notice that the Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, had submitted pesticide petition (PP) 8E3628 to EPA on behalf of the agricultural experiment stations of Georgia, Louisiana, North Carolina, and Oklahoma.

The petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(e)), propose the establishment of a tolerance for residues of the herbicide 2-(2-chlorophenyl)methyl-4,4-dimethyl-3-isoxazolidinone in or on the raw agricultural commodity sweet potato at 0.05 part per million (ppm).

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and other relevant material have been evaluated and discussed in the proposed rule. Based on the data and information considered, the Agency concludes that the tolerance will protect the public health. Therefore, the tolerance is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above (40 CFR 178.20). The objections submitted must specify the provisions of the regulation deemed objectionable and the grounds for the objections (40 CFR 178.25). Each objection must be accompanied by the fee prescribed by 40 CFR 180.33(i). If a hearing is requested, the objections must include a statement of the factual issue(s) on which a hearing is requested, the requestor's contentions on such issues, and a summary of any evidence relied upon by the objector (40 CFR 178.27). A request for a hearing will be granted if the Administrator determines that the material submitted shows the following: There is a genuine and substantial issue of fact; there is a reasonable possibility that available evidence identified by the requestor would, if established, resolve one or more of such issues in favor of the requestor, taking into account uncontested claims or facts to the contrary; and resolution of the factual issue(s) in the manner sought by the requestor would be adequate to justify the action requested (40 CFR 178.32).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: November 27, 1992.

Douglas D. Campt,

Director, Office of Pesticide Programs.

Therefore, 40 CFR part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. Section 180.425 is amended in the table therein by adding and alphabetically inserting the raw agricultural commodity sweet potato, to read as follows:

§ 180.425 2-(2-Chlorophenyl)methyl-4,4-dimethy-3-isoxazolidinone; tolerances for residues.

* * * * *

Commodity	Parts per million
* * * * *	
Sweet potato	0.05

RIN 2070-AB78

Pesticide Tolerances and Food and Feed Additive Regulations for Glyphosate; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; correction.

SUMMARY: This document corrects a final rule that established tolerances and food and feed additive regulations for the combined residues of the herbicide glyphosate (*N*-(phosphonomethyl)glycine) and its metabolite aminomethyl phosphonic acid by addressing a comment on the proposal that was inadvertently overlooked in issuing the final rule. No change is made in the final rule as a result of the comment.

FOR FURTHER INFORMATION CONTACT: By mail: Robert J. Taylor, Product Manager (PM) 25, Registration Division (H7505C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 241, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703) 305-6800.

SUPPLEMENTARY INFORMATION: In FR Doc. 92-22252 appearing at page 42701 in the **Federal Register** of September 16, 1992, the following changes are made in the first column:

1. The one-sentence paragraph "There were no comments or requests for referral to an advisory committee received in response to the proposed rule." is removed.

2. The following three new paragraphs are inserted in place of the removed paragraph:

A comment was received from Mr. Stephen A. McFadden of Pasco, WA, in response to EPA's proposal to increase the tolerance level of glyphosate. Mr. McFadden expressed two primary concerns: (1) An increase in the tolerance level for glyphosate may result in increased plant metabolites which may affect public health, and (2) the introduction of genetically engineered soybeans with a glyphosate resistance could result in a similar increase.

Agency response to concern (1): When glyphosate is applied as a harvest aid (the purpose for which the increased tolerances were sought) the treated soybeans are mature, and no additional plant metabolites would be accumulated in the seed.

Agency response to concern (2): The proposed harvest aid use and associated

tolerance increase are for conventional soybeans only. Genetically engineered soybeans are now in the testing stage and are regulated by the USDA and the FDA. Mr. McFadden's comments regarding the metabolism of genetically engineered plants have been forwarded to those Agencies.

Dated: November 27, 1992.

Douglas D. Campt,

Director, Office of Pesticide Programs.

40 CFR Part 271

[FRL-4545-3]

North Carolina; Final Authorization of Revisions to State Hazardous Waste Management Program

AGENCY: Environmental Protection Agency.

ACTION: Immediate final rule.

SUMMARY: North Carolina has applied for final authorization of revisions to its hazardous waste program under the Resource Conservation and Recovery Act (RCRA). North Carolina's revisions consist of the provisions contained in Non-HSWA Cluster VI, promulgated July 1, 1989, through June 30, 1990, and HSWA Cluster II promulgated between July 1, 1987, and June 30, 1990. These requirements are listed in Section B of this document. The Environmental Protection Agency (EPA) has reviewed North Carolina's application(s) and has made a decision, subject to public review and comment, that the North Carolina hazardous waste program revisions satisfy all of the requirements necessary to qualify for final authorization. Thus, EPA approves North Carolina's hazardous waste program revisions. North Carolina's applications for program revisions are available for public review and comment.

DATES: Final authorization for North Carolina's program revisions shall be effective February 16, 1993 unless EPA publishes a prior **Federal Register** action withdrawing this immediate final rule. All comments on North Carolina's program revision applications must be received by the close of business, January 15, 1993.

ADDRESSES: Copies of North Carolina's program revision applications are available during normal business hours at the following addresses for inspection and copying: North Carolina Department of Environment, Health, and Natural Resources, Hazardous Waste Branch, P.O. Box 27687, Raleigh, North Carolina 27611-7687; U.S. EPA Region IV, Library, 345 Courtland Street, NE., Atlanta, Georgia 30365; (404) 347-4216. Written comments should be sent to Narindar Kumar at the address listed below.

FOR FURTHER INFORMATION CONTACT: Narindar Kumar, Chief, State Programs Section, Waste Programs Branch, Waste Management Division, U.S. Environmental Protection Agency, 345 Courtland Street, NE., Atlanta, Georgia 30365; (404) 347-2234.

SUPPLEMENTARY INFORMATION:

A. Background

States with final authorization under section 3006(b) of the Resource Conservation and Recovery Act ("RCRA" or "the Act"), 42 U.S.C. 6926(b), have a continuing obligation to maintain a hazardous waste program that is equivalent to, consistent with, and no less stringent than the Federal hazardous waste program. In addition, as an interim measure, the Hazardous and Solid Waste Amendments of 1984 (Pub. L. 98-616, November 8, 1984, hereinafter "HSWA") allows States to revise their programs to become substantially equivalent instead of equivalent to RCRA requirements promulgated under HSWA authority. States exercising the latter option receive "interim authorization" for the HSWA requirements under section 3006(g) of RCRA, 42 U.S.C. 6926(g), and later apply for final authorization for the HSWA requirements.

Revisions to State hazardous waste programs are necessary when Federal or State statutory or regulatory authority is modified or when certain other changes occur. Most commonly, State program revisions are necessitated by changes to EPA's regulations in 40 CFR parts 260-268 and 124 and 270.

B. North Carolina

North Carolina initially received final authorization for its base RCRA program effective on December 31, 1984 (49 FR 48694). North Carolina has received authorization for revisions to its program on March 25, 1986, (51 FR 10211), October 4, 1988 (53 FR 29460), April 10, 1989 (54 FR 6290), November 21, 1989 (54 FR 38993), March 19, 1991 (56 FR 1930), September 17, 1991 (56 FR 33206), and June 26, 1992 (57 FR 15254). On January 26, 1992, North Carolina submitted program revision applications for additional program approvals. Today, North Carolina is seeking approval of its program revisions in accordance with 40 CFR 271.21(b)(3).

EPA has reviewed North Carolina's applications and has made an immediate final decision that North Carolina's hazardous waste program revisions satisfy all of the requirements necessary to qualify for final authorization. Consequently, EPA intends to grant final authorization for the additional program modifications to North Carolina. The public may submit written comments on EPA's immediate final decision up until January 15, 1993.

Copies of North Carolina's application(s) for these program revisions are available for inspection and copying at the locations indicated in the "**ADDRESSES**" section of this notice.

Approval of North Carolina's program revisions shall become effective February 16, 1993, unless an adverse comment pertaining to the State's revisions discussed in this notice is received by the end of the comment period.

If an adverse comment is received EPA will publish either: (1) A withdrawal of the immediate final decision or (2) a notice containing a response to comments which either affirms that the immediate final decision takes effect or reverses the decision.

EPA shall administer any RCRA hazardous waste permits, or portions of permits that contain conditions based upon the Federal program provisions for which the States is applying for authorization and which were issued by EPA prior to the effective date of this authorization. EPA will suspend issuance of any further permits under the provisions for which the State is being authorized on the effective date of this authorization.

North Carolina is today seeking authority to administer the following Federal requirements promulgated on August 14, 1989, through June 1, 1990:

Federal requirement	HSWA or FR reference	Promulgation	State authority
Delay of Closure; Period for Hazardous Waste Management Facilities	54 FR 33376	8/14/89	15A NCAC 13A.0009(c) 15A NCAC 13A.0009(h) 15A NCAC 13A.0009(f) 15A NCAC 13A.0010(b) 15A NCAC 13A.0010(g) 15A NCAC 13A.0010(h) 15A NCAC 13A.0013(g) 15A NCAC 13A.0010(h) 15A NCAC 13A.0013(g)

Limitations:

[1] North Carolina cannot assume the authority for the following aspects of regulating hazardous waste exports which have implications on the provisions adopted at 260.50 through 262.57 on Checklist 31. This authority is not delegable to the States.

- 1 Receive notifications of the intent to Export;
- 1 Transmit information, regarding intent to Export, to foreign countries through the Department of State; and,
- 1 Transmit acknowledgement of consent to the exporter.

EPA feels that foreign policy interest and exporters interest in expeditious processing are better served by the Agency retaining the above listed functions. The Department of State would have the single point of contact in administering the export program, allowing for uniformity and expeditious transmission of information between the United States and foreign countries.

[2] North Carolina cannot assume the authority for implementing the following provisions pertaining to the Land Disposal Restrictions because these authorities are not delegable to the States. §§ 268.5, 268.42(b), 268.44, and 268.6. This restriction has implications on the provisions listed on checklists 39, 62, and 63.

[3] North Carolina was authorized for financial responsibility settlement agreement, (51 FR 16422) on 10/4/88. This action only incorporates the corrections promulgated on 6/26/90 which added §§ 264.113 and 265.113 to the checklist.

[4] North Carolina does not allow underground injection as a means of disposal.

C. Decision

I conclude that North Carolina's application(s) for these program revisions meet all of the statutory and regulatory requirements established by RCRA. Accordingly, North Carolina is granted final authorization to operate its hazardous waste program as revised, except where otherwise noted.

North Carolina now has responsibility for permitting treatment, storage, and disposal facilities within its borders and carrying out other aspects of the RCRA program, subject to the limitations of its program revision application, its previously approved authorities and where otherwise noted in this Notice. North Carolina also has primary enforcement responsibilities, although EPA retains the right to conduct inspections under section 3007 of RCRA and to take enforcement actions under sections 3008, 3013, and 7003 of RCRA.

Compliance With Executive Order 12291

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this authorization will not have a significant economic impact on a substantial number of small entities. This authorization effectively suspends the applicability of certain Federal regulations in favor of North Carolina's program, thereby eliminating duplicative requirements for handlers of hazardous waste in the State. It does not impose any new burdens on small entities.

This rule, therefore, does not require a regulatory flexibility analysis.

List of Subjects in 40 CFR Part 271

Administrative practice and procedure, Confidential business information, Hazardous materials transportation, Hazardous waste, Indian lands, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Water pollution control, Water supply.

Authority: This notice is issued under the authority of sections 2002(a), 3006 and 7004(b) of the Solid Waste Disposal Act as amended (42 U.S.C. 6912(a), 6926, 6974(b)).

Patrick M. Tobin,

Regional Administrator.

Proposed Rules

Federal Register
Vol. 57, No. 242
Wednesday, December 16, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[OPP-300272; FRL-4179-1]

RIN 2070-AC18

Tetrapotassium Pyrophosphate; Tolerance Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that an exemption from the requirement of a tolerance be established for residues of tetrapotassium pyrophosphate (CAS Reg. No. 7320-34-5) when used as an inert ingredient (sequestrant, anticaking agent, or conditioning agent) in pesticide formulations applied to growing crops only. This proposed regulation was requested by the Monsanto Co.

DATES: Comments, identified by the document control number [OPP-300272], must be received on or before January 15, 1992.

ADDRESSES: By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, deliver comments to: Rm. 1128, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202. Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential will be included in the public docket by the EPA without prior notice. The public docket is available for public inspection in Rm. 1128 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Rosalind L. Gross, Registration Support Branch, Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 724A, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703)-305-5971.

SUPPLEMENTARY INFORMATION: Monsanto Co., Suite 1100, 700 14th St., NW., Washington, DC 20005, submitted pesticide petition (PP) 1E03984 to EPA requesting that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 346a(e), propose to amend 40 CFR 180.1001(d) by establishing an exemption from the requirement of a tolerance for residues of tetrapotassium pyrophosphate ((CAS Reg. No. 7320-34-5), also known as potassium pyrophosphate) when used as an inert ingredient (sequestrant, anticaking agent, or conditioning agent) not to exceed 10 percent in pesticide formulations applied to growing crops only.

Inert ingredients are all ingredients that are not active ingredients as defined in 40 CFR 153.125, and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): solvents such as alcohols and hydrocarbons; surfactants such as polyoxyethylene polymers and fatty acids; carriers such as clay and diatomaceous earth; thickeners such as carrageenan and modified cellulose; wetting, spreading, and dispersing agents; propellants in aerosol dispensers; microencapsulating agents; and emulsifiers. The term "inert" is not intended to imply nontoxicity; the ingredient may or may not be chemically active.

The data submitted in the petition and other relevant material have been evaluated. As part of the EPA policy statement on inert ingredients published in the **Federal Register** of April 22, 1987 (52 FR 13305), the Agency established data requirements which will be used to evaluate the risks posed by the presence of an inert ingredient in a pesticide formulation. Exemptions from some or all of the requirements may be granted if it can be determined that the inert ingredient will present minimal or no risk.

The Agency has decided that the data normally required to support the proposed tolerance exemption for tetrapotassium pyrophosphate will not need to be submitted. The rationale for this decision is described below.

1. Tetrapotassium pyrophosphate is an inorganic compound that breaks down into potassium and phosphate ions. These potassium and phosphate ions are indistinguishable from the potassium and phosphate ions already present in the environment.

2. In solution, tetrapotassium pyrophosphate and sodium chloride exist in their ionic forms and as such are indistinguishable chemically and biologically from an ionic solution of tetrasodium pyrophosphate and potassium chloride.

3. Tetrasodium pyrophosphate is exempt from the requirement of a tolerance when used as inert (or occasionally active) ingredients in pesticide formulations applied to growing crops or to raw agricultural commodities after harvest under 40 CFR 180.1001(c) and is recognized as GRAS under 21 CFR 182.6789 and 21 CFR 582.6789 as a sequestrant.

4. Potassium chloride is exempt from the requirement of a tolerance when used as inert (or occasionally active) ingredients in pesticide formulations applied to growing crops or to raw agricultural commodities after harvest under 40 CFR 180.1001(c) and is recognized as GRAS under 21 CFR 182.5622 as a dietary supplement and is recognized as GRAS under 21 CFR 582.5622 as a nutrient and/or dietary supplement.

5. Tetrapotassium pyrophosphate is chemically similar to several chemicals (e.g., potassium phosphate) already exempt from the requirement of a tolerance when used as inert (or occasionally active) ingredients in pesticide formulations applied to growing crops or to raw agricultural commodities after harvest under 40 CFR 180.1001(c).

6. Tetrapotassium pyrophosphate is chemically similar to several chemicals (e.g., dipotassium hydrogen phosphate, potassium dihydrogen phosphate) already exempt from the requirement of

a tolerance when used as inert (or occasionally active) ingredients in pesticide formulations applied to growing crops only under 40 CFR 180.1001(d).

7. Tetrapotassium pyrophosphate is chemically similar to several potassium and sodium salts (e.g., potassium phosphate, sodium phosphate) which are considered minimum risk inerts (List 4 inerts).

8. Tetrapotassium pyrophosphate (potassium pyrophosphate) was listed in "A Comprehensive Survey of Industry on the Use of Food Chemicals Generally Recognized As Safe (GRAS)," Appendix A, Part II, NAS, Washington, DC, pp. 14-16, U.S. Department of Commerce, National Technical Information Service, Order No. PB221-949, 1972.

9. Tetrapotassium pyrophosphate is approved for use under 21 CFR 173.315 in flume water for washing sugar beets.

Based upon the above information and review of its use, EPA has found that, when used in accordance with good agricultural practice, this ingredient is useful and a tolerance is not necessary to protect the public health. Therefore, EPA proposes that the exemption from the requirement of a tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this document in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [OPP-300272]. All written comments filed in response to this petition will be available in the Public Response and Program Resources Branch, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Recording and recordkeeping requirements.

Dated: December 4, 1992.

Lawrence E. Culleen,

Acting Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. Section 180.1001(d) is amended by adding and alphabetically inserting the inert ingredient, to read as follows:

180.1001 Exemptions from the requirement of a tolerance.

Notices

Federal Register
Vol. 57, No. 242
Wednesday, December 16, 1992

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

COUNCIL ON ENVIRONMENTAL QUALITY

Availability of Annual Report on Endangered Species Act Exemption

December 8, 1992.

AGENCY: Council on Environmental Quality, Executive Office of the President.

ACTION: Information only: Notice of availability of Annual Report on Endangered Species Act Exemption.

SUMMARY: This notice announces the availability of the Annual Report submitted by Basin Electric Power Cooperative, as Project Manger for the Missouri Basin Power Project in the matter of an exemption granted from the requirements of the Endangered Species Act to Grayrocks Dam. The lead federal agency in the project is the Rural Electrification Administration.

DATES: The report was submitted to the Council on December 1, 1992.

ADDRESSES: The Annual Report is available from Basin Electric Power Cooperative, 1717 East Interstate Avenue, Bismarck, ND 58501–0564; Telephone: (701) 223–0441.

FOR FURTHER INFORMATION CONTACT: Dinah Bear, General Counsel, Council on Environmental Quality, 722 Jackson Place, NW., Washington, DC 20503. (202) 395–5754.

SUPPLEMENTARY INFORMATION: Under the Endangered Species Act, and agency granted an exemption under 16 U.S.C. 1536(h) must submit to the Council on Environmental Quality an annual report describing its compliance methods with the mitigation and enhancement measures prescribed by 16 U.S.C. 1536. See 16 U.S.C. 1536(1)(2). This subsection further requires that the Council publish availability of the report in the **Federal Register**.

On February 7, 1979, the Endangered Species Committee granted an exemption from the requirements of the Endangered Species Act to Grayrocks Dam. In granting the Exemption Order, the Committee, as required by the act, established requirements for reasonable mitigation and enhancement measures. These requirements are set out in an "Agreement of Settlement and Compromise" and is part of the Annual Report announced here.

David B. Struhs,
Chief of Staff.

BILLING CODE 3125–01–M

DEPARTMENT OF COMMERCE

Agency Forms Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposals for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: National Oceanic and Atmospheric Administration.
Title: Pacific Billfish Angler Survey.
Agency Form Number: NOAA 88–10.
OMB Approval Number: 0648–0020.
Type of Request: Revision of a currently approved collection.
Burden: 175 hours.
Number of Respondents: 2,500.
Avg Hours Per Response: 4 minutes.
Needs and Uses: This survey determines the annual trend in catch of billfish in the Pacific Ocean by recreational fishermen, and the effect on catch by domestic and foreign fleet operators. Data are used in domestic and international discussions, by Federal fishery councils and complies with requirements of the Marine Game Fish Research Act.
Affected Public: Individuals or households.
Frequency: Annually.
Respondent's Obligation: Voluntary.
OMB Desk Officer: Ron Minsk, (202) 395–3084.

Agency: National Oceanic and Atmospheric Administration.
Title: Reporting Requirements for a Commercial Fisheries Exemption Under Section 114 of the Marine Mammal Protection Act.
Agency Form Number: None.
OMB Approval Number: 0648–0225.
Type of Request: Extension of the expiration date of a currently approved collection.
Burden: 143,988 reporting/recordkeeping hours.
Number of Respondents: 28,963.
Avg Hours Per Response: Ranges between 2.5 and 5 minutes -- averages 112 responses per respondent.
Needs and Uses: The Marine Mammal Protection Act mandates the protection of marine mammals and makes their killing, except under permit or exemption, a violation. Section 114, as amended, authorizes an exemption for commercial fishermen provided they register and report all takings. The information is required by statute and needed by the National Marine Fisheries Service to determine the impacts of commercial fishing on marine mammal populations.
Affected Public: Individuals, businesses or other for–profit institutions, small businesses or organizations.
Frequency: On occasion, annually.
Respondent's Obligation: Mandatory.
OMB Desk Officer: Ron Minsk, (202) 395–3084.

Agency: National Oceanic and Atmospheric Administration.
Title: Registration to Implement Temporary Emergency Sea Turtle Conservation Measures.
Agency Form Number: None.
OMB Approval Number: 0648–0267.
Type of Request: Revision of a currently approved collection.
Burden: 108 hours.
Number of Respondents: 900.
Avg Hours Per Response: 7 minutes.
Needs and Uses: The National Marine Fisheries Service has issued a final rule to amend the sea turtle protection regulations applicable to shrimp trawlers in the Southeast Atlantic and Gulf of Mexico. The regulations contain a provision for registering fishermen, if needed, when emergency conditions exist making shrimp trawling with Turtle Excluder Devices (TEDs) impracticable. The rule also contains a provision that will allow restrictions to be imposed on other fisheries that encounter sea turtles as well. The registration system will be used to identify vessels that are exempt from the TED requirement and to identify fishing vessels required to carry observers.
Affected Public: Small businesses or organizations.
Frequency: On occasion.
Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Ron Minsk, (202) 395-3084.

Copies of the above information collection proposals can be obtained by calling or writing Edward Michals, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, room 5327, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collections should be sent to Ron Minsk, OMB Desk Officer, room 3019, New Executive Office Building, Washington, DC 20503.

Dated: December 10, 1992.

Edward Michals,

Departmental Forms Clearance Officer, Office of Management and Organization.

BILLING CODE 3510-CW-F

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Minority Business Development Agency (MBDA).

Title: Study of Awareness and Attitudes of Minority Young Adults Toward Business Ownership.

Agency Form Number: None.

OMB Approval Number: None.

Type of Request: New collection.

Burden: 500 hours.

Number of Respondents: 2,000.

Avg Hours Per Respondent: 15 minutes.

Needs and Uses: The national telephone survey will provide MBDA with national estimates of the awareness and attitudes of young adults toward business ownership, including comparison of four racial/ethnic groups. This will assist MBDA in designing and targeting interventions to the minorities and age cohorts who would benefit most from their assistance.

Affected Public: Individuals or households.

Frequency: One time survey.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Gary Waxman, (202) 395–7340.

Copies of the above information collection proposal can be obtained by calling or writing Edward Michals, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, room 5327, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Gary Waxman, OMB Desk Officer, room 3208, New Executive Office Building, Washington, D.C. 20503.

Dated: December 10, 1992

Edward Michals,

Departmental Forms Clearance Officer, Office of Management and Organization.

Foreign-Trade Zones Board

[Docket 32–91]

Foreign-Trade Zone 142—Salem, NJ, Withdrawal of Application for Subzone Status for Lignotock Auto Interior Components Plant

Notice is hereby given of the withdrawal of the application submitted by the City of Salem Port Authority, grantee of FTZ 142, requesting authority for subzone status for the automotive interior door trim panel assembly plant of Lignotock Corporation in Westampton Township, Burlington County, New Jersey. The application was filed on May 30, 1991 (56 FR 27230, 6/13/91).

The withdrawal is requested by the applicant because of changed circumstances, and the case has been closed without prejudice.

Dated: December 8, 1992.

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 92–30516 Filed 12–15–92; 8:45 am]

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

Marine Mammals; Report to Congress

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of report availability.

SUMMARY: Section 114(l)(4) of the Marine Mammal Protection Act (MMPA) requires that NMFS develop, in consultation with the Marine Mammal Commission, the Fishery Management Councils, fishing and environmental communities, and other interested groups, a legislative proposal for governing the interactions between marine mammals and commercial fisheries. This report has been submitted to Congress and is now available for distribution to the general public.

ADDRESSES: A copy of the report is available from: Herbert W. Kaufman, Office of Protected Resources (F/PR2), National Marine Fisheries Service, 1335 East-West Highway, Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT: Herbert W. Kaufman, F/PR2, 301/713–2319.

SUPPLEMENTARY INFORMATION: The Marine Mammal Protection Act Amendments of 1988 (Pub. L. 100–711, signed November 23, 1988) established a new section 114 in the MMPA which implemented a 5-year Interim Exemption for certain incidental takings of marine mammals by commercial fishermen. The primary objective of this Interim Exemption is to provide a means for collecting reliable information about interactions between commercial fishing activities and marine mammals while allowing commercial fishing to continue. Based upon this and other relevant information, the Secretary of Commerce was directed to develop a suggested regime that would govern the incidental taking of marine mammals following the termination of the interim exemption program on October 1, 1993.

This document describes NMFS' final recommendations to Congress for a regulatory regime to govern interactions between marine mammals and commercial fishing operations. NMFS previously published and distributed for public comment draft versions of the recommendations on May 24, 1991 (56 FR 23958), and on November 20, 1991 (see 56 FR 61231, December 2, 1991). Significant comments were received on various components of the recommendations during the public review period. The majority of the comments received reflected concerns about the complexity of the recommendations and their application to a broad range of fisheries rather than focusing on those with significant marine mammal incidental take problems. The final recommendations contain substantial changes in how the regulatory program will be developed and implemented. A recurring theme of many comments from both the commercial fishing industry and the environmental community was the need to focus attention and resources on the most important problems facing marine mammal stocks. In response, the final recommendations concentrate research, monitoring, and management efforts on those fisheries responsible for significant removals of marine mammal stocks. The final recommendations contain several elements. Foremost, the recommendations maintain OSP as the fundamental precept for marine mammal protection and acknowledge

that OSP levels are still not known and will not be known for many years for most marine mammal species. Therefore, the recommendations provide for a safe level of take even if OSP is not determinable or if a population is determined to be below its OSP.

The safe level of take is determined using conservative methods, from the numbers of marine mammals of various species that could be removed from the marine ecosystem each year due to commercial fishing without either decreasing the population levels below OSP or lengthening by more than 10 percent the time needed for a depleted stock to increase back to its OSP range. The results of this determination is referred to as the "potential biological removal" (PBR).

The fisheries and marine mammal populations are prioritized such that fisheries that receive the focus of conservation efforts are those with significant takes from marine mammal populations that are depleted, threatened or endangered, or where cumulative takes from all causes equal or exceed the population's PBR.

Historical data would be used to determine which commercial fisheries interact and which do not interact with marine mammals. All vessels operating in interacting fisheries would be required to register. Vessels operating in non-interacting fisheries would not be required to register. Based on stock assessment data obtained through the stock assessment program, OSP levels would be determined for each stock, if possible. If data for making OSP determinations were not available, NMFS would make a finding that the PBR methodology would be used to determine allowable removal levels. Appropriately conservative PBRs would then be calculated for each marine mammal stock that interacts with commercial fishing operations, with the goals of limiting mortality and maintaining stocks within their OSP ranges. PBRs would be adjusted to account for special circumstances surrounding endangered, threatened or depleted stocks. The total annual removal of each stock from all sources would then be compared to the calculated PBR to determine if the stock is Class Alpha (α) or Beta (β). A stock would be categorized as Class α if total removals are equal to or greater than the PBR, of if the stock is classified as depleted, threatened or endangered. A stock would be categorized as Class β if total removals are less than the PBR, or if the stock is not classified as depleted, threatened, or endangered.

Interacting fisheries would then be categorized on the basis of the marine mammals with which they interact. Fisheries that have significant interactions with Class α stocks would be placed in Category I. Fisheries that have insignificant interactions with Class α stocks or significant interactions with Class β stocks would be placed in Category II. Fisheries that have insignificant interactions with Class β stocks would be placed in Category III.

The total PBR would then be allocated among user groups. The fishery allocation would be allocated among interacting fisheries based on socio-economic factors, biological considerations, historical take rates, past performance to reduce takes, and ability to reduce takes. Category I fisheries and Category II fisheries interacting with Class α stocks would receive a portion of the total fisheries allocation and their removals would be monitored annually to ensure that allocations are not being exceeded. If necessary, NMFS would issue emergency regulations to restrict fishing. Category III fisheries would not receive an allocation, but would be monitored every 2–3 years or at NMFS' discretion to ensure that their level of take remains insignificant and that an upgrade to Category II or I is not needed. NMFS also reserves the right to issue emergency regulations for Category III fisheries, if necessary.

A mechanism by which NMFS will ensure the soundness of its recommended plan is the application of the zero mortality rate goal. This goal will be applied to all fisheries through educational efforts, gear workshops and pertinent research efforts.

Dated: December 4, 1992.

William W. Fox, Jr.,

Assistant Administrator for Fisheries.

[FR Doc. 92–30458 Filed 12–15–92; 8:45 am]

BILLING CODE 3510-22-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Civilian Health and Medical Program of the Uniformed Services (CHAMPUS); Fiscal Year 1993 Updates

AGENCY: Office of the Secretary, DoD.

ACTION: Notice of updated mental health per diem rates.

SUMMARY: This notice provides for the updating of hospital-specific per diem rates for high volume providers and regional per diem rates for low volume providers; the updated cap per diem for high volume providers; and the beneficiary per diem cost-share amount for low volume providers to be used for FY 1993 under the CHAMPUS Mental Health Per Diem Payment System.

EFFECTIVE DATE: The rates contained in this notice are effective for services occurring on or after October 1, 1992.

ADDRESSES: Office of the Civilian Health and Medical Program of the Uniformed Services (OCHAMPUS), Program Development Branch, Aurora, CO 80045–6900.

For copies of the **Federal Register** containing this notice, contact the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783–3238. The charge for the **Federal Register** is $1.50 for each issue payable by check or money order to the Superintendent of Documents.

FOR FURTHER INFORMATION CONTACT: Stan Regensberg, Program Development Branch, OCHAMPUS, telephone (303) 361–1342. To obtain copies of this document, see the "**ADDRESSES**" section above. Questions regarding payment of specific claims under the CHAMPUS Mental Health Per Diem Payment System should be addressed to the appropriate CHAMPUS contractor.

SUPPLEMENTARY INFORMATION: The final rule published in the **Federal Register** on September 6, 1988, (52 FR 34285) set forth reimbursement changes that were effective for all inpatient hospital admissions in psychiatric hospitals and exempt psychiatric units occurring on or after January 1, 1989. Included in this final rule were provisions for updating reimbursement rates for each federal fiscal year. As stated in the final rule, each per diem shall be updated by the Medicare update factor for hospitals and units exempt from the Medicare Prospective Payment System. In the **Federal Register** on September 1, 1992, (57 FR 39746), Medicare has recommended to Congress an update factor of 4.2 percent for federal fiscal year 1993 for hospitals and units excluded from the prospective payment system. CHAMPUS will adopt this update factor for FY 1993 as the final update factor. Hospitals and units with hospital-specific rates (hospitals and units with high CHAMPUS volume) will have their FY 1992 CHAMPUS per diem rates updated by 4.2 percent for FY 1993.

The following reflect an update of 4.2 percent.

REGIONAL SPECIFIC RATES FOR PSYCHIATRIC HOSPITALS AND UNITS WITH LOW CHAMPUS VOLUME

United States Census Region	Rate*
Northeast:	

REGIONAL SPECIFIC RATES FOR PSYCHIATRIC HOSPITALS AND UNITS WITH LOW CHAMPUS VOLUME—Continued

United States Census Region	Rate*
New England	$475
Mid-Atlantic	$454
Midwest:	
East North Central	$393
West North Central	$371
South:	
South Atlantic	$469
East South Central	$508
West South Central	$427
West:	
Mountain	$426
Pacific	$503

*The wage portion of the rate, subject to the area wage adjustment, is 71.40 percent.

BENEFICIARY COST-SHARE: Beneficiary cost-share (other then dependents of active duty members) for care paid on the basis of a regional per diem rate is the lower of $126 per day or 25 percent of the hospital billed charges effective for services rendered on or after October 1, 1992.

CAP AMOUNT: Cap amount for hospitals and units with high CHAMPUS volume is $701 per day.

Dated: December 10, 1992.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 92–30447 Filed 12–15–92; 8:45 am]

BILLING CODE 3810–01–M

Department of the Army

Notice of Procedural Changes in DOD Rate Acquisition Programs

AGENCY: Military Traffic Management Command.

ACTION: Notice.

SUMMARY: Military Traffic Management Command (MTMC), for the Department of Defense (D)D, intends to modify the procedures used to acquire rates and charges from the motor carrier industry for driveaway and towaway service. This modification is the issuance of a rules publication designed to standardize and simplify the procurement of rates and services to move military traffic in driveaway or towaway service, under 49 U.S.C. 10721. This publication, MTMC Driveaway-Towaway Rules Publication No. 2, is available in draft form for public review and comment and may be obtained from Military Traffic Management Command, ATTN: MTIN–NG, room 621, 5611 Columbia Pike, Falls Church, VA 22041–5050 or telephone (703) 756–1585. Written comments concerning this proposed publication will be considered, if received at the same address not later than January 25, 1993.

FOR FURTHER INFORMATION CONTACT: Mr. Blaize J. Guzzardo, Headquarters, Military Traffic Management Command, ATTN: MTIN–NG, 5611 Columbia Pike, Falls Church, VA 22041–5050, telephone (703) 756–1585.

Kenneth L. Denton,

Army Federal Register Liaison Officer.

[FR Doc. 92–30449 Filed 12–15–92; 8:45 am]

BILLING CODE 3710–08–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No.'s 137–002 and 8144–003]

Pacific Gas and Electric Company Amador County, CA; Notice of Intent To Prepare an Environmental Impact Statement and Conduct Public Scoping Meetings

December 10, 1992.

The Federal Energy Regulatory Commission (FERC) has received an application for relicense of the existing Mokelumne River Project No. 137, and an application for license to construct the proposed Devil's Nose/Cross County Project No. 8144. Both hydropower projects would be located principally on the North Fork of the Mokelumne River. The Mokelumne Project is located in Alpine, Amador, and Calaveras Counties, California, and the Devil's Nose Project would be located in Amador and Calaveras Counties, California.

The FERC staff has determined that licensing these projects would constitute a major federal action significantly affecting the quality of the human environment. Therefore, the staff intends to prepare an Environmental Impact Statement (EIS) on the two hydroelectric projects in accordance with the National Environmental Policy Act.

The Forest Service, Bureau of Land Management, and Corp of Engineers will be cooperating agencies in the preparation of the EIS.

The EIS will objectively consider both site specific and cumulative environmental impacts of the project and reasonable alternatives, and will include an economic, financial and engineering analysis.

A draft EIS will be issued and circulated for review by all the interested parties. All comments filed on the draft EIS will be analyzed by the staff and considered in a final EIS. The staff's conclusions and recommendations will then be presented for the consideration of the Commission in reaching its final licensing decision.

Scoping Meetings

Two scoping meetings will be conducted on Thursday, January 14, 1993. A scoping meeting oriented toward resource agencies will be conducted from 9 a.m. to 12 p.m., in Room West 21–42 at the Cottage Way Federal Building, 2800 Cottage Way, Sacramento, California. The building is located between Fulton Avenue and Morse Boulevard. A scoping meeting oriented toward the public will be conducted from 7 p.m. to 10 p.m., in the Civic Center at the City Hall, 33 Broadway, Jackson, California. City Hall is located at the corner of Highways 49 and 88.

Interested individuals, organizations, and agencies are invited to attend either or both meetings and assist the staff in identifying the scope of environmental issues that should be analyzed in the EIS.

To help focus discussions at the meetings, a preliminary scoping document outlining subject areas to be addressed in the EIS will be mailed to agencies and interested individuals on the FERC mailing list. Copies of the scoping document will also be available at the scoping meetings.

Objectives

At the scoping meetings the staff will: (1) Summarize the environmental issues tentatively identified for analysis in the planned EIS; (2) determine the relative depth of analysis for issues to be addressed in the EIS; (3) identify resource issues that are not important and do not require detailed analysis; (4) solicit from the meeting participants all available information, especially quantified data, on the resources at issue; and (5) encourage statements from experts and the public on issues that should be analyzed in the EIS, including point of view in opposition to, or in support of, the staff's preliminary views

Procedures

The meetings will be recorded by a court reporter and all statements (oral and written) thereby become a part of the formal record of the Commission proceedings on the Mokelumne Project and on the Devil's Nose Project. Individuals presenting statements at the meetings will be asked to clearly identify themselves for the record.

Individuals, organizations, and agencies with environmental expertise and concerns are encouraged to attend the meetings and assist the staff in

defining and clarifying the issues to be addressed in the EIS.

Participants wishing to make oral comments at the public meeting are asked to keep them to five minutes to allow everyone the opportunity to speak.

Persons choosing not to speak at the meetings, but who have views on the issues or information relevant to the issues, may submit written statements for inclusion in the public record at the meeting. In addition, written scoping comments may be filed with the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, until February 15, 1993.

All written correspondence should clearly show one or both of the following caption on the first page: Mokelumne River Project No. 137 or Devil's Nose/Cross County project No. 8144.

Further, intervenors—those on the Commission's service list (parties)—are reminded of the Commission's Rules of Practice and Procedure, requiring parties filing documents with the Commission, to serve a copy of the document on each person whose name appears on the official service list.

If you have any questions please contact Thomas Dean at (202) 219–2778.

Linwood A. Watson, Jr.,

Acting Secretary.

[FR Doc. 92–30448 Filed 12–15–92; 8:45 am]

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[OPP–50751; FRL–4168–7]

Issuance of Experimental Use Permits

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted experimental use permits to the following applicants. These permits are in accordance with, and subject to, the provisions of 40 CFR part 172, which defines EPA procedures with respect to the use of pesticides for experimental use purposes.

FOR FURTHER INFORMATION CONTACT: By mail: Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person or by telephone: Contact the product manager at the following address at the office location or telephone number cited in each experimental use permit: 1921 Jefferson Davis Highway, Arlington, VA.

SUPPLEMENTARY INFORMATION: EPA has issued the following experimental use permits:

62719–EUP–16. Issuance. DowElanco, Quad IV, 9002 Purdue Rd., Indianapolis, IN 46268–1189. This experimental use permit allows the use of 119.8 pounds of the herbicide N-(2,6-difluorophenyl)-5-methyl-1,2,4-triazolo-[1,5a]-pyrimidine-2-sulfonamide on 1,765 acres of soybeans to evaluate the control of broadleaf weeds. The program is authorized in the States of Alabama, Arkansas, Colorado, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Virginia, and Wisconsin. The experimental use permit is effective from September 4, 1992 to September 4, 1994. A temporary tolerance for residues of the active ingredient in or on soybeans has been established. (Joanne I. Miller, PM 23, Rm. 237, CM #2, (703–305–7830))

62719–EUP–17. Issuance. DowElanco, Quad IV, 9002 Purdue Rd., Indianapolis, IN 46268–1189. This experimental use permit allows the use of 272.77 pounds of the herbicide N-(2,6-difluorophenyl)-5-methyl-1,2,4-triazolo-[1,5a]-pyrimidine-2-sulfonamide and 3,709.64 pounds of the herbicide trifluralin on 3,879 acres of soybeans to evaluate the control of broadleaf weeds. The program is authorized in the States of Alabama, Arkansas, Colorado, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Virginia, and Wisconsin. The experimental use permit is effective from September 4, 1992 to September 4, 1994. A temporary tolerance for residues of the active ingredients in or on soybeans has been established. (Joanne I. Miller, PM 23, Rm. 237, CM #2, (703–305–7830))

Persons wishing to review these experimental use permits are referred to the designated product manager. Inquires concerning these permits should be directed to the person cited above. It is suggested that interested persons call before visiting the EPA office, so that the appropriate file may be made available for inspection purposes from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

Authority: 7 U.S.C. 136.

Dated: November 25, 1992.

Lawrence E. Cullen,

Acting Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560–50–F

[OPP–30345; FRL–4176–8]

Rohm and Haas Company; Application To Register a Pesticide Product

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces receipt of an application to register the pesticide product Kathon 287T, containing an active ingredient not included in any previously registered product pursuant to the provisions of section 3(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

DATES: Written comments must be submitted by January 15, 1993.

ADDRESSES: By mail submit comments identified by the document control number [OPP–30345] and the file symbol (707–EEU) to: Public Response and Program Resources Branch, Field Operations Division (H7506C), Attention PM 31, Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1128, Environmental Protection Agency, CM #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for public inspection in rm. 1128 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: PM 31, John Lee, Rm. 258, CM #2, (703–305–5675).

SUPPLEMENTARY INFORMATION: EPA received an application from Rohm and Haas Company, Independence Mall West, Philadelphia, PA 19105, to register the product Kathon 287T (File Symbol 707–EEU), a technical microbiocide containing the active ingredient (4,5-dichloro-2-n-octyl-3 (2*H*)-isothiazolone at 93.5 percent; an ingredient not included in any previously registered product pursuant to the provisions of section 3(c)(4) of FIFRA. This product is used for the formulation of industrial mildewcides. Notice of receipt of the application does not imply a decision by the Agency on the application.

Notice of approval or denial of an application to register a pesticide product will be announced in the **Federal Register**. The procedure for requesting data will be given in the **Federal Register** if an application is approved.

Comments received within the specified time period will be considered before a final decision is made; comments received after the time specified will be considered only to the extent possible without delaying processing of the application.

Written comments filed pursuant to this notice, will be available in the Public Response and Program Resources Branch, Field Operations Division (FOD) office at the address provided from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays. It is suggested that persons interested in reviewing the application file, telephone the FOD office (703–305–5805), to ensure that the file is available on the date of intended visit.

Authority: 7 U.S.C. 136.

Dated: December 2, 1992.

Lawrence E. Culleen,

Acting Director, Registration Division, Office of Pesticide Programs.

[FR Doc. 92–30511 Filed 12–15–92; 8:45 am]

BILLING CODE 6560–50–F

[OPP–240101; FRL–4177–8]

State Registrations of Pesticides

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received notices of registration of pesticides to meet special local needs under section 24(c) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, from 23 States and Puerto Rico. A registration issued under this section of FIFRA shall not be effective for more than 90 days if the Administrator disapproves the registration or finds it to be invalid within that period. If the Administrator disapproves a registration or finds it to be invalid after 90 days, a notice giving that information will be published in the **Federal Register**.

DATES: The last entry for each item is the date the State registration of that product became effective.

FOR FURTHER INFORMATION CONTACT: Edith Minor, Registration Division, Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 718, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703)-305-5978.

SUPPLEMENTARY INFORMATION: This notice only lists the section 24(c) applications submitted to the Agency. The Agency has 90 days to approve or disapprove each application listed in this notice. Applications that are not approved are returned to the appropriate State for action. Most of the registrations listed below were received by the EPA in July through August of 1992. Receipts-of-State registrations will be published periodically. Of the following registrations, 11 involve a changed-use pattern (CUP). The term "changed use pattern" is defined in 40 CFR 162.3(k) as a significant change from a use pattern approved in connection with the registration of a pesticide product. Examples of significant changes include, but are not limited to, changes from a nonfood to food use, outdoor to indoor use, ground to aerial application, terrestrial to aquatic use, and nondomestic to domestic use.

38. *EPA SLN No. SD 92 0009.* Sandoz Agro, Inc. Registration is for Dicamba to be used on millet to control weeds. July 28, 1992.

Texas

39. *EPA SLN No. TX 92 0021.* U.S. Dept. of Agriculture. Registration is for Linuron to be used on parsley to control weeds. July 5, 1992.

40. *EPA SLN No. TX 92 0022.* ISK Biotech Corp. Registration is for Chlorothalonil to be used on peaches to control peach scab. July 31, 1992.

41. *EPA SLN No. TX 92 0023.* E. I. du Pont deNemours and Co., Inc. Registration is for Finesse and Lexone to be used on winter wheat to control grass. August 18, 1992.

42. *EPA SLN No. TX 92 0024.* AMVAC Chemical Corp. Registration is for PCNB 75% Wettable Powder to be used on peanuts to control southern blight and white mold. August 25, 1992.

Vermont

43. *EPA SLN No. VT 92 0001.* Platte Chemical Co., Inc. Registration is for Diazinon to be used on balsam fir plantings to control gall midge and twin aphid. July 23, 1992.

44. *EPA SLN No. VT 92 0002.* Rhone-Poulenc AG Co. Registration is for Thiodicarb to be used on sweet corn to control european corn borer and corn ear worms. July 23, 1992.

Washington

45. *EPA SLN No. WA 92 0032.* Uniroyal Chemical Co., Inc. Registration is for Propargite to be used on potatoes to control spider mite. July 20, 1992.

46. *EPA SLN No. WA 92 0033.* U.C.B. Chemicals Corp. Registration is for Ziram Granuflo to be used on pears to control storage rots. August 18, 1992.

47. *EPA SLN No. WA 92 0034.* American Cyanamid Co. Registration is for Pendimethalin to be used on alfalfa to control weeds (dodder). August 21, 1992.

48. *EPA SLN No. WA 92 0035.* ICI Americas, Inc. Registration is for Napropamide to be used on cranberries to control silver leaf, aster, and clover. August 31, 1992.

49. *EPA SLN No. WA 92 0036.* Uniroyal Chemical Co., Inc. Registration is for Propargite to be used and apples to control mites. August 31, 1992.

Wyoming

50. *EPA SLN No. WY 92 0005.* American Cyanamid Co. Registration is for Pendimethalin to be used on alfalfa to control weeds (dodder). July 23, 1992.

Authority: Sec. 24, as amended, 92 Stat. 835 (7 U.S.C. 136).

Dated: November 25, 1992.

Lawrence E. Culleen,

Director, Registration Division, Office of Pesticide Programs.

[OPPT-51811; FRL-4180-5]

Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires

any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in the final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). This notice announces receipt of 20 such PMNs and provides a summary of each.

DATES: Close of review periods:

P 93–107, February 1, 1993.

P 93–108, 93–109, 93–110, 93–111, 93–112, 93–113, 93–114, 93–115, 93–116, 93–117, February 3, 1993.

P 93–118, 93–119, 93–120, 93–121, February 6, 1993.

P 93–122, 93–123, 93–124, 93–125, 93–126, February 7, 1993.

Written comments by:

P 93–107, January 2, 1993.

P 93–108, 93–109, 93–110, 93–111, 93–112, 93–113, 93–114, 93–115, 93–116, 93–117, January 4, 1993.

P 93–118, 93–119, 93–120, 93–121, January 7, 1993.

P 93–122, 93–123, 93–124, 93–125, 93–126, January 8, 1993.

ADDRESSES: Written comments, identified by the document control number "[OPPT–51811]" and the specific number should be sent to: Document Processing Center (TS–790), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 401 M St., SW., Rm. 201ET, Washington, DC, 20460 (202) 260–3532.

FOR FURTHER INFORMATION CONTACT: Susan B. Hazen, Director, Environmental Assistance Division (TS–799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. E–545, 401 M St., SW., Washington, DC, 20460 (202) 554–1404, TDD (202) 554–0551.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the nonconfidential version of the submission provided by the manufacturer on the PMNs received by EPA. The complete nonconfidential document is available in the TSCA Public Docket Office, NE–G004 at the above address between 8 a.m. and noon and 1 p.m. and 4 p.m., Monday through Friday, excluding legal holidays.

P 93–107

Manufacturer. American Colloid Company.

Chemical. (S) Humates (humic acid).

Use/Production. (S) Soil amendment. Prod. range: 250,000–750,000 ky/yr.

P 93–108

Manufacturer. E.I. Du Pont De Nemours and Company.

Chemical. (G) Polyether acetate.

Use/Production. (G) Isolated intermediate in the manufacture of a polyether glycol. Prod. range: Confidential.

Toxicity Data. Acute oral toxicity: LD50 > 25,000 mg/kg species (rat). Eye irritation: slight species (rabbit).

P 93–109

Importer. Mitsui Petrochemicals(America), Ltd.

Chemical. (G) Modified (stylene-olefin copolymer).

Use/Import. (S) Primer for automative polypropylene and ethylene-propylene-rubber. Import range: Confidential.

P 93–110

Manufacturer. Confidential.

Chemical. (G) Vinylidene chloride acrylate ester polymer.

Use/Production. (G) Formulation of protective coatings. Prod. range: Confidential.

P 93–111

Manufacturer. E.I. Du Pont De Nemours and Company.

Chemical. (G) Polyimide.

Use/Production. (G) Open nondispersive use. Prod. range: Confidential.

Toxicity Data. Eye irritation: slight species (rabbit). Skin irritation: slight species (rabbit).

P 93–112

Manufacturer. Confidential.

Chemical. (G) Calcium based thickener.

Use/Production. (S) Grease thickener. Prod. range: Confidential.

Toxicity Data. Acute oral toxicity: LD50 > 5.0 g/kg species (rat). Acute dermal toxicity: LD50 > 2.0 g/kg species (rabbit). Eye irritation: slight species (rabbit). Skin irritation: negligible species (rabbit). Skin sensitization: negative.

P 93–113

Manufacturer. Confidential.

Chemical. (G) Substituted alkanoic acid derivative.

Use/Production. (G) Raw material used in commercial manufacturing process. Prod. range: Confidential.

P 93–114

Manufacturer. Confidential.

Chemical. (G) Substituted alkanoic acid derivative.

Use/Production. (G) Raw material used in commercial manufacturing process. Prod. range: Confidential.

P 93–115

Manufacturer. Confidential.

Chemical. (G) Substitutes alkanoic acid derivative.

Use/Production. (G) Raw material used in commercial manufacturing process. Prod. range: Confidential.

P 93–116

Manufacturer. Confidential.

Chemical. (G) Substituted heteromonocyclic polymer.

Use/Production. (G) Resin used for industrial applications. Prod. range: Confidential.

P 93–117

Importer. EMS-American Grilon, Inc.

Chemical. (S) Copolyester of terephthalic acid, isophthalic acid, dodecanedioic acid and 1,4-butanediol.

Use/Import. (S) Hot melt for adhesion of textile substrates. Import range: Confidential.

P 93–118

Importer. Basf Corporation.

Chemical. (G) Catonic modified acrylic ester polymer.

Use/Import. (S) Sizing agent. Import range: Confidential.

Toxicity Data. Acute oral toxicity: LD50 1,388 mg/kg species (rat). Mutagenicity: positive.

P 93–119

Importer. Confidential.

Chemical. (G) Urea-propenamide adduct.

Use/Import. (G) Photopolymer to printing plate without lead. Import range: Confidential.

Toxicity Data. Acute oral toxicity: LD50 1,388 mg/kg species (rat).

P 93–120

Importer. Confidential.

Chemical. (G) Polyester polyurethane acrylate oligomer.

Use/Import. (S) Outer primary coating resin for optical fibers. Import range: Confidential.

P 93–121

Importer. EMS-American Grilon.

Chemical. (G) Polyetherheteramide, based on nylon 6 monomer caprolactam, =nylon 6 monmomer.

Use/Import. (S) Basic polymers for compounding to granules for extrusion and injection molding. Import range: Confidential.

P 93–122

Manufacturer. Confidential.

Chemical. (G) Modified acylic polymer.

Use/Production. (S) Coating, sealant, binder, adhesive and flame retardant. Prod. range: Confidential.

P 93–123

Manufacturer. Confidential.

Chemical. (G) Modified acrylic polymer.

Use/Production. (S) Coating, sealant, binder, adhesive, and flame retardant. Prod. range: Confidential.

P 92–124

Manufacturer. Confidential.

Chemical. (G) Modified acylic polymer.

Use/Production. (S) Coating, sealant, binder, adhesive and flame retardant. Prod. range: Confidential.

P 92–125

Manufacturer. Confidential.

Chemical. (S) A phthalic anhydride, maleic anhydride, tall oil fatty acids, neopentyl glycol, ethylene glycol, andpentaerythritol polyester reacted with styrene andmethacrylate acid.

Use/Production. (S) Styrene and acrylic-modified polyester resin used as a pigmented protective coating. Prod. range: 200,000–300,000 kg/yr.

Toxicity Data. Skin sensitization: positive.

P 92–126

Manufacturer. Ashland Chemical, Inc.

Chemical. (G) 2,2'-(Substituted) bisoxazoline.

Use/Production. (G) Thermoset resin component (open, nondispersive use). Prod. range: Confidential.

Toxicity Data. Acute oral toxicity: LD50 3.55 g/kg species (rat). Acute dermal toxicity: LD50 > 2.0 g/kg species (rabbit). Eye irritation: slight. Skin irritation: slight. Mutagenicity: positive. Skin sensitization: positive.

Dated: December 3, 1992.

BILLING CODE 6560–50–F

FEDERAL DEPOSIT INSURANCE CORPORATION

Determination to Provide Assistance; Citizens State Bank

Pursuant to the provisions of section 13(c)(8) of the Federal Deposit Insurance Act (the FDI Act) (12 U.S.C. 1823(c)(8), as amended by the Federal Deposit Insurance Corporation Improvement Act of 1991), notice is hereby given that at its closed meeting held at 10:02 a.m. on October 20, 1992, the Federal Deposit Insurance Corporation's (the Corporation's) Board of Directors determined to provide assistance to Citizens State Bank, Princeton, Texas (Citizens), before the appointment of a conservator or receiver.

Subject to the least-cost provisions of section 13(c)(4) of the FDI Act (12 U.S.C. 1823(c)(4)), the Corporation, in compliance with section 13(c)(8), determined to provide direct financial assistance after: (1) The Corporation determined that grounds for the appointment of a conservator or receiver exist or likely will exist in the future unless Citizens' capital levels are increased; (2) the Corporation determined that it is unlikely that Citizens can meet all currently applicable capital standards without assistance; (3) based on information currently available to the Corporation, the Corporation determined that Citizens' management, as reconstituted in the course of the transaction, is competent and has complied with applicable laws, rules, and supervisory directives and orders; and (4) based on information currently available to the Corporation, the Corporation determined that Citizens' management, as reconstituted in the course of the transaction, has not engaged in any insider dealing, speculative practice or other abusive activity. The determinations described under (3) and (4) above are based on information that could be obtained in the time available. The determinations shall not prejudice future action if subsequent information indicates that such action is appropriate.

Additional information on this notice can be obtained by contacting Janet V. Norcom, Counsel, Legal Division, FDIC, 550 17th Street, NW., Washington, DC 20429. Telephone: (202) 898–3607.

By direction of the Board of Directors.

Dated this 20th day of October, 1992.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

BILLING CODE 6714–01–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

Public Information Collection Requirements Submitted to OMB for Review

ACTION: Notice.

SUMMARY: The Federal Emergency Management Agency (FEMA) has submitted to the Office of Management and Budget the following public information collection requirements for review and clearance in accordance with the Paperwork Reduction Act of 1980, 44 U.S.C. chapter 35.

DATES: Comments on this information collection must be submitted on or before February 16, 1993.

ADDRESSES: Direct comments regarding the burden estimate or any aspect of this information collection, including suggestions for reducing this burden, to: The FEMA Information Collections Clearance Officer at the address below; and to Gary Waxman, Office of Management and Budget, 3235 New Executive Office Building, Washington, DC 20503, (202) 395–7340, within 60 days of this notice.

FOR FURTHER INFORMATION CONTACT: Copies of the above information collection request and supporting documentation can be obtained by calling or writing Linda Borror, FEMA Information Collections Clearance Officer, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646–2624.

Type: Extension of 3067–0123.

Title: State and Local Emergency Operations Plans.

Abstract: State and local emergency operations plans (EOP's) are necessary to facilitate coordinated and effective response and recovery from major natural, technological, and attack-related hazards. Once an EOP is developed, it must be updated once every 4 years. State and local jurisdictions develop and update plans using multihazard emergency operations planning guidance found in FEMA Civil Preparedness Guides, specifically CPG 1–8, *Guide for the Development of State and Local Emergency Operations Plans,* and CPG 1–8A, Guide for the Review of State and Local Emergency Operations Plans.

Type of Respondents: State and local governments.

Estimate of Total Annual Reporting and Recordkeeping Burden: 402,780 hours.

Number of Respondents: 959.

Estimated Average Burden Time per Response: 420 hours.

Frequency of Response: Other. During the update cycle, plans will be submitted once every 4 years.

Dated: December 9, 1992.

Wesley C. Moore,

Director, Office of Administrative Support.

BILLING CODE 6718–01–M

FEDERAL MARITIME COMMISSION

Maryland Port Administration/ Mediterranean; Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the

Washington, DC Office of the Federal Maritime Commission, 800 North Capitol Street, NW., 9th Floor. Interested parties may submit comment on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–200408–002.

Title: Maryland Port Administration/ Mediterranean Shipping Terminal Agreement.

Parties: Maryland Port Administration ("Port") Mediterranean Shipping Company, S.A. ("MSC")

Synopsis: The amendment provides for a $25.00 special incentive credit for loaded MSC mini-landbridge containers handled at the Port's Seagirt Marine Terminal.

Agreement No.: 224–200446–001.

Title: Port of New Orleans/Coastal Cargo Company, Inc. Leasing Agreement.

Parties: The Port of New Orleans, Coastal Cargo Company, Inc.

Synopsis: The modification extends the leasing period of the basic Agreement on a month to month basis in accordance with the provisions of the Louisiana Civil Code Article 2689.

Agreement No.: 224–200706.

Title: Port of Palm Beach/Inter-Call Communications, Inc., Lease Agreement.

Parties: Port of Palm Beach ("Port") Inter-Call Communications, Inc.

Synopsis: The Agreement provides for a leasing arrangement between the two parties for the purpose of leasing office space, with parking spaces, in the Maritime Office Building located at the Port.

Dated: December 10, 1992.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730–01–M

GENERAL SERVICES ADMINISTRATION

Information Collection Activities Under Office of Management and Budget Review

AGENCY: Office of Administration, GSA.

SUMMARY: The GSA hereby gives notice under the Paperwork Reduction Act of 1980 that it is requesting the Office of Management and Budget (OMB) to approve information collection, Zero Burden Information Collection Reports. GSA proposes to use a single, general control number for information collections that impose no burden upon the public.

ADDRESSES: Send comments to Ed Springer, GSA Desk Officer, Room 3235, NEOB, Washington, DC, 20503 and to Mary L. Cunningham, GSA Clearance Officer, General Services Administration (CAIR), 18th and F Street NW., Washington, DC 20405.

SUPPLEMENTARY INFORMATION:

a. Background

In November 1990 GSA submitted a Request for OMB Review of Zero Burden Information Collection Reports.

b. Purpose

The information collection request submitted for approval consists of reports which do not impose collection burdens upon the public. These collections require information which is already available to the public at large or that is routinely exchanged by firms during the normal course of business. A general control number for these collections decreases the amount of paperwork generated by the approval process. Since May 10, 1991, GSA has published one rule that falls under Information collection 3090–2050. The rule was published at 56 FR 29442, June 27, 1991, titled: Implementation of Public Law 99–506. The effective date was July 8, 1991. Annual Reporting Burden: None.

FOR FURTHER INFORMATION CONTACT: Mary Cunningham, Office of Administration (202) 501–1659.

Copy of Proposal: May be obtained from the Information Collection Management Branch (CAIR), room 7122, GSA Building, 18th & F St. NW., Washington, DC 20405, by telephoning (202) 501–2691, or by faxing your request to (202) 501–2727.

Dated: November 30. 1992

Emily C. Karam,

Director, Information Management Division

BILLING CODE 6820–BR–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 92N–0486]

Pfizer Pharmaceuticals Inc., et al.; Withdrawal of Approval of 45 Abbreviated Antibiotic Drug Applications

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of 45 abbreviated antibiotic drug applications (AADA's). The holders of the AADA's notified the agency in writing that the drug products were no longer marketed and requested that the approval of the applications be withdrawn.

EFFECTIVE DATE: January 15, 1992.

FOR FURTHER INFORMATION CONTACT: Lola E. Batson, Center for Drug Evaluation and Research (HFD–360), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–295–8038.

SUPPLEMENTARY INFORMATION: The holders of the AADA's listed in the table in this document have informed FDA that these drug products are no longer marketed and have requested that FDA withdraw approval of the applications. The applicants have also, by their request, waived their opportunity for a hearing.

AADA no.	Drug	Applicant
60–475	Neobiotic (neomycin sulfate) Tablets, 350 milligrams (mg)	Pfizer Pharmaceuticals Inc., 235 East 42d St., New York, NY 10017–5755.
60–668	Chloramphenicol Non-Sterile Bulk and Micronized Chloramphenicol	Boehringer Mannheim GmbH, Sandhofer Strasse 116, Postfach 310120, 6900 Mannheim 31, West Germany.
60–688	Otoreid-HC Ear Drops (Neomycin Sulfate-Polymyxin B Sulfate- Hydrocortisone-Diperodon Hydrochloride)	Solvay Pharmaceuticals, 901 Sawyer Rd., Marietta, GA 30062.
60–696	Penicillin G Potassium Ophthalmic Ointment	Bristol-Myers Squibb, Pharmaceutical Research Institute, P.O. Box 4000, Princeton, NJ 08543–4000.

AADA no.	Drug	Applicant
61–116	Ampicillin Trihydrate	Bristol-Myers Squibb, Co.,Pharmaceutical Group Technical Operations, P.O. Box 4755, Syracuse, NY 13221–4755.
61–118	Cloxacillin Sodium	Do.
61–119	Dicloxacillin Sodium	Do.
61–346	Methicillin Sodium, Sterile	Do.
61–347	Oxacillin Sodium, Sterile	Do.

61–604	Ampicillin Sodium, Sterile	Do.
61–593	Kanamycin, Sterile	Do.
61–759	Cephapirin Sodium	Do.
61–776	Tetracycline Hydrochloride (non-sterile bulk)	Rhone-Poulenc Rorer, 500 Virginia Dr., Fort Washington, PA 19034.
61–780	Cefospor (cephacetrile sodium)	Ciba-Geigy Corp., Summit, NJ 07901.
61–791	Pfizer E (erythromycin stearate) Tablets	Pfizer Pharmaceuticals Inc.
61–795	Oxacillin Sodium, Sterile	Bristol-Myers Squibb Co.
61–796	Oxacillin Sodium	Do.
61–797	Methicillin Sodium	Do.
61–816	Otobione Otic Suspension	Sherling-Plough Research Institute, 2000 Galloping Hill Rd., Kenilworth, NJ 07033–0530.
61–832	Amoxicillin Trihydrate	Bristol-Myers Squibb Co.
61–924	Dicloxacillin Sodium, Sterile	Do.
61–963	Pen V Acid	Do.
61–983	Nafcillin Sodium, Sterile	Do.
62–001	Penicillin V Potassium Tablets USP, 250 mg and 500 mg	Parke-Davis, 201 Tabor Rd., Morris Plains, NJ 07950.
62–002	Penicillin V Potassium for Oral Solution USP, 125 mg/5 milliliters (mL) and 250 mg/5 mL	Do.
62–003	Penicillin G Potassium for Injection USP, 1,000,000 and 5,000,000 units per vial	Do.
62–030	Ampicillin for Oral Suspension, 125 mg/5 mL and 250 mg/5 mL	Do.
62–041	Ampicillin Capsules, 250 mg and 500 mg	Do.
62–107	Amoxicillin Capsules, 250 mg and 500 mg	Do.
62–127	Amoxicillin for Oral Suspension	Do.
62–173	Neomycin Sulfate Tablets USP, 350 mg	Roxane Laboratories, P.O. Box 16532, Columbus, OH 43216–6532.
62–217	Ampicillin Trihydrate, Sterile	Bristol-Myers Squibb Co.
62–232	Pen G Benzathine, Sterile	Do.
62–250	Pen G Procaine, Sterile	Do.
62–298	Oxytetracycline Hydrochloride (non-sterile bulk)	Rhone-Poulenc Rorer
62–316	Cefoxanide Free Acid, Sterile	Bristol-Myers Squibb Co.
62–332	Tetracycline Hydrochloride Capsules USP, 250 mg and 500 mg	Warner Chilcott Laboratories, 201 Tabor Rd., Morris Plains, NJ 07950.
62–461	Cephalothin Sodium, Sterile	Bristol-Myers Squibb Co.
62–486	Pen G Benzathine, Sterile	Do.
62–487	Nafcillin Sodium, Sterile	Do.
62–510	Rocephin (ceftriaxone sodium) Sterile Vials	Roche Pharmaceuticals, 340 Kingsland St., Nutley, NJ 07110–1199.
62–604	Sterile Erythromycin Lactobionate	Lyphomed, 2045 North Cornell Ave., Melrose Park, IL 60160–1002.
62–723	Sterile Cephapirin Sodium, USP	Do.
62–863	Cephalexin Tablets, 250 mg, 500 mg, and 1,000 mg	Vitarine Pharmaceuticals, Inc., 227–15 North Conduit Ave., Springfield Gardens, NY 11413.

Therefore, under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), and under authority delegated to the Director of the Center for Drug Evaluation and Research (21 CFR 5.82), approval of the AADA's listed above, and all amendments and supplements thereto, is hereby withdrawn, effective January 15, 1992.

Dated: December 4, 1992.

D. B. Burlington,

Acting Director, Center for Drug Evaluation and Research.

[FR Doc. 92–30491 Filed 12–15–92; 8:45 am]

BILLING CODE 4160–01–F

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[(G–910–G3–0006–4210–04; NMNM 83264)]

Issuance of Exchange Conveyance Document of Public Land in San Miguel County; NM

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This action informs the public of the conveyance of 400.00 acres of public land out of Federal ownership. This action also reconveys 400.00 acres of land to Federal ownership.

FOR FURTHER INFORMATION CONTACT: Taos Resource Area Manager, 224 Montevideo Plaza, Cruz Alta Road, Taos, New Mexico 87571.

SUPPLEMENTARY INFORMATION: The United States issued an exchange conveyance document to the Church of Spiritual Technology, a California corporation, on August 24, 1992, for the surface estate in the following described land in San Miguel County, New Mexico, pursuant to section 206 of the Act of October 21, 1976 (43 U.S.C. 1716).

New Mexico Principal Meridian

T. 15 N., R. 22 E.,
Sec. 14, SE¼NE¼;
Sec. 22, NW¼NE¼;
Sec. 23, SW¼NW¼;
Sec. 27, W½NE¼, SE¼NE¼, and NW¼.
Containing 400.00 acres.

In exchange for the land described above, the Church of Spiritual Technology conveyed to the United States the surface estate in the following described land located in San Miguel County, New Mexico:

New Mexico Principal Meridian

T. 17 N., R. 23 E.,
Sec. 14, SE¼SW¼;
Sec. 23, E½NW¼ and SW¼NW¼;
Sec. 27, S½SW¼;
Sec. 34, E½NW¼, NE¼SW¼, and NW¼SE¼.
Containing 400.00 acres.

The purpose of the exchange was to acquire land offering high values for wildlife habitat and recreation and also to consolidate holdings within the Sabinoso Wilderness Study Area. The exchange was consistent with the Taos Resource Management Plan approved October 1988.

The values of the Federal public land and the non-Federal land in the exchange were appraised at $28,000.00. The public interest was served through the completion of this exchange.

Dated: November 30, 1992.

Monte G. Jordan,

Associate State Director.

BILLING CODE 4310–FB–M

[OG–910–G3–0005–4210–04; NMNM 83254]]

Issuance of Exchange Conveyance Document of Public Land in Taos County; NM

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This action informs the public of the conveyance of 53.21 acres of public land out of Federal ownership. This action also reconveys 50.00 acres of land to Federal ownership.

FOR FURTHER INFORMATION CONTACT: Taos Resource Area Manager, 224 Montevideo Plaza, Cruz Alta Road, Taos, New Mexico 87571.

SUPPLEMENTARY INFORMATION: The United States issued an exchange conveyance document to Louis Menyhert on August 24, 1992, for the surface estate in the following described land in Taos County, New Mexico, pursuant to section 206 of the Act of October 21, 1976 (43 U.S.C. 1716).

New Mexico Principal Meridian

T. 28 N., R. 10 E.,
Sec. 30, lots 4, 9, and 10.
Containing 53.21 acres.

In exchange for the land described above, Louis Menyhert conveyed to the United States the surface estate in the following described land located in Taos County, New Mexico:

New Mexico Principal Meridian

T. 29 N., R. 9 E.,
Sec. 13, S½SE¼SW¼;
Sec. 23, N½NE¼NW¼,
W½SE¼NE¼NW¼, and
E½SW¼NE¼NW¼.
Containing 50.00 acres.

The purpose of the exchange was to provide access to private land and increase the public land holding within an area designated for retention in the Taos Resource Area Management Plan. The acquired land offers high public values for recreation and wildlife habitat.

The values of the Federal public land and the non-Federal land in the exchange were appraised at $15,300.00 and $15,500.00, respectfully. The public interest was served through the completion of this exchange.

Dated: November 30, 1992.

Monte G. Jordan,

Associate State Director.

National Park Service

Final Supplemental Environmental Impact Statement; Yosemite National Park Concession Services Plan

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, Public Law 91–190, and specifically to the regulations promulgated by the Council on Environmental Quality at 40 CFR 1505.2, the Department of the Interior, National Park Service (NPS) has prepared a Record of Decision on the Final Concession Services Plan/Supplemental Environmental Impact Statement (EIS) to the 1980 Final General Management Plan/Environmental Impact Statement (GMP/EIS) for Yosemite National Park, Mariposa, Madera, and Tuolumne Counties, California.

The NPS will amend the 1980 Yosemite National Park General Management Plan as it pertains to concession services offered in the park in accordance with the proposal set forth as Alternative B in the Final Concession Services Plan/Supplemental Environmental Impact Statement issued in September, 1992 (57 FR 41952). The Draft Plan/Supplemental Environmental Impact Statement was issued in December, 1991 (56 FR 67097).

Copies of the Record of Decision may be obtained from either the Superintendent, Yosemite National Park, P.O. Box 577, Yosemite National Park, CA 95389, or the National Park Service, Western Regional Office, Division of Planning, Grants and Environmental Quality, 600 Harrison Street, suite 600, San Francisco, CA 94107–1372.

Dated: December 4, 1992.

Lewis Albert,

Acting Regional Director, Western Region.

BILLING CODE 4310–70–M

Minerals Management Service

Outer Continental Shelf (OCS) Advisory Board, Scientific Committee (SC); Vacancies and Request for Nominations

The Minerals Management Service (MMS) is seeking interested and qualified individuals to serve on its OCS Advisory Board SC during the period of May 2, 1993, through May 1, 1995. The initial 2-year term may be renewable for up to an additional 4 years. The SC is chartered under the Federal Advisory Committee Act to advise the Director of the MMS on the appropriateness, feasibility, and scientific value of the OCS Environmental Studies Program (ESP) and environmental aspects of the offshore oil and gas program. The ESP, which was authorized by the OCS Lands Act as amended (Section 20), is administered by the MMS and covers a wide range of field and laboratory studies in biology, chemistry, and physical oceanography, as well as studies of the social and economic impacts of OCS oil and gas development. The work is conducted through award of competitive contracts and interagency and cooperative agreements. The SC reviews the relevance of the information being produced by the ESP and may recommend changes in its scope, direction, and emphasis.

The SC comprises distinguished scientists in appropriate disciplines of the biological, physical, chemical, and socioeconomic sciences. The selection is based on maintaining disciplinary expertise in all areas of research, as well as geographic balance. Demonstrated knowledge of the scientific issues related to OCS oil and gas development is essential. Selection is made by the Department of the Interior on the basis of these factors.

Interested individuals should send a letter of interest and resumé within 30 days to:

Dr. Ken Turgeon, Executive Secretary and Chief, Environmental Studies Branch, Environmental Policy and Programs Division, Minerals Management Service, 381 Elden Street, Mail Stop 4310, Herndon, Virginia 22070. He may be reached by telephone on (703) 787–1717.

Dated: December 2, 1992.

Thomas Gernhofer,

Associate Director for Offshore Minerals Management.

BILLING CODE 7020-02-M

[Investigation No. 731–TA–627 (Preliminary)]

Pads for Woodwind Instrument Keys from Italy

Determination

On the basis of the record [1] developed in the subject investigation, the Commission unanimously determines, pursuant to section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)), that there is a reasonable indication that an industry in the United States is materially injured by reason of imports from Italy of pads for woodwind instrument keys, provided for in subheading 9209.99.40 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value (LTFV).[2]

Background

On October 21, 1992, a petition was filed with the Commission and the Department of Commerce by Prestini Musical Instruments Corp., Nogales, AZ, alleging that an industry in the United States is materially injured or threatened with material injury by reason of LTFV imports of pads for woodwind instrument keys from Italy. Accordingly, effective October 21, 1992, the Commission instituted antidumping investigation No. 731–TA–627 (Preliminary).

Notice of the institution of the Commission's investigation and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of October 29, 1992 (57 FR 49097). The conference was held in Washington, DC, on November 12, 1992, and all persons who requested the opportunity were permitted to appear in person or by counsel.

Issued: December 8, 1992.

By order of the Commission.

Paul R. Bardos,

Acting Secretary.

[1] The record is defined in section 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

[2] As defined by the Department of Commerce, "The products covered by this investigation are pads for woodwind instrument keys, which are manufactured by Pisoni."

[Investigation No. 332–315]

Uranium and Uranium Enrichment Services: The Impact on the Domestic Industry of Imports Into the United States From Nonmarket Economy Countries

AGENCY: United States International Trade Commission.

ACTION: Termination of investigation.

EFFECTIVE DATE: December 11, 1992.

SUMMARY: On September 25, 1991, following receipt of a request from the Committee on Finance of the U.S. Senate, the Commission instituted investigation No. 332–315 under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)). Notice of the investigation was published in the **Federal Register** of October 2, 1991 (56 F.R. 49905). On December 4, 1992, the Commission received a letter from the Committee on Finance of the U.S. Senate requesting that the Commission terminate its section 332 investigation on uranium. Accordingly, on December 11, 1992, the Commission terminated investigation No. 332–315.

FOR FURTHER INFORMATION CONTACT: Mr. James A. Emanuel (202–205–3367), Energy and Chemicals Division, Office of Industries, or Mr. William Gearhart (202–205–3091), Office of the General Counsel, U.S. International Trade Commission. Hearing impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–205–1810.

By order of the Commission.

Issued: December 11, 1992.

Paul R. Bardos,

Acting Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 32194]

Wheeling & Lake Erie Railway Company and Columbus & Ohio River Rail Road Company—Joint Relocation Project Exemption; Notice of Exemption

On December 2, 1992, Wheeling & Lake Erie Railway Company (WLER) and Columbus & Ohio River Rail Road Company (CORC) filed a notice of exemption under 49 CFR 1180.2(d)(5) to relocate a line of railroad in Harrison County, OH. The joint project involves the: (1) acquisition by WLER of overhead trackage rights over an approximately 11-mile portion of CORC's parallel line between Bowerston (CORC milepost 69.85) and Jewett (CORC milepost 81.11); (2) construction of two turnouts and two sections of connecting track, totalling approximately 2,300 feet, between WLER's line and CORC's line at Bowerston and Jewett; and (3)

abandonment by WLER of its 11.5-mile line between Bowerston (WLER milepost 168.25) and Jewett (WLER milepost 179.75). WLER and CORC planned to consummate the transaction on or about December 9, 1992.

WLER and CORC state that there are no active shippers located on the line segment to be abandoned. They contend that the proposed joint relocation project will result in the elimination of a duplicate rail line and promote the more efficient and effective utilization of railroad equipment and resources. Citing Denver & R.G.W.R. Co.—Joint Project—Relocation, 4 I.C.C.2d 95 (1987) (Joint Project), they further contend that the proposed joint relocation project will not involve a change in service to shippers, an expansion into new territory, or a change in existing competitive situations.

The Commission generally does not assume jurisdiction over the incidental abandonment and construction components of a relocation project if, as alleged here, none of the criteria set out in Joint Project have been triggered. Accordingly, the proposed abandonment and construction are not subject to Commission jurisdiction. The remainder of the joint relocation project involves WLER's acquisition of overhead trackage rights over CORC's line. While this qualifies under the class exemption procedures at 49 CFR 1180.2(d) (5) and (7), the Commission has determined that line relocations may also embrace trackage rights transactions such as the one proposed here. See D.T. & I.R.—Trackage Rights, 363 I.C.C. 878 (1981).

As a condition to the use of this exemption, any employees affected by the trackage rights agreement will be protected by the conditions imposed in Norfolk and Western Ry. Co.—Trackage Rights—BN, 354 I.C.C. 605 (1978), as modified in Mendocino Coast Ry., Inc.—Lease and Operate, 360 I.C.C. 653 (1980).

Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: William A. Callison, 100 East First Street, Brewster, OH 44613; and Michael J. Connor, 136 South Fifth Street, Coshocton, OH 43812.

Dated: December 9, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Information Collections Under Review

The Office of Management and Budget (OMB) has been sent the following collection(s) of information proposals for review under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35) and the Paperwork Reduction Reauthorization Act since the last list was published. Entries are grouped into submission categories, with each entry containing the following information:

(1) The title of the form/collection;
(2) The Agency form number, if any, and the applicable component of the Department sponsoring the collection;
(3) How often the form must be filled out or the information is collected;
(4) Who will be asked or required to respond, as well as a brief abstract;
(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond;
(6) An estimate of the total public burden (in hours) associated with the collection; and,
(7) An indication as to whether Section 3504(h) of Public Law 96-511 applies.

Comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the OMB reviewer, Ms. Lin Liu on (202) 395-7340 and to the Department of Justice's Clearance Officer, Mr. Don Wolfrey, on (202) 514-4115. If you anticipate commenting on a form/collection, but find that time to prepare such comments will prevent you from prompt submission, you should notify the OMB reviewer and the DOJ Clearance Officer of your intent as soon as possible. Written comments regarding the burden estimate or any other aspect of the collection may be submitted to Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, and to Mr. Don Wolfrey, DOJ Clearance Officer, SPS/JMD/850 WCTR, Department of Justice, Washington, DC 20530.

Reinstatement of a Previously Approved Collection for Which Approval has Expired

(1) 1992 Probation Data Survey and 1992 Parole Data Survey
(2) CJ-7 and CJ-8. Bureau of Justice Statistics
(3) Annually
(4) State or local governments and Federal agencies or employees. The information will be used by officials, administrators and researchers to evaluate current conditions and trends nationwide concerning probation and parole populations.
(5) 339 annual responses at 1.5 hours per response
(6) 509 annual burden hours
(7) Not applicable under 3504(h)

Public comment on these items is encouraged.

Dated: December 10, 1992.

Don Wolfrey,

Department Clearance Officer, Department of Justice.

[FR Doc. 92-30462 Filed 12-15-92; 8:45 am]

BILLING CODE 4410-18-M

Notice of Lodging of Consent Decree Pursuant to the Clean Air Act

In accordance with Department policy, 28 CFR 50.7, notice is hereby given that on November 25, 1992, a proposed Consent Decree in *United States* v. *GAF Building Materials Corporation* was lodged with the U.S. District Court for the Central District of California. This is a civil action pursuant to section 113 of the Clean Air Act ("Act"), 42 U.S.C. 7413, against GAF Building Materials Corporation ("GAF") for violations of the New Source Performance Standards ("NSPS") provisions of the Act, 42 U.S.C. 7411(e). The complaint alleges that GAF violated the notification, performance testing, and startup requirements proscribed by the NSPS for glass furnaces, set forth at 40 CFR part 60, subparts A and CC.

GAF owns and operates a facility in Irwindale, California for the manufacture of chopped glass fibers which are used by other GAF facilities for the production of asphalt roofing materials. The Irwindale plant has three furnaces which produce molten glass for the manufacture of glass fibers. In August 1986, GAF modified one of its glass furnaces which doubled the production capacity of the furnace and increased the facility's emissions of particulate matter.

GAF's T-3 furnace is an "affected facility" within the meaning of 40 CFR 60.2 and 60.290, subject to the NSPS at 40 CFR part 60, subparts A and CC, because the modification of the T-3 furnace, which increased its emissions of particulate matter from 16 tons per day to 32 tons per day, commenced on or about August 6, 1986. The 1986 modification was well after the June 15, 1979 "applicability" date for the NSPS for glass furnaces.

The proposed consent decree requires GAF to pay $89,600 in civil penalties, and to comply with all requirements of the NSPS. GAF has voluntarily ceased operations at the facility, but agrees under the terms of the settlement to comply with all requirements of the NSPS should it resume operations.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments concerning the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, U.S. Department of Justice, P.O. Box 7611, Ben Franklin Station, Washington, DC 20044, and should refer to *United States* v. *GAF Building Materials Corporation*, D.O.J. Ref. 90–5–2–1–1439.

The proposed Consent Decree may be examined at the Office of the United States Attorney for the Central District of California, room 7516 Federal Building, 300 North Los Angeles Street, Los Angeles, California 90012; the U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, California; and at the Consent Decree Library, 601 Pennsylvania Avenue, NW., Washington, DC 20044, 202–347–2072. Copies of the proposed Decree may be obtained in person or by mail from the Consent Decree Library, 601 Pennsylvania Avenue, NW., Box 1097, Washington, DC 20044. In requesting a copy, please refer to the referenced case and enclose a check in the amount of $2.75 (25 cents per page reproduction cost) payable to "Consent Decree Library".

Vicki A. O'Meara,

Acting Assistant Attorney General, Environment and Natural Resources Division.

[FR Doc. 92–30454 Filed 12–15–92; 8:45 am]

BILLING CODE 4410–01–M

Notice of Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation and Liability Act

In accordance with Department policy, 28 CFR 50.7, notice is hereby given that on December 3, 1992 a proposed Consent Decree in *United States* v. *C.H. Heist et al.*, Civil Action No. C1–95–955, was lodged in the United States District Court for the Southern District of Ohio. The Complaint filed by the United States asserts a claim under section 107 of the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C. 9607(a), for costs incurred by the United States in responding to the release or threat of release of hazardous substances at the Pristine, Inc. site in Reading, Ohio. The Consent Decree requires eight *de minimis* settling defendants and the United States Environmental Protection Agency, as a *de minimis* settling federal agency, to pay $150,000 to reimburse the United States Environmental Protection Agency for unrecovered past response costs at the Pristine, Inc. site.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments concerning the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, U.S. Department of Justice, P.O. Box 7611, Ben Franklin Station, Washington, DC 20044, and should refer to *United States* v. *C.H. Heist, et al.*, D.J. Ref. No. 90–11–2–279A.

The proposed Consent Decree may be examined at any of the following offices: (1) The United States Attorney for the Southern District of Ohio, United States Courthouse, 100 E. 5th St., Cincinnati, Ohio 45202 (contact Assistant United States Attorney Gerald F. Kaminski); (2) the U.S. Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604–3590 (contact Assistant Regional Counsel Nancy-Ellen Zusman); and (3) the Consent Decree Library, 601 Pennsylvania Avenue, NW., Washington, DC 20004, (202) 347–2072. Copies of the proposed Consent Decree may be obtained in person or by mail from the Consent Decree Library, 601 Pennsylvania Avenue, NW., Box 1097, Washington, DC 20004. For a copy of the Consent Decree, please enclose a check in the amount of $7.50 (25 cents per page reproduction charge) payable to Consent Decree Library.

John C. Cruden,

Chief, Environmental Enforcement Section, Environment & Natural Resources Division.

BILLING CODE 4410–01–M

Notice of Lodging of Consent Decree Pursuant to the Clean Air Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that a proposed consent decree in *United States* v. *Keystone Terminal Operating Corp.*, Civil Action No. 91–7634 was lodged on December 3, 1992 with the United States District Court for the Eastern District of Pennsylvania. Defendant Keystone Terminal Operating Corp. owns a gasoline facility in Philadelphia, Pennsylvania. The proposed consent decree requires the defendant to comply with fuel volatility regulations promulgated under the Clean Air Act and pay a civil penalty of $12,596 for certain alleged past violations of these regulations.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should specifically refer to *United States* v. *Keystone Terminal Operating Corp.*, D.J. reference #90–5–2–1–1652.

The proposed consent decree may be examined at the Office of the United States Attorney for the Eastern District of Pennsylvania, 3310 U.S. Courthouse, 601 Market Street, Philadelphia, Pennsylvania 19106; and at the Consent Decree Library, 601 Pennsylvania Avenue, NW., Box 1097, Washington, DC 20004, (202) 347–2072. A copy of the proposed consent decree may be obtained in person or by mail from the Consent Decree Library. In requesting a copy, please enclose a check in the amount of $3.00 (25 cents per page reproduction costs), payable to the Consent Decree Library.

John C. Cruden,

Chief, Environmental Enforcement Section.

BILLING CODE 4410–01–M

Drug Enforcement Administration

Quotas for Controlled Substances in Schedules I and II

AGENCY: Drug Enforcement Administration (DEA), Justice.

ACTION: Notice of Established 1993 aggregate production quotas.

SUMMARY: This notice establishes initial 1993 aggregate production quotas for controlled substances in Schedules I and II of the Controlled Substances Act.

DATES: This order is effective upon publication.

FOR FURTHER INFORMATION CONTACT: Howard McClain, Jr., Chief, Drug & Chemical Evaluation Section, Drug Enforcement Administration, Washington, DC 20537, Telephone: (202) 307–7183.

SUPPLEMENTARY INFORMATION: Section 306 of the Controlled Substances Act (21 U.S.C. 826) requires the Attorney General to establish aggregate production quotas for controlled substances in Schedules I and II each year. This responsibility has been delegated to the Administrator of the

DEA pursuant to § 0.100 of title 28 of the Code of Federal Regulations.

On September 22, 1992, a notice of the proposed initial 1993 aggregate production quotas for certain controlled substances in Schedules I and II was published in the **Federal Register** (57 FR 43751). All interested parties were invited to comment on or object to these proposed aggregate production quotas on or before October 22, 1992. Three comments were received.

Mallinckrodt Specialty Chemicals Company commented that the proposed initial 1993 aggregate production quotas for thebaine, codeine (for sale), hydromorphone and opium were insufficient to provide for the estimated medical, scientific, research, and industrial needs of the United States, estimated export requirements, and for the establishment and maintenance of reserve stocks. Mallinckrodt's comments were based on their forecasted 1993 domestic sales, forecasted 1993 exports and trends in the aggregate production quotas from 1986 to 1993.

After reviewing the relevant information, the DEA has determined that no increases are necessary for the initial 1993 aggregate production quotas for thebaine, codeine (for sale), hydromorphone and opium at this time.

Mallinckrodt Specialty Chemicals Company also commented that the proposed initial 1993 aggregate production quotas for oxycodone, morphine (for conversion), hydrocodone, diphenoxylate and codeine (for conversion) were insufficient to provide for the estimated medical, scientific, research and industrial needs of the United States and for the establishment and maintenance of reserve stocks. Taking into consideration the involved companies' current and projected sales and inventories and the Food and Drug Administration's (FDA) estimates of medical need for 1993, the initial 1993 aggregate production quotas for oxycodone, morphine (for conversion), hydrocodone, diphenoxylate and codeine (for conversion) were adjusted by the DEA.

Polaroid Corporation commented that the proposed initial 1993 aggregate production quota for 2,5-dimethoxyamphetamine was insufficient to provide for the estimated industrial needs of the United States and for the establishment and maintenance of reserve stocks. The DEA has reviewed Polaroid's request and has adjusted the initial 1993 aggregate production quota for 2,5-dimethoxyamphetamine.

SmithKline Beecham Pharmaceuticals commented that the proposed initial 1993 aggregate production quota for amphetamine was insufficient to meet their revised production requirements. The DEA has taken this into consideration and has adjusted the 1993 aggregate production quota for amphetamine accordingly.

A manufacturer has advised the DEA that the initial 1993 aggregate production quota for alfentanil may not be sufficient for 1993.

The DEA has reviewed and adjusted the initial 1993 aggregate production quota of alfentanil. The adjustment was based on revised 1992 and projected 1993 sales and the FDA's estimates of medical need for 1993.

The DEA has added an initial 1993 aggregate production quota for methadone (for conversion). This quota is to be used for the manufacture of methadone solely for conversion to levo-alpha-acetylmethadol. This quota will be reviewed again during 1993 and will be adjusted if necessary.

Pursuant to section 3(c)(3) and 3(e)(2)(C) of Executive Order 12291, the Director of the Office of Management and Budget has been consulted with respect to these proceedings.

These actions have been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this matter does not have sufficient Federalism implications to warrant the preparation of a Federalism Assessment.

The Administrator hereby certifies that this action will have no significant impact upon small entities whose interests must be considered under the Regulatory Flexibility Act, 5 U.S.C. 601, et seq. The establishment of aggregate production quotas for Schedules I and II controlled substances is mandated by law and by international treaty obligations. While aggregate production quotas are of primary importance to large manufacturers, their impact upon small entities is neither negative nor beneficial. Accordingly, the Administrator has determined that this action does not require a regulatory flexibility analysis.

Therefore, under the authority vested in the Attorney General by section 306 of the Controlled Substances Act of the 1970 (21 U.S.C. 826) and delegated to the Administrator of the DEA by § 0.100 of title 28 of the Code of Federal Regulations, the Administrator of the DEA hereby orders that the 1993 initial aggregate production quotas, expressed in grams of anhydrous acid or base, be established as follows:

Basic class	Established initial 1993 quotas (in grams)
Schedule I:

BILLING CODE 4410-09-M

[Docket No. 92-61]

James H. Nickens, M.D.; Revocation of Registration

On July 30, 1992, the Administrator of the Drug Enforcement Administration (DEA), issued an Order to Show Cause and Immediate Suspension of Registration to James H. Nickens, M.D. (Respondent), of 3551 16th Street, NW., Washington, DC, seeking to revoke DEA Certificate of Registration, AN9606534, and deny any pending applications for renewal of that application. The grounds for the issuance of the Order to Show Cause and Immediate Suspension of Registration were that Respondent lacked state authorization to handle controlled substances in the District of Columbia and that his continued registration would be inconsistent with the public interest. Additionally, citing his preliminary finding that Respondent's continued registration posed an imminent danger to the public health and safety, the Administrator ordered the immediate suspension of his registration pending the outcome of these proceedings. 21 U.S.C. 824(d).

By letter dated August 29, 1992, Respondent requested a hearing on the issues raised in the Order to Show Cause. The matter was placed on the docket of Administrative Law Judge Paul A. Tenney. On September 24, 1992, the Government filed a motion for summary disposition. On October 8, 1992, the Respondent filed a response in opposition to the Government's motion. On October 9, 1992, Judge Tenney issued his Opinion and Recommended Decision, recommending the revocation of Respondent's DEA Certificate of Registration based on his lack of state authorization to handle controlled substances. Neither party filed exceptions to the administrative law judge's opinion and recommended decision and, on November 9, 1992, the administrative law judge transmitted the record to the Administrator. The Administrator has considered the record in its entirety and, pursuant to 21 CFR 1316.67, hereby enters his final order in this matter.

The Administrator finds that as of April 30, 1991, the Respondent's District of Columbia controlled substances registration expired. Consequently, Respondent is without authority to handle controlled substances in the District of Columbia. The DEA does not have the statutory authority under the Controlled Substances Act to issue or maintain a registration if the applicant or registrant is without state authority to handle controlled substances. *See* 21 U.S.C. 802(21), 823(f) and 824(a)(3). This prerequisite has been consistently upheld. *See Bobby Watts, M.D.*, 53 FR 11919 (1988); *Wingfield Drugs, Inc.*, 52 FR 27070 (1987); *Robert F. Witek, D.D.S.*, 52 FR 47770 (1987); and cases cited therein.

In his response to the Government's motion for summary disposition, Respondent acknowledges that his registration to handle controlled substances in the District of Columbia expired on April 30, 1991. Respondent argues, *inter alia*, this his DEA registration should not be revoked because he filed an application with the District of Columbia for renewal of his registration to handle controlled substances on July 29, 1992, and that he expects soon have a valid registration. The Administrator finds that since Respondent is not currently authorized to handle controlled substances in the District of Columbia, he is not entitled to possess a DEA Certificate of Registration.

Since there is no dispute about Respondent's lack of authority to handle controlled substances in the District of Columbia, the administrative law judge properly granted the Government's motion for summary disposition. When no question of fact is involved, or when the facts are agreed upon, a plenary, adversarial administrative proceeding with the full panoply of due process rights is not obligatory. *See Philip E. Kirk, M.D.*, 48 FR 32887 (1983), *aff'd sub*

nom Kirk v. *Mullen*, 749 F.2d 297 (6th Cir. 1984).

Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that DEA Certificate of Registration, AN9606534, previously issued to James H. Nickens, M.D., be, and it hereby is, revoked. The Administrator further orders that any pending applications for the renewal of such registration, be, and they hereby are, denied. This order is effective January 15, 1993.

Dated: December 10, 1992.

Robert C. Bonner,

Administrator of Drug Enforcement.

BILLING CODE 4410-09-M

NATIONAL COMMISSION ON FINANCIAL INSTITUTION REFORM, RECOVERY, AND ENFORCEMENT

Meeting

AGENCY: National Commission on Financial Institution Reform, Recovery, and Enforcement.

TIME AND DATE: 9 a.m. to 4 p.m., Wednesday, January 13, 1993.

PLACE: Peter Zenger Room, National Press Club, 13th Floor, 529 14th Street NW., Washington, DC 20045.

STATUS: The meeting will be open to the public. It is possible that portions of the meeting may be closed to the public pursuant to 5 U.S.C. 552b, Government in the Sunshine Act.

MATTERS TO BE CONSIDERED: At the public portion of the meeting, the Commission shall consider the progress of the Commission's study to date and make such determinations as may be necessary to conduct hearings and complete the Commission's work.

Following the public portion of the meeting, the Commission may consider and discuss in a closed session information on specific financial institutions which information is contained in or related to examination, operating or condition reports, or which constitutes commercial or financial information obtained on a confidential or privileged basis. These matters are within exemptions (c)(4), (c)(8) and (c)(9)(A) of 5 U.S.C. 552b, the Government in the Sunshine Act, which are applicable by virtue of 5 U.S.C. app. 2 section 10(d), the Federal Advisory Committee Act.

The Commission may also consider in a closed session the issuance of subpoenas or participation in a legal action or proceeding to enforce its subpoenas. These matters are within exception (c)(10) of the Government in the Sunshine Act. In addition, the Commission will consider any other matters as may properly come before it. It is possible that portions of the meeting relating to such other matters may be closed by the Commission if the Commission's counsel certifies that such portions of the meeting may be closed consistent with the Government in the Sunshine Act and the determination by the Administrator of the General Services Administration that such portions may be closed.

CONTACT PERSONS FOR MORE INFORMATION: Larry G. Hicks (202) 632-1556, or Linda R. Johnson (202) 632-1556.

Larry G. Hicks,

Director of Administration.

BILLING CODE 6820-PD-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Declined General Applications for Federal Assistance

AGENCY: National Endowment for the Arts.

ACTION: Circular 1 revised; final notice.

SUMMARY: Process for reconsideration of declined applications for Federal assistance. This circular adopts in final form a Proposed Procedure published June 8, 1992, in response to public comment. This notice is being republished in its entirety, for the convenience of the reader, due to printing errors in the version published December 8, 1992 (57 FR 58031).

FOR FURTHER INFORMATION CONTACT: Office of General Counsel, room 522, National Endowment for the Arts, Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506-0001; (202) 682-5418 (voice) or (202) 682-5496 (Voice/T.T.: Text-Telephone, a telephone device for hearing impaired individuals). Visually or learning impaired people may obtain assistance in acquiring a cassette recording of this circular by writing or calling: Office for Special Constituencies, room 605, National Endowment for the Arts, Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506-0001; (202) 682-5532 (voice) or (202) 682-5496 (Voice/T.T.).

1. Purpose

The processes by which the National Endowment for the Arts (the "Endowment") offers financial and technical assistance have been designed to result in supporting projects of artistic excellence and merit. The Endowment relies on advisory peer panel review of grant applications as the first step in assuring informed support. Panel recommendations are subsequently reviewed by the National Council on the Arts, which provides advice to the Chairperson of the Endowment. The Chairperson then decides whether to approve the applications recommended by the Council.

This Circular establishes a procedure for reconsideration of applications for financial and technical assistance, which have been declined by the National Endowment for the Arts based on negative recommendations of the peer review panel. This procedure does not include reconsideration of grant amounts once a grant is awarded. This Process does not apply to applications recommended by the peer review panel but rejected by the Council or Chairperson. Reconsideration of such applications is had at the discretion of the Chairperson only. The provisions of this Circular, which updates and amends the earlier Circular, dated March 29, 1983, on this subject, do not apply to procurement governed by the Federal Acquisition Regulations.

2. Policy

(a) *Statement.* Award of financial and technical assistance is discretionary. Panel recommendations are made using criteria described in the Program guidelines. Criteria that involve subjective, qualitative judgments are not subject to reconsideration. Notwithstanding this fact, a Project Director, Authorizing Official, or individual whose application has been declined (hereafter referred to as "applicant") may obtain an explanation of the declination from the appropriate Endowment Program Director. Following receipt of the explanation, if the applicant believes that the declination was based on one or more of the following Grounds for Reconsideration, reconsideration may be obtained under the procedure outlined in Section 3, below.

(b) *Ground(s) for Reconsideration.* Reconsideration of application declinations is available solely for one or more of the following three reasons relating to procedural impropriety or error:

(i) Panel considered criteria other than those appearing in the relevant Program guidelines;

(ii) Individual(s) with conflict of interest served on peer review panel;

(iii) Information relevant to the deliberations was provided by staff,

panelists, or others, but not including the applicant, which was inaccurate or incomplete, despite the fact that the applicant provided the Endowment staff with accurate and complete information as part of the regular application process.

3. Procedures To Be Followed for Reconsideration

(a) *Explanation by Program Director.* Within 30 days following written notification from the Endowment of its decision on any application, the applicant may request an explanation for a declined application from the appropriate Program Director. This initial request may be by telephone, in person, or in writing, as required by the individual Program. The Program Director will explain within 30 days following the applicant's request the basis for declination, which may include a summary of the peer review panel comments and applicable on-site evaluation reports, the names of all panel and staff members, and other information, not otherwise exempt from disclosure, requested by the applicant.

The Program Director may designate another Endowment official to provide the explanation for the declination to the applicant. The term "Program Director," as used here, applies to such designees.

(b) *Request for Reconsideration.* If the Program Director's explanation appears to the applicant to indicate the presence of one or more of the "Grounds for Reconsideration" listed in paragraph 2(b) above, the applicant may submit to the appropriate Deputy Chairperson (hereafter referred to as "Deputy") a written Request for Reconsideration. This written request must reference the particular ground(s) for reconsideration and specify the facts supporting his or her claim, with enough particularity to enable the Deputy to determine whether the claim is meritorious. A request of this nature will be considered only if: (a) The Request for Reconsideration is based on one or more of the grounds listed in paragraph 2(b); (b) the applicant has obtained an explanation from the appropriate Program Director; (c) the applicant has specified with sufficient particularity the facts supporting his or her claim; (d) the Request for Reconsideration is received by the Deputy within 30 days after the date of the Program Director's explanation.

(c) *Action by the Appropriate Deputy.*

(i) The appropriate Deputy will review the applicant's Request for Reconsideration, records of the panel discussions, the applicant's application file, and any other relevant materials to determine if the panel's recommendation was influenced by one or more of the grounds listed in paragraph 2(b). In conducting this review, the Deputy may request additional information from the applicant, obtain advice from a peer review panel, or conduct additional investigation or review. However, no revisions or additions to the grant application materials will be accepted in connection with the Request for Reconsideration, except to the extent that additional materials are necessary to substantiate the applicant's claim that one or more of the grounds listed in paragraph 2(b) exists.

(ii) The Deputy may conduct the reconsideration personally or may designate another Endowment official who had no part in the initial evaluation to do so. The term "Deputy," as used here, applies to such designees.

(iii) The Deputy will provide written notification of the results of the reconsideration within 45 days following receipt of the Request for Reconsideration. If the Deputy cannot provide such notice within 45 days, the applicant will receive a written explanation of the need for more time and an estimate of when the results can be expected.

(d) *Resolution of Requests for Reconsideration.* Reconsideration is not an adversarial process, and a formal hearing is not provided. The Endowment cannot assure applicants that reconsideration will result in the award of a grant even if error is established in connection with the initial evaluation. The Deputy shall make one of the following four determinations. The determinations of the Deputy shall be in writing and shall be final.

(i) If the Deputy determines that none of the grounds listed in paragraph 2(b) existed, the declination will be affirmed.

(ii) If the Deputy determines that one or more of the grounds listed in paragraph 2(b) existed, but the recommendation of the peer review panel was not affected materially, the declination will be affirmed.

(iii) If the Deputy determines that one or more of the grounds listed in 2(b) existed, and he or she can determine, based on the materials reviewed, that but for the infirmity in the review process, the application would have been recommended, the application will be considered by the National Council on the Arts at its next regularly scheduled meeting. The Chairperson of the Endowment then will decide whether to approve applications recommended by the Council.

(iv) If the Deputy determines that one or more of the grounds listed in paragraph 2(b) occurred, but he or she cannot determine whether, but for the infirmity, the peer review panel would have recommended that application, the application will be reviewed by a panel. If the panel recommends the application for support, the National Council on the Arts will review it at the next regularly scheduled meeting. The Chairperson of the Endowment then will decide whether to approve applications recommended by the Council.

4. Reporting Requirements

Each appropriate Deputy will maintain a record of Requests for Reconsideration, in accordance with the Endowment's Records Disposition schedule. The record will include the date of receipt, the name of the applicant, including name of organization or institution where applicable, the application number, the determinations of the Deputy, and once the Deputy's review is complete, the date on which each applicant was notified of the results of the reconsideration, and what those results were.

Dated: December 11, 1992.

Catherine Stevens,

General Counsel, National Endowment for the Arts.

NATIONAL SCIENCE FOUNDATION

Special Emphasis Panel in Research, Evaluation, and Dissemination; Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting.

Date and Time: January 11-12, 1993.

Place: One Washington Circle Hotel, One Washington Circle Northwest, Washington, DC.

Type of Meeting: Closed.

Contact Person: Ms. Barbara Lovitts, Division of Research, Evaluation and Dissemination, rm. 1227, National Science Foundation, 1800 G Street, NW., Washington, DC 20550, Telephone (202) 357-7071.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate research proposals submitted to the Research in Teaching and Learning Program as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including

technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act.

Dated: December 11, 1992.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-483]

Union Electric Company Callaway Plant, Unit 1; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from the requirements of section III.D.1.(a) of appendix J to 10 CFR part 50 issued to the Union Electric Company, (the licensee), for the Callaway Plant, Unit 1, located in Callaway County, Missouri.

Environmental Assessment

Identification of Proposed Action

The proposed action would grant an exemption from section III.D.1.(a) of appendix J to 10 CFR part 50, which requires a set of three Type A tests (Containment Integrated Leakage Rate Test or CILRT) be performed, at approximately equal intervals during each 10-year service period. This licensee request is for a one-time exemption from the requirement that the third Type A test of the first 10-year service period be performed during the service period. The exemption would extend the current service period by approximately 3 months beyond the normal 10-year service period. The licensee request stated the exemption would extend the current service period by 14 months. This statement was based on the assumption that the 10-year service period began with preoperational CILRT performed in January 1984, instead of the inservice date of December 1984. The 10-year service period began in December 1984.

The proposed action is in accordance with licensee's request for exemption dated June 16, 1992.

The Need for the Proposed Action

The proposed exemption is needed because the licensee's current refueling outage schedule requires the third CILRT for the first 10-year service period be performed at either a 35-month or 53-month interval. (CILRTs are generally performed coincident with refueling outages due to the time required for their performance.) The first and second CILRT testing intervals for the first 10-year service period were 40 and 41 months. Without this exemption, the licensee would be required to perform the third CILRT at a 35-month interval and perform an additional (fourth) CILRT during the second 10-year service period.

Environmental Impacts of the Proposed Action

The Commission's staff has determined that granting the proposed exemption would not significantly increase the probability or amount of expected primary containment leakage and that containment integrity would thus be maintained. The current requirement in Section III.D.1.(a) that three Type A tests be performed would continue to be met, except one interval (54-months) will be longer than specified in the Callaway Technical Specifications. Consequently, the probability of accidents would not be increased, nor would the post-accident radiological releases be greater then previously determined. Neither would the proposed exemption otherwise affect radiological plant effluents. Therefore, the Commission's staff concludes that there are no significant radiological environmental impacts associated with the proposed exemption.

With regard to potential nonradiological impacts, the proposed exemption involves a change to surveillance and requirements. It does not affect nonradiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed exemption.

Alternative to the Proposed Action

Since the Commission concluded that there are no significant environmental impacts associated with the proposed action, any alternatives would have either no or greater environmental impact.

The principal alternative would be to deny the requested exemption. This would not reduce the environmental impacts attributed to the facility but would result in adding operating cost by requiring a fourth Type A test during the second 10-year service period.

Alternative Use of Resources

This action does not involve the use of any resources not previously considered in the "Final Environmental Statement related to the operation of Callaway Plant, Unit No. 1," dated January 1982.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemption. Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the request for amendment dated June 16, 1992, which is available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington DC and at the Callaway County Public Library, 710 Court Street, Fulton, Missouri 65251.

Dated at Rockville, Maryland, this 10th day of December 1992.

For the Nuclear Regulatory Commission.

John N. Hannon,

Director, Project Directorate III-3, Division of Reactor Projects III/IV/V, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

[Docket No. 40-2259]

Pathfinder Mines Corp.; Finding of No Significant Impact Regarding Issuance of an Amendment to Source Material License SUA-672 for the Pathfinder Mines Corp.; Lucky Mc Mill, To Incorporate Reclamation Schedules, Fremont County, WY

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of a finding of no significant impact.

1. Proposed Action

The administrative action is issuance of a license amendment to incorporate an enforceable reclamation schedule for the Lucky Mc Mill in Fremont County, Wyoming.

2. Reasons for Finding of No Significant Impact

The proposed amendment is administrative, incorporating

reclamation milestones into the license in accordance with the Memorandum of Understanding (MOU) between the Environmental Protection Agency (EPA) and the NRC which was published in the **Federal Register** on October 25, 1991. The Notice of Intent to amend Source Material License SUA–672 for the Lucky Mc Mill to incorporate reclamation schedules was published in the **Federal Register** on September 18, 1992. The NRC accepted comments on this proposed licensing action for 45 days. No comments were received. In accordance with 10 CFR 51.22(c)(11), the Commission has determined that no environmental analysis need be performed since no significant impacts will result from the proposed licensing actions.

3. Action

The Commission action is to amend Source Material License SUA–672 upon publication of this Notice. The action is based on this Finding of No Significant Impact and no comments begin received to the Notice of Intent published on September 18, 1992.

This Notice, together with the Notice of Intent to Amend Source Material License SUA–672, are available for public inspection and copying at the Commission's Uranium Recovery Field Office at 730 Simms Street, Golden, Colorado, and at the Commission's Public Document Room at 2120 L Street, NW., Washington, DC 20555.

Dated at Denver, Colorado, this 8th day of December 1992.

For the Nuclear Regulatory Commission.

Ramon E. Hall,

Director, Uranium Recovery Field Office.

BILLING CODE 7590–01–M

[Docket No. 40–8084]

Rio Algom Mining Corp., Finding of No Significant Impact Regarding Issuance of an Amendment to Source Material License SUA–1119 for the Rio Algom Mining Corp., Lisbon Mill, To Incorporate Reclamation Schedules, San Juan County, UT

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice of a Finding of No Significant Impact.

1. Proposed Action

The administrative action is issuance of a license amendment to incorporate an enforceable reclamation schedule for the Lisbon Mill in San Juan County, Utah.

2. Reasons for Finding of No Significant Impact

The proposed amendment is administrative, incorporating reclamation milestones into the license in accordance with the Memorandum of Understanding (MOU) between the Environmental Protection Agency (EPA) and the NRC which was published in the **Federal Register** on October 25, 1991. The Notice of Intent to amend Source Material License SUA–1119, for the Lisbon Mill to incorporate reclamation schedules was published in the **Federal Register** on August 18, 1992. The NRC accepted comments on this proposed licensing action for 45 days. No comments were received. In accordance with 10 CFR 51.22(c)(11), the Commission has determined that no environmental analysis need be performed since no significant impacts will result from the proposed licensing actions.

3. Action

The Commission action is to amend Source Material License SUA–1119 upon publication of this Notice. The action is based on this Finding of No Significant Impact and no comments being received to the Notice of Intent published on August 18, 1992.

This notice, together with the Notice of Intent to Amend Source Material License SUA–1119, are available for public inspection and copying at the Commission's Uranium Recovery Field Office at 730 Simms Street, Golden, Colorado, and at the Commission's Public Document Room at 2120 L Street, NW., Washington, DC 20555.

Dated at Denver, Colorado this 8th day of December 1992.

For the Nuclear Regulatory Commission.

DEPARTMENT OF STATE

Bureau of Politico-Military Affairs

[Public Notice 1736]

Suspension of Munitions Export Licenses to Somalia

AGENCY: Department of State.

ACTION: Public notice.

SUMMARY: Notice is hereby given that all licenses and other approvals to export or otherwise transfer defense articles or defense services to Somalia are suspended until further notice pursuant to sections 38 and 42 of the Arms Export Control Act.

EFFECTIVE DATE: December 16, 1992.

FOR FURTHER INFORMATION CONTACT: Clyde G. Bryant, Jr., Chief, Compliance Analysis Division, Office of Defense Trade Controls, Bureau of Politico-Military Affairs, Department of State (703–875–6650).

SUPPLEMENTARY INFORMATION: Effective immediately, it is the policy of the U.S. Government to deny all applications for

licenses and other approvals to export or otherwise transfer defense articles and services to Somalia. In addition, U.S. manufacturers and exporters and any other affected parties are hereby notified that the Department of State has suspended all previously issued licenses and approvals authorizing the export or other transfer of defense articles or defense services to Somalia. This action has been taken in accordance with U.N. Security Council Resolution 733 instituting a general and complete embargo on all deliveries of weapons and military equipment to Somalia.

The licenses and approvals that have been suspended include any manufacturing licenses, technical assistance agreements, technical data, and commercial military exports of any kind involving Somalia subject to the Arms Export Control Act. This action also precludes the use in connection with Somalia of any exemptions from licensing or other approval requirements included in the International Traffic in Arms Regulations (ITAR) (22 CFR parts 120–130).

This action has been taken pursuant to sections 38 and 42 of the Arms Export Control Act (22 U.S.C. 2778, 2791) and § 126.7 of the ITAR.

Dated: December 4, 1992.

Robert L. Gallucci,

Assistant Secretary, Bureau of Politico-Military Affairs, Department of State.

[FR Doc. 92–30460 Filed 12–15–92; 8:45 am]

BILLING CODE 4710–25–M

[Public Notice 1734]

Restriction of Munitions Export Licenses to Yemen

AGENCY: Department of State.

ACTION: Public notice.

SUMMARY: Pursuant to sections 38 and 42 of the Arms Export Control Act, a notice is hereby given that all licenses and other approvals to export or otherwise transfer defense articles or defense services to Yemen are being reviewed on a more scrutinized case-by-case basis, with a presumption of denial for lethal articles or items supporting such articles.

EFFECTIVE DATE: November 16, 1992.

FOR FURTHER INFORMATION CONTACT: Clyde G. Bryant, Jr., Chief, Compliance Analysis Division, Office of Defense Trade Controls, Bureau of Politico-Military Affairs, Department of State (703–875–6650).

SUPPLEMENTARY INFORMATION: It is the policy of the U.S. Government to review all licenses and approvals authorizing the export or other transfer of defense articles or defense services to Yemen on a more highly scrutinized case-by-case basis, with a presumption of denial for lethal articles. Approvals for export of defense articles or defense services bound for Yemen will be considered primarily for non-lethal defense articles or services.

The licenses and approvals subject to this policy include manufacturing licenses, technical assistance agreements, technical data, and commercial military exports of any kind involving Yemen subject to the Arms Export Control Act. This policy also prohibits the use in connection with Yemen of any exemptions from licensing or other approval requirements included in the International Traffic in Arms Regulations (ITAR) (22 CFR parts 120–130).

For the purposes of this policy, "nonlethal defense articles" means an article that is not a weapon, ammunition, or other equipment or material that is designed to inflict serious bodily harm or death (see, e.g., 10 U.S.C. 2547).

This action has been taken pursuant to sections 38 and 42 of the Arms Export Control Act (22 U.S.C. 2778, 2791) and § 126.7 of the ITAR in furtherance of the foreign policy of the United States.

In accordance with §§ 126.3 and 126.7 of the ITAR, affected U.S. persons desiring review of this policy with regard to a particular export may petition the Director, Office of Defense Trade Controls.

Dated: November 27, 1992.

Robert L. Gallucci,

Assistant Secretary, Bureau of Politico-Military Affairs, Department of State.

BILLING CODE 4710–25–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD–92–070]

Navigation Safety Advisory Council

AGENCY: Coast Guard, DOT.

ACTION: Notice.

SUMMARY: The U.S. Coast Guard is seeking applications for membership for three-year terms on the Navigation Safety Advisory Council (NAVSAC). On June 30, 1993, there will be seven vacancies on the 21-member Council. The Coast Guard will review all applications and make recommendations to the Secretary. The appointments will be made by the Secretary of Transportation.

DATES: Completed applications must be received by February 28, 1993.

ADDRESSES: To request an application, either call (202) 267–0415 and give your name and mailing address or write to Commandant (G–NSR–3), U.S. Coast Guard, 2100 Second St., SW., room 1420, Washington, DC 20593–0001. Completed applications and resumes should be mailed or delivered to the above address.

FOR FURTHER INFORMATION CONTACT: Margie G. Hegy, Executive Director, Navigation Safety Advisory Council at (202) 267–0415.

SUPPLEMENTARY INFORMATION: The Navigation Safety Advisory Council was originally established as the Rules of the Road Advisory Council (RORAC) under the Inland Navigational Rules Act of 1980 (33 U.S.C. 2073). The RORAC provided advice to the Secretary of Transportation on matters relating to the International and Inland Navigation Rules.

Section 105 of the Coast Guard Authorization Act of 1989 (Pub. L. 101–225; 33 U.S.C. 1231a(e)), enacted December 12, 1989, changed the name of the RORAC to the Navigation Safety Advisory Council (NAVSAC), broadened the scope of the Council, and extended the life of the Council to September 30, 1995.

NAVSAC is a deliberative body which advises the Secretary of Transportation, via the Commandant, U.S. Coast Guard, on matters relating to the prevention of vessel collisions, rammings, and groundings, including, but not limited to: Inland Rules of the Road, International Rules of the Road, navigation regulations and equipment, routing measures, marine information, diving safety, and aids to navigation systems.

The Council consists of 21 members who have expertise, knowledge and experience in the Navigation Rules of the Road (International and Inland), aids to navigation, navigational safety equipment, vessel traffic service, and traffic separation schemes and vessel routing. To assure balanced representation, members are chosen, insofar as practical, from the following groups: (1) Recognized experts and leaders in organizations having an active interest in the Rules of the Road and vessel and port safety; (2) representatives of owners and operators of vessels, professional mariners, recreational boaters, and the recreational boating industry; (3) individuals with an interest in maritime

law; and (4) Federal and state officials with responsibility for vessel and port safety. Each member is appointed for a term of three years.

The Council meets twice each year at various sites in the continental United States. Members are entitled to per diem allowances and reimbursement for travel expenses to attend the meetings. The three-year membership term will begin July 1, 1993, and, assuming that the Council is continued beyond September 30, 1995, will expire June 30, 1996.

Dated: December 10, 1992.

W.J. Ecker,

Rear Admiral, U.S. Coast Guard, Chief, Office of Navigation Safety and Waterway Services.

[FR Doc. 92-30500 Filed 12-15-92; 8:45 am]

BILLING CODE 4910-14-M

Federal Highway Administration

Environmental Impact Statement: Los Angeles County, CA

AGENCY: Federal High Administration (FHWA), DOT.

ACTION: Amended notice.

SUMMARY: The FHWA is issuing this notice to advise the public of closure of the comment period for the final Environmental Impact Statement [EIS No. 920134] for CA-710/Long Beach Freeway Construction, from I-10/San Bernardino Freeway to I-210/Foothill Freeway. Comments must be received by January 15, 1993. The address is: Federal Highway Administration, Attn. Mr. James Bednar, Chief/District Operations, P.O. Box 1914, Sacramento, California 95812-1915.

FOR FURTHER INFORMATION CONTACT: Mr. James Bednar at the above address. Telephone: (916) 551-1310.

SUPPLEMENTARY INFORMATION: The final EIS for route 710 identifies the Meridian Variation Alignment as the preferred alternative. The FHWA approved the final EIS as adequate for public disclosure of information on the preferred alternative regarding potential impacts and proposed mitigation as required by the National Environmental Policy Act (NEPA). However, because of the controversy surrounding the project and the magnitude of the impacts relating to potential community disruption, residential relocation, business dislocation, and cultural resources, the final project concept and location for the preferred alternative have not yet been approved by the FHWA.

An Enhancement and Mitigation Committee was established to develop more comprehensive mitigation and enhancement measures to further reduce the impacts of the preferred alternative. The group has met frequently since its initial meeting on September 9, 1992. The Committee's focus has been on both the mitigation and enhancement measures mentioned in the final EIS and on identification and development of appropriate additional mitigation and enhancement opportunities which will minimize the facility's "footprint" through the environmentally and historically sensitive areas the project traverses. The **Federal Register** notice of August 4, 1992, advised that public comments on the final EIS would be accepted until the FHWA published an additional notice 30 days prior to the end of the comment period. The notice further stated that it was anticipated that this would take place by the end of the current calendar year (1992).

At the Committee's meeting of December 10, 1992, significant progress was made on the Commtitee's recommendation for minimizing the facility's "footprint". The Commtitee has narrowed the number of options from 16 to 2 still under consideration and made a number of additional decisions regarding other mitigation measures.

Caltrans has advised the FHWA that Caltrans will report to the FHWA on the progress of the Committee to date. This report will be submitted to the FHWA on December 14, 1992. Copies of this report may be obtained from Caltrans District 7 Office located at 120 S. Spring Street, Los Angeles, California 90012 or from the FHWA Office in Sacramento at the address above. The report also will be available at the City Clerks' Offices in Alhambra, South Pasadena, Pasadena, and Los Angeles, California.

Comments on the FEIS may be directed to Mr. James Bednar, FHWA, at the address indicated above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

(23 U.S.C. 315; 49 CFR 1.48)

Issued on: December 11, 1992.

Roger Borg,

Division Administrator, Sacramento, California.

BILLING CODE 4910-22-M

Research and Special Programs Administration

Office of Hazardous Materials Safety; Applications for Exemptions

AGENCY: Research and Special Programs Administration, DOT.

ACTION: List of applicants for exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR part 107, subpart B), notice is hereby given that the Office of Hazardous Materials Transportation has received the applications described herein. Each mode of transportation for which a particular exemption is requested is indicated by a number in the "Nature of Application" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft.

DATES: Comments must be received on or before January 15, 1993.

ADDRESS COMMENTS TO: Dockets Branch, Research and Special Programs Administration, U.S. Department of Transportation, Washington, DC 20590. Comments should refer to the application number and be submitted in triplicate. If confirmation of receipt of comments is desired, include a self-addressed stamped postcard showing the exemption application number.

FOR FURTHER INFORMATION CONTACT: Copies of the applications are available for inspection in the Dockets Branch, room 8426, Nassif Building, 400 7th Street, SW., Washington, DC.

NEW EXEMPTIONS

Application No.	Applicant	Regulation(s) affected	Nature of exemption thereof
10925–N	Southern Air Transport Miami, FL	49 CFR 172.101	To authorize the transportation of dimethylhydrazine, Class 3 in 55-gallon DOT Specification 50 drums and nitrogen tetroxide class 6 in 106A100W or 110A500W tank containers aboard cargo aircraft only. (mode 4.)
10926–N	Radcal Corporation Monrovia, CA	49 CFR 173.34(d)	To manufacture, mark and sell radiation monitors which incorporate a DOT Specification 39 cylinder, without a safety relief device, containing argon, Division 2.2 (modes 1, 4, 5.)
10927–N	Hoechst Celanese Corporation Pampa, TX.	49 CFR 173.21, 173.31(b)(1) and (2).	To authorize tank cars with bottom outlets and interior heater coil caps to remain open during loading process of various hazardous materials. (mode 2.)
10928–N	Jefferson Smurfit Corp./Container Corp. of America Brewton, AL.	49 CFR 174.67(i) and (j)	To authorize Chlorine filled tank cars to remain connected during unloading without the physical presence of an unloader. (mode 2.)
10929–N	Consolidated Rail Corporation Philadelphia, PA.	49 CFR 174.67(i) and (j)	To authorize tank cars containing various hazardous materials to remain connected during unloading without the physical presence of an unloader. (mode 2.)
10931–N	Western Atlas International/Atlas Wireline Service Houston, TX.	49 CFR 173.24, 173.304(a), 173.34(d), 175.30, 178.37–5.	To authorize the manufacture, mark and sell of DOT specification 3AA cylinder, constructed of titanium alloy with a design pressure of 20,000 psi for use in transporting flammable gas, n.o.s., Division 2.1 (modes 1, 2, 3, 4.)
10932–N	Nalco Chemical Company Naperville, IL.	49 CFR Parts 172, 173 and 177	To authorize the shipment of small quantities of Packing Group II and III hazardous materials in privately owned automobiles and small trucks to be exempt from shipping papers, marking, labelling and employee training. (mode 1.)
10933–N	Rollins CHEMPAK, Inc. Houston, TX.	49 CFR 173.12, 174.81, 176.83 and 177.848.	To authorize the multi-modal transportation of lab-packs with other containerized hazardous materials with partial relief from certain segregation requirements. (modes 1, 2, 3.)
10934–N	LaRoche Industries Inc. Atlanta, GA.	49 CFR 179.101–1	To authorize the transportation of various hazardous materials in DOT Specification 105A100 or 105A200 tank car tanks constructed of stainless steel. (mode 2.)
10935–N	NSI Norfolk, VA	49 CFR 172.331, 173.154, 173.164, 173.178, 173.182, 173.204, 173.217, 173.234, 173.245(b), 173.366 and, 173.367.	To manufacture, mark and sell non-DOT specification flexible nonreusable bulk bags of woven polypropylene fabric for the shipment of certain flammable, corrosive, oxidizer or poison B solids. (modes 1, 2, 3.)

This notice of receipt of applications for new exemptions is published in accordance with part 107 of the Hazardous Materials Transportations Act (49 U.S.C. 1806; 49 CFR 1.53(e)).

Issued in Washington, DC, on December 10, 1992.

J. Suzanne Hedgepeth,

Chief, Exemptions Branch, Office of Hazardous Materials Exemptions and Approvals.

Research and Special Programs Administration Office of Hazardous Materials Safety

Notice of Applications for Modification of Exemptions or Applications to Become a Party to an Exemption

AGENCY: Research and Special Programs Administration, DOT.

ACTION: List of applications for modification of exemptions or applications to become a party to an exemption.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR part 107, subpart B), notice is hereby given that the Office of Hazardous Materials Safety has received the applications described herein. This notice is abbreviated to expedite docketing and public notice. Because the sections affected, modes of transportation, and the nature of application have been shown in earlier **Federal Register** publications, they are not repeated here. Requests for modifications of exemptions (e.g. to provide for additional hazardous materials, packaging design changes, additional mode of transportation, etc.) are described in footnotes to the application number. Application numbers with the suffix "X" denote a modification request. Application numbers with the suffix "P" denote a party to request. These applications have been separated from the new applications for exemptions to facilitate processing.

DATES: Comments must be received on or before December 31, 1992.

ADDRESS COMMENTS TO: Dockets Unit, Research and Special Programs Administration, U.S. Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate. If confirmation of receipt of comments is desired, include a self-addressed stamped postcard showing the exemption number.

FOR FURTHER INFORMATION: Copies of the applications are available for inspection in the Dockets Unit, room 8426, Nassif Building, 400 7th Street SW., Washington, DC.

Application No.	Applicant	Renewal of exemption
6874–X	Degussa Corporation Ridgefield Park, NY (See Footnote 1).	6874
7785–X	Carleton Technologies Inc. Orchard Park, NY (See Footnote 2).	7785
8725–X	CNG Cylinder Company Long Beach CA (See Footnote 3).	8725
8958–X	Goex, Inc. Moosic, PA (See Footnote 4).	8958
9061–X	The S.S.I. Group, Ltd. Fairdale, KY (See Footnote 5).	9061
9645–X	Bonar Plastics, Inc. Lindsay, Ontario, CN (See Footnote 6).	9645
10645–X	Essex Cryogenics of Missouri, Inc. St. Louis, MO (See Footnote 7).	10645
10810–X	U.S. Department of the Army Falls Church, VA (See Footnote 8).	10810

(1) To modify exemption to provide for an optional non-DOT specification wooden box of ⅜ inch thickness for use in transporting sodium cyanide, solid, classed as poison B.

(2) Request variations in test criteria for non-DOT specification missile gas storage systems containing nitrogen or helium, classed as non-flammable gas.

(3) To manufacture, mark and sell a non-DOT specification fiber reinforced plastic cylinder of 3,600 psi for shipment of certain flammable and nonflammable gases.

(4) To modify the exemption to provide for cargo vessel as an additional mode of transportation.

(5) To modify exemption to provide for an alternative packaging consisting of 2 one-gallon metal containers not to exceed 25 pounds total weight for use in transporting calcium carbide, classed as flammable solid.

(6) To authorize an additional design non-DOT specification polyethylene portable tank and to provide for shipment of organochlorine pesticides liquid, toxic, n.o.s. division 6.1 as an additional commodity.

(7) To modify exemption to provide for a half liter non-DOT specification insulated cylinder for use in transporting nonflammable gas.

(8) To modify exemption to provide for optional alcohol and 5% water solution in mixtures of explosives for transportation in specifically designed packaging.

Application No.	Applicant	Parties to exemption
7835-P	T.W. Smith Corp., Brooklyn, NY.	7835
7835-P	Volkalx, Inc., North Branch, NJ.	7835
8009-P	FleetStar, Inc., Austin, TX	8009
8236-P	Cass River Coatings, Inc., Vassar, MI.	8236
8450-P	Loral Vought Systems Corporation, Dallas, TX (See Footnote 1).	8450
8451-P	Loral Vought Systems, Dallas, TX.	8451

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

December 9, 1992.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, room 3171 Treasury Annex, 1500 Pennsylvania Avenue NW., Washington, DC 20220

Internal Revenue Service

OMB Number: 1545-0820.
Regulation ID Number: EE-86-88 NPRM (Previously LR-279-81).
Type of Review: Extension.
Title: Incentive Stock Options.
Description: The affected public includes corporations that transfer stock to employees after 1979 pursuant to the exercise of a statutory stock option. The corporation must furnish the employee receiving the stock with a written statement describing the transfer. The statement will assist the employee in filing their tax returns.
Respondents: Businesses or other for-profit, Small businesses or organizations.
Estimated Number of Respondents: 50,000.
Estimated Burden Hours Per Respondent: 20 minutes.
Frequency of Response: Annually.
Estimated Total Reporting Burden: 16,650 hours.

OMB Number: 1545-0884.
Form Number: IRS Form 8279.
Type of Review: Extension.
Title: Election to be Treated as a FSC or as a Small FSC.
Description: A foreign corporation and its shareholders must elect to be a Foreign Sales Corporation (FSC) or small FSC. Form 8279 is used to make the election. Form 8279 provides IRS with the necessary information to determine that the foreign corporation qualifies to be a FSC, number and types of shareholders, and tax year of the FSC and its principal shareholders.
Respondents: Businesses or other for-profit.
Estimated Number of Respondents/Recordkeepers: 5,000.
Estimated Burden Hours Per Respondent/Recordkeeper:
Recordkeeping—4 hours, 32 minutes.
Learning about the law or the form—1 hour, 29 minutes.
Preparing and sending the form to the IRS—1 hour, 36 minutes.
Frequency of Response: Other (one-time election).
Estimated Total Reporting/Recordkeeping Burden: 38,300 hours.
Clearance Officer: Garrick Shear (202) 622-3869, Internal Revenue Service, room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.
OMB Reviewer: Milo Sunderhauf (202) 395-6880, Office of Management and Budget, room 3001, New Executive Office Building; Washington, DC 20503.

Part II

Department of Education

34 CFR Part 5b

Privacy Act Regulations; Notice of Proposed Rulemaking

DEPARTMENT OF EDUCATION

34 CFR Part 5b

RIN 1801–AA06

Privacy Act Regulations

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to amend the Department's regulations implementing the Privacy Act of 1974 (the Act), 5 U.S.C. 552a. These amendments are needed to modify existing Department regulations (34 CFR 5b.11) exempting the system of records known as the Investigative Files of the Inspector General ED/OIG (System No. 18–10–0001) from certain provisions of the Act and corresponding departmental regulations.

DATES: Comments must be received on or before February 16, 1993.

ADDRESSES: All comments concerning these proposed regulations should be addressed to Thomas D. Strong, U.S. Department of Education, 400 Maryland Avenue, SW., room 4117, Washington, DC 20202–1510.

FOR FURTHER INFORMATION CONTACT: Thomas D. Strong. Telephone: (202) 732–4762. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

SUPPLEMENTARY INFORMATION: The proposed amendments would add exemptions authorized by the Act, 5 U.S.C. 552a(j)(2), to those that are currently in place for the ED/OIG Investigative Files system of records under the "(j)(2)" exemption. Under subsection (j)(2) of the Act, the Secretary of Education, through rulemaking, may exempt those systems of records maintained by a component of the Department that performs as its principal function any activity pertaining to the enforcement of criminal laws from certain provisions of the Act, if the system of records is used for certain law enforcement purposes.

The Office of Inspector General (OIG) is a component of the Department that performs as one of its principal functions investigations into violations of criminal law in connection with the Department's programs and operations, pursuant to the Inspector General Act of 1978, as amended, 5 U.S.C. App. 3, and the Investigative Files system of records falls within the scope of subsection (j)(2); *i.e.*, information compiled for the purpose of criminal investigation, reports relating to any stage of the enforcement process, and information compiled for the identification of individual criminals. In addition, the proposed amendments would add exemptions authorized by the Act, 5 U.S.C. 552a(k)(2), for those investigatory materials in the system that may be deemed to relate primarily to civil and administrative law enforcement (the "(k)(2)" exemptions).

The additional proposed (j)(2) exemptions for criminal law enforcement records would remove restrictions on the manner in which information may be collected and the type of information that may be collected by OIG investigators in the course of a criminal investigation, would limit certain notice requirements, and would exempt the system of records from civil remedies for violations of the Act. These additional exemptions are necessary primarily to avoid premature disclosures of sensitive information, including, but not limited to, the existence of a criminal investigation, that may compromise or impede the investigation.

The proposal to add (k)(2) exemptions reflects recognition that certain records in the system may be deemed to fall outside the (j)(2) exemption (because they were collected primarily for civil and administrative law enforcement, such as investigations of Department employees' violations of the Standards of Conduct). Nevertheless, the Act recognizes that these records might also properly be exempted from certain disclosure and notice requirements as well as restrictions on the manner in which an investigator may collect information, in order to avoid compromising, impeding, or interfering with those investigations.

A more complete explanation of each proposed exemption follows, as required by the Act.

The Secretary proposes the following changes to the current exemptions contained in 34 CFR 5b.11.

A. Exemptions Pursant to (j)(2)

The Secretary has determined that the OIG Investigative Files should be exempt from the following provisions of the Privacy Act and corresponding departmental regulations, in addition to the exemptions already in place. These exemptions are necessary and appropriate to maintain the integrity and confidentiality of criminal investigations.

1. Expansion of the (j)(2) Exemption

Expansion of the (j)(2) exemption to cover the following Privacy Act provisions is being proposed for the following reasons:

(a) 5 U.S.C. 552a(c)(4), *duty to inform outside parties of correction of and notation of dispute about information in system in accordance with subsection (d) of the Privacy Act:* Since this system of records is already exempted from the access provisions of subsection (d) of the Privacy Act, this section is not properly applicable.

(b) 5 U.S.C. 552a(e)(1), *duty to maintain in agency records only "relevant and necessary" information about an individual:* This provision is inappropriate for criminal investigations, because it is not always possible to detect the relevance or necessity of each piece of information in the early stages of an investigation. In some cases, it is only after the information is evaluated in light of other evidence that its relevance and necessity will be clear. In other cases, what may appear to be a relevant and necessary piece of information may become irrelevant in light of further investigation.

In addition, during the course of an investigation, the investigator may obtain information that relates primarily to matters under the investigative jurisdiction of another agency (*e.g.*, the fraudulent use of Social Security numbers), and that information may not be reasonably segregated. In the interest of effective law enforcement, OIG investigators should retain this information, since it can aid in establishing patterns of criminal activity and can provide valuable leads for Federal and other law enforcement agencies.

(c) 5 U.S.C. 552a(e)(2), *collection of information from the subject individual:* The general rule that information be collected "to the greatest extent practicable" from the target individual is not appropriate in criminal investigations. OIG investigators should be authorized to use their professional judgment as to the appropriate sources and timing of an investigation. Often it is necessary to conduct an investigation so that the target does not suspect that he or she is being investigated. The requirement to obtain the information from the targeted individual may put the suspect on notice of the investigation and thereby thwart the investigation by enabling the suspect to destroy evidence and take other action that would impede the investigation. This requirement may also in some cases preclude an OIG investigator from gathering information and evidence before interviewing an investigative target in order to maximize the value of the interview by confronting the target with the evidence or information.

In addition, the statutory term "to the greatest extent practicable" is a subjective standard, and it is impossible adequately to define the term so that individual OIG investigators can consistently apply it to the many fact patterns presented in OIG investigations.

(d) 5 U.S.C. 552a(e)(3), *Privacy Act notice in the collection of information from individuals; deletion of inappropriate qualifying language:* As the regulations currently read, OIG investigators are exempt from giving notice (containing the authority for information collection, principal purpose, routine uses, and effect of refusal to provide information) to those from whom it collects information in the conduct of criminal investigations, but only "to the extent these requirements would prejudice the conduct of the investigation." Thus, the Department's regulations already recognize that as a general rule this exemption is necessary and appropriate for OIG investigative files.

It is ill-advised and impractical to have regulatory language that could be read as requiring investigative personnel to make a case-by-case determination as to whether in fact giving a Privacy Act notice will have a prejudicial effect on the investigation each time they interview a witness or collect documents. This is a determination that cannot always be made accurately in advance of an interview or request for documents, and the Privacy Act does not require such an impractical case-by-case assessment for the exemption to apply.

(e) 5 U.S.C. 552a(e)(4)(I), *duty to publish notice of the categories of sources of records in the system:* To the extent that this provision is construed to require more detailed disclosure than the broad, generic information currently published in the system notice, an exemption from this provision is necessary to protect the confidentiality of sources of information, to protect privacy and physical safety of witnesses and informants, and to avoid the disclosure of investigative techniques and procedures. OIG will, nevertheless, continue to publish such a notice in broad generic terms as is its current practice.

(f) 5 U.S.C. 552a(e)(5), *duty to maintain records with such accuracy, relevance, timeliness, and completeness as is reasonably necessary to assure fairness:* Much the same rationale is applicable to this proposed exemption as that set out previously in item (b) (duty to maintain in agency records only "relevant and necessary" information about an individual). While the OIG makes every effort to maintain records that are accurate, relevant, timely, and complete, it is not always possible in a criminal investigation to determine with certainty that all the information collected is accurate, relevant, timely, and complete. During a thorough investigation, a trained investigator would be expected to collect allegations, conflicting information, and information that may not be based upon the personal knowledge of the provider. At the point of determination by OIG to refer the matter to a prosecutive agency, for example, that information would be in the system of records, and it may not be possible until further investigation is conducted, or indeed in many cases until after a trial (if at all), to determine the accuracy, relevance, and completeness of some information. This requirement would inhibit the ability of trained investigators to exercise professional judgment in conducting a thorough investigation. Moreover, fairness to affected individuals is assured by the due process they are accorded in any trial or other proceeding resulting from the OIG investigation.

(g) 5 U.S.C. 552a(e)(8), *duty to make reasonable efforts to serve notice on an individual when any record on such individual is made available under compulsory legal process when such process becomes a matter of public record:* Compliance with this provision could prematurely reveal and compromise an ongoing criminal investigation to the target of the investigation and reveal techniques, procedures, or evidence.

(h) 5 U.S.C. 552a(g), *exemption from civil remedies:* Allowing civil lawsuits for alleged Privacy Act violations by OIG investigators would compromise OIG investigations by subjecting the sensitive and confidential information in the ED/OIG Investigative Files to the possibility of inappropriate disclosure under the liberal civil discovery rules. That discovery may reveal confidential sources, the identity of informants, and investigative procedures and techniques, to the detriment of the particular criminal investigation as well as other investigations conducted by OIG.

The pendency of such a suit would have a chilling effect on investigations, given the possibility of discovery of the contents of the investigative case file, and a Privacy Act lawsuit could therefore become a ready strategic weapon used to impede OIG investigations. Furthermore, since, under the current and proposed regulations, the system would be exempt from many of the Act's requirements, it is unnecessary and contradictory to provide for civil remedies from violations of those provisions in particular.

This exemption in no way detracts from OIG's commitment to meet all its legal obligations under the Privacy Act.

B. Exemptions Pursuant to (k)(2)

Since the Inspector General Act requires the OIG to uncover not only fraud but also waste and abuse, some of the records in the ED/OIG Investigative Files pertain to individuals investigated primarily for non-criminal violations for purposes of civil or administrative action or both. Accordingly, the Secretary has determined that the ED/OIG Investigative Files should also be subject to the exemptions authorized under (k)(2) to the extent that the system contains investigatory material compiled primarily for purposes not within the scope of the (j)(2) exemption. The system would thus be exempt from sections 552a(c)(3), (d) (1) through (4), (e)(1), (e)(4) (G), (H) and (I), and (f), and corresponding Department regulations.

The Secretary proposes to adopt these exemptions for the following reasons:

(a) 5 U.S.C. 552a(c)(3), *duty to grant access to an accounting of disclosures of a record:* Granting access to the accounting for each disclosure as required by the Privacy Act, including the date, nature, and purpose of each disclosure of a record and the identity of the recipient, could alert the subject of a civil investigation to its existence and nature and reveal investigative or prosecutive interest by other agencies, particularly in a joint-investigation situation. This could seriously impede or compromise the investigation and case preparation by prematurely revealing its existence and nature; compromise or interfere with witnesses or make witnesses reluctant to cooperate with the investigators; and lead to suppression, alteration, or destruction of evidence.

(b) 5 U.S.C. 552a(d) (1) through (4) and (f), *duty to provide access to records, make corrections and amendments to records, and to notify individuals of existence of records upon their request:* Providing individuals with access to records of a civil investigation and the right to contest the contents of those records and force changes to be made to the information contained therein would seriously interfere with and thwart the orderly and unbiased conduct of the investigation and impede case preparation. Providing the access rights normally afforded under the Privacy Act would provide the subject with valuable information that would allow

interference with or compromise of witnesses or render witnesses reluctant to cooperate with investigators; lead to suppression, alteration, or destruction of evidence; and result in the secreting of or other disposition of assets that would make them difficult or impossible to reach in order to satisfy the Government's civil claims growing out of the investigation.

(c) 5 U.S.C. 552a(e)(1), *duty to maintain in agency records only "relevant and necessary information about an individual":* The rationale for this exemption is the same as that stated previously with respect to the criminal law enforcement investigations under (j)(2) of the Privacy Act, and that explanation is incorporated herein by reference.

(d) 5 U.S.C. 552a(e)(4)(G) and (H), *duty to publish notice of notification, access, amendment, and correction procedures for the system of records:* There is no necessity for such publication since the system of records will be exempt from the underlying duties to provide notification about and access to information in the system and to make amendments to and corrections of the information in the system.

(e) 5 U.S.C. 552a(e)(4)(I), *duty to publish notice of the categories of sources of records in the system:* The rationale for this exemption is the same as that stated previously with respect to criminal investigations under (j)(2) of the Privacy Act, and that explanation is incorporated herein by reference.

The Secretary also proposes technical changes to the way exemptions are described in 34 CFR 5b.11. These technical changes are designed to facilitate a determination of which exemptions are applicable to which systems of records. Further, exemptions are broken out separately depending upon whether the basis for the exemption is section 552a(j) or (k).

Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities.

These proposed regulations involve procedural rights of individuals under the Privacy Act, and economic impact under the Regulatory Flexibility Act is not at stake.

Paperwork Reduction Act of 1980

These proposed regulations have been examined under the Paperwork Reduction Act of 1980 and have been found to contain no information collection requirements.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 4022 Switzer Building, 330 C Street S.W., Washington D.C., between the hours of 8:30 a.m. and 4 p.m., Monday through Friday of each week except Federal holidays.

List of Subjects in 34 CFR Part 5b

Administrative practice and procedures, Education Department, Privacy.

Dated: December 10, 1992.

Lamar Alexander,

Secretary of Education.

(Catalogue of Federal Domestic Assistance Number does not apply.)

The Secretary proposes to amend part 5b of Title 34 of the Code of Federal Regulations as follows:

PART 5b—PRIVACY ACT REGULATIONS

1. The authority citation for part 5b continues to read as follows:

Authority: 5 U.S.C. 301 and 5 U.S.C. 552a, unless otherwise noted.

2. Section 5b.11 is revised to read as follows:

§ 5b.11 Exempt systems.

(a) *General policy.* The Act permits an agency to exempt certain types of systems of records from some of the Act's requirements. It is the policy of the Department to exercise authority to exempt systems of records only in compelling cases.

(b) *Specific systems of records exempted under (j)(2).* The Department exempts the Investigative Files of the Inspector General ED/OIG (18–10–0001) system of records from the following provisions of 5 U.S.C. 552a and this part:

(1) 5 U.S.C. 552a(c)(3) and § 5b.9(a)(1) and (c)(3) of this part, regarding access to an accounting of disclosures of a record.

(2) 5 U.S.C 552a(c)(4) and §§ 5b.7(c) and 5b.8(b) of this part, regarding notification to outside parties and agencies of correction or notation of dispute made in accordance with 5 U.S.C. 552a(d).

(3) 5 U.S.C. 552a(d)(1) through (4) and (f) and §§ 5b.5(a)(1) and (c), 5b.7, and 5b.8 of this part, regarding notification or access to records and correction or amendment of records.

(4) 5 U.S.C. 552a(e)(1) and § 5b.4(a)(1) of this part, regarding maintaining only relevant and necessary information.

(5) 5 U.S.C. 552a(e)(2) and § 5b.4(a)(2) of this part, regarding collection of information from the subject individual.

(6) 5 U.S.C. 552a(e)(3) and § 5b.4(a)(3) of this part, regarding notice to individuals asked to provide a record to the Department.

(7) 5 U.S.C. 552a(e)(4)(G), (H), and (I), regarding inclusion of information in the system notice about procedures for notification, access, correction, and source of records.

(8) 5 U.S.C. 552a(e)(5), regarding maintaining records with requisite accuracy, relevance, timeliness, and completeness.

(9) 5 U.S.C. 552a(e)(8), regarding service of notice on subject individual if a record is made available under compulsory legal process if that process becomes a matter of public record.

(10) 5 U.S.C 552a(g), regarding civil remedies for violation of the Privacy Act.

(c) *Specific systems of records exempted under (k)(2).* (1) The Department exempts the Investigative Files of the Inspector General ED/OIG (18–10–0001) from the following provisions of 5 U.S.C. 552a and this part to the extent that the system of records consists of investigatory material compiled for law enforcement purposes:

(i) 5 U.S.C. 552a(c)(3) and § 5b.9(c)(3) of this part, regarding access to an accounting of disclosures of records.

(ii) 5 U.S.C. 552a(d)(1) through (4) and (f) and §§ 5b.5(a)(1) and (c), 5b.7, and 5b.8 of this part, regarding notification of and access to records and correction or amendment of records.

(iii) 5 U.S.C. 552a(e)(1) and § 5b.4(a)(1) of this part, regarding the requirement to maintain only relevant and necessary information.

(iv) 5 U.S.C. 552a(e)(4)(G), (H), and (I), regarding inclusion of information in the system notice about procedures for notification, access, correction, and source of records.

(2) The Department exempts the Complaint Files and Log, Office for Civil Rights (18–08–0002) from the following provisions of 5 U.S.C. 552a and this part:

(i) 5 U.S.C. 552a(c)(3) and § 5b.9(c)(3) of this part, regarding access to an accounting of disclosures of records.

(ii) 5 U.S.C. 552a(d)(1) through (4) and (f) and §§ 5b.5(a)(1) and (c), 5b.7, and

5b.8 of this part, regarding notification of and access to records and correction or amendment of records.

(iii) 5 U.S.C. 552a(e)(4)(G) and (H), regarding inclusion of information in the system notice about procedures for notification, access, and correction of records.

(d) *Specific systems of records exempted under (k)(5).* (1) The Department exempts the Investigatory Material Compiled for Personnel Security and Suitability Purposes (18–10–0002) system of records from the following provisions of 5 U.S.C. 552a and this part:

(i) 5 U.S.C. 552a(c)(3) and § 5b.9(c)(3) of this part, regarding access to an accounting of disclosures of records.

(ii) 5 U.S.C. 552a(d)(1) through (4) and (f) and §§ 5b.5(a)(1) and (c), 5b.7, and 5b.8 of this part, regarding notification of and access to records and correction or amendment of records.

(iii) 5 U.S.C. 552a(e)(4)(G) and (H), regarding inclusion of information in the system notice about procedures for notification, access, and correction of records.

(2) The Department exempts the Suitability for Employment Records (18–11–0020) from the following provisions of 5 U.S.C. 552a and this part:

(i) 5 U.S.C. 552a(c)(3) and § 5b.9(c)(3) of this part, regarding access to an accounting of disclosures of records.

(ii) 5 U.S.C. 552a(d)(1) through (4) and (f) and §§ 5b.5(a)(1) and (c), 5b.7, and 5b.8 of this part, regarding notification of and access to records and correction or amendment of records.

(iii) 5 U.S.C. 552a(e)(4)(G) and (H), regarding inclusion of information in the system notice about procedures for notification, access, and correction of records.

(e) *Basis for exemptions taken under (j)(2), (k)(2), and (k)(5).* The reason the Department took each exemption described in this section is stated in the preamble for the final rulemaking document under which the exemption was promulgated. These final rulemaking documents were published in the **Federal Register** and may be obtained from the Department of Education by mailing a request to the following address: U.S. Department of Education, Privacy Act Officer, Information Management Branch, Washington, DC 20202–4753.

(f) *Notification of or access to records in exempt systems of records.* (1) If a system of records is exempt under this section, an individual may nonetheless request notification of or access to a record in that system. An individual shall make requests for notification of or access to a record in an exempt system or records in accordance with the procedures of § 5b.5 of this part.

(2) An individual will be granted notification of or access to a record in an exempt system but only to the extent that notification or access would not reveal the identity of a source who furnished the record to the Department under an express promise, and, prior to September 27, 1975, an implied promise, that his identity would be held in confidence if—

(i) The record is in a system of records or that portion of a system of records that is exempt under subsection (k)(2), but not under subsection (j)(2), of the Act and the individual has been, as a result of the maintenance of the record, denied a right, privilege, or benefit to which he or she would otherwise be eligible; or

(ii) The record is in a system of records that is exempt under subsection (k)(5) of the Act.

(3) If an individual is not granted notification of or access to a record in a system of records exempt under subsections (k)(2) (but not under subsection (j)(2)) and (k)(5) of the Act in accordance with this paragraph, he or she will be informed that the identity of a confidential source would be revealed if notification of or access to the record were granted to the individual.

(g) *Discretionary actions by the responsible Department official.* Unless disclosure of a record to the general public is otherwise prohibited by law, the responsible Department official may, in his or her discretion, grant notification of or access to a record in a system of records that is exempt under this section. Discretionary notification of or access to a record in accordance with this paragraph will not be a precedent for discretionary notification of or access to a similar or related record and will not obligate the responsible Department official to exercise his or her discretion to grant notification of or access to any other record in a system of records that is exempt under this section.

Part III

Department of Justice

Federal Prison Industries, Inc.
Bureau of Prisons

28 CFR Part 345 and 545
UNICOR Inmate Work Programs; Proposed Rule

DEPARTMENT OF JUSTICE

Federal Prison Industries, Inc.

28 CFR Part 345

Bureau of Prisons

28 CFR Part 545

RIN 1120–AA04

UNICOR Inmate Work Programs

AGENCY: Federal Prison Industries, Inc., Bureau of Prisons, Justice.

ACTION: Proposed rule.

SUMMARY: In this document, the Bureau of Prisons is proposing to revise and reorganize its rule on UNICOR Inmate Work Programs. This proposed rule revises, and codifies into one part, the existing provisions on inmate hiring procedures, pay, and scholarship and incentive awards programs. It updates Bureau policy by adding provisions on position classification and recruitment, physical and medical work limitations, inmate worker standards, performance appraisal, dismissal procedures, benefit retention, and training programs. The intent of this proposal is to enable the Bureau to continue to employ and train inmates in a manner that will assist the inmate in post-release employment.

DATES: Comments due by February 1, 1993.

ADDRESSES: Office of General Counsel, Bureau of Prisons, HOLC room 754, 320 First Street, NW., Washington, DC 20534.

FOR FURTHER INFORMATION CONTACT: Roy Nanovic, Office of General Counsel, Bureau of Prisons, phone (202) 307–3062.

SUPPLEMENTARY INFORMATION: The Bureau of Prisons is proposing to amend its regulations on UNICOR Inmate Work Programs. UNICOR is the commercial or "trade" name of Federal Prison Industries, Inc. (FPI). FPI, a component of the Bureau of Prisons, is a wholly owned government corporation whose mission is to provide institution work assignments and training opportunities for inmates confined in Federal correctional facilities. Final rules on the provisions comprising UNICOR Inmate Work Programs had previously been published in the **Federal Register** as follows: Inmate Pay on September 30, 1983 (48 FR 45047) and amended on March 27, 1990 (55 FR 11326) and April 19, 1990 (55 FR 14917), Scholarship Program on May 1, 1981 (46 FR 24900), Inmate Hiring Procedures on July 1, 1981 (46 FR 34549), and Incentive Awards Program on August 31, 1981 (46 FR 43810).

Existing regulations on UNICOR Inmate Pay are codified in 28 CFR part 345. This proposed rule reorganizes the existing provisions, simplifies the inmate pay provisions (new §§ 345.50 through 345.63) by removing tables of pay rates and various examples of pay rate calculations, adds provisions relating to position classification (new § 345.20), physical and medical work limitations (new §§ 345.64 and 65), benefit retention provisions (new § 345.66), and expands provisions related to assignment to UNICOR work status (new § 345.35).

Existing regulations on UNICOR Inmate Hiring Procedures are codified in 28 CFR part 545, subpart F. These provisions are revised and expanded upon in § 345.30 and §§ 345.32 through 345.34, and include new provisions on recruitment procedures (§ 345.31), inmate worker standards and performance appraisal (§§ 345.40 and 345.41), and inmate worker dismissal (§ 345.42).

Existing regulations on the Scholarship Program are codified in 28 CFR part 545, subpart E. These provisions are revised and expanded upon in § 345.84. As proposed, these provisions specify that an inmate maintain a verifiable average of "C" or better to maintain program eligibility.

Existing regulations on UNICOR Incentive Awards Program are codified in 28 CFR part 545, subpart G. These provisions are revised and expanded upon in §§ 345.73 and 345.74.

This proposed rule contains new provisions relating to inmate training (§§ 345.80 through 345.83).

The Bureau of Prisons has determined that this rule is not a major rule for the purpose of E.O. 12291. After review of the law and regulations, the Director, Bureau of Prisons has certified that this rule, for the purpose of the Regulatory Flexibility Act (Pub. L. 96–354), does not have a significant impact on a substantial number of small entities.

Interested persons may participate in this proposed rulemaking by submitting data, views, or arguments in writing to the Bureau of Prisons, 320 First Street, NW., HOLC room 754, Washington, DC 20534. Comments received during the comment period will be considered before final action is taken. All comments received remain on file for public inspection at the above address. The proposed rule may be changed in light of the comments received. No oral hearings are contemplated.

List of Subjects

28 CFR Part 345

Inventions and patents, Prisoners, Scholarships and fellowships.

28 CFR Part 545

Prisoners.

Dated: December 9, 1992.

Kathleen M. Hawk,

Director, Bureau of Prisons, and Commissioner of Federal Prison Industries.

Accordingly, pursuant to the rulemaking authority vested in the Attorney General in 5 U.S.C. 552(a) and delegated to the Director, Bureau of Prisons in 28 CFR 0.96(q), it is proposed to revise part 345 in chapter III of 28 CFR, and to amend part 545 in subchapter C of 28 CFR, chapter V as set forth below.

1. 28 CFR part 345 is revised to read as follows:

PART 345—UNICOR INMATE WORK PROGRAMS

Subpart A—General

Sec.

345.10 Purpose and scope.
345.11 Definitions.

Subpart B—Classification

345.20 Position classification.

Subpart C—Recruitment and Hiring

345.31 Recruitment.
345.32 Hiring.
345.33 Waiting list hiring exceptions.
345.34 Refusal to employ.
345.35 Assignments to FPI.

Subpart D—Standards and Performance Appraisal

345.40 Inmate worker standards and performance appraisal—general.
345.41 Performance appraisal for inmate workers.
345.42 Inmate worker dismissal.

Subpart E—Pay and Benefits

345.50 Inmate pay and benefits—general.
345.51 Inmate pay.
345.52 Premium pay.
345.53 Piecework rates.
345.54 Overtime compensation.
345.55 Longevity pay.
345.56 Vacation pay.
345.57 Administrative pay.
345.58 Holiday pay.
345.59 Inmate performance pay.
345.60 Training pay.
345.61 Inmate earnings statement.
345.62 Inmate accident compensation.
345.63 Funds due deceased inmates.
345.64 Sharing of medical data with FPI staff.
345.65 Inmate medical work limitation.
345.66 Retention of benefits.

Subpart F—Awards

345.70 Awards program—general.
345.71 Official commendations.

345.72 Cash bonus or cash award.
345.73 Procedures for granting awards for suggestions or inventions.
345.74 Awards for special achievements for inmate workers.

Subpart G—Training and Scholarship Programs

345.80 FPI inmate training and scholarship programs.
345.81 Pre-industrial training.
345.82 Apprenticeship training.
345.83 Job safety training.
345.84 The FPI scholarship fund.

Authority: 18 U.S.C. 4126, 28 CFR 0.99, and by resolution of the Board of Directors of Federal Prison Industries, Inc.

Subpart A—General

§ 345.10 Purpose and Scope.

It is the policy of Federal Prison Industries, Inc. to provide work to inmates confined in a Federal institution. This work is designed to allow inmates the opportunity to acquire the knowledge, skills, and work habits which will be useful when released from the institution. There is no requirement that inmates be paid for work in an industrial assignment. 18 U.S.C. 4126, however, provides for discretionary compensation to inmates working in Industries. Under this authority, inmates of the same grade jobs, regardless of the basis of pay (hourly, group piece, or individual piece rates) shall receive approximately the same compensation. All pay rates under this part are established at the discretion of Federal Prison Industries, Inc. Any alteration or termination of the rates shall require the approval of the Federal Prison Industries Board of Directors. While the Warden is responsible for the local administration of Inmate Industrial Payroll regulations, no pay system is initiated or changed without prior approval of the Assistant Director of Federal Prison Industries, Inc.

§ 345.11 Definitions.

(a) *Federal Prison Industries, Inc. (FPI)*—A wholly-owned government corporation established by Congress in 1934 whose mission is to provide work programs and training opportunities for inmates confined in Federal correctional facilities. Hereinafter, referred to as FPI.

(b) *UNICOR*—The commercial or "trade" name of Federal Prison Industries, Inc. Most factories or shops of Federal Prison Industries, Inc. are commonly referred to as "UNICOR" or as "Industries". Where these terms are used, they refer to FPI production locations and to the corporation as a whole. UNICOR, FPI, and Industries are used interchangeably in this manner.

(c) *Federal Prison Industries Board of Directors*—A presidentially appointed board of six directors who serve the corporation at the will of the President and without compensation.

(d) *Superintendent of Industries (SOI)*, also referred to as Associate Warden/ Industries and Education, is responsible for the efficient management and operation of an FPI factory. Hereinafter, referred to as SOI.

(e) *Unit Team*—Bureau of Prisons staff responsible for the management of inmates and the delivery of programs and services. The Unit Team may consist of a unit manager, case manager, correctional counselor, unit secretary, unit officer, education representative, and psychologist.

(f) *Unit Discipline Committee (UDC)*—The term Unit Discipline Committee refers to one or more institution staff members delegated by the Warden with the authority and duty to hold an initial hearing upon completion of the investigation concerning alleged charge(s) of inmate misconduct (see 28 CFR 541.15). The Warden shall authorize these staff members to impose minor sanctions for violation of prohibited act(s).

(g) *Discipline Hearing Officer (DHO)*—This term refers to an independent discipline hearing officer who is responsible for conducting institution Discipline Hearings and who imposes appropriate sanctions for incidents of inmate misconduct referred for disposition following the hearing required by 28 CFR 541.15 before the UDC.

Subpart B—Classification

§ 345.20 Position classification.

(a) Inmate worker positions must be assigned an appropriate level of pay. All inmate workers shall be informed of the objectives and principles of pay classification as a part of the routine orientation of new FPI inmate workers.

(b) The Warden and SOI have the responsibility for position classification at each location.

Subpart C—Recruitment and Hiring

§ 345.31 Recruitment.

Inmate workers for FPI locations may be recruited through admission and orientation lectures or through direct recruiting.

§ 345.32 Hiring.

(a) Inmate workers may be hired through waiting lists. Except as noted in § 345.33, inmates are to be placed on the waiting lists in order of receipt of applications for work with Industries, and are to be hired in the same sequence.

(b) Waiting lists are to be maintained and kept available for scrutiny by auditors and other staff with a need to know. SOIs are encouraged to maintain a waiting list for each FPI factory.

§ 345.33 Waiting list hiring exceptions.

(a) *Needed Skills.* An inmate may be hired ahead of other inmates on the waiting list if he/she possesses needed skills and the SOI documents the reasons for the action in the position classification files.

(b) *Prior FPI Work Assignment.* An inmate with prior FPI work experience during the inmate's current commitment and with no break in custody will ordinarily be placed within the top ten percent of the waiting lists unless the inmate voluntarily left the FPI work assignment for non-program reasons; i.e. for some reason other than formal education, vocational training, drug abuses or similar formal programs. For example, an inmate transferred administratively for nondisciplinary reasons, and who has documented credit as a prior worker, is covered under the provisions of this paragraph.

(c) *Industry Closing and Relocation.* When an FPI factory closes in a location with two or more factories, an inmate worker affected may be transferred to remaining factories ahead of the top portion of the inmates on the waiting lists, so there is no break in active duty with FPI. Such actions are also in order where the work force of an industry is reduced to meet institution or FPI needs. An inmate transferred under the provisions of this part will have the same rights as any intra-industry transfer.

(d) *Disciplinary Transfers.* An inmate who is a disciplinary transfer from the last institution designated and who wishes re-assignment in FPI at the receiving institution may be hired on a case-by-case basis at the discretion of the SOI, who should consider the security level and reasons for the misconduct. Such an inmate, despite prior experience, is not due special placement on the waiting list, is not given advance hiring preference, and does not receive consideration for accelerated promotion back to the grade held at the time of transfer.

(e) *Inmate Financial Responsibility Program Assignment.* The unit team may recommend an inmate for priority placement on the waiting list to assist in paying a significant financial obligation.

§ 345.34 Refusal to employ.

(a) The SOI has authority to refuse an FPI assignment to an inmate who, in the judgment of the SOI, would constitute a serious threat to the orderly and safe

operation of the factory. A refusal to assign must be documented by a memorandum to the unit team listing reasons for the refusal, with a copy to the position classification files in FPI. Typically, the reasons should include other earlier (ordinarily within the past twelve months) documented violations of the FPI inmate worker standards or institution disciplinary regulations.

(b) The refusal to assign is to be rescinded when, in the judgment of the SOI, the worker no longer constitutes a serious threat to the industrial operation.

§ 345.35 Assignments to FPI.

The inmate's unit team assigns the inmate to FPI with the SOI's concurrence.

(a) Any request by an inmate for consideration must be made through the unit team. All inmates may be considered for assignment with FPI. FPI does not discriminate on the basis of race, color, religion, ethnic origin, age, or physical handicap.

(b) New workers are ordinarily assigned at pay grade five. All first time inmate workers shall enter at pay grade five and may be required to successfully complete a course in pre-industrial training or on-the-job training (as available) before promotion to pay grade four.

(c) An inmate who has not successfully completed pre-industrial or on-the-job training remains at pay grade five for at least 30 days.

(d) An inmate hired after having resigned voluntarily from FPI may be excused from pre-industrial training and may be hired at a pay grade based on previous training and experience.

Subpart D—Standards and Performance Appraisal

§ 345.40 Inmate worker standards and performance appraisal—general.

This subpart establishes minimum work standards for inmate workers assigned to the Industries program at all field locations. The SOI may reproduce these standards and may also develop additional local guidelines to augment these standards and to adapt them to local needs and conditions. Local Industries shall place these standards and any additional local guidelines on display at appropriate locations within the industrial sites. Inmates shall be provided with a copy of these standards and local guidelines, and shall sign receipts acknowledging they have received and understand them before beginning work in the Industries program.

(a) At a minimum, each industrial location is to have work standards for each of the following areas:

(1) Safety—ensuring the promotion of workplace safety and the avoidance of activities that could result in injury to self or others.

(2) Quality Assurance—ensuring that work is done as directed by the supervisor in an attentive manner so as to minimize the chance of error.

(3) Personal Conduct and Hygiene—ensuring the promotion of harmony and sanitary conditions in the workplace through observation of good hygiene and full cooperation with other inmate workers, work supervisors, and training staff.

(4) Punctuality and Productivity—ensuring the productive and efficient use of time while the inmate is on work assignment or in training.

(b) *Compliance With Work Standards.* Each inmate assigned to FPI shall comply with all work standards pertaining to his or her work assignment. Adherence to the standards should be considered in evaluating the inmate's work performance and documented in individual hiring, retention, and promotion/demotion situations.

§ 345.41 Performance appraisal for inmate workers.

Work supervisors should complete a performance appraisal form for each inmate semi-annually, by March 31 and September 30, or upon termination or transfer from the industrial work assignment. Copies shall be sent to the unit team. Inmate workers should discuss their appraisals with their supervisors at a mutually agreeable time in order to improve their performance. Satisfactory and unsatisfactory performance ratings shall be based on the standards in § 345.40(a).

(a) The SOI is to ensure that evaluations are done and are submitted to unit teams in a timely manner.

(b) The SOI or a designee may promote an inmate to a higher grade level if an opening exists when the inmate's skills, abilities, qualifications, and work performance are sufficiently developed to enable the inmate to carry out a more complex factory assignment successfully, and when the inmate has abided by the inmate worker standards. Conversely, the SOI or SOI designee may demote an inmate worker for failing to abide by the inmate worker standards. Such demotions shall be fully documented.

§ 345.42 Inmate worker dismissal.

The SOI may remove an inmate from Industries work status in cooperation with the unit team.

(a) The SOI may remove an inmate from FPI work status according to the conditions outlined in the pay and benefits section of this policy and in cooperation with the unit team.

(b) An inmate may be removed from FPI work status for failure to comply with any court-mandated financial responsibility. (See 28 CFR 545.11(d)).

(c) An inmate found to have committed a prohibited act (whether or not it is FPI related) resulting in segregation or disciplinary transfer is also to be dismissed from Industries based on an unsatisfactory performance rating for failure to be at work.

Subpart E—Pay and Benefits

§ 345.50 Inmate pay and benefits—general.

It is the policy of FPI to provide compensation to FPI inmate workers through various conditions of pay and benefits. Title 18 U.S. Code section 4126 authorizes FPI to compensate inmates under rules and regulations promulgated by the Attorney General. The following items define terms frequently used in this section.

(a) *Full Time Work Status.* A work schedule for an inmate consisting of 90% or more of the normal factory work week.

(b) *Part Time Work Status.* A work schedule of less than 90% of the normal factory work week.

(c) *FPI Work Status.* Assignment to an Industries work detail.

(1) An inmate shall accrue vacation time, longevity service credit, and shall receive holiday pay for the period of time the inmate is officially assigned to the Industries work detail, provided claims for such pay and/or benefits occur within one calendar year of the period of time for which the claim is made. Inmate claims submitted more than one year after the time in question require the approval of the Assistant Director before an inmate may receive such pay and/or benefits.

(2) An inmate in FPI work status may be on the job, on furlough, vacation, medical idle for FPI work-related injury, or in administrative detention. An inmate on sick call, however, is not considered to be in FPI work status.

(3) FPI pay and benefits are lost in cases of disciplinary transfer and segregation.

(4) An inmate returned to the institution due to program failure at a Community Corrections Center or while on parole or escape is not entitled to credit for time spent in Industries prior to said program failure. This rule also applies to any other program failure which results in a break in confinement status.

§ 345.51 Inmate pay.

Inmate workers in FPI locations receive pay at five levels ranging from 5th grade pay (lowest) to 1st grade pay (highest). Time in grade requirements are covered in the section on performance appraisal. Inmate workers may be eligible for premium pay as specified in § 345.52.

§ 345.52 Premium pay.

Payment of premium pay to selected inmates is authorized. The total number of qualifying inmates may not exceed 15% of first grade inmates at a location.

(a) *Eligibility.* Inmates in first grade pay status may be considered for premium pay.

(b) *The Selection Process.* Candidates for premium pay must be nominated by a foreman on the FPI staff, and recommended on the basis of specific criteria by a selection committee assigned by the SOI.

(1) The SOI, as chief selecting official, must sign approval for all premium pay inmate selections. This authority may not be delegated below the level of Acting SOI.

(2) The selected candidate(s) are notified by the FPI Manager or by a posted list on the FPI bulletin board. A record of the selection and who was on the selection board is kept for documentation purposes. An inmate nominated to be a premium pay inmate may refuse the appointment without prejudice.

(c) [Reserved]

(d) *Pay Rate.* Premium pay inmates receive a specified amount over and above all other pay and benefits to which they may be entitled (e.g., longevity pay, overtime, piecework rates, etc.). Premium pay is also paid for vacation, holiday, and administrative hours.

(e) *Duties of Premium Pay Inmates.* Premium pay status is not a form of bonus or incentive pay for high producing inmates. It is recognition by staff of the value of the leadership and citizenship traits displayed by the inmate in helping to assure factory operations proceed smoothly.

(f) *Transfer Status Of Premium Pay Inmates.* Premium pay status may not be transferred from institution to institution with the inmate worker. Premium pay status must be earned at each location.

(g) *Removals From Premium Pay Status.* Removal from premium pay status may occur for failure to demonstrate the premium pay selection traits or for failure to abide by the inmate worker standards set forth in this policy. All removals from premium pay status shall be documented on the inmate's evaluation form. The following conditions also may result in removal from premium pay status:

(1) Any premium pay inmate found to have committed any level 100 or 200 series offense by the DHO is automatically removed from premium pay status whether or not the offense was FPI related.

(2) Inmates absent from work for more than 30 consecutive calendar days may be removed from premium pay status by the SOI.

§ 345.53 Piecework rates.

Piecework rates are incentives for workers to strive for higher pay and production benefiting both the worker and FPI. Piecework rates may be of two major types: Individual piecework (in which an individual's pay goes up or down depending upon his/her own output) or Group Wage Fund (in which all members of a group strive for higher rates or production output as a unit, and all share in a pool of funds distributed among work group members equally).

§ 345.54 Overtime compensation.

An inmate worker is entitled to overtime pay at a rate of two times the hourly or unit rate for hourly, individual, and group piecework rate employees when the total hours worked (including administrative pay) exceed the factory's regularly scheduled workday. Hours worked on days other than the scheduled work week (e.g., Saturday) shall be compensated at the overtime rate.

§ 345.55 Longevity pay.

(a) Except as provided in paragraph (b) of this section, an inmate earns longevity pay raises after 18 months spent in FPI work status regardless of whether or not the work was continuous. The service may have occurred in one or more FPI factories or shops. An inmate qualifies for longevity pay raises as provided in the table below:

Length of Service With FPI
After 18 months of service and payable in the 19th month
After 30 months of service and payable in the 31st month
After 42 months of service and payable in the 43rd month
After 60 months of service and payable in the 61st month
After 84 months of service (and more) and payable in the 85th month

Longevity pay allowances shall be added after the wages for each actual hour in pay status have been properly computed.

(b) *Exceptions.* (1) FPI work status during service of a previous sentence with a subsequent break in custody may not be considered in determining longevity pay.

(2) An inmate in segregation or who is given a disciplinary transfer loses any longevity status previously achieved.

(3) An inmate who voluntarily transfers to a non-FPI work assignment loses any longevity status previously achieved. An inmate who leaves FPI to enter education, vocational training, or chemical abuse programs, however, generally retains longevity and pay grade status upon return to FPI, unless the inmate withdraws from those programs without a good faith effort to complete them. The decision on whether there was a good faith effort is to be made by the SOI in concert with the staff member in charge of the program.

§ 345.56 Vacation pay.

Inmate workers are granted vacation pay by the SOI when their continued good work performance justifies such pay, based on such criteria as quality of work, attendance and punctuality, attentiveness, and adherence to industry operating regulations. The work supervisor must recommend to the SOI the vacation time to be taken or paid. Eligibility for vacation pay must be verified by the Business Office prior to approval by the SOI. The SOI may declare an inmate ineligible for vacation credit because of an inmate's unsatisfactory work performance during the month in which such credit was to occur.

(a) An inmate may take accrued vacation time for visits, participation in institution programs or for other good reasons at the discretion of the SOI. Industrial managers should make every reasonable attempt to schedule an inmate worker's vacations so as not to conflict with the manpower requirements of factory production schedules and Inmate Systems Management requirements.

(b) An inmate temporarily assigned to the Industrial detail, e.g., on construction details, also earns vacation credit which he or she must take or be paid for at the end of the temporary assignment.

(c) An inmate must take and/or be paid for vacation credit within sixty days after each annual eligibility date of the inmate's most recent date of assignment to UNICOR. An inmate who elects not to take vacation time must indicate this in writing. That inmate shall receive pay for the annual vacation credit in a lump sum on the regular monthly payroll. This amount is ordinarily paid within sixty days after the annual eligibility date of the

inmate's most recent date of assignment to UNICOR. An inmate whose employment is terminated by release, reassignment, transfer, or other reasons, and who has unused vacation credit shall be paid for this credit on the monthly payroll.

§ 345.57 Administrative pay.

An inmate excused from a job assignment may receive administrative pay for such circumstances as a general recall for an institution, power outages, blood donations, or other situations at the discretion of the SOI. Such pay may not exceed an aggregate of three hours per month.

§ 345.58 Holiday pay.

An inmate worker in FPI work status shall receive pay at the standard hourly rate, plus longevity where applicable, for all Federal holidays provided the inmate is in work status on the day before and the day after the holiday occurs. Full time workers receive one full day's pay. Part time workers receive one-half day's pay.

§ 345.59 Inmate performance pay.

Inmate workers for FPI may also receive Inmate Performance Pay for participation in programs where this award is made. However, inmate workers may not receive both Industries Pay and Performance Pay for the same program activity. For example, an inmate assigned to a pre-industrial class may not receive FPI pay as well as inmate performance pay for participation in the class.

§ 345.60 Training pay.

Inmates directed by the SOI to take a particular type of training in connections with a FPI job are to receive FPI pay if the training time occurs during routine factory hours of operation. This does not include ABE/GED or pre-industrial training.

§ 345.61 Inmate earnings statement.

Each inmate worker in FPI shall be given a monthly earnings statement while actively working for FPI.

§ 345.62 Inmate accident compensation.

An inmate worker shall be paid lost time wages while hospitalized or confined to quarters due to work-related injuries (including occupational disease or illnesses directly caused by the worker's job assignments) as specified by the Inmate Accident Compensation Program (28 CFR part 301).

§ 345.63 Funds due deceased inmates.

Funds due a deceased inmate for work performed for FPI are payable to a legal representative of the inmate's estate or in accordance with the law of descent and distribution of the state of domicile.

§ 345.64 Sharing of medical data with FPI staff.

The SOI, in consultation with the medical staff, is to ensure that documented medical information pertaining to an inmate's health and any medical limitation (e.g., back injury) is made available to the FPI staff member making the assignment and to the persons who directly supervise the assignment.

§ 345.65 Inmate medical work limitation.

In addition to any prior illnesses or injuries, medical limitations also include any illness or injury sustained by an inmate which necessitates removing the ill worker from an FPI work assignment. If an inmate worker is injured more than once in a comparatively short time, and the circumstances of the injury suggest an awkwardness or ineptitude which in turn indicates that further danger exists, the inmate may be removed to another FPI detail or to a non-FPI detail.

§ 345.66 Retention of benefits.

(a) *Job Retention.* Ordinarily, when an inmate is absent from the job for a significant period of time, the SOI will fill that position with another inmate, and the first inmate will have no entitlement to continued UNICOR employment.

(1) For up to the first 30 days when an inmate is in medical idle status, that inmate will retain UNICOR pay grade status, with suspension of actual pay, and will be able to return to UNICOR when medically able, provided the absence was not because of a UNICOR work-related injury resulting from the inmate's violation of safety standards. If the medical idle lasts longer than 30 days, was not caused by a violation of safety standards, and the unit term approves the inmate's return to UNICOR, and SOI shall place that inmate within the top ten percent of the UNICOR waiting list.

(2) Likewise, for up to the first 30 days when an inmate is in Administrative Detention, that inmate may retain UNICOR pay grade status, with actual pay suspended, and will be able to return to UNICOR, provided the inmate is not found to have committed a prohibited act. If Administrative Detention lasts longer than 30 days, and the inmate is not found to have committed a prohibited act, and the unit team approves the inmate'r return to UNICOR, the SOI shall place that inmate within the top ten percent of the UNICOR waiting list.

(3) An inmate in Administrative Detention, and found to have committed a prohibited act, may return to UNICOR work status at the discretion of the SOI.

(4) If an inmate is injured and absent from the job because of a violation of UNICOR safety standards, the SOI may reassign the inmate within UNICOR or recommend that the unit team reassign the inmate to a non-UNICOR work assignment.

(5) If an inmate is transferred from one institution to another for administrative (not disciplinary) reasons, and the unit team approves the inmate's return to UNICOR, the SOI shall place that inmate within the top ten percent of the UNICOR waiting list.

(b) *Longevity and vacation credit.* Ordinarily, when an inmate's UNICOR employment is interrupted, the inmate loses all accumulated longevity and vacation credit with the following exceptions:

(1) The inmate retains longevity and vacation credit when placed in medical idle status, provided the medical idle is not because of a UNICOR work-related injury resulting from the inmate's violation of safety standards. If the medical idle results from a UNICOR work-related injury where the inmate was not at fault, the inmate also continues to earn longevity and vacation credit.

(2) Likewise, the inmate retains, and continues earning for up to 30 days, longevity and vacation credit if placed in Administrative Detention, provided the inmate is not found to have committed a prohibited act.

(3) The inmate retains, but does not continue earning, longevity and vacation credit when transferring from one institution to another for administrative (not disciplinary) reasons, when absent from the institution on writ, or when placed in administrative detention and found to have committed a prohibited act.

(c) *Pay grade retention.* Ordinarily, when an inmate's UNICOR employment is interrupted, that inmate is not entitled to retain his or her pay grade.

(1) An inmate retains pay grade status, with actual pay suspended, for up to 30 days in Administrative Detention. The inmate, if not found to have committed a prohibited act, is reimbursed for the time spent in detention. If found to have committed a prohibited act, the pay grade is retained, but the actual pay is not granted for the time in Administrative Detention.

(2) Likewise, an inmate retains pay grade status for up to 30 days while absent from the institution on writ, with

actual pay suspended. The SOI may approve pay grade retention when an inmate is on writ for longer than 30 days on a case-by-case basis.

(3) If an inmate is absent because of a UNICOR work-related injury where the inmate was not at fault, the inmate retains his or her pay grade, with actual pay suspended.

Subpart F—Awards

§ 345.70 Awards program—general.

FPI provides incentive awards of various types to inmate workers for special achievements in their work, scholarship, suggestions, and for inventions which improve industry processes or safety, or which conserve energy or materials consumed in FPI operations, and for outstanding levels of self-development.

§ 345.71 Official commendations.

An inmate worker may receive an official written commendation for any suggestion or invention adopted by FPI, or for any special achievement, as determined by the SOI, related to the inmate's industrial work assignment. A copy of the commendation is to be placed in the inmate's central file.

§ 345.72 Cash bonus or cash award.

An inmate worker may receive a cash bonus or cash award for any suggestion or invention which is adopted by FPI and produces a net savings to FPI of at least $250.00. Cash awards shall be one percent of the net estimated savings during the first year, with the minimum award being $25.00, and the maximum award being $1,000.00.

§ 345.73 Procedures for granting awards for suggestions or inventions.

Inmate suggestions for improvements in operations or safety, or for conservation of energy or material, must be submitted in writing.

(a) The inmate's immediate supervisor shall review the suggestion and forward it with comments and award recommendation to the SOI.

(b) The SOI shall ensure that all inmate suggestions and/or inventions formally submitted are considered for incentive awards by a committee comprised of Industries personnel designated by the SOI.

(1) The committee is authorized to award a cash award of up to $100.00 or an equivalent gift not to exceed $100.00 in value to an inmate whose suggestion has been adopted. A recommendation for an award in excess of $100.00 shall be forwarded to the Assistant Director, FPI, for a final decision.

(2) The committee shall forward all recommendations for awards for inventions through the SOI to the Warden. The Warden may choose to add his or her comments before forwarding to the Assistant Director, FPI, for a final decision.

(3) Incentive awards are the exclusive methods for recognizing inmates for suggestions or inventions.

§ 345.74 Awards for special achievements for inmate workers.

While recognition of inmate worker special achievements may originate from any FPI staff member, the achievement ordinarily will be submitted in writing by the inmate's immediate supervisor.

(a) The SOI shall appoint a local institution committee to consider inmates for special achievement awards.

(b) The committee shall forward its recommendations to the SOI who is authorized to approve individual awards (cash or gifts) not to exceed $100 in value. A recommendation for an award in excess of $100 (cash or gifts) shall be forwarded, with the Superintendent's recommendation and the justification for it, through the Warden to the Assistant Director, FPI. The Warden may submit comments on the recommendation.

Subpart G—Training and Scholarship Programs

§ 345.80 FPI inmate training and scholarship programs.

As earnings permit, FPI provides appropriate training for inmates which is directly related to the inmate worker's job assignment. Additionally, FPI administers a scholarship program to provide inmates with an opportunity to begin, or to continue with business and industry courses or vocational training.

(a) An applicant for FPI-funded training program should be evaluated to determine sufficient interest and preparation to successfully complete the course content. The evaluation may be done by the Education Department, Unit Team, or other qualified personnel.

(b) An inmate selected to participate in FPI-funded training programs ordinarily must have enough sentence time remaining to serve to complete the training.

§ 345.81 Pre-industrial training.

FPI encourages the development and use of pre-industrial training programs. Such training ordinarily provides benefits to the inmate and to the factory. Pre-industrial training also provides an additional management tool for replacing inmate idleness with constructive activity. Accordingly, each factory location may provide a pre-industrial training program.

(a) Pre-industrial program trainees shall ordinarily begin at the entry level pay grade (grade 5). Positions for pre-industrial training programs are filled in the same manner as other grade five positions.

(b) Pre-industrial training is not a prerequisite for work placement if the inmate already possesses the needed skill.

(c) If pre-industrial training is available and the worker has not completed both the skill training and orientation phases of pre-industrial training, the inmate should be put into the first available training class.

(d) When pre-industrial training is not available, new FPI assignees will receive on-the-job training in pre-industrial pay status for a period of at least 30 days before being promoted into available fourth grade jobs.

§ 345.82 Apprenticeship training.

FPI provides inmate workers with an opportunity to participate in apprenticeship training programs to the extent practicable. Such programs help prepare workers for post-release employment in a variety of trades. Apprentices are given related trades classroom instruction in addition to the skill training during work hours, where necessary.

§ 345.83 Job safety training.

FPI provides inmates with regular job safety training which is developed and scheduled in coordination with the institution Safety Manager. Participation in the training shall be documented in a safety training record signed by the inmate.

§ 345.84 The FPI scholarship fund.

FPI shall award post-secondary school scholarships to selected, qualified inmate workers. These scholarships provide an inmate with the opportunity to begin or continue with business and industry courses or vocational training as approved and deemed appropriate by the Supervisor of Education.

(a) *Eligibility Requirements.* The SOI and the Supervisor of Education at each institution shall develop application procedures to include, at a minimum, the following criteria:

(1) The inmate shall be a full-time FPI worker.

(2) The inmate has a favorable recommendation for participation from his or her work supervisor.

(3) The inmate meets all relevant institution requirements for participation (e.g. disciplinary record, custody level, etc.).

(4) The inmate is accepted by the institution of higher learning offering

the course or program which is requested.

(5) The inmate must maintain a verifiable average of "C" or better to continue program eligibility.

(6) Before beginning the course of study, the inmate must sign an agreement to provide the SOI with an unaltered, original copy of his or her grades.

(b) *Scholarship Selection Procedures.* FPI scholarship awards shall be made by a three member Selection Committee comprised of the SOI, the Supervisor of Education, and one other person designated by the SOI.

(c) *Scholarship Program Operation.*

(1) Ordinarily, one scholarship may be awarded per school period for every fifty workers assigned. At least one scholarship may be awarded at each institution location, regardless of the number of inmates assigned.

(2) Individual scholarships ordinarily should not exceed the cost of tuition and books for one course. Where several courses may be taken for the same cost as one, the inmate worker may be allowed to take more than one course.

(3) Scholarship monies are to be paid only to the institution providing instruction, or to the Education Department for transfer of funds to the college, university, or technical institution providing instruction.

(4) An inmate may not receive more than one scholarship per school period.

(5) An inmate must maintain at least a "C" average to be continued as eligible for further assistance. An inmate earning less than "C" must wait one school period of eligibility before reapplying for further assistance. Where a course grade is based on a "pass/fail" system, the course must be "passed" to be eligible for further assistance.

(6) An inmate awarded a correspondence course must successfully complete the course during a school year (e.g., 2 semesters, 3 quarters).

(7) An inmate receiving scholarship aid must have approval from the SOI and the Supervisor of Education before withdrawing from classes for good reason. An inmate withdrawing or "dropping" courses without permission shall wait one school year before applying for further scholarship assistance. An inmate may withdraw from courses without penalty for medical or non-disciplinary administrative reasons such as transfer, writ, release, etc., without first securing permission, although withdrawals for medical reasons must be certified in writing by the Hospital Administrator.

SUBCHAPTER C—INSTITUTIONAL MANAGEMENT

PART 545—WORK AND COMPENSATION

2. The authority citation for 28 CFR part 545 continues to read as follows:

Authority: 5 U.S.C. 301; 18 U.S.C. 3013, 3571, 3621, 3622, 3624, 3663, 4001, 4042, 4081, 4082 (Repealed in part as to offenses committed on or after November 1, 1987), 4126, 5006–5024 (Repealed October 12, 1984 as to offenses committed after that date), 5039; 28 U.S.C. 509, 510; 28 CFR 0.95–0.99.

Subpart E—[Removed]

Subpart F—[Removed]

Subpart G—[Removed]

3. In 28 CFR part 545, subpart E, consisting of §§ 545.40 through 545.43, subpart F, consisting of §§ 545.50 through 545.56, and subpart G, consisting of §§ 545.60 through 545.64, are removed.

Environmental Protection Agency

Cancellation of Pesticides for Non-Payment of 1992 Registration Maintenance Fees; Notice

ENVIRONMENTAL PROTECTION AGENCY

[OPP–64014; FRL 4166–6]

Cancellation of Pesticides for Non-Payment of 1992 Registration Maintenance Fees

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The October, 1988 amendments to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) imposed a new requirement for payment of an annual maintenance fee to keep pesticide registrations in effect. The fee due last January 15 has gone unpaid for about 2,375 registrations. Section 4(i)(5)(D) of FIFRA provides that the Administrator may cancel these registrations by order and without a hearing; orders to cancel all but a few of them have been issued within the past few days. The Agency is deferring cancellation for certain of these registrations, however, to permit time for affected users to explore alternatives to cancellation directly with the registrants.

DATES: Reports of agreements to support continued registration or transfer of the registrations for which cancellation is being deferred must be received by March 16, 1993.

FOR FURTHER INFORMATION CONTACT: To report agreements to support continued registration of any of the products for which cancellation has been deferred, or for further information on the maintenance fee program , contact by mail: John Jamula, Office of Pesticide Programs (H7504C), Environmental Protection Agency, 401 M Street SW, Washington, DC 20460. Office location and telephone number: Room 210, Crystal Mall No. 2, 1921 Jefferson Davis Highway South, Arlington, VA (703) 305–6426.

SUPPLEMENTARY INFORMATION:

Electronic Availability: This document is available as an electronic file on *The Federal Bulletin Board* at 9 a.m. the day of publication in the **Federal Register**. By modem dial 202–512–1387 or call 202–512–1530 for disks or paper copies. This file is available in Postscript, Wordperfect 5.1 and ASCII.

I. Introduction

Section 4(i)(5) of FIFRA as amended, requires that all pesticide registrants pay an annual registration maintenance fee, due by January 15 of each year, to keep their registrations in effect. This requirement applies to all registrations, granted under section 3, as well as those granted under section 24(c) to meet special local needs. Registrations for which the fee is not paid are subject to cancellation by order and without a hearing.

The 1990 Farm Bill recently amended FIFRA to allow the Administrator to reduce or waive maintenance fees for minor agricultural use registrations when he determines that the fee would be likely to cause significant impact on the availability of the pesticide for the use. The Agency has identified 63 registrations that fall into this category, and is deferring their cancellation for 90 days. Section II contains a list of these registrations and their vulnerable minor uses, along with instructions for preventing their cancellation.

In late December, 1991, all holders of either section 3 registrations or section 24(c) registrations were sent lists of their active registrations, along with forms and instructions for responding. They were asked to identify which of their registrations they wished to maintain in effect, and to calculate and remit the appropriate maintenance fees. Most responses were received by the statutory deadline of January 15; a supplemental notice was sent in February, however, to registrants who had not responded after acknowledging receipt of the original notice. Late payments of the fees were accepted until April 15, when the process of cancellation was begun.

A few registrants who orginally requested cancellation of certain registrations later changed their minds, and contacted the Agency after April 15 seeking to pay the maintenance fee for these registrations. Since the cancellation process had already begun, the late fees were not accepted. These registrations have now been canceled, but the Agency may be able to provide expedited review of applications for replacement registrations received from these companies. Registrants who believe that they may qualify for this expedited review should call the toll-free maintenance fee information line at 1–800–755–2424 for further information.

Since mailing the notices, EPA has maintained a toll-free inquiry number through which the questions of affected registrants have been answered.

Maintenance fees have been paid for about 17,800 section 3 registrations, or about 90 percent of the registrations on file in December. Fees have been paid for about 2,500 section 24(c) registrations, or about 84 percent of the total on file in December. Cancellations for non-payment of the maintenance fee affect about 1,920 section 3 registrations and about 450 section 24(c) registrations.

II. Product Cancellations not Affecting Status of Active Ingredient

Our analyses indicate that a significant number of these cancellations are simple housekeeping transactions, unlikely to affect pesticide markets or users. For example, more than three quarters of the Section 3 registrations for which no fee was paid are no longer in production, and their disappearance from the market will cause no adverse impact.

Although comparable production data are not available for the canceled 24(c) registrations, the Agency believes most of them are similarly obsolete. Over 72 percent of them were originally issued before 1987—most of them for a finite term which has long since expired. A large proportion have also been made obsolete by subsequent Section 3 registrations for the same uses.

The remaining cancellations, 450 section 3 registrations and 127 section 24(c) registrations issued in the past 5 years, have been the principal focus of our further impact analyses. We anticipate two types of impact for the bulk of these cancellations. First, some of these disappearing registrations will be survived in the market by substantially identical registrations. These substantially identical products may not, however, be readily available wherever a disappearing product was sold, so there may be local or regional disruptions while distribution patterns are adjusted. We expect these disruptions to be minor and temporary. The cancellation orders generally permit registrants to continue to sell and distribute existing stocks of the canceled products until the due date for the next annual registration maintenance fee, January 15, 1993. Existing stocks already in the hands of dealers or users, however, can generally be distributed, sold or used legally until they are exhausted. Existing stocks are defined as those stocks of a registered pesticide product which are currently in the U.S. and which have been packaged, labeled and released for shipment prior to the effective date of the cancellation action.

The exceptions to these general rules are cases where more stringent restrictions on sale, distribution, or use of the products have already been imposed, through Special Reviews or other Agency actions. These general provisions for disposition of stocks should serve in most cases to cushion the impact of these cancellations while the market adjusts.

Second, in some cases unique non-agricultural uses will disappear, although the active ingredients will remain available for different uses in

other products. When this situation occurs, there may be more serious impacts on users of the canceled products. Once again, existing stocks of the canceled products already in channels of trade will be usable to mitigate these impacts in the short term. For the longer term the mechanisms of Section 3 amendments and 24(c) registrations will remain available to obtain replacement registrations.

Neither of these types of impact leaves users without the means to replace lost registrations; neither is considered to justify further deferral of cancellations for non-payment of the maintenance fee. Thus all these registrations for which the active ingredient will remain in other products have been canceled.

III. Cancellations Leading to Disappearance of Minor Agricultural Uses

A third type of impact arises in cases where unique agricultural uses would disappear. The 1990 Farm Bill amended FIFRA to allow the Administrator to reduce or waive maintenance fees for minor agricultural uses when he determines that the fee would be likely to cause significant impact on the availability of the pesticide for the use. The Agency has identified 63 registrations in this category, and will defer cancellation of these registrations for 90 days to permit affected users to explore alternatives to cancellation. If within 90 days of publication of this notice the Agency is notified in writing by the current registrant at the address given above either (1) that the registrant will continue to support the registration, or (2) that an agreement has been reached to transfer the registration to another party, we will waive the 1992 maintenance fee and retain the registration in full active status. It should be emphasized, however, that any such registration would still be subject to all requirements for reregistration, including reregistration fees (except as they may be reduced through the statutory provisions for small business or low volume uses).

The 63 registrations containing a disappearing minor agricultural use are grouped by active ingredient in the following Table 1:

We encourage individual users or user groups who are concerned about the potential loss of these active ingredients to work directly with registrants identified by the first 6 digits of the Reg No. in Table 1 to persuade them to continue to support the ingredient, or to identify third parties who would be willing to support the ingredient if the registrations were transferred to them. Their full names and address appear in Table 3 below.

IV. Cancellations Leading to Disappearance of Active Ingredients

A final type of impact arises if an active ingredient that is now or recently has been available in the marketplace disappears. The Agency has identified 25 registered active ingredients that fall into this category; i.e., they have been produced in the past 3 years and the maintenance fee has not been paid for any product containing them. Twenty-three of these 25 ingredients have not been supported for reregistration; impacts of their disappearance will not be reconsidered here.

After deleting these 23 from the list of 25, 2 disappearing active ingredients remain. None subject to prior regulatory action, and all are likely to disappear as a consequence of these cancellations. The two active ingredients affected are formulated in a single product used for aquatic weed control.

These 2 ingredients, along with the EPA registration number and product name of the product in which they occur, are listed in the following Table 2:

TABLE 2.—ACTIVE INGREDIENTS WITH RECENT PRODUCTION PENDING CANCELLATION OF ALL PRODUCTS FOR NON-PAYMENT OF 1992 REGISTRATION MAINTENANCE FEES

Chemical Name	Registration No.	Product Name
Calcium Sulfate	033436–00001	Clean-Flo Lake Cleanser
Aluminum Sulfate	033436–00001	Clean-Flo Lake Cleanser

Because these active ingredients are at risk to disappearance, the Agency has deferred cancellation of this registration for 90 days. During that time the registrant or other affected persons may make arrangements to continue the registration.

If the last Section 3 registration for an ingredient disappears, the Section 24(c) registration process is unlikely to be able to compensate for the loss. Thus EPA is temporarily deferring cancellation of this product to allow adversely affected users to pursue alternatives to cancellation.

We encourage individual users or user groups who are concerned about the potential loss of these active ingredients to work directly with the registrant identified by the first 6 digits of the Reg No. in Table 2 to persuade them to continue to support the ingredient or to identify third parties who would be willing to support the ingredient if the registration were transferred to them. Their full names and addresses appear in Table 3 below. We also encourage users to consult with the Cooperative Extension Service or other local sources

to identify alternatives to these active ingredients.

If within 90 days of publication of this notice the Agency is notified in writing by the current registrant at the address listed in Table 3 below either (1) that the registrant will continue to support the registration, or (2) that an agreement has been reached to transfer the registration to another party, we will retain the registration in full active status as soon as the delinquent maintenance fee payment is received. It should be emphasized, however, that any such registration would still be subject to all requirements for reregistration, including reregistration fees (except as they may be reduced through the statutory provisions for small businesses or low volume uses).

In addition to publishing this notice in the **Federal Register**, we are sending it directly to the States, to the U.S. Department of Agriculture, and to other parties who have previously expressed concern for minor uses. They should be receiving the notice at approximately the same time it is published. We hope that this extraordinary notification effort, and the deferral of cancellations for the most sensitive registrations, will serve to prevent any avoidable loss of critical minor use pesticides.

Because so many registrations are involved, it would be impractical to list them all in this notice. Complete lists of registrations canceled for non-payment of the maintenance fee will, however, be available for reference during normal business hours in the OPP Public Docket, room 1128, Crystal Mall #2, 1921 Jefferson Davis Highway South, Arlington VA, and at each EPA Regional Office. Product-specific status inquiries may be made by telephone by calling toll-free 1–800–444–7255.

Dated: November 30, 1992.

Linda J. Fisher,

Assistant Administrator for Prevention, Pesticides and Toxic Substances.

Environmental Protection Agency

Pesticide Reregistration; Outstanding Data Requirements for Certain Lists B and C Active Ingredients (Fifth Notice)

[OPP-34034; FRL-4168-6]

Pesticide Reregistration: Outstanding Data Requirements for Certain List B and C Active Ingredients (Fifth Notice).

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended in 1988 establishes a five-phase process for the reregistration of pesticide products containing active ingredients "contained in any pesticide first registered before November 1, 1984." During Phase 1 the Environmental Protection Agency (the Agency) divided the active ingredients subject to reregistration into four lists; Lists B, C and D were published in the Federal Register on May 25, 1989 (54 FR 22706); July 24, 1989 (54 FR 30846); and October 24, 1989 (54 FR 43388), respectively. FIFRA requires the Administrator during Phase 4 of reregistration to publish the outstanding data requirements identified for those active ingredients being supported for reregistration. The outstanding data requirements of 129 List B active ingredients were published by the Agency among four previous **Federal Register** Notices at 56 FR 6849, February 20, 1991; 56 FR 37610, August 7, 1991; 56 FR 54852, October 23, 1991, and 57 FR 9474, March 18, 1992. This fifth Notice continues the series of reporting the outstanding data requirements of one additional List B and 30 List C active ingredients. Remaining supported Lists B, C, and D active ingredients are on a later reregistration schedule and their unfulfilled data requirements will be published in future Notices.

FOR FURTHER INFORMATION CONTACT: By mail, Teung F. Chin, Special Review and Reregistration Division (H7508W), Office of Pesticides Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location, Crystal Station 1, 2800 Crystal Drive, Arlington, VA 22202. Telephone No. (703) 308-8589.

SUPPLEMENTARY INFORMATION:

Electronic Availability: This document is available as an electronic file on the *Federal Bulletin Board* at 9:00 a.m. on the date of publcation in the **Federal Register**. By modem dial (202) 512-1387 or call (202) 512-1530 for disks or paper copies. This file is also available in Postscript, Wordperfect and ASCII.

This Notice identifies, pursuant to FIFRA section 4(f)(1)(B), the outstanding data requirements needed for reregistration of certain of the active ingredients on Lists B and C. That section also calls for the separate issuance of Data Call-In notices to registrants to obtain information satisfying these data requirements. The Agency has recently issued such Data Call-In notices to the appropriate registrants.

This SUPPLEMENTARY INFORMATION is divided into four units. Unit I provides background information on pesticide reregistration. Unit II discusses the requirements of section 4(f)(1)(B). Unit III describes the process used by the Agency in identifying outstanding data requirements. It also contains a table of the outstanding data requirements for each active ingredient. Unit IV describes the Data Call-In notices that have been issued to obtain data to satisfy the data requirements identified in this Notice.

I. Background

Section 4 of FIFRA as amended in 1988 required the Agency to conduct pesticide reregistration of older pesticides in five phases. In Phase 1, the Agency published Lists A, B, C, and D of pesticide active ingredients subject to reregistration. For Lists B, C, and D in Phase 2, registrants seeking reregistration had to identify for the Agency any data requirements which registrants believe would apply to their active ingredients, and indicate the ones that they thought were now satisfied. For those that were not satisfied, registrants had to indicate how they would fulfill the remaining data requirements necessary for the reregistration of their products. In Phase 3, these registrants summarized and in some cases reformatted studies that they believed were adequate and that they had previously submitted to the Agency. In Phase 4, the Agency is directed to review the materials submitted by registrants in Phases 2 and 3, and to identify the outstanding data requirements that need to be fulfilled in order for the Agency to determine whether or not pesticides containing particular active ingredients are eligible for reregistration. The Agency is further directed to issue Data Call-In notices to obtain data to satisfy these outstanding requirements. Finally, in Phase 5, the Agency must review the data submitted by registrants; determine whether pesticides containing particular active ingredients are eligible for reregistration; obtain product-specific information needed to determine whether particular products should be reregistered; and make final determinations on whether such products should be reregistered. The final determination on reregistration is to be based on whether a pesticide meets the standards of FIFRA section 3(c)(5), which prescribes the standards for initial registration of pesticides. If the Administrator determines that a pesticide should not be reregistered, section 4 directs the Administrator to take appropriate regulatory action.

Pursuant to FIFRA section 4(c)(2)(B) the Agency published in the **Federal Register** on May 25, 1989, a list of 229 chemicals (in 149 review cases) constituting List B of reregistration. Similarly, on July 24, 1989, a list of 257 chemicals (in 150 review cases) constituting List C of reregistration was published in the Federal Register. The Agency then sent guidance on how to comply with Phase 2 of reregistration to all registrants of pesticides containing active ingredients on Lists B and C. Registrants were required to inform EPA of their intent to seek or not to seek reregistration, to identify data requirements they believe applied to the active ingredients in their products, to identify the data requirements for which they have already submitted adequate data, and to commit to replace missing or inadequate data concerning the List B active ingredients contained in their products.

To assist registrants in complying with Phase 3, the Agency issued on December 24, 1989 the FIFRA Accelerated Reregistration —Phase 3 Technical Guidance (EPA No. 540/09-90-078). This document provides detailed instructions on: (i) Summarizing studies, (ii) reformatting studies, (iii) identifying adverse information, and (iv) identifying previously submitted studies that may not fully satisfy current requirements. To meet the requirements for Phase 3, registrants were required to submit summaries of previously submitted studies that they wished to rely on for reregistration. Additionally, for studies submitted prior to January 1, 1982, registrants had to submit a reformatted version of the study, if data were for certain toxicological and residue chemistry guidelines. Registrants were to certify that the raw data for the previously submitted studies were either in their possession, or in the possession of the Agency, or were readily accessible elsewhere. Registrants were to identify and submit any data considered under section 6(a)(2) to show an adverse effect of the pesticide. Also, registrants were to identify any other information they considered to be supportive of registration. And registrants had to commit to fill any new data gaps identified by them.

In Phase 4, the Agency has been conducting a review of the adequacy of

the data submitted by registrants for active ingredients on Lists B and C during Phases 2 and 3 and in compliance with any Data Call-In notices previously issued under section 3(c)(2)(B) of FIFRA. The purpose of the Agency's review was to systematically identify all data requirements for active ingredients that, based on information available to the Agency at this time, are necessary for a determination of eligibility for reregistration. For many active ingredients, registrants may have already committed to meet some of those requirements but have not yet submitted the results of their studies to the Agency. Concurrently, to effect the submission of those data for which commitments have not yet been made, the Agency issued Data Call-In notices to affected registrants for the additional data required by the Agency. This Notice identifies the outstanding data requirements for 31 List B and C active ingredients. It includes any new data requirements identified that are the subject of Data Call-In notices being sent to affected registrants, as well as any other prior commitments of unfulfilled data requirements. Collection of this information is authorized under the Paperwork Reduction Act by the Office of Management and Budget under OMB Control No. 2070–0107.

II. Outstanding Data Requirements

Section 4 (f)(1)(B) of FIFRA requires the Agency to publish this Notice of outstanding data requirements for each active ingredient on Reregistration Lists B and C. The Agency has been conducting a review of the information provided on all List B and C submissions on record for data adequacy and completeness, and has identified in this followup Notice a partial list of those chemicals with outstanding data requirements. Section 2(ff) of FIFRA defines outstanding data requirements as "a requirement for any study, information, or data that is necessary to make a determination under section 3(c)(5) and which study, information, or data — (A) has not been submitted to the Administrator; or (B) if submitted to the Administrator, the Administrator has determined must be resubmitted because it is not valid, complete, or adequate to make a determination under section 3(c)(5) and the regulations and guidelines issued under such section."

For purposes of the **Federal Register** Notice, outstanding data requirements include all requirements identified by the Agency which have yet to be satisfied at the active ingredient level, before or pursuant to Phases 2, 3, and 4 of reregistration. If registrants committed during Phases 2 and 3 or pursuant to prior actions to submit data to fulfill certain data requirements, and the data have not yet been submitted, the Agency is identifying them as outstanding. Upon review of the completed studies submitted either in response to earlier Data Call-In notices or as part of the reregistration process, the Agency may need to call in some additional studies before a final determination on reregistration can be made.

As in the previous **Federal Register** Notices, the following Table 1 provides a complete listing of the Guideline Reference Numbers (GRN) and corresponding titles for the data requirements referred to in this Notice.

TABLE 1.—STUDY TITLES AND GUIDELINE REFERENCE NUMBERS OF REREGISTRATION DATA REQUIREMENTS

Guideline Reference No.	Test of Study
.....	
61–1	Product Identification and Disclosure of Ingredients[1]
61–2(a)	Description of Beginning Materials and Manufacturing Process[2]
61–2(b)	Discussion of Formation of Impurities[3]
62–1	Preliminary Analysis[4]
62–2	Certification of Limits[5]
62–3	Analytical Methods to Verify Certified Limits[6]
Physical and Chemical Characteristics[7].	
63–2	Color
63–3	Physical State
63–4	Odor
63–5	Melting Point
63–6	Boiling Point
63–7	Density, Bulk Density, or Specific Gravity
63–8	Solubility
63–9	Vapor Pressure
63–10	Dissociation Constant
63–11	Octanol/Water Partition Coefficient
63–12	pH
63–13	Stability
63–14	Oxidizing or Reducing Action
63–15	Flammability
63–16	Explodability
63–17	Storage Stability
63–18	Viscosity
63–19	Miscibility
63–20	Corrosion Characteristics
63–21	Dielectric Breakdown Voltage
64–1	Submittal of Samples
Wildlife and Aquatic Organisms Data Requirements[8].	
71–1(a)	Acute Avian Oral Toxicity (LD50) in Bobwhite Quail or Mallard Duck
71–1(b)	Acute Avian Oral Toxicity (LD50) in Bobwhite Quail or Mallard Duck (Using Typical End–Use Product)
71–2(a)	Acute Avian Dietary Toxicity (LC50) in Bobwhite Quail
71–2(b)	Acute Avian Dietary Toxicity (LC50) in Mallard Duck
71–3	Wild Mammal Toxicity Test
71–4(a)	Avian Reproductive Toxicity in Bobwhite Quail
71–4(b)	Avian Reproductive Toxicity in Mallard Duck
71–5(a)	Simulated Terrestrial Field Study
71–5(b)	Actual Terrestrial Field Study

TABLE 1.—STUDY TITLES AND GUIDELINE REFERENCE NUMBERS OF REREGISTRATION DATA REQUIREMENTS—Continued

Guideline Reference No.	Test of Study
72-1(a)	Fish Toxicity to Bluegill Sunfish
72-1(b)	Fish Toxicity to Bluegill Sunfish (Using Typical End-Use Product)
72-1(c)	Fish Toxicity to Rainbow Trout
72-1(d)	Fish Toxicity to Rainbow Trout (Using Typical End-Use Product)
72-2(a)	Invertebrate Toxicity Freshwater LC50 (*Daphnia* Preferred)
72-2(b)	Invertebrate Toxicity Freshwater LC50 (*Daphnia* Preferred-Using Typical End-Use Product)
72-3(a)	Toxicity to Estuarine and Marine Organisms (In Fish)
72-3(b)	Toxicity to Estuarine and Marine Organisms (In Molluska)
72-3(c)	Toxicity to Estuarine and Marine Organisms (In Shrimp)
72-3(d)	Toxicity to Estuarine and Marine Organisms (In Fish - Using Typical End-Use Product)
72-3(e)	Toxicity to Estuarine and Marine Organisms (In Molluska - Using Typical End-Use Product)
72-3(f)	Toxicity to Estuarine and Marine Organisms (In Shrimp - Using Typical End-Use Product)
72-4(a)	Early Life Stage in Fish
72-4(b)	Life Cycle in Aquatic Invertebrates (*Daphnia*/Mysid)
72-5	Fish Life Cycle Study
72-6	Aquatic Organism Accumulation Study
72-7(a)	Simulated Field Tests for Aquatic Organisms
72-7(b)	Actual Field Tests for Aquatic Organisms
Toxicology Data Requirements[9].	
81-1	Acute Oral Toxicity in the Rat
81-2	Acute Dermal Toxicity
81-3	Acute Inhalation Toxicity in the Rat
81-4	Primary Eye Irritation in the Rabbit
81-5	Primary Dermal Irritation
81-6	Dermal Sensitization
81-7	Acute Delayed Neurotoxicity in the Hen
82-1(a)	90-Day Feeding Study in the Rodent
82-1(b)	90-Day Feeding Study in the Non-Rodent
82-2	21-Day Dermal
82-3	90-Day Subchronic Dermal
82-4	90-Day Inhalation in Rat
82-5(a)	90-Day Neurotoxicity in Hen
82-5(b)	90-Day Neurotoxicity in the Mammal (Rat Preferred)
83-1(a)	Chronic Feeding Study in the Rodent
83-1(b)	Chronic Feeding Study in the Non-Rodent
83-2(a)	Oncogenicity Study in the Rat
83-2(b)	Oncogenicity Study in the Mouse
83-3(a)	Teratogenicity in the Rat
83-3(b)	Teratogenicity in the Rabbit
83-4	2-Generation Reproduction Study in the Rat
83-5	Chronic Feeding/Oncogenicity in the Rat
84-2(a)	Gene Mutation
84-2(b)	Structural Chromosome Aberration
84-4	Other Genotoxic Effects
85-1	General Metabolism
85-2	Dermal Penetration

[17] 40 CFR 158.440; Subdivision R, Pesticide Spray Drift Evaluation: NTIS PB84–169216.

For further information and descriptions regarding specific data requirements, criteria for testing, and general guidance on data acceptability, consult the FIFRA Accelerated Reregistration—Phase 3 Technical Guidance document (December 24, 1989), and the Pesticide Assessment Guidelines available from the National Technical Information Service (NTIS), Attn: Order Desk, 5285 Port Royal Road, Springfield, VA 22161 (Tel: 703-487-4650).

III. Partial Listing of List B and C Active Ingredients Outstanding Data Requirements

To fulfill its commitments in Phase 4 the Agency is publishing a series of **Federal Register** notices and issuing Data Call-In notices for groups of active ingredients as their outstanding data requirements are identified. The outstanding data requirements of 129 List B active ingredients were published by the Agency among four previous Federal Register Notices at 56 FR 6849, February 20, 1991; 56 FR 37610, August 7, 1991; 56 FR 54852, October 23, 1991; and 57 FR 9474, March 18, 1992. This fifth Notice lists the outstanding data requirements of 31 additional List B and C active ingredients. Remaining supported List B, C and D active ingredients are on a later reregistration schedule and their unfulfilled data requirements will be published in future Notices.

The following Table 2 contains one List B and 30 List C active ingredients and the status of the requirements at this time.

TABLE 2.—OUTSTANDING DATA REQUIREMENTS FOR LIST B AND C ACTIVE INGREDIENTS

Case No.[1]	Chemical No.	Chemical Name	Outstanding Data Requirements(By Guideline Reference No.)
2455	077401	Aminoethanol salt of 2'5-dichloro-4'-nitrosalicylanilide	61–1, 61–2(a), 61–2(b), 62–1, 62–2, 62–3, 63–2, 63–3, 63–4, 63–5, 63–7, 63–8, 63–9, 63–10, 63–11, 63–12, 63–13, 70–1(d)*, 71–1(a), 71–2(a), 71–2(b), 72–1(a), 72–1(b), 72–1(d), 72–2(b), 72–4(a), 72–4(b), 81–1, 81–2, 81–3, 81–4, 81–5, 81–6, 82–1(a), 82–1(b), 83–3(a), 84–4, 86–1, 123–2, 161–1, 161–2, 162–3, 162–4, 163–1, 164–2, 171–3, 171–4(a), 171–4(b), 171–4(c), 171–4(d), 171–4(e), 171–4(f), 171–4(g), 171–4(h), 171–4(i)
3023	107001	5-Hydroxymethoxymethyl-1-aza-3,7-dioxabicyclo[3.3.0]octane	61–1, 62–3, 81–3, 82–3, 161–1
3023	100702	5-Hydroxymethyl-1-aza-3,7-dioxabicyclo[3.3.0]octane	61–1, 62–3, 81–3, 82–3, 161–1
3023	100703	5-Hydroxypoly(methyleneoxy)methyl-1-aza-3,7-dioxabicyclo[3.3.0]octane	61–1, 62–3, 81–3, 82–3, 161–1
3030	035605	1,4-Bis(bromoacetoxy)-2-butene	61–1, 61–2(a), 61–2(b), 62–1, 62–2, 62–3, 63–2, 63–3, 63–4, 63–5 63–6, 63–7, 63–8, 63–9, 63–10, 63–11, 63–12, 63–13, 72–1(b), 72–1(c), 72–1(d), 72–2(a), 72–2(b), 72–3(a), 72–3(b), 72–3(c), 72–3(d), 72–3(e), 72–3(f), 72–4(a), 72–4(b), 83–3(a), 84–2(a), 84–2(b), 84–4, 160–5, 161–1, 161–2, 161–3, 162–1, 162–3, 163–1, 164–5, 171–2
3038	045502	1,1'-Hexamethylene bis(5-(*p*-chlorophenyl)biguanide), diacetate	61–1, 61–2(a), 61–2(b), 62–1, 62–2, 62–3, 63–2, 63–3, 63–4, 63–5, 63–6, 63–7, 63–8, 63–9, 63–10, 63–11, 63–12, 63–13, 81–1, 81–3, 160–5, 171–2, 171–3
3046	064208	4-Chloro-3-cresol	71–1(a), 71–2(a), 72–1(c), 72–2(a), 83–2(a)
3051	069152	Alkyl* amine hydrochloride *(as in fatty acids of coconut oil)	No outstanding data gaps
3052	123702	Methanol, [[(2-dihydro-5-methyl-3(2*H*)-oxazolyl)-1-methyl-ethoxy]methoxy]methoxy]-	No outstanding data gaps
3063	118901	* 2,3-Dihydro-5,6-dimethyl-1,4-dithiin-1,1,4,5-tetraoxide	81–1, 81–2, 81–3, 81–5, 83–2(a), 123–2, 162–1, 162–2, 162–3, 164–1, 165–1, 171–4(a), 171–4(b), 171–4(c), 171–4(d), 171–4(e), 171–4(j), 171–4(k), 171–4(l), 171–5, 201–1, 202–1
3064	001001	2,6-Dimethyl-*m*-dioxan-4-ol acetate	61–1, 62–1, 62–2, 62–3, 72–1(a), 72–1(c), 72–2(a), 72–3(a), 72–3(b), 72–3(c), 81–2, 82–3, 160–5, 161–1, 161–2, 162–3, 162–4, 163–1, 171–2

TABLE 2.—OUTSTANDING DATA REQUIREMENTS FOR LIST B AND C ACTIVE INGREDIENTS—Continued

Case No.[1]	Chemical No.	Chemical Name	Outstanding Data Requirements(By Guideline Reference No.)
3069	017901	1-(3-Chloroallyl)-3,5,7-triaza-1-azoniaadamantane chloride	61–1, 62–2, 71–1(a), 71–2(a), 71–2(b), 72–1(a), 72–1(c), 72–3(a), 72–3(b), 72–3(c), 72–4(a), 72–4(b), 161–1, 161–2, 161–3, 162–1, 162–3, 163–1, 165–4
3070	099001	2-((Hydroxymethyl)amino)ethanol	61–1, 62–1, 71–2(a), 72–1(c), 72–2(a), 84–4, 161–1
3076	102901	Potassium *N*-hyroxymethyl-*N*-methyldithiocarbamate	61–1, 61–2(a), 61–2(b), 62–1, 62–2, 62–3, 71–2(a), 72–1(a), 72–1(b), 72–1(c), 72–1(d), 72–2(a), 72–2(b), 72–3(a), 72–3(b), 72–3(c), 72–3(d), 72–3(e), 72–3(f), 72–4(a), 72–4(b), 81–1, 81–2, 81–3, 81–4, 81–5, 81–6, 82–3, 83–3(a), 84–2(a), 84–2(b), 84–4, 161–1, 161–2, 161–3, 162–1, 162–2, 162–3, 162–4, 163–1, 164–1, 164–2, 165–3, 165–4

3138	122302	Alpha-n-heptyl-butyrol tanol	61–1, 61–2(a), 61–2(b), 62–1, 62–2, 62–3, 63–2, 63–3, 63–4, 63–5, 63–6, 63–7, 63–8, 63–9, 63–10, 63–11, 63–12, 63–13, 160–5, 161–1, 162–1, 163–1
3147	082901	1,3,5-Triethylhexahydro-s-triazine	61–2(b), 72–2(a), 83–3(a), 83–3(b)

[1] List B case numbers begin with "2", List C case numbers start with "3."

KEY: * Special Studies; Guidelines for the following studies are presently being developed (for more information, contact the person named in the Notice):

70–1(d) Special Test Requirements.

81–8 Acute Neurotoxicity Screening–Rat.

82–7 90–Day Neurotoxicity Screening–Rat.

This list contains 31 currently supported List B and C active ingredients reviewed during Phase 4 of reregistration and notes any outstanding data requirements identified as Guideline Reference Numbers. In a number of instances, registrants have

already committed to satisfy many of these requirements, with the remaining requirements being subject to the recently issued Data Call-In notices. Of these, some may have been partially satisfied by studies that can be upgraded or supplemented with additional data. The data needs for specific crops are not presented here; instead the overall Guideline Reference Number is listed if any crop specific data are outstanding, even though some individual crop data requirements under it may be in fact satisfied.

IV. Phase 4 List B and C Data Call-In Notices

Under FIFRA section 3(c)(2)(B) the Agency has issued to affected registrants Phase 4 List B and C Data Call-In notices for the outstanding data requirements that registrants have not previously committed to satisfy for the active ingredients listed on Table 2 of this Notice. Registrants with unfilled data requirements for their active ingredients must respond to the Agency within 90 days of receipt of their Data Call-In Notice to express their intent to satisfy the remaining data requirements. The data requirements identified in the Data Call-In notices must be submitted within the time schedule specified in them. Additional Data Call-In notices for the remaining List B, C and D chemicals not covered by this followup Notice will be sent to the affected registrants, coinciding with the publication of one or more additional **Federal Register** notices in the next several months.

Dated: November 13, 1992.

Part VI

Office of Management and Budget

Cumulative Report on Rescissions and Deferrals; Notice

OFFICE OF MANAGEMENT AND BUDGET

Cumulative Report on Rescissions and Deferrals; December 1, 1992

This report is submitted in fulfillment of the requirement of section 1014(e) of the Congressional Budget and Impoundment Control Act of 1974 (Pub. L. 93–344). Section 1014(e) requires a monthly report listing all budget authority for this fiscal year for which, as of the first day of the month, a special message has been transmitted to Congress.

This report gives the status of seven deferrals contained in the First Special Message for FY 1993, which was transmitted to Congress on October 1, 1992.

Rescissions

As of the date of this report, no rescission proposals are pending before the Congress.

Deferrals (Attachments A and B)

Attachment A provides the status of the $930.9 million in budget authority being deferred from obligation as of December 1, 1992. Attachment B provides the status of each deferral reported during FY 1993.

Information from Special Message

The special message containing information on the deferrals that are covered by this cumulative report is printed in the **Federal Register** cited below:

57 FR 46730, Friday, October 9, 1992.

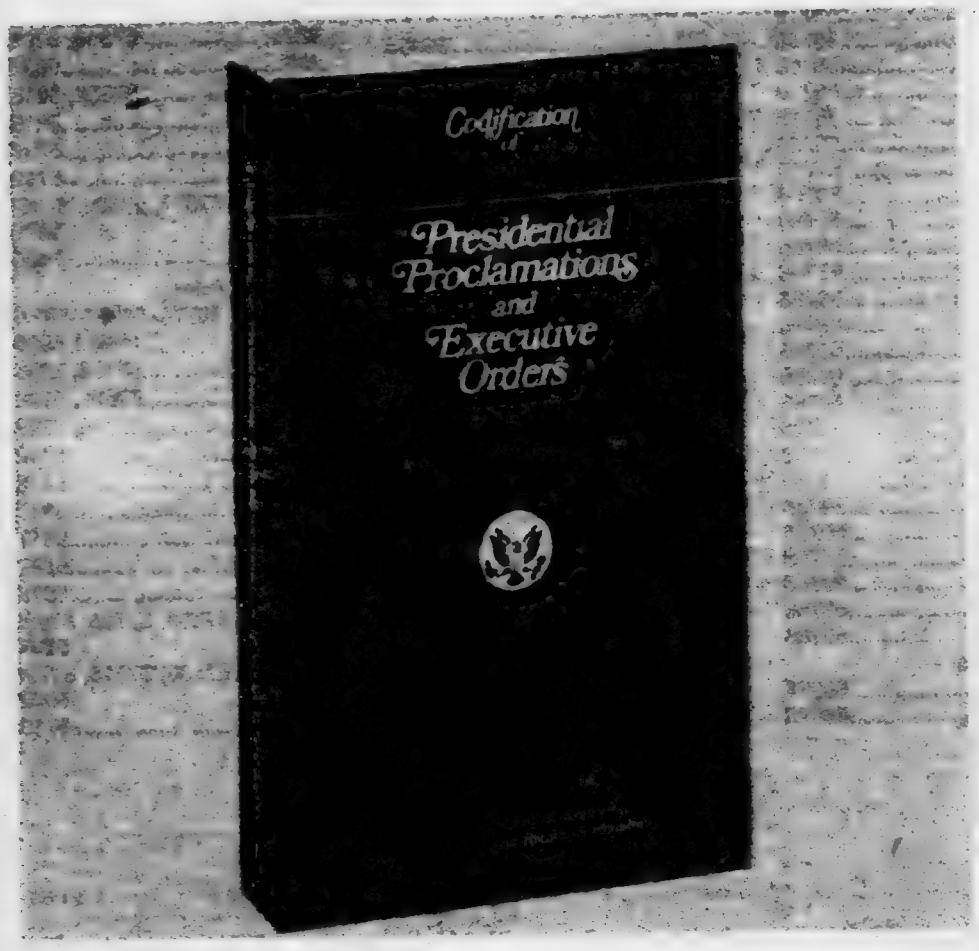
.... Order now ! . . . .



For those of you who must keep informed about **Presidential Proclamations and Executive Orders,** there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period April 13, 1945, through January 20, 1989, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1945–1989 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche format and magnetic tape. The annual subscription price for the **Federal Register** paper edition is $375, or $415 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $353; and magnetic tape is $37,500. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $4.50 for each issue, or $4.50 for each group of pages as actually bound; or $1.50 for each issue in microfiche form; or $175.00 per magnetic tape. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

Presidential Documents

Title 3—

The President

Notice of December 14, 1992

Continuation of Libyan Emergency

On January 7, 1986, by Executive Order No. 12543, President Reagan declared a national emergency to deal with the unusual and extraordinary threat to the national security and foreign policy of the United States constituted by the actions and policies of the Government of Libya. On January 8, 1986, by Executive Order No. 12544, the President took additional measures to block Libyan assets in the United States. The President has transmitted a notice continuing this emergency to the Congress and the **Federal Register** every year since 1986. On April 15, 1992, I barred authorization for aircraft to take off from, land in, or overfly the United States, if the aircraft, as part of the same flight or as a continuation of that flight, is destined to land in or has taken off from Libya. Because the Government of Libya has continued its actions and policies in support of international terrorism, the national emergency declared on January 7, 1986, and the measures adopted on January 7 and January 8, 1986, and April 15, 1992, to deal with that emergency, must continue in effect beyond January 7, 1993. Therefore, in accordance with section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), I am continuing the national emergency with respect to Libya.

This notice shall be published in the **Federal Register** and transmitted to the Congress.

George Bush

THE WHITE HOUSE,
December 14, 1992.

Rules and Regulations

Federal Register
Vol. 57, No. 243
Thursday, December 17, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

7 CFR Part 68

RIN 0580–AA18

Fees for Rice Inspection and Laboratory Test Services

AGENCY: Federal Grain Inspection Service,[1] USDA.

ACTION: Final rule.

SUMMARY: On April 17, 1991, the Federal Grain Inspection Service (FGIS) published an interim rule in the **Federal Register** (56 FR 15483). The interim rule implemented: (1) Fee increases for rice inspection and laboratory test services, (2) a unit fee per hundred weight (CWT) for all rice inspection services performed on lots, at rest, at export locations, (3) added several laboratory test services and consolidated others for clarity and efficiency, and (4) if needed, additional fee increases for rice inspection services on January 1, 1993, and January 1, 1995, respectively.

FGIS is adopting the interim rule without change. The Agency has also confirmed that the January 1, 1993, and January 1, 1995, rice inspection service fee increases contained in the interim rule are needed to cover operating costs including related supervisory and administrative costs.

DATES: January 19, 1993.

FOR FURTHER INFORMATION CONTACT: George Wollan, Federal Grain Inspection Service, USDA, Room 0624-South Building, P.O. Box 96454, Washington, DC 20090–6454; (202) 720–0292.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

This final rule has been issued in conformance with Executive Order 12291 and Departmental Regulation 1512–1. This action has been classified as nonmajor because it does not meet the criteria for a major regulation established in the Order.

Executive Order 12778

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. This action is not intended to have retroactive effect. This final rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule. There are no administrative procedures which must be exhausted prior to any judicial challenge to the provisions of this rule.

Regulatory Flexibility Act Certification

John C. Foltz, Administrator, FGIS, has determined that this final rule will not have a significant economic impact on a substantial number of small entities because most users of the inspection services do not meet the requirements for small entities as defined in the Regulatory Flexibility Act (5 U.S.C. 601 *et. seq.*).

Information Collection and Recordkeeping Requirements

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35), the information collection requirements contained in this rule being amended have been previously approved by the Office of Management and Budget under control number 0580–0013.

Background

On April 17, 1991, FGIS published in the **Federal Register** (56 FR 15483) an interim final rule that increased fees for rice inspection and laboratory test services. This interim rule was effective April 17, 1991, and provided for a comment period ending on May 17, 1991. No comments were received.

This final rule confirms the changes in laboratory services implementation on April 17, 1991 and confirms the need for the January 1, 1993, and January 1, 1995, increases in rice inspection fees as implemented in the interim final rule.

* * * *Changes in Laboratory Services*

FGIS in the interim rule added several new laboratory test services and consolidated others for clarity and efficiency. The new tests were required to accommodate frequent grain and food industry requests for these services. The additions are as follows: Alpha monoglycerides, Brix, Color test (syrups), Moisture average (crackers), Pesticide residue (carbon tetrachloride, methyl bromide & ethylene dibromide), Visual exam (hops pellet), Visual exam (pasta), and Water activity.

Additions to existing tests are as follows: To Bostwick (uncooked/cook test/dispersibility) from Bostwick (uncooked), to Popping ratio/value popcorn form Popping value (popcorn), and to Salt or sodium content from Salt content.

Deletions to existing tests are as follows: to Appearance & odor from Appearance, flavor and odor-oils, to Moisture & volatile matter from Moisture and Volatile matter-oil and shortening, to Potassium bromate from Potassium bromate-quantitative, and to Protein from Protein, Kjeldahl.

Consolidations of existing tests are as follows: To Calcium from Calcium (AOAC) and Calcium enrichment, and to Dough handling (baking) from Baking test-bread and Loaf volume.

Name changes are as follows: To Cold test (oil) from Clarity of oil involving heating, to Lovibond color from Color lovibond, to Moisture from Moisture-oven, to Performance test (prepared bakery mix) from Baking test-cake, to Sanitation-filth (light) from Filth-light, to Visual exam (insoluble impurities, oils & shortening) from Insoluble impurities-oil and shortening, to Visual exam (pasta) from Checked and broken macaroni units, to Visual exam (total foreign material other than cereal grains) from Foreign material-processed grain products, and to Wiley melting point from Melting point-wiley.

FGIS is also deleting several tests that are no longer requested. *Those tests being deleted are:* Acidity Greek, Acid value-oil, Arachidic acid, Baume, Coliform, Color-bleached, Color-gardner, Color-oil & shortening, Congeal point, Cooking test, Density, Dextrose equivalent, Diastatic activity of flour, Farinograph characteristics, Fat-acidity, Filth-heavy, Foam test, Foots-heated and/or chilled, Heating test-oil & shortening, Insoluble bromides, Lysine

[1] The authority to exercise the functions of the Secretary of Agriculture contained in the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621–1627), concerning inspection and standardization activities related to grain and similar commodities and products thereof has been delegated to the Administrator Federal Grain Inspection Service (7 U.S.C. 75a; 7 CFR 68.5).

from fortification, Lysine from hydrolysis of protein, Maltose value-flour, Marine oil in vegetable oil-qualitative, Moisture-distillation, Neutral oil loss, Nitrogen solubility, index, Oven leak test-oil can, Oil content-oilseed, Particle size-flour, Potassium bromate-qualitative, Purity-monosodium glutamate, Reducing sugars, Refractive index, Saponification number, Sedimentation, Softening point, Specific gravity-oils, Starch damage-flour, Sucrose, Test weight per bushel-other than grain, Viscosity, Water soluble protein, and Xanthydrol test for rodent urine.

Further, the Laboratory Report fee of $3.00 was deleted.

** * * January 1, 1993, and January 1, 1995, Increase in Fees for Rice Inspection Services*

The interim rule included fee increases that are to be effective January 1, 1993, and January 1, 1995, respectively. The rule also stated that FGIS would review its cost, revenue and operating reserve levels to assure that the fee increases scheduled for January 1, 1993 and 1995, respectively, were required at the levels specified to maintain quality rice inspection services upon request.

FGIS has reviewed its cost, revenue and operating reserve levels to assure that the fee increases scheduled for January 1, 1993, and 1995, respectively, are required at the levels specified and are sufficient to maintain quality rice inspection services upon request.

FGIS has determined that revenue of $2,870,010 for Fiscal Year 1992 did not cover operating costs of $3,346,899 resulting in a negative margin of $476,889. Although FGIS reduced its costs by $125,677 when compared to Fiscal Year 1991, revenue decreased by $177,239. Clearly, the increase is required. Therefore, FGIS believes that the fee schedule, for January 1, 1993 and 1995, respectively, is needed.

Accordingly, the interim ruling amending 7 CFR part 78 which was published at 56 FR 15483 on April 17, 1991, is adopted as a final rule without change.

List of Subjects in 7 CFR Part 68

Administrative practice and procedure, Agriculture commodities.

For the reasons set out in the preamble, 7 CFR part 68 has been revised as follows:

PART 68—REGULATIONS AND STANDARDS FOR INSPECTION AND CERTIFICATION OF CERTAIN AGRICULTURE COMMODITIES AND THEIR PRODUCTS

1. The authority citation for part 68 continues to read as follows:

Authority: Sec. 202–208, 60 Stat. 1087, as amended (7 U.S.C. 1621 *et seq.*).

2. Accordingly, the interim final rule revising sections 68.90 and 68.91 which was published on April 17, 1991 (56 FR 15483), is adopted as a final rule without change.

Dated: November 23, 1992.

David R. Galliart,

Acting Administrator.

[FR Doc. 92–30508 Filed 12–16–92; 8:45 am]

BILLING CODE 3410-EN-M

Agricultural Marketing Service

7 CFR Part 907

[Navel Orange Regulation 740, Amdt. 1]

Navel Oranges Grown in Arizona and Designated Part of California

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule amends Navel Orange Regulation 740 by increasing the quantity of California-Arizona navel oranges that may be shipped to domestic markets during the period from December 11 through December 17, 1992. Consistent with program objectives, such action is needed to establish and maintain orderly marketing conditions for fresh California-Arizona navel oranges for the specified week. This action was recommended by the Navel Orange Administrative Committee (Committee), which is responsible for local administration of the navel orange marketing order.

EFFECTIVE DATE: Regulation 740, Amendment 1, (7 CFR 907.1040) is effective for the period from December 11 through December 17, 1992.

FOR FURTHER INFORMATION CONTACT: Christian D. Nissen, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, room 2523–S, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 720–5127; or Robert Curry, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, 2202 Monterey Street, suite 102B, Fresno, California, 93721; telephone: (209) 487–5901.

SUPPLEMENTARY INFORMATION: This amendment is issued under Marketing Order No. 907 (7 CFR part 907), as amended, regulating the handling of navel oranges grown in Arizona and designated part of California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended, hereinafter referred to as the "Act."

This final rule has been reviewed by the Department of Agriculture (Department) in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. This action is not intended to have retroactive effect. This final rule will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after date of the entry of the ruling.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of the use of volume regulations on small entities as well as larger ones.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially

small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 130 handlers of California-Arizona navel oranges subject to regulation under the navel orange marketing order and approximately 4,000 navel orange producers in California and Arizona. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of handlers and producers of California-Arizona navel oranges may be classified as small entities.

The California-Arizona navel orange industry is characterized by a large number of growers located over a wide area. The production area is divided into four districts which span Arizona and part of California. The largest proportion of navel orange production is located in District 1, Central California, which represented about 85 percent of the total production in 1991–92. District 2 is located in the southern coastal area of California and represented about 13 percent of 1991–92 production; District 3 is the desert area of California and Arizona, and it represented slightly less than 2 percent; and District 4, which represented less than 1 percent, is northern California.

The Committee conducted a telephone vote on December 10, 1992, to consider the current and prospective conditions of supply and demand and recommended, with nine members voting in favor, one opposing, and one abstaining, an amendment to Navel Orange Regulation 740 to increase the total allotment for Districts 1 and 3 from 1,900,000 cartons to 2,100,000 cartons for the week ending on December 17, 1992.

A Committee member reported that there are substantially more request and bookings than were anticipated at the Committee's meeting on December 8. Several members commented that demand is very strong and that the market is holding firm. Two members expressed that the industry should take advantage of this increased demand. Thus, the majority of Committee members favored increasing the allotment for the week ending on December 17, 1992, by 200,000 cartons, while one Committee member favored open movement at this time.

The Department reviewed the Committee's recommendation in light of the Committee's projections as set forth in its 1992–93 marketing policy, the December 8 revised shipping schedule, information provided during the telephone vote, and as previously established in Naval Orange Regulation 740. The recommended amount of 2,100,000 cartons is 200,000 cartons above the amount specified in the Committee's revised shipping schedule. Of the 2,100,000 cartons, 94.7 percent or 1,989,000 cartons are allotted for District 1, and 5.3 percent or 111,000 cartons are allotted for District 3. Handlers in Districts 2 and 4 will not be regulated as they are not shipping a sufficient quantity of navel oranges to warrant volume regulation at this time.

During the week ending on December 3, 1992, shipments of navel oranges to fresh domestic markets, including Canada, totaled 1,547,000 cartons, compared with 1,595,000 cartons shipped during the week ending on December 5, 1991. Export shipments totaled 154,000 cartons, compared with 183,000 cartons shipped during the week ending on December 5, 1991. Processing and other uses accounted for 391,000 cartons, compared with 263,000 cartons shipped during the week ending on December 5, 1991.

Fresh domestic shipments to date this season total 7,932,000 cartons, compared with 4,333,000 cartons shipped by this time last season. Export shipments total 540,000 cartons, compared with 682,000 cartons shipped by this time last season. Processing and other use shipments total 2,542,000 cartons, compared with 909,000 cartons shipped by this time last season.

For the week ending December 3, regulated shipments of navel oranges to the fresh domestic market were 1,509,000 cartons on an adjusted allotment of 1,453,000 cartons, which resulted in net overshipments of about 56,000 cartons. Regulated general maturity shipments for the week (December 4 through December 10, 1992) are estimated at 1,800,000 cartons on an adjusted allotment of 1,671,000 cartons. Thus, overshipments of about 129,000 cartons could be carried forward into the week ending on December 17, 1992.

The average f.o.b. shipping point price for the week ending on December 3, 1992, was $7.42 per carton based on a reported sales volume of 1,099,000 cartons. The season average f.o.b. shipping point price to date is $8.14 per carton. The average f.o.b. shipping point price for the week ending on December 5, 1991, was $9.85 per carton; the season average f.o.b. shipping point price at this time last year was $10.70.

The Department's Market News Service reported that, as of December 10, demand for choice California-Arizona navel oranges exceeds available supplies, and demand is very good for all others. The market was reported as about steady. Most present shipments are from prior bookings.

According to the National Agricultural Statistics Service, the 1991–92 season average fresh equivalent on-tree price for California-Arizona navel oranges was $5.29 per carton, 71 percent of the season average parity equivalent price of $7.43 per carton. Based upon fresh utilization levels indicated by the Committee and an econometric model developed by the Department, the 1992–93 season average fresh on-tree price is estimated at $3.49 per carton, about 45 percent of the estimated fresh on-tree parity equivalent price of $7.83 per carton.

Increasing the quantity of navel oranges that may be shipped during the period from December 11 through December 17, 1992, would be consistent with the provisions of the marketing order by tending to establish and maintain, in the interest of producers and consumers, an orderly flow of navel oranges to market.

Based on considerations of supply and market conditions, and the evaluation of alternatives to the implementation of this volume regulation, the Administrator of the AMS has determined that this final rule will not have a significant economic impact on a substantial number of small entities and that this action will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is further found and determined that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register**. This is because there is insufficient time between the date of the final recommendation of the Committee based on the latest marketing information (December 10), and the effective date necessary to effectuate the declared policy of the Act.

This final rule amends Navel Orange Regulation 740 by increasing the total allotment for Districts 1 and 3 from 1,900,000 cartons to 2,100,000 cartons for the week ending on December 17, 1992. It is necessary, therefore, in order to effectuate the declared purposes of the Act, to make this regulatory provision effective as specified.

List of Subjects in 7 CFR Part 907

Marketing agreements, Oranges, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 907 is amended as follows:

PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

1. The authority citation for 7 CFR part 907 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 907.1040 is amended to read as follows:

Note: This section will not appear in the Code of Federal Regulations.

§ 907.1040 Navel Orange Regulation 740.

The quantity of navel oranges grown in California and Arizona which may be handled during the period from December 11 through December 17, 1992, is established as follows:

District 1	District 2	District 3	District 4	Total
Cartons/% (000)	Cartons/% (000)	Cartons/% (000)	Cartons/% (000)	Cartons (000)
1,989/94.7	Open	111/5.3	Open	2,100

Dated: December 14, 1992.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

Farmers Home Administration

7 CFR Parts 1930, 1944, 1951 and 1965

RIN 0575–AA60

Farm Labor Housing Loan and Grant Program, Loan Agreement and Income Eligibility for Domestic Farm Laborers

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) hereby amends its Farm Labor Housing Loan and Grant Regulations. This action changes the basic rules of the Labor Housing Regulations affecting present and future borrowers and current and future tenants, the FmHA field staff, and housing managers concerning unauthorized rents, income eligibility, occupancy of labor housing, delegation of authority, verification of income, and verification of income from farm labor. These changes are made as a result of public comments received from the proposed rule published October 1, 1990, and Agency agreements with the Inspector General and are determined to be in the best interest of labor housing borrowers and grantees, tenant farm workers and their families, and the government.

Also, included in this change is consideration of comments received from the proposed rule published April 13, 1989, concerning retired and disabled farm workers, the definition of eligible farm labor, and the occupancy of section 514/516 (Labor Housing) by section 515 (Rural Rental Housing) eligible tenants. The final rule published June 21, 1991, did not address the issue of "substantial portion of income." The comments received at that time concerning "substantial portion of income" were considered in this final rule which does make changes to the definition for "substantial portion of income".

EFFECTIVE DATE: January 19, 1993.

FOR FURTHER INFORMATION CONTACT: Tom Sanders, Senior Loan Officer, Special Authorities Branch, Multi-family Housing Processing Division, FmHA, USDA, Washington, DC 20250, Telephone (202) 720–1606 (This is not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information requirements contained in this regulation have been submitted to the Office of Management and Budget for an expedited twenty-one (21) day clearance under section 3504(h) of the Paperwork Reduction Act of 1980. Public reporting burden for this collection of information is estimated to vary from 5 minutes to 150 hours per response, with an average of 11 hours per response including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Department of Agriculture, Clearance Officer, OIRM, room 404-W, Washington, DC 20250; and to the Office of Management and Budget, Attention: Desk Officer for the Farmers Home Administration, Washington, DC 20503.

Classification

This action has been reviewed under USDA procedures established in Departmental Regulation 1512–1 which implements Executive Order 12291, and has been determined "Non major." It will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State or local governments, agencies, or geographic regions, or significant adverse effects on competition, employment investment, productivity, innovation, or on the ability of United States based enterprises to compete with foreign based enterprises in domestic or export markets.

Background/Discussion

On October 1, 1990, Farmers Home Administration published a proposed rule (55 FR 39982) to amend subpart D of part 1944, "Farm Labor Housing Loan and Grant Policies, Procedures and Authorizations," subpart C of part 1930, "Management and Supervision of Multiple Family Housing Borrowers and Grant Recipients." The proposed rule invited comments for 60 days ending November 30, 1990. The purpose of the revisions is to correct inequities in the regulations as identified by audit findings by the Office of Inspector General and agreed to by FmHA.

In order to correct inequities in the regulations, it was necessary to revise language in the definition of "substantial portion of income" and it was an opportunity to use the comments concerning farm worker "income" from the proposed rule published April 13, 1989 (54 FR 14822).

The intended effect of the revisions is to define the difference in tenant reporting between employer provided (farmer owned) housing and nonprofit sponsored housing. These revisions define the Agency's expectations of the farmer with no additional burden on reporting. Likewise, for nonprofit sponsors there is no increase in the public reporting burden. The changes simply clarify the Agency's position. The result of this rulemaking is to clearly state at loan and/or grant closing the reporting expectations of the government for housing financed and provided by the employer. Additional

management guidance on rents and rent structure for income ineligible farm workers is also provided.

Discussion of Comments

Nine letters were received commenting on the various aspects on the changes proposed in the October 1, 1990, proposed rule making. Eight letters were received within the comment period and one letter was received 5 days after closing of the comment period. The letters were generally supportive of the Agency's policies and direction. An overall fairness issue was raised by some respondents regarding the difference in treatment for income verification between farmworkers residing in farmer-owned housing and those in nonprofit-sponsored housing. For the reader's information, with the exception of the Labor Housing programs, FmHA program eligibility is primarily a function of income, which we require to be verified. However, eligibility for labor housing requires an additional verification—that the source of income is from farm labor.

In this final rule there is no requirement placed on the provider (the farmer) of on-farm housing to report and verify income of the farm worker. These loans are made to farmers because of a need for farm labor. Therefore, farm worker occupancy of on-farm housing is rent free and is associated with having to live on the farm.

A discussion of the major issues follows:

1. The Verification of Income Requirement Is Not Fair to Farm Workers Living "Off-Farm"

Three respondents stated we are creating a separate class of farmworker by not requiring from the farmer income verification reports on farm workers in their employment and receiving benefit of employer (farmer) provided housing.

All farmworkers, both on-farm and off-farm, must earn a substantial portion of income from eligible farm labor in order to benefit from this program. However, a difference exists in the area of income eligibility between the sections 514 loans and 516 grants in the Housing Act of 1949. Section 514 loans simply require that a substantial portion of income be earned from eligible farm labor. Section 516 requires additionally that the occupant meet low income eligibility requirements. When Rental Assistance (RA) is provided to supplement shelter costs of farmworkers, the RA is restricted to housing owned by nonprofit organizations and is further restricted to those farmworkers with very-low or low income.

With this rule, it is the Agency's portion to strengthen the farmer (employer) reporting requirements to the Agency. The farmworker is eligible to reside in an off-farm unit provided an employment contract exists between the farmer and the farmworker. The farmer is required to report their housing occupant. Since there is no rent being paid, nor any low or moderate income mandate for section 514 loans, income verification is not needed.

In contrast, nonprofit organizations must rent to any person attesting to being a low income farmworker. As a result, farmworkers residing in nonprofit sponsored labor housing must provide verification of both source and total amount of income for determining housing eligibility. This strict verification is necessary to comply with the statutory program requirements associated with direct rental subsidy to farmworkers for shelter costs.

2. Rent Procedures for Income Ineligible Farm Workers

Eight of the nine respondents had comments on various aspects of this issue.

One respondent indicated this change did not make the distinction clear enough between on-farm and off-farm and the use of the rent procedures. We disagree; there are no distinctions to be made on rent procedures for farm workers. The FmHA must approve all rent changes for off-farm housing. This also applies to on-farm housing if rent is collected and includes on-farm units where there has previously been no rent charged. The rule now outlines the Agency's rent computation and disposition of rental income policies.

Two respondents objected to the Agency permitting above-moderate income farm laborers to occupy labor housing because there will be no incentive for project managers to market and seek income eligible farmworkers. These objections were based on a concurrent proposal to permit project managers, with FmHA approval, to retain rental income in excess of the basic rents for operating and maintenance purposes, and reserves. We agree it is inappropriate to permit the continued occupancy of above-moderate-income farm workers when there are income eligible farm workers on the waiting list for off-farm projects operating in accordance with § 1944.176(c)(6) of subpart D of part 1944. However, we do not agree that we should impose an absolute ban on all above-moderate-income residents. The modified rule should enhance the economic viability of the project by permitting occupancy by above moderate residents only when income eligible farmworkers are not available. We believe this position is more appropriate than an arbitrary rule that could create vacancies. Above-moderate-income farmworker households residing in off-farm housing projects may be required to move, with either a 7 or 30 day notice as the circumstances dictate in Exhibit B of subpart C of part 1930, if eligible farmworkers are approved for housing.

Four respondents supported the change for a higher shelter cost of up to 30 percent of household income or a market oriented rent. The proposed rule allowed for charging "* * * the lesser of the required shelter cost contribution set out in paragraph II [RR] or the prevailing rental rates for the area, * * *" However, the comments also cautioned that we should provide a formula for the computation of the rent rather than leave it up to the field staff to determine the prevailing rental rates for the area.

We agree that added guidance is needed. The Agency has adopted the recommendations to provide a formula and revised the rule to require excess to rents to be applied to the borrower's loan account.

3. Substantial Portion of Income

Three respondents commented on this definition. Two pertained to editorial consistency concerning the use of the terms "farm worker income" or "household income" or "adjusted annual income" and confusion between "certification of farm work" and "verification of income from farm work." We resolved the concerns by using "adjusted annual income" and "verification of income from farm work" throughout.

Only one respondent to this proposed rule recommended that we raise the substantial portion of income limits that are shown in Exhibit J of subpart D of part 1944. Exhibit J is a reference exhibit used in the definition for substantial portion of income. We combined this comment with those on "substantial portion of income" from the proposed rule published April 13, 1989 (54 FR 14822).

The two positions being taken are:

1. The percentages used to set a floor for minimum farm work income necessary for housing eligibility discriminates against the local seasonal and year round farmworker. (For the reader's information, the dollar minimum income to be earned varies by region. The threshold for housing eligibility for migrant farmworkers is

that at least 50 percent of their annual income must be from farm work. The threshold for local seasonal and year round farmworkers is 65 percent.), or;

2. The income limits set out in Exhibit J of this subpart are "too low" or "too high". The "too high" comment is from agricultural areas that have experienced a decline in farm work due to weather related disaster.

The "too low" comment is from agricultural areas where a high wage is earned and the minimum dollar amount can be earned in a short time. In this circumstance the farmworker has been known to switch to less strenuous work, while remaining within our income limits, and retaining housing eligibility.

While these comments reflect a concern for housing of the farmworker and housing management concerns of the respondents, they reflect anecdotal information relating to specific cases. To make a change based on anecdotal information, without thorough review and analysis of farmworkers income by state and region, and a public comment period would do more harm than good. The current definition of "substantial portion of income" used in conjunction with Exhibit J is a method that works and there is other administrative authority in Agency procedures to accommodate most situations that arise affecting a farmworker's housing eligibility.

Accordingly, we do not believe there is sufficient justification to warrant a change to the "substantial portion of income" definition or Exhibit J at this time.

3. Loan Agreement (LH Insured Loan to Farm Borrowers To Provide Housing for the Farm Borrower's Farming Operations)

There were three responses to the use of this new agreement. One respondent questioned the use of the term "certification" in lieu of verification of income from farm work. One respondent favored the use of the loan agreement. One respondent recommended we revise the loan agreement to require the same reporting of income for on-farm tenants as required for off-farm tenants. While we have adopted the editorial recommendations concerning the verification of income from farm work, the recommendation concerning the inclusion of reporting income in the loan agreement has not been adopted. It would be inconsistent with our previously stated position concerning the reporting of farmworker income by the farm borrower.

During the drafting of this final rule and review of the Loan Agreement, several other points were raised. One concerned the permissive approach for fees charged (Paragraph B item 2 of the proposed loan agreement) by the farmer for damage deposits or cleaning fees without the Agency's prior approval. The exception language for damage deposits or cleaning fees was deleted from item 2 and added to item 3 as fees that require prior agency approval. It is the agency's experience in rental housing that the use of damage deposits and cleaning fees will give the tenants a sense of responsibility and well being for their housing.

While we have changed our position on damage deposits and cleaning fees within the loan agreement, we will not discourage the use of these fees when justified in the management of on-farm housing.

The second point raised was how to obtain third party verification of farm labor and rent free housing in circumstances where we are not verifying and reporting income. It was decided that FmHA will require farm borrowers to have the farmworker tenants sign a form verifying rent free housing as a condition of farm labor employment. As a result, we have designed a form (Exhibit K–1) that gives us tenant verification of rent free housing, verification of farm labor, and is the attachment to the farm borrower's annual report.

This form is to be completed for the borrower by the tenant when the tenant moves into the housing. The tenant will keep a copy, one copy will be mailed to the designated FmHA Office, and one copy will be retained by the borrower. The borrower will submit this form(s) each year with the annual report. If the housing is operated on a seasonal basis, then a form will be needed for each of the last occupants when the housing is closed for the season for the annual report.

Accordingly with the supplementary reporting requirement for occupancy, additional procedural changes were necessary to clarify the forms use and Agency policy. Two paragraphs (d) and (e) were added in this final rule to § 1944.154 Priorities for tenants' occupancy current procedure, that were not in the proposed rule.

However, we will expect the farmer to maintain a file for these verification(s) of current occupants for yearround housing or the last occupants for seasonally operated housing. The verification(s) should be available for FmHA inspection for all current occupants regardless of season. We do not expect the verifications to be retained by the farm borrower after the annual report nor do we expect verifications to be retained for interim seasonal occupancy.

The use of the new form for the Verification of Farm Labor and Occupancy of Rent Free Housing shall be effective with the publication of this final rule.

Another point raised was the status of the borrower's loan when the Agency approves rent for the farm borrower. It is the Agency's position that the original loan purpose and the loan agreement be maintained for the life of the loan. When there is a request to rent normally non-rental units, the original loan agreement will be left in place and maximum use will be made of Agency servicing authorities.

The final point raised was retroactive execution of this new loan agreement. It has been decided that we will require notification of all existing farm borrowers within 90 days of the effective date of this rule of the new documentation for Labor Housing loans and seek loan agreements where previously none existed. However, we must emphasize that the Agency is not placing any additional reporting requirements or costs on the farm borrowers, but we are documenting that they have been notified of the program's intent, purpose, and reporting requirements. It is not our intent to place uncooperative borrowers in default, but it is our intent to establish a basis for future servicing action if required.

Accordingly, special servicing procedures for retroactive loan agreements were developed and included in § 1944.181 Loan Servicing in subpart D of part 1944. The paragraph was revised into 3 sub-paragraphs and were not in the proposed rule.
